American Railroad Journal.

Saturday, April 28, 1866.

Stock Exchange and Money Market.

The financial condition of the country is evidently growing better every day. The receipts of the revenues from customs and direct duties are enormous, reaching the sum of five hundred millions and upwards per annum. There is no indication of any possible increase of the public debt; the proposed Mexican loan has received its quietus in Congress; and, on the whole, a laudable spirit of economy is observable at the seat of Government. Another danger is also passed—the impending difficulty with France is evidently overcome, and a foreign war is on this account entirely improbable. The President has communicated to Congress the diplomatic correspondence of our Secretary of State with the French Government, which appears to settle the question. The latter accepts the American views of the propriety of non-intervention on this continent, and has announced its intention of withdrawing its armies from Mexico in the course of a few months. The delay is explained as a climatic necessity; and is not so material since we are to carry our points, and maintain the influence and force of the Monroe doctrine. This arrangement will be highly satisfactory to the American people, and is very creditable to the diplomatic skill of Mr. SEWARD. There have been moments when a different policy on his part, even to the extreme of war measures, would have doubtless been popular; and it has required, on his part, great coolness, forbearance and good temper, to resist at the same time the aggressive conduct of the French Government, and the belligerent spirit of his own countrymen. Time, which in all Mr SEWARD'S theories is an important element, has on this occasion justified his calculations completely; and he has now the satisfaction of saving the country from an expensive war, bloodshed and an increasing National debt, while the honor, the rights, and the policy of the country have been fully vindicated and sustained. It is no more than due to Mr. SEWARD to award him the honor he has thus achieved in a contest with the ablest and most dangerous man of the old world at the present day.

We see, in connection with this gratifying result, that Congress, feeling the security of the resources of the Nation, and the certainty of an excess of revenue, is turning its attention to the subject of a reduction of taxation, and the relief of the people from such portions of their burdens as are found unnecessary and vexatious. It is to be hoped that they will be removed with as little delay as possible; since every tax which is uncalled for is an unjust pressure on the life of labor and industry.

The only other public danger to which the country is exposed is the violation of its neutrality with Great Britain through the conduct of a certain class of our excitable adopted citizens. It is now, however, pretty certain that our Government will permit no offences against international comity, and the proper military precautions have been accordingly taken at the points where the principal danger is apprehended. In addition to this, a remarkable and significant circumstance has come to light within a few days past; that at a public meeting of liberators and sympathizers in this city, in which the principal actor was present and made a speech, he declared that without more pecuniary aid forthwith, nothing could be expected from him and his associates. Now as it is understood that several millions of dollars have already been raised under former assurances, and nothing has come out of it, it is to be presumed that not enough more can be realized to produce any further actual results. We therefore consider the movement a failure and not likely in any way to lead us into a war, as was no doubt the expectation of many who were engaged in the project. This country has had enough of bloodshed and taxation to answer all political, moral and historical purposes for the next hundred years. We now want repose and reflection. We have yet to secure entire conciliation with the South, and to bring it back to its old relations of

unity and intercourse. This is as much as we can successfully accomplish without undertaking the protection of Mexico, or the freedom of Ireland. This country is for ourselves and must be looked after as our own home.

The historian Alison, in his history of modern Europe, says that at the conclusions of the continental wars, the arts and sciences with literature, made a prodigious advance in England, and that there was suddenly an unusual display of the talents of peace, which he accounts for by the assertion, that war having brought out the noblest and most heroic traits of the British character, gave the impulse on its cessation, to the exercise of the other great qualities of the mind, usually in correspondence with the heroic. If this theory be correct, and of universal truth, then we may cherish the hope, that our own time has come for grand developments, for new statesmanship, fresh literature, invention, and mental superiority. The late war developed the most profound patriotism on the part of our people, and witnessed the most touching self-sacrifices. If the same nobleness of spirit can be perpetuated in the walks of peace, the country will have been a gainer by its trials in this as in other things. We hope our future historian will have the opportunity of making a record as honorable as that left by Alison; and that of us, too, it may be said that out of the war we advanced to an unprecedented grandeur in peace.

The continual ease in the Money Market is everywhere perceptible. The rates are lower than ever—in many cases as low as 3 per cent.—and the abundance induces many persons to fear that we are on the eve of a return to disastrous speculation. But, it is noticeable that most schemes have but a short life with us, however plausible may be their inception. If the Americans go hastily into projects, they have an equal talent for getting quickly out of them. What has happened to the copper interests is now repeating itself in oil; not that there is not copper, nor oil, but that the projectors in most cases never expected to make anything out of either. The profits lay in the pockets of the credulous and unwary; these were the mines and these the wells really intended by the projectors. We therefore think the wholesome experience we have all learned in these matters is likely to prevent the recurrence of any particular mania in the speculative market in consequence of the superabundance of money. It seems impossible to get up any excitement in railway shares or securities; and this shows a disposition not to be led off into extravagant estimates of the values of even the best securities.

The report of the associated banks for the week ending April 21, shows the ease which prevails here in the Money Market. The loans had decreased $1,942,786, and the specie $1,539,666; but the deposits had increased by the sum of $3,655,109, and the legal tenders $3,092,318. The really weak point in the condition of these banks is in their specie reserves, of which on the 21st, they held but $9,495,403, when in the week previous they had $11,035,129.

It is very evident that the banks do not contemplate an early return to specie payments; and they no doubt part with their coin when they have a good opportunity. The action of Congress to prevent contraction is no doubt considered a guarantee against any immediate danger.

This business of lending gold is carried on with great success in this city by a class of operators. It is after this fashion: A house with $100,000 in gold lends it from day to day at a percentage, as large often as 1 per cent. a day, which calculated by the year will be found to be enormous usury. This interest is nevertheless allowed, though the gold is paid for by an actual deposit in greenbacks at the current rate, so that the gold broker not only gets a heavy interest on his gold, but he has greenbacks for it, and 25 per cent. more of margin, which he also lends out at the same time, reaping double profits on the same sum quite easily. Is it any wonder that we have a class of operators who wish to keep up the differences between paper and gold, as long as possible, and who dread the hour when a greenback will bring the specie dollar at par which it promises on its face. The truth is, all these disturbances in currency and in values are the real stock in trade of the men of the street; and we should never return to the precious metals, if that return depended upon their assent. We wonder why they do not transfer their operations to climes even more congenial. Thus in St. Domingo they might find to-day the paper money of the Government selling 7,000 of it for a single dollar in specie. Margin enough to gratify the greatest skill and cupidity. We came as near to this as $2.85 to $1; and most of us feared it would have been $3 to $1; but a kind Providence, and the valor of our troops, stopped the operation. We have been getting back to our normal and legal condition of money, but have been checked by the interference of Congress; and the fear is that we may, before we know it, find ourselves stepping backwards from the path we ought to take.

We have been greatly favored by the fact that the stock of cotton was much larger than was calculated, or even hoped. The two and a-half millions of bales which have come into the hands of commerce, have made all the difference to us in the world. This, of all our staples, was the only one which could, at all times, be counted on as certain of a market, and convertible at once into gold. Neither our grain nor our tobacco were of any account in comparison as to quantity or value. We have entirely turned the tables on the nations who take it from us, and with whom we traded. This is evident enough from the low rate at which exchange has ruled ever since the close of the war. It is under par and has been so; and the only wonder is that we have not had large importations of specie before this. Undoubtedly we should have had them if the importations of goods did not continue on a large scale on *foreign account*. It is the policy of the foreign manufacturers, both those of France and England, to keep large supplies of their fabrics in this port; our bonded warehouses are full of them; for here they are saleable at some price, and convertible into gold with great facility. We dispute the assertion recently made by a cotemporary, that "the indebtedness of our importers in Europe is large." It is not; the indebtedness is of the foreign houses and shippers to the manufacturer there. The American houses are not only not in debt abroad, but their credits and balances there are beyond their purchases. Of this we are fully assured; and the statement corresponds with the admissions of the best informed foreign financial journals. A question seems to trouble some of our cotemporaries which it may be worth while to notice. It is: whether we may not expect a return of our National securities from the continent to secure the higher quotations sometimes made here. Now we have contended, and still contend, that a rise here will in all cases produce a rise abroad. It has invariably done so; and the communication is now so rapid and certain that 12 days' time is enough to give any important information. We have found the Germans more disposed to buy than to sell hitherto. They have sent very little of their security to this country for re-sale; though they have several times made handsome profits out of the Londoners. They confidently expect to see the American bonds at par; and the temptation to hold them will be irresistible. It is true that our last advices show a small decline on the continent, but nothing in comparison, with that which has taken place in other securities. The higher the price goes in the United States, the higher it must go abroad. This we are confident will be the course of events. A Boston cotemporary makes the following remarks, that cotton has gone forward from this country to Europe, since the 1st of April at the rate of 9,000 bales per day, which, at $160 in gold per bale, are worth $1,440,000 per day's business. Our other exports on the average of the last four years are estimated by the same journal at least at $600,000 in gold. So that since the 1st of April the aggregate of these daily exports is $2,000,000 per day. On the other hand our imports are less than one million five hundred thousand dollars per day, while we do not consider that the amount of coin brought into this port by immigration alone is quite $140,000 per day. This view of the subject certainly puts a very pleasing aspect on the financial workings of our commercial system. The most alarming thing about our foreign trade is the fact that the prices of flour are so high in this country, that considerable quantities of the French article are now on their way to the United States and will pay a large profit if prices can be kept up. Notwithstanding the fall of gold we may expect to see this flour imported in large quantities. White wheat sold in this market on Tuesday last at $3 per bushel, a price which would permit its import from Liverpool with a clear profit of 50 cents per bushel. And yet we have permitted millions of bushels of wheat to rot in the storehouses in Chicago, because the price, high as it was, did not suit the speculative holders!

We regret to perceive that the disbursements for the army continue to be large. While those of the navy for the week ending April 21st were $1,204,606, those of the army were almost ten millions; and if this rate of expenditure is to continue we shall most certainly hear from the Treasury Department of the necessity for further loans. The expenditure is at the rate of nearly five hundred millions a year, a most unjustifiable one, and which calls loudly for an entire change in the policy of Congress. It cannot be that now in time of profound peace any such sum as five hundred millions are wanted for the army. Pacification and not war is now the part we have to perform. The sooner we get back to the old state of things, the States governing themselves, the better for the Treasury and the whole people.

Finally, amid the varieties of opinion now afloat

we notice an alarm in a quarter favorable to construction, and an early return to specie payments, which it is well enough to notice. A cotemporary says "the danger of another inflation and another period of fierce gambling in stocks and commodities is now imminent, and can only be arrested by the appearance of an efficient funding scheme." There certainly could not be a greater misfortune to the country than another inflation; but we rely much on the gradual decline of gold, which will have the effect to make the return to specie payments easy and certain. There is no danger from inflation if the paper of the country is forced to redemption, and this will follow if gold declines to par, or so nearly as to make the difference no great loss to the Banks in the operation. We believe that the business of the country is so enormous, that it will sustain a much larger currency than has been supposed. And while we admit it is at present greater than we need, yet we think we could carry it, if gold should get to par, and this would be our aim if we were at the head of the Treasury department.

The New York exports, exclusive of specie, for the week ending April 24, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,114,312	$6,255,521
Prev. reported	58,001,847	73,209,372
Since January 1	$60,116,159	$79,464,898

The New York imports compare as follows:

	1865.	1866.
Dry goods	$1,427,150	$2,337,947
Gen. merchandise	4,688,179	5,286,457
Total for the week	$6,115,329	$7,624,404
Prev. reported	37,649,915	93,115,153
Since January 1	$43,765,244	$100,739,557

The balance in the Sub-Treasury on Wednesday was $93,836,340 10.

Covington and Ohio Railroad.

The Commissioners appointed by the States of Virginia and West Virginia to bestow the Charter of the Covington and Ohio Railroad upon such parties as they may deem fit, will meet at the Eutaw House, Baltimore, on the 1st of May, to receive and pass upon such proposals for the construction of said railroad as may be presented by responsible parties. Over three millions of dollars have been expended already in grading this road.

The Commissioners have published a pamphlet, containing authentic information about this road, its grades and curvature, together with minute and trustworthy estimates what it will cost, and copies of all the laws which relate to it.

This pamphlet may be obtained at the office of Maury & Co., Washington; Sam'l Harris & Sons, Baltimore; Drexel & Co., Philadelphia; and Vermilye & Co., New York.

Gettysburg Railroad Company.

The directors of this company, at a late meeting resolved to put the road under contract from New Oxford to York, Pa., as soon as the line is located. The York *Press* says the supplement to the charter of the company authorizing the issue of preferred stock was accepted, and a resolution passed directing the issuing of 30,000 shares of preferred stock, ($1,500,000) to be guaranteed a dividend of six per cent. per annum out of the net earnings of the company, and after the payment of the six per cent. dividend then the balance of the net earnings, if any, to be divided *pro rata* between the common stockholders and preferred stockholders. Books were authorized to be opened at once for subscriptions to this preferred stock.

Railroad Earnings.---Weekly.

The earnings of the Western Union Railroad, for the week ending April 14, 1866.... $11,897 70
Corresponding week previous year.... 7,380 45

Increase.... $4,517 25

Receipts from Jan. 1, to April 14:
1866.... $138,388 42
1865.... 128,935 21

Increase.... $9,453 21

The traffic of the Great Western Railway of Canada, for the week ending April 20th, 1866, were.... $76,388 13
Corresponding week of 1865.... 72,507 79

Increase.... $3,880 34

The earnings of the Grand Trunk Railway of Canada for the week ending April 14th, 1866, were.... $144,438 00
Corresponding week of previous year.. 137,976 00

Increase.... $6,462 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in April, 1866.. $19,218 00
Corresponding week previous year.... 18,852 56

Increase.... $365 44

Commencing 1st Jan. 1866.... $299,562 00
Commencing 1st Jan. 1865.... 316,574 84

Decrease.... $17,012 84

The earnings of the Chicago and Great Eastern Railway for 2d week in April were.... $24,286 31
Same period last year.... 17,649 71

Increase in 1866.... $6,636 60

The earnings of the Michigan Central Railroad for the 2d week in April, 1866, were... $83,683 29
Corresponding week of previous year.. 79,650 31

Increase.... $4,032 98

The earnings of the Chicago and Northwestern Railway for the third week in April, 1866, were.... $124,783 53
Corresponding week of previous year. 99,790 33

Increase.... $24,993 20

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st two weeks in April, were:

	1865.	1866.
1st week....	$40,391 93	$39,688 36
2d week....	38,402 26	41,483 14
Total....	$78,794 19	$81,171 50

Rock River Improvement.

At a meeting of the Rock River Improvement committee at Chicago on the 10th inst., the Illinois delegates organized by appointing Joseph Utley, of Dixon, President; S. M. Church, of Rockford, Treasurer; T. J. Robinson, Rock Island, Secretary. The following resolution was adopted:

Resolved. That the President of the sub-committees from Wisconsin and Illinois, upon consultation, be empowered to call a joint meeting of said committees, for the purpose of selecting a consulting engineer, and doing such other business as may require the joint action of said committee.

☞ The Waterloo, (Iowa) *Courier* says that the Chicago and Northwestern Railway Co. has purchased the Cedar Valley and Minnesota Railroad, and that the grading from Cedar Rapids to Waterloo will be put under contract immediately. The Dubuque and Sioux City Railroad is completed to Iowa Falls.

☞ The Portland *Press* states that the managers of the Grand Trunk Railway have allowed the bonds of the Atlantic and St. Lawrence Railroad Company, due April 1, and which the Grand Trunk Company are bound to pay, to be protested, and that they have held no communication whatever with the Trustees of said bonds. The *Press* infers that the Grand Trunk Company wish to depreciate the value of the bonds, so that they can purchase them up at less than the face.

Public Debt of North Carolina.

We have received from Hon. Kemp P. Battle, Public Treasurer of North Carolina, a statement addressed to the General Assembly of North Carolina, showing the amount of liabilities of the State and the sets-off thereto. From this we learn that the amount of bonds issued prior to the act of secession, May 20, 1861, was $9,749,500, of which $364,000 are past due. The books of the Treasury do not show on what classes of bonds the coupons are due and unpaid, but the Treasurer estimates the whole amount past due, on ante-war bonds, in round numbers at $3,000,000. These added to the ante-war debt, will make $12,749,500; and if the internal improvement bonds issued during the war be added, the entire debt of the State—omitting all war debts for general purposes—will be $14,369,000, the annual interest on which is $862,170. The State has sets-off against this debt as follows:

Stock in North Carolina R. R. Co..		$3,000,000 00
Raleigh and Gaston R. R. Co....		682,500 00
Atlantic and North Carolina R.R. Co.		1,066,000 00
Western North Carolina R. R. Co...		1,418,000 00
Albermarle & Chesapeake Canal Co.		350,000 00
		$6,516,500 00
Bonds city of Raleigh.	$48,000 00	
Raleigh and Gaston R. R. Co....	20,000 00	
Wilmington, Charlotte and Rutherford R. R. Co....	2,000,000 00	
Western (Coalfield) R. R. Co....	600,000 00	
Accrued interest on these bonds to January 1st 1866....	307,623 00	
Balance due on bonds of Atlantic and N.C. R. R. Co....	181,164 88	
		3,156,789 88
Total sets-off....		$9,673,289 88

This sum being deducted from the ante-war debt and interest, $12,749,500, leaves $3,086,210 12 as the balance of state indebtness; or adding the debt incurred during the war for internal improvements ($1,620,000) a total of $4,706,210 12. While some of these sets-off are unproductive at present it is the opinion of the Treasurer that in a short time, under the revival of trade and travel, they will, to a great degree, relieve the burden of the public debt.

The following statement shows the bonded debt of the State past due. The first item of $53,000 consists of ten year registered bonds issued under acts of 1848 and 1850, known to be due, but there is no record to show the date of maturity:

When due.	Where payable.	Amount.
July 1st 1864....	Raleigh.	$53,000
January 1st 1865....	New York....	41,000
July 1st 1865....	"	144,000
January 1st 1866....	"	59,009
Total due....		$364,000

The following will show the date of maturity of bonds not yet due, issued before the war, showing the aggregate in each year:

When due.	Where payable.	Amount.
1867....	New York....	$15,000
1868....	"	41,000
1869....	"	72,100
1869....	Raleigh.	26,500
1870....	New York....	128,400
1871....	Raleigh.	40,000
1872....	"	20,000
1875....	New York....	24,000
1876....	"	110,000
1877....	"	8,000
1878....	"	18,000
1883....	"	1,000,000
1884....	"	630,000
1885....	"	1,470,000
1886....	"	748,000
1887....	"	1,283,500
1888....	"	300,000
1889....	"	1,302,500
1890....	"	1,898,500
1891....	"	250,000
Total....		$9,385,500

The total amount of bonds issued since May 20, 1861, for internal improvements is stated at $1,619,000. Of these $455,000 for the benefit of the Wilmington, Charlotte and Rutherford Railroad Co., have been validated by an act of the General Assembly on conditions not yet complied with. The bonds issued for the benefit of the Chatham Railroad Co., were not issued directly to that company, but $200,000 were delivered to the Raleigh and Gaston Railroad Co., and $49,000 to the city of Raleigh in exchange for bonds of those corporations of like amount, and were then paid to the Chatham Railroad Co. by them for same amount of stock. The State is secured by a mortgage on the property and franchises of the latter corporation. Since that time the Raleigh and Gaston Railroad Co., paid to the State in discharge of its debt $180,000 and the city of Raleigh $1,000. The following is a list of the bonds issued during the war in aid of internal improvements:

To Western R. R. Co....	$200,000	due 1891.
Western N. Carolina R.R. Co..	220,000	" 1891.
Wilmington, Charlotte and Rutherford R. R. Co....	950,000	" 1892.
Chatham R. R. Co....	249,000	" 1883.

It is supposed that these bonds will be assumed by the new State government as a part of the debt to be provided for.

The State also issued for other purposes during the war the following:

For defense....	$136,500	due 1892
Ways and means....	6,941,500	" 1893
Confederate tax....	1,364,500	" 1882.
Defense....	4,429,000	" 1882.

—making the total debt of the State for war purposes $12,871,500.

The following is a recapitulation of the above statements, omitting the war debts:

Bonds past due and unpaid....	$364,000
" yet to mature....	9,385,500
Coupons—estimated at....	3,000,000
Total ante-war debt....	$12,749,500
Issued for internal improvements during the war....	1,619,000
Total....	$14,368,000
Deduct sets-off....	9,673,290
Leaving....	$4,694,710

The following statement will show the amount due by the State to sundry Banks in the State

and individuals, on account of temporary loans, on the 1st of October, 1864.

Bank of Cape Fear, Salem	$30,000
" " Washington	245,000
" Wadesboro'	108,871
Farmers' Bank of N. C.	75,000
Miners' and Planters' Bank	12,497
Total due Banks	$471,368
Individuals:	
David Hinton	$12,000
Henry Mordecai	15,000
D. G. Fowle	3,000
C. Perkins	7,055
	37,055
Total due Banks and individuals	$508,423

The following will show the condition of the Banks, omitting war public securities, and debits and credits of minor importance:

Specie	$776,888 86
Foreign exchange on banks of States not engaged in rebellion	148,446 18
Bills discounted prior to May 20,1861	2,359,069 03
" " since May 20, 1861.	2,476,880 58
Circulation	7,140,275 00
Due depositors prior to May 20, 1861	536,210 53
" for deposits made since May 20, 1861	940,046 79
Capital stock	7,671,167 00

Franklin Mining Company.

The 10th annual meeting of this company was held in Boston on the 19th inst. The report states that the company was organized in 1857, and has been in continuous successful operation since that time. The mines are situated in what is known as the Portage District in Michigan, on Lake Superior. The product of copper for the year 1865, was 2,125,589 lbs. mineral, yielding 1,559,-481 lbs. Ingot copper, giving an average of 73.37 per cent. of the mineral. Of this product and the balance left over at the close of navigation 1864, 1,416,397 lbs. have been sent to market, of which 1,269,397 lbs. have been sold, the gross amount realized from these sales being $389,928 19. The gross earnings for the year, estimating the copper on hand and at the mine at 35 and 33 cents, amount to $491,757 88; the expenses, $450,002 44, leaving a net profit for the year (less tribute) of $41,609 55. The additions to real estate and permanent improvements amount to $10,955 17, leaving an available surplus of assets over liabilities of $119,767 35, being an increase of $22,039 40, over last year. The machinery, stamps, etc., are all in good condition; in short, the mine is perfectly equipped, well opened, and is just commencing what will prove to be a successful and profitable career, to continue for years to come; the great length of vein, and the increased richness of it, as greater depth is attained (shown by the operations at the Pewabic), lead inevitably to this conclusion. The directors regret having been unable to pay a dividend from profits for the past year, but show that it was entirely out of their power, unless the company should carry on their mining operations on credit. It is expected, however, that the present year will give a much higher price for the product, and that the cost of mining and supplies of every kind, freight, etc., will be very materially reduced. The directors conclude their report as follows:

The present board of directors was elected in 1864, and re-elected in 1865 with the distinct understanding that the affairs of this company were to be managed distinctly and separately from those of any other company; this they had endeavored to do, and have done so far as was possible, some contracts existing with the Pewabic company not terminating until the present year.

The following resolutions passed at the annual meeting held on the 20th April, 1864, will fully explain the above:

It is therefore resolved, as the sense of this meeting, that the directors of this company be fully authorized, if in their judgment it is expedient, to notify the directors of the Pewabic company of their desire to terminate this joint interest on the first day of July next, either by division of the stock of goods then on hand, or by sale from one to the other party as may be mutually agreed upon.

Resolved, That the directors be and are hereby authorized to notify the directors of the Pewabic company of their desire to purchase from them, in conformity to an agreement on file to that effect, all the right and title which the Pewabic company have in all buildings which were originally constructed on joint account, but located on the lands of this company.

The statement of assets and liabilities show that there were at the mine assets amounting to $202,-407 28, comprising cash in agent's hands, $6,762 66; mdse. in store, $63,311 87; mining supplies, machinery, &c., $31,405 03; 275,084 lbs. ingot copper, $90,777 72; and shares and lands in Portage Lake and River Improvement Co. $10,050. In Boston the assets amount to $84,762 30 as follows: Cash in treasurer's hands $1,178 85; bills receivable $22,948 72; copper on hand, 147,-000 lbs., valued at $51,450; due from Pewabic Mining Co. $2,984 55; due from Concord $6,200 27. The total assets are $287,169 67.

The liabilities are as follows: Due at the mine $50,588 45 Due in Boston, treasurer's notes, $45,-000; agent's drafts advised, $28,742 88; bills payable $14,053 94; for advances on copper $28,681 64, and ledger balances, $188 41, and unclaimed demands $147, making a total of $167,-402 32.

The excess of assets over liabilities is $119,767 35.

A Philadelphia 7-30 Loan.

The Legislature of Pennsylvania, at its late session passed an act authorizing the city of Philadelphia, whenever necessary to defray municipal expenses, to issue bonds to the amount of $5,000,-000, in sums of not less than $100 each, payable at such times as may be directed by the Councils of said city, and bearing interest at a rate not to exceed seven and three-tenths per cent. per annum, and to sell the same in open market to the highest bidder: Provided, that none of the said bonds shall be sold for less than the principal sums named therein. Provided, That the city shall have the option at any time after five years from the date of the bonds, and not exceeding twenty years from the date of the same, to reduce the said interest to the legal rate, or pay the principal of the bonds.

Railroad Convention.

On the 4th of July next a General convention of all the railroad Presidents, Chief Engineers and General Superintendents in the United States is to be held in Philadelphia, for an interchange of views in regard to railroad construction, management and operation. The call for the Convention has been signed by railroad officers in all parts of the country, and the chief officers of railroads in the British Provinces have been invited to attend and participate in the deliberation.

Chicago and Rock Island Railroad.

The Chicago and Rock Island Railroad Company have resolved to issue $2,600,000 of the Bonds or obligations of the company (convertible into stock), and dispose of them to the Stockholders at the rate of twenty per cent. of the par value of the same. The Bonds will be apportioned to those Stockholders pro rata, who shall be registered as such on the closing of the Transfer Books on the 8th day of May next.

The payment of the twenty per cent. of the par value of the bonds must be made by the 12th day of June next, at which date the bonds will be ready for delivery.

This is to the effect that the shareholders are to receive 40 per cent. on their capital of $6,500,000 in bonds or scrip convertible into full paid shares of the company, by the payment on or before the 12th of June next of 20 per cent. of the par value of the scrip. In other words, the extra dividend is equal to 32 per cent. cash, counting the shares *at par* extra dividend. The sum of $2,080,000 surplus increase thus appropriated and $520,000 cash on the conversion of the scrip into full shares, together $2,600,000, will accomplish the purchase of the Mississippi and Missouri road, west of the Mississippi River.

Interest and Dividends.

The Northern Central Railroad Company has declared a quarterly dividend of 2 per cent., clear of National and State taxes, payable 21st May next.

The coupons due May 1, 1866, on the Equipment Fund Loan, will be paid on and after May 1, at the Vermont Central Railroad office, No. 5 State Street, Boston. Coupons held in Vermont will be paid at the office of the Treasurer, St. Albans, Vt.

Interest on the bonds and preferred stock of the Toledo, Wabash and Western Railway Co., due May 1, will be paid at the office of the company, 19 Broad St.

☞ The Secretary of the Treasury gives notice that the Assistant Treasurers of the United States at New York, Philadelphia and Boston, and the Designated Depositary at Baltimore, have been instructed to discontinue receiving deposits on account of Temporary Loan for Clearing House purposes at five per cent. per annum on and after May 1st, 1866, from which date all certificates outstanding and unpaid will carry four per cent. interest per annum.

On said 1st of May, and until further notice, said Assistant Treasurers and Designated Depositary will receive such deposits in lawful money and issue therefor Clearing House certificates, payable on demand, in legal tender notes, with interest at four per cent. per annum.

☞ Judge Hoar, of the Supreme Court in session at Taunton, decided recently, that the absence of a revenue stamp does not invalidate a writ or other legal document. He questioned whether Congress so intended in framing the internal revenue law; but was clear in the opinion, that a statute of the United States, undertaking to invalidate an instrument which, by the laws of a State, is valid, would be unconstitutional. The Government may exact a penalty for failure to affix the stamp, but cannot make void the instrument for lack of the stamp.

Export of Iron and Steel.

The immense development of this trade can only be appreciated when we cast a retrospective glance at its progress since 1850. In that year the exported value of the iron and steel was £5,350,056; in 1851, £5,830,370; in 1852, £6,684,276; in 1853, £10,845,422; in 1854, £11,674,675; in 1855, £8,465,642; in 1856, £12,966,109; in 1857, £13,603,337; in 1858, £11,197,072; in 1859, £12,314,437; in 1860, £12,154,997; in 1861, £10,326,646; in 1862, £11,365,150; in 1863, £13,150,936; in 1864, £13,310,484; and in 1865, £13,451,445. Comparing 1865 with 1850, we thus see an increase of £8,101,389. It was in 1853 that the exports experienced their most rapid expansion, but even upon that year 1865 showed an advance of £2,606,023. If we analyse the exports of 1850 and 1865, we arrive at the following results:

	1850.	1865.
Pig and puddled iron	£348,074	£1,591,063
Bar, angle, bolt & rod iron / Railway iron of all sorts.	2,801,043	2,213,123 / 3,541,296
Iron wire	86,573	450,689
Cast iron	215,332	771,124
Hoops, sheet iron and boiler plates / Wrought iron of all sorts.	1,454,410	1,597,604 / 2,494,371
Old iron for re-manufacture	50,876	12,688
Unwrought steel	393,748	779,487
Total	£5,350,056	£13,451,445

There has been an immense advance in every department of the trade, with the exception of the comparatively insignificant item of old iron for re-manufacture. Further, it will be seen that the total value of the exports was in 1865 larger than in any former year, excepting 1857.—*London Mining Journal, March* 24.

Railways in Holland.

The total length of the Dutch railways opened for public traffic on the 1st of January last, was 282,717 kilometres. In the course of the present year 189,446 kilometres will be opened, making a total of 472,163 kilometres, which is scarcely half of the projected network of railways in the Netherlands.

☞ The London *Engineer* says that several English firms have tendered for rails, Bessemer steel rails, &c., to be supplied to the Belgian State railways. For Bessemer steels—that is for one lot of 185 tons—the lowest tender was that delivered by Mr. H. Simon, of Manchester. The terms of this tender were £15 1s. 6d. per ton.

☞ The President has approved the bill to reimburse the State of Missouri for moneys expended for the United States, for enrolling, equipping and provisioning the United States forces, to aid in suppressing the rebellion. The sum of $6,716,000 is appropriated for the purpose.

☞ A survey is now in progress, under the direction of Mr. A. E. Swasey, Superintendent of the Taunton Branch road, for a railroad from Mansfield junction, on the Boston and Providence Railroad, to Framingham, on the Boston and Worcester, twenty miles.

☞ The proposed branch railroad leading from near Barnesville Pa., into the Lehigh Region, will be 15 miles in length. A corps of engineers have examined the route and pronounce it favorable for the construction of the proposed branch.

☞ A large meeting was held in Cincinnati on the 20th, for the purpose of rendering aid to the Cincinnati and Chattanooga Railroad. Nearly $600,000 was subscribed.

Milwaukee and La Crosse Railroad.

The United States Circuit Court, this morning, both the judges concurring, affirmed the validity of the judgment in favor of Selah Chamberlain against the La Crosse and Milwaukee Railroad Company. This judgment was entered in 1857, for $629,000, and amounts, with the interest, to about $1,000,000. This makes the adjudicated liens on the Eastern Division of the La Crosse Railroad Company, prior to the claims of the Milwaukee and Minnesota Railroad Company, amount to about $3,400,000, viz:

Palmer mortgage	$875,000
City mortgage	314,000
Soutter mortgage	1,040,000
Cleveland judgment	140,000
Chamberlain judgment	1,000,000
	$4,369,000
There are other judgments claiming priority for say	75,000
	$4,444,000

The judgments are all owned directly or indirectly by the Milwaukee and St. Paul Railway Company. The road in controversy is 95 miles in length, and as seen above, the adjudicated claims are $46,700 per mile, in addition to which there are a large amount of contested claims to come up. The Prairie du Chien Railroad, a through route, cost $31,000 per mile, and has never yet been able to pay a dividend to all its stockholders from its earnings.—*Mil. Wis. April* 18.

☞ The Baltimore City Council have passed the ordinance authorizing the Philadelphia, Wilmington and Baltimore Railroad Company to lay down an additional track, commencing at the eastern limits of the city and extending westwardly on the centre of Boston street to connect with their present track on Canton avenue, at or near Boston or Chester street, east of Castle alley, with a provision that the company take up the present track on the south side of Boston street and place it alongside of the new track, on or about the centre of the street, and the rails of said track to be what is denominated the tram rail.

☞ Judge Ingraham has decided in relation to the claims of Morris Ketchum & Co. on the New York and New Haven Railroad Co., as to the latter's responsibility for the fraudulent issue of stock by Robert Schuyler. The decision is, "judgment for defendants against the plaintiffs for $100,576 65, with interest on $54,834 66, from April 10, 1866, and costs." The case had been appealed by the railroad company to the Court of Appeals of the State, which referred it back for the purpose of finally disposing of some of the questions involved.

☞ The Government Commissioners have accepted forty miles of the Union Pacific Railroad, main line, west of Omaha, Nebraska, and the work is progressing at the rate of a mile a day. Sixty-one miles were completed on the 10th inst.

☞ The Union Pacific Railroad, Eastern Division, has been finished 23 miles west of Topeka. The branch between Lawrence and Leavenworth is three-fourths finished.

☞ A meeting of the corporators of the La Crosse, Trempeleau and Prescott Railroad Company was held in Milwaukee on the 18th instant, at which a complete reorganization of that Company was effected with a view to the immediate construction of the road.

Railroads in Russia.

A recent official exhibit of the cost of building railroads in the Russian empire shows that the different lines of the Great Company cost 169,183,920 roubles for a total length of 1,617 versts, or 104,628 roubles per verst (⅔ of a French mile each). The Riga Dunaburg railway, 264 versts, cost 13,561,231 rubles, or 66,976 rubles each; the Moscow-Rjasan, 185 versts, fifteen millions, or 81,081 rubles each; the Volga-Don line, 73 versts, 4,591,748 rubles, or 62,996 rubles each; the Moscow-Jaroslaw line, 66 versts, 4,173,881 rubles, or 63,240 rubles each; the line from Moscow to St. Petersburg is a model line, only its building has cost the enormous sum of 208,462 rubles the verst. The railway from Krementchvug to Batta is to be finished in three years, and the belief is that the line from Czernovitz to Lemberg will be opened for traffic in the course of the autumn of 1866.

☞ The Governor of New York has vetoed the two railroad bills—one appropriating $500,000 for the completion of the Albany and Susquehanna Railroad, and another giving $450,000 to the Whitehall and Plattsburg Railroad. The bill authorizing an increase of fare on the New York Central Railroad passed both branches of the Legislature—but was returned by the Governor to the Secretary of State without his approval.

☞ It is stated that the Directors of the Cincinnati, Peru and Chicago Railroad have negotiated a loan of $600,000, which will be furnished in a week or two, when the work on the road will be prosecuted with renewed vigor until completed.

☞ The cars are now running on the Allegheny Valley railroad to Ore Hill Furnace, and it is expected that they will reach Orrsville by May. A large portion of the road above Orrsville is under contract, and the ground has been broken on the same.

☞ The prospects of a railroad from Bay City to East Saginaw, Mich., are said to be brightening. The directors now have $115,000 of available funds and expect to be able to raise the balance required.

☞ The stock books of the new Anthracite Railroad Company, are soon to be opened for subscription in Boston, as well as New York and Philadelphia. The charter has been obtained, and sufficient funds already secured to push forward the work to a speedy consummation.

☞ Surveyors commenced work on the Iowa and Minnesota Railroad (Indianola to the Minnesota State Line) on the 26th of March.

☞ The Illinois and Michigan Canal was formally opened to navigation throughout its whole length on the 10th of April.

New York, Saturday, May 5, 1866.

Annual Report of the Superintendent of Buildings.

We have received the Annual Report of the Superintendent of Buildings in this city, for the year 1865, made to the Board of Supervisors in February last, a document of about 60 pages. It appears from this, that the office of Superintendent is a very busy one, 3,738 cases occurring for his inspection during the year; or in other words, requiring his attention, to see that the building regulations for the city are properly complied with. These regulations are at the same time precise and comprehensive, and after some years' testing, are found to be useful both to the capital and labor subjected to their control—to the interests of employer and employed. Builders and mechanics are said especially to approve of them.

This city is now among the largest in the world, and bids fair to become even still larger. It has peculiarities of its own, which are without resemblance elsewhere, being situated on an island, at the mouth of a long, navigable river, and on a bay of immense extent, great depth of water, and easy and immediate access from the sea in all seasons of the year. We do not remember another port in the world that will in all respects compare with New York. Yet its island area limits its growth, and must affect the character of its architecture. It is long and narrow. Its greater axis must be constantly traversed by the principal part of its busy population to enable them to reach their place of business and residences, thus making time an important consideration, and giving to the street railway system, its support, as it has been its necessity. Thus it will be seen, that the largest extension and improvements of the city can only be in the one direction, where space is left for them, and the changes that have occurred within the last fifteen years in this respect are truly marvellous. From 14th street upwards, the construction of avenues and cross streets has been attended with the immediate erection of the most elegant and costly buildings, facades miles in extent, and they are still in progress. The prospect is, that the whole island will in fifteen years more be occupied in a similar style, with the Central Park as the principal centre of residences.

It is noticeable that of late years the style of architecture in this city has greatly improved. Compared with even the best houses in Broadway when it was the favorite residences of our principal people, the modern houses on the avenues and cross streets are infinitely superior in design, finish and convenience. There is hardly any comparison to be made between them, so great is the difference in favor of the modern structure.

The introduction of the Croton water alone made the most important changes in the design of our buildings. No city in the world has advantages in this respect, that will compare with ours. To supply every dwelling with water, pure and wholesome, is not only a hygeinic triumph but a mechanical one, since the construction of the main service pipes, hydrants, baths and waste pipes required much skill and science. The universal enjoyment of this element is one of the boons which have been conferred on the city, by far seeing intelligence and public spirit, and is of priceless value. The water and the fuel which are so abundantly supplied to New York, are the corner stones of its health and prosperity.

The construction of its buildings has relation to both these conditions; while our baths and plumbing work are of the best description, so our grates, stoves, and heating apparatus are diversified, ingenious, economical and elegant. In respect to these, we may claim for our artizans that in the excellence and finish of their work they surpass in this branch of business those of any other country. Neither in London or Paris will the plumbing or mantle work of the houses compare with that in New York. On the contrary, some of the most recently erected dwellings in the former city have been constructed after the New York plan. A splendid edifice of Sir Morton Peto in London, is said to be distinguished by the introduction and adoption of the American internal arrangements.

The materials for building are plentiful, and hitherto have been cheap. Marble, free stone, brick and iron, all used to a great extent, have at times prevailed as taste or fashion predominated, or prices regulated, and of late years the designs have continued to grow more elegant. No finer vista can be found, not even in famous St. Petersburg to surpass large portions of the Fifth avenue. Indeed one is lost in wonder when he observes the large numbers of the splendid edifices which adorn the upper parts of the city, generally it may be said, the acquisitions of honorable industry and good character.

It is well understood that the class of persons known as mechanics and tradesmen, who are actively engaged in daily business, and have yet their fortunes to achieve, are much better lodged and sheltered in this city than any similar class of persons abroad, and enjoy as they toil, a much larger share of the comforts of life. Their dwellings are more comfortable, they are neatly furnished, and their whole style of living is that of comparative ease, with plenty for each day's wants. If there is any fault, it is in over anxiety to attain too much comfort at once, which induces perhaps at times excessive exertion, and leads to misfortune. Yet it is the spirit of the country and the people to rise, and to make every effort to do so, and New York is an example of what this spirit can bring about.

The supervision of the buildings erected in the city enables the Superintendent to give us some of his conclusions. It appears that the number of new buildings commenced in 1865, was 1,190 or 457 more than during the preceding year. Of

these 308 were of the first class, 167 of the 2d class, 161 of the tenement class; 112 were stores, 137 stables, 8 churches and 18 school houses. Thus it will be seen that twice as many first class houses were being erected as of the second class, or of the third class, thus showing the wealth of the city, and the disposition of the rich to enjoy their means.

Although the war had the effort of checking the progress of building in the city, it nevertheless appears the number of structures has been gradually increasing. The report before us, gives as the total of these from May 1, 1862, to December 31, 1865, a period of three years and eight months.... 4,013

In construction	88
Begun in 1862	755
" 1863	1,247
" 1864	733
" 1865	1,190
	4,013

Of these 530 were not fully completed at the time of the report.

The first class dwellings are each to contain one family only, the tenement houses, of half the capacity and one-fourth the value, accommodate 1,610 families, besides furnishing room occupied by upwards of 100 stores, bakehouses and groceries. Fifty-four first class buildings are used for banks, insurance offices and commercial establishments. One hundred and twelve buildings for factories and workshops were erected during the year.

The violations of the building ordinances are somewhat numerous but may be readily attributed to ignorance and misapprehension. Still it is a curious fact that no less than 13,000 cases have occurred since 1862, to require the attention if not the correction of the building authorities, the Superintendent having a really responsible position to occupy.

This authority seems indispensable to be exercised in large towns, though the idea is not a modern one. Many of our most popular notions are of ancient origin. The veto power as it is termed, one of the most important entrusted to the discretion of the Chief Magistrate is borrowed from the Romans, and so our Superintendent Mr. Macgregor has no doubt if he has a curious turn of mind, explored the history of the *Ædiles* or magistrates who had charge of the public and private buildings, and roads.

It is a singular fact that the Romans had a great tendency to special legislation for the protection of popular rights as long as the people themselves cared for them. We too seem to think their special interests require special protection in this city at least. We have a commission which has charge of the water of the city, another of the police, another of its health, and various others have from time to time been projected. Our public schools have for a long time been under special supervision of a Board and are a splendid success.

We believe the Superintendent of buildings has no control over the designs of the structures which come under his notice, beyond the consideration of their stability and safety. These are left to the taste and means of owners, and the consequence is, that we have a variety of styles not always harmonious though generally pleasing enough. It is observed that periodically great similarity of exterior prevails, one architect apparently copying from another: then again there will come an entire change. The most remarkable improvements have been seen of late in the construction in the lower parts of the city of the buildings to be used for business purposes. These are built of costly materials, of the most elegant proportions, are well lighted, of easy access and are altogether a large advance over the old places of business, such as witnessed in former years the exertions of the older merchants and bankers, not then so well posted as to the necessity of air and ventilation. The offices occupied by our leading financiers, insurers and bankers are now generally of a most convenient and desirable character.

On the whole, New York may claim precedence in this country in respect to its architecture, over all the other cities.

It is already a beautiful town in its newest parts at least, with a magnificent park in its centre, to be its lungs and bronchial apparatus, and to give air and health to its population.

It is to be hoped that in the further construction of our dwellings, stores and factories, due regard will continue to be paid to the demands of the existing ordinances not merely, but good taste, architecture, and the laws of health.

Erie Railway.

The earnings of this road for the years ending December 31, 1864 and 1865, were as follows:

	1864.	1865.
From freight	$10,242,897 61	$11,268,761 12
" passengers	3,002,197 70	4,031,680 20
" mails	101,352 04	101,352 04
" telegraph	44,286 48	14,006 39
" rents	7,138 76	10,643 96
" storage	5,561 66	8,331 01
" interest	26,214 29	.. ..
	$13,429,648 54	$15,434,774 72
Expenses, viz:		
Office & station expenses	$1,222,907 06	$1,210,489 94
Cost of running	2,363,904 96	3,136,025 11
General expenses	331,546 92	280,051 02
Repairs of engines and cars	1,920,433 40	2,607,297 46
Repairs of track & roadway	2,414,815 45	2,376,697 53
Repairs of struct'res	420,611 42	450,605 86
Incidental expenses	54,503 93	22,347 98
Miscellaneous	232,562 55	284,749 12
	$8,961,285 69	$10,368,264 02
Net earnings	$4,468,357 85	$5,066,510 70

Disbursed in 1865 as follows:

Interest on mort. debt	$1,399,769 66	
Rent of railroads	182,400 00	
Rent of Long Dock property	165,690 00	
Internal revenue taxes	561,250 42	
Taxes on real estate	225,416 02	
Pavonia Ferry	22,948 47	
Interest	49,329 51	
Hire of cars	29,264 32	
Rents, repairs and expenses of operating the Buffalo Division	582,242 40	
		3,218,310 80
Surplus		$1,848,199 90
Dividends of 4 per cent. on common and 8½ per cent. on preferred stock, as of July 1, '65	$906,641 05	
Dividend of 3½ per ct. on preferred stock, as of Jan. 1, 1866	238,579 28	
		1,190,220 33
		$657,979 57
Surplus January 1, 1865		857,370 64
To credit of Income Account, January 1, 1866		$1,515,350 21

Compared with 1864, the gross earnings of 1865 show an increase of $2,005,131 18, with an increase in expenses of $1,406,973 33—making the increase of net earnings, $598,152 85.

The freight and passenger earnings for the past two years compare as follows:

Freight Earnings:	1864.	1865.
Through east	$4,748,533 89	$4,615,592 04
" west	2,031,184 57	2,695,069 69
Way east	2,332,586 77	3,036,025 21
" west	1,130,592 88	922,074 18
Total freight	$10,242,897 61	$11,268,761 12

Passenger Earnings:	1864.	1865.
Through east	$315,112 33	$478,127 45
" west	458,985 81	864,398 39
Way east	1,057,201 65	1,295,538 78
" west	1,170,897 91	1,393,615 58
Total passenger	$3,002,197 70	$4,031,680 20

—showing an increase in freight earnings of $1,025,863 51, or 10 per cent,; and in passenger earnings of $1,029,482 50, or 34.2 per cent.

The tons of freight moved and passengers carried during the same two years compare as follows:

Freight:	1864.	1865.
Through east	440,758	434,742
" west	164,118	205,612
Way east	932,151	1,310,288
" west	677,268	584,149
Total tons	2,214,295	2,534,791

Passengers:	1864.	1865.
Through east	35,143	50,036
" west	59,949	105,821
Way east	844,511	1,007,886
" west	846,003	1,012,222
Total number	1,785,606	2,175,965

—showing an increase in tonnage of 312,496, and in passengers of 390,359.

The preceding tables of comparison exhibit a gratifying increase in the freight traffic, the increase being on the through west and way east.

The increase in passenger traffic is very large on all classes, and in both directions, but more particularly on way passengers.

The expenses of operating and repairs in 1865, were greater than those in the preceding year by $1,406,978 33—nearly one-half (686,864 06) being for repairs of engines and cars, and over one-fourth (485,209 87) for cost of fuel.

This increased expenditure is attributable to the substitution of cast steel for iron in renewal of axles and tires; to the enhanced cost of fuel during the past year; and to general improvements in bridges, ties and ballasting. The outlay on account of these items will undoubtedly be largely reduced the coming year.

The amount of new iron laid down in 1865 was 20,170 tons, at a cost of $1,815,300; in 1864, 20,480 tons, at a cost of $2,132,725—showing a decrease in quantity of 310 tons, and in cost of $317,425.

The average cost per net ton for railroad iron in 1864 was $105; in 1865 it was $90, effecting a very great saving in this item. The cost will be still further reduced for the coming year.

The expenses for repairs of track and roadway would shown a much larger reduction, but that during the Winter and Spring of this year, the road suffered severely from excessive floods, more destructive in their effects than any that have ever occurred in the vicinity of the line.

The total amount expended for construction during the year 1865, was $4,941,293 02; of this $819,859 98 was for 13½ miles of double track, and 14 miles of sidings; $2,691,419 12 for 56 new locomotives and 754 new cars; $121,216 71 for new ferry boat; $215,520 34 for Long Dock shops, etc.; $177,060 72 for machinery in shops; $3,652 36 on account Hawley Branch; $112,167 13 for discount on 4th mort. bonds sold, and interest; and $800,896 66, for the construction of freight and engine houses, car shops, etc., at different points upon the line of the road.

The following is a comparative statement of the

capital stock and funded debt of the company, December 31—

	1864.	1865.
Common stock	$16,400,100	$16,570,100
Preferred "	8,535,700	8,535,700
Total capital stock	$24,935,800	$25,105,800
First mortgage bonds	3,000,000	3,000,000
Second " "	4,000,000	4,000,000
Third " "	6,000,000	6,000,000
Fourth " "	3,634,000	4,441,000
Fifth " "	1,002,500	926,500
Buffalo Branch "	186,400	186,400
Sterling "	.....	3,816,582
Real estate "	500	500
Total funded debt	$17,823,400	$22,370,982
Total stock and funded debt	$42,759,200	$47,476,782

This shows an increase in the common capital stock during the year of $170,000, accounted for by the conversion of $93,000 of fourth, and $77,000 of fifth mortgage bonds. The funded debt also shows an increase of $4,546,582 19, accounted for by the sale of $3,816,582 19 sterling bonds, and $900,000 of fourth mortgage bonds, less $170,000 of fourth and fifth mortgage bonds converted into capital stock.

The financial condition of the company is exhibited in the annexed balance sheet. The liabilities of the company on the 31st of December, 1865, were:

Accounts payable		$3,551,980 56
Dividend payable Feb. 5, 1866		283,879 28
		$3,835,559 84
Means to pay the same:		
Cash and cash items	$905,158 88	
Accounts receivable	1,467,714 96	
Long Dock Co	251,520 34	
		2,588,394 18
Excess of liabilities		$1,247,165 66

The property of the company consists of: Main Line from Jersey City to Dunkirk, 460 miles; Piermont Branch, 18 miles; Newburgh Branch, 19 miles; Northwestern Division, Hornellsville to Attica, 60 miles—total length of road owned by the company, 557 miles.

The Branch roads leased and operated by the company are: Buffalo Division, Corning to Buffalo, 140 miles; Rochester Division, 18 miles; Canandaigua and Elmira, 66 miles; Hawley Branch, 16 miles—total 240 miles.

The whole number of miles owned and leased by the company is 797.

The Warwick Valley road, ten miles long, is operated by the company, but not leased.

The whole number of miles operated by the company is 807.

There are on the Main Line and Branches owned by the company 205 miles of double track, and 157 miles of sidings, and on the leased roads 21 miles of double track and sidings—making the entire length of track equal to 1,190 miles of single track.

The equipment of the road consists of 332 locomotive engines and tenders; 133 passenger cars; 264 emigrant, baggage and caboose cars; 2,975 box freight, cattle, milk and oil cars; 1,212 flat freight cars; and 884 coal cars.

The report closes with the following remarks in reference to the condition of the road and means to operate it:

During the past year several miles of second track have been built, side tracks have been extended and additional ones introduced at points where business required them; a large amount of iron has been used in renewals; new engine houses, depot and other buildings have been erected and old ones enlarged. Our rolling stock has been very largely increased in locomotives and cars of every class, and the road is now fully equipped in every department. The large increase in engines, passenger and sleeping cars, emigrant, freight, coal and cattle cars, now enables us to do all the business offering promptly and to the entire satisfaction of the public.

We have arranged for ample and convenient cattle yards at Dunkirk and Buffalo, and for a new Grain Elevator at Buffalo, through the agency of third parties, without increasing the expenses of the company. We have also arrangements from which we anticipate a large increase in our local business from the transportation of coal, iron, and the products of the forest.

Our passenger business is very encouraging, and with a first class road, perfect in all its appointments, particularly its fine engines, new and commodious cars, and its excellent hotels, we have every reason to hope that it will become the favorite route with the traveling community.

Although indications point to a decrease in the traffic of the coming year, as compared with the past, every effort has been made to place the road in such a condition in all respects, as will enable us to transact with economy and profit whatever business may be offered.

Our expenses must hereafter be greatly lessened, as the cost of nearly every article used in operating the road is already materially reduced, and this reduction may be reasonably expected to continue. The large force employed during the past year in repairs of road-bed and rolling stock, will be reduced to a limit consistent with the improved condition of the road. Negotiations are now in progress for the transfer of freight at New York and Jersey City by contract, based on the actual tonnage handled. This arrangement, it is expected, will result in a large reduction of expenses at those points; and should these anticipations be realized, similar contracts will be made at other large stations. Our relations with connecting roads are very satisfactory, giving us assurance of continued and large interchange of traffic.

The condition of the company in all its working departments was never better, and the prospect of being able to operate the road economically is most cheering.

Occupying an advantageous position for the carrying trade between the Atlantic and the great West, and having a gauge specially adapted to secure the comfort of passengers, it is already a favorito route with the public, and must continue to receive a fair share of the public patronage.

Entertaining these views, therefore, the Directors feel justified in anticipating most satisfactory results from the operations of the road, during the coming and future years; and will spare no exertions to enable it to sustain the high reputation it has already acquired.

President.—Robert H. Berdell.

Vice President.—Alexander S. Diven.

Directors.—John Arnot, Robt. H. Berdell, D. A. Cushman, J. C. Bancroft Davis, Alexander S. Diven, Daniel Drew, Wm. Evans, Thomas W. Gale, Dudley S. Gregory, Jas. F. D. Lanier, Samuel Marsh, Ralph Mead, Ambrose S. Murray, Isaac N. Phelps, Henry L. Pierson, Wm. B. Skidmore, Cornelius Vanderbilt.

Secretary.—Horatio N. Otis.

Treasurer.—John Hilton.

General Sup't.—Hugh Riddle.

Consulting Engineer.—Charles Minot.

Interest and Dividends.

The Macon and Western Railroad Company have declared a dividend of 5 per cent. less Government tax, payable in New York, on demand.

The Concord, Nashua and Lowell, and Manchester and Lawrence Railroads have declared a dividend of 4 per cent. each payable May 1.

The Cleveland and Mahoning Railroad Company have declared a dividend of four per cent., free of Government tax, on the full shares of the capital stock of the company (except that issued in the conversion of bonds, and upon that a pro rata dividend), payable on the 10th day of May.

The Philadelphia and Reading Railroad Company give notice that the option of receiving the dividends in stock or cash, under the resolution of the Board of 11th of December, 1865, will cease on the 31st of May, 1866, and that such stockholders as do not demand their dividend to be paid to them in stock on or before that day will be thereafter entitled to receive it in cash only.

☞ The Mayor of Baltimore has returned to the first branch of the City Council, without his signature, the ordinance authorizing the Philadelphia, Wilmington and Baltimore Railroad Company to lay down an additional track on Boston street, commencing at the eastern limits of the city and extending westwardly until it intersected with the present track on Canton avenue.

☞ The Canandaigua and Niagara Falls Railroad, which has for several years been operated by the New York Central Railroad Co., has become the property, by lease or purchase, of the Pennsylvania Railroad Co., which will secure to the latter the control of a direct railroad line tween Philadelphia and Niagara Falls.

Liability of Carrier for Delivery to Third Person—What Delivery will Discharge a Carrier.

The question in regard to the carrier's obligation to deliver goods to the shipper or consignor has been much agitated and not quite settled. It arises in the case of another party claiming the goods as owner and taking them in that character from the carrier. Will such taking excuse the carrier for non-delivery? If the goods are demanded of him by a third party on the ground that he is the owner, can the carrier deliver the goods and justify his conduct? Suppose a case: B. ships a car load of grain at Troy by the Harlem Railroad Co., consigned to the "Owner" at New York, care of A. On arrival of the grain at New York, a third party appears, claiming to be the owner, and the company delivers the grain to him on his paying the freight. Is the company liable for the value of the grain, in a case where such third party was not in fact the owner?

It is quite certain that the carrier cannot himself raise the question of title in a third person, and on that ground refuse delivery to the person originally holding them. Thus in the case of Laclough *vs.* Towle, 3 Esp., 114, a carrier had a parcel of goods delivered to him to be carried from Maidstone to London. While the goods lay at his warehouse, a person came there who said the goods were his, and claimed them from the carrier. The carrier refused to deliver them, but being indemnified, promised to keep them and not deliver them according to the order. The goods not being delivered, the party by whom they were delivered to the carrier brought an action against the carrier. The Court would not permit the carrier to set up any question of property out of the plaintiff, and *held* that he, having received the goods from him, was precluded from questioning his title or showing a property in any other person.

It is undoubtedly the general rule that the carrier cannot deny the title of the party from whom he has received the goods for transportation. In general no agent can defend against the action of his principal, by setting up the *jus tertii* in his own favor. (Nicholson *vs.* Knowlis, 5 Madd., 47; Parsons on Contracts, Vol. 2, p. 204.) On the other hand, if the carrier delivers them to a third party, and it can be shown in an action against him that this third party was the actual and lawful owner, and that the plaintiff who delivered the goods to the carrier had no right to them whatever, this certainly is a sufficient defence. This was settled after much consideration, in King *vs.* Richards, 6 Whart., 418. The defendants in that case were common carriers of goods between New York and Philadelphia, and had signed a receipt of certain goods as received of A., which they promised to deliver to his order. In *trover* by the indorsers of this paper, who had made advances on the goods, it was held, that the defendants might prove that A. had no title to the goods; that they had been fraudulently obtained by him from the true owner, and that upon demand made, they had delivered them up to the latter. Kennedy J., said: "It is said that it would be a breach of trust or an act of treachery, on the part of the bailee, to deliver the goods over on demand to the true owner, notwithstanding he has received them from a wrongdoer, because he promised to restore the goods to such wrongdoer. If the bailee in such case receive the goods from the bailor innocently, under the impression made by the bailor that he is the owner thereof, or has the right to dispose of them in the manner he is doing, and therefore promises to return the goods to the bailor, it is very obvious that such a promise ought not to be regarded as binding, because obtained through a false impression, made wilfully by the bailor; and truth, which lies at the foundation of justice, as well as all moral excellence, would seem to require in every such case that the goods should be delivered up to the true owner, especially if he demand the same, instead of the wrongful bailor. But if the bailee knew at the time he received the goods, and made the promise to redeliver them to the bailor, with a view to favor the bailor, that the latter had come wrongfully by them, either by having taken them tortiously or feloniously from the owner; then the bailee thereby became a participant in the fraud or the felony, and it would be abhorrent to every principle of justice that he should be protected under such circumstances against the demand or claim of the owner. This promise however, of the bailee, is said to be binding on him only, and is not such as his personal representatives are bound to regard; and the reason assigned for this is because the goods have come to their possession by operation of law. This doctrine if it were to be allowed, would certainly be singularly anomalous, and unlike in its effect, to any other promise recognized by the law as binding." (See also, Bates *vs.* Stanton, 1 Duer., 79.)

The doctrine as thus stated is fully sustained in the case of Sheridan *vs.* The New Quay Co., 93 Eng., C. L., 618. In giving the judgment of the Court, Willes, J., says:—"The defendants were common carriers, and therefore bound to receive the goods for carriage. They could make no inquiry as to the ownership. They have not voluntarily raised the question; it was raised by the demand of the real owner before the defendants had parted with the goods. The law would have protected them against the real owner if they had delivered the goods in pursuance of their employment, without notice of his claim. It ought equally to protect them against the *pseudo* owner, from whom they could not refuse to receive the goods, in the present event of the real owner claiming the goods, and their being given up to him."

It is, held, in general, that if he does not yield to an adverse claim by a third party, he is liable to an action, in case the title of the party be good. (Wilson *vs.* Anderton, 1 B. & Ad., 450.) In this case the captain of a ship who had taken goods on freight and who claimed a lien upon them, but whose claim was unfounded, delivered them to the defendant as his bailee. The plaintiff who was the owner of the goods, demanded them of the defendant, but he refused to deliver them without the directions of the bailor. The Court held, that the bailor not having any lien upon the goods, the refusal of the bailee was sufficient evidence of a conversion. Tenterden, C. J., said: "A bailee can never be in a better situation than the bailor. If the bailor has no title, the bailee can have none, for the bailor can give no better title than he has. The right to the property may, therefore, be tried in an action against the bailee, and a refusal like that stated in this case has always been considered evidence of a conversion. The situation of a bailee is not one without remedy. He is not bound to ascertain who has the right. He may file a bill of interpleader in a Court of equity. But a bailee who forbears to adopt that mode of proceeding, and makes himself a party by retaining the goods for the bailor must stand or fall by his title." Littledale, J.: "The question is whether under the circumstances stated in this case, the bailee can set up any title against the real owner? What is the situation of a bailee? He has no other title except that which the bailor had. As to the *Nisi Prius* case before Gould, J., it is not applicable to the present point. There the carrier, on the goods being demanded by a third party, voluntarily identified himself with that party, by proposing to retain them on an indemnity, and offering to set up the title of that party on an action by the bailor. Now a lessee cannot dispute the title of his lessor at the time of the lease, but he may show that the lessor's title has been put an end to; and therefore, in an action of covenant by the lessor, a plea of eviction by title paramount, or that which is equivalent to it, is a good plea, and a threat to distrain or bring an ejectment, by a person having good title, would be equivalent to an actual eviction. So here if the bailor brought an action against the defendant as bailee, the latter might, on the same principle, show that the plaintiff recovered the value of the goods, or that on being threatened with an action by a person who had good title to the goods, he had delivered them to him."

The carrier may have his interpleader in equity to ascertain who has the right; but it is not easy to see what adequate means of self-protection he has at common law. And yet he should be permitted in some way to demand security of the party whose title seems to him the better, and to whom he is therefore willing to give the goods. And whenever security is refused, there should be no recovery against him, unless the better title of the person claiming the goods was obvious and certain, or there were other circumstances indicating that the carrier had not acted with entire good faith or proper discretion. But in the present state of the authorities, it seems that if the carrier be called upon by such antagonistic claimants, he must decide between them at his own peril.

A singular illustration of this principle is given in the case of Morris *vs.* Third Avenue Railroad Co., 23, How. Pr. R., 345. It appeared in that case that the plaintiff, who was a passenger upon the defendant's car in the city of New York, left her satchel in the car. The conductor's attention being called to the fact, he took charge of it, and upon the return trip placed it in the care of the receiver of the road, by whom it was delivered to a person who had no right or claim to it. The Court held that although city passenger railroad companies are not chargeable strictly as common carriers of baggage, they receiving no compensation for its carriage beyond that received as the fare of the passenger, yet they were in this case, bailees for hire, while the property remained in their custody; and the property having come into their possession by the owner's neglect, the delivery of it to the wrong person was a conversion and the defendants were liable, unless they exer-

cised all the care and vigilance that could reasonably be expected under the circumstances.

WHAT DELIVERY WILL DISCHARGE THE CARRIER.

When goods are delivered to the place of destination, and the consignee is dead, absent or refuses to receive them, or is not known, and cannot after due effort be found, the carrier discharges himself by placing them in store with some responsible third party in that business at the place of delivery, for and on account of the owner. Fisk *vs.* Newton, 1 Den., 45.) In this last case the consignee in New York was a clerk having no place of business of his own, and the carrier was not informed of his occupation or address, and his name was not in the city Directory, and the carrier after reasonable effort could not find him. It was held that the carrier's responsibility ceased on his storing the goods with a storehouse keeper in good credit, on account of the owner; and that he was not liable on the insolvency of the storehouse keeper occurring some months afterwards. But when the consignee refuses to receive the goods, and the carrier continues to act under the direction of the shipper by retaining its possession or storing it, then the carrier is liable. (Ide *vs.* Sadler, 18 Barb., 32.)

When the consignee is a transient person, as where for instance, the goods were taken to be delivered at N. to T., a transient person, who had no agent there, and the carrier not being able to find T. at N., in good faith and in conformity with usage delivered them there to a third person for him, and this person, through a mistake delivered them to a different person than T., it was *held* that the carrier's duty was discharged under such circumstances by delivery to a responsible third person, though it would be otherwise if T. had been a resident, or had had an agent at N. (Mayell *vs.* Potter, 2 Johns. Cas., 371.) Thus too, where a carrier receives goods addressed to a place beyond the terminus of his route, and the carrier is a mere forwarder of goods when they are to be sent beyond such route, he discharges his duty as carrier by transporting them to the terminus of his own route, and then delivering them to a responsible carrier, according to the usage of the business, that they may be forwarded. (6 Hill, 157.)

There is frequently a usage of carriers, known to the consignor, of leaving goods to be called for, and where that is the case, although *prima facie*, the carrier is bound to deliver goods to the consignee personally, the usage is a defence to an action for goods lost under such circumstances. (17 Wend., 305.)

It should be borne in mind that a right of action for injury caused by the carrier's negligence is not barred by subsequent acceptance of the injured property, though this is a matter in mitigation of the damages. After an injury has been committed, the cause of action cannot be discharged by any act of the plaintiff short of a release or acceptance of something in satisfaction. (Bowman *vs.* Teall, 23 Wend., 306.)

When the carrier did not bring the goods to the terminus at which he undertook to deliver them, and had no office or agent there, he was held liable although the plaintiff had made no demand of them at that place. (Schroeder *vs.* Hudson River Railroad Co., 5 Duer., 55.)

☞ The anthracite coal tonnage is steadily on the increase. Thus far this season there has been put into market 2,680,948 tons against 2,227,879 tons, showing an increase of 453,069 tons.

Vermont and Massachusetts Railroad.

The following is a comparative statement of the earnings and expenses of this road, for the years ending November 30, 1862, 1863, 1864 and 1865:

	1862.	1863.	1864.	1865.

American Railroad Journal.

Saturday, May 5, 1866.

Stock Exchange and Money Market.

The market remains in the very best condition for all the interests of the country. Those persons who were terrified at the possibility of contraction might have saved their breath. It has not taken place; and though it is understood that the public debt has been diminished sixteen millions in the last month, the volume of currency is not apparently lessened, and interest has actually been as low as 3½ per cent. There is evidently an excess of money in the market, and the only wonder is that speculation has not grown rampant and prices gone back to the times of inflation. On the contrary, these last are steadily declining, although combinations continue strong enough to retain enormous profits in many of the necessaries of life. Butter at 75 cents per lb. tells on the comforts of many thousands of families; and the dairymen get enough from the products of a single milch cow to buy a score of them in the course of a year. It is to be hoped they at least are satisfied. Cotton in the staple has fallen in this market, and slightly advanced in the foreign one. American securities advanced on this side in the face of a temporary decline abroad; where, by the last advices, they had recoved to 70½ cents and rising. The return avalanche of our bonds has not yet occurred; and if it did, this market is in a condition to melt it down without making a freshet or a torrent. The news looks more peaceful, the people of Germany showing a disposition to object to a war for the benefit of any of the reigning families; yet it is evident, from the latest accounts, that France, Russia and Italy are armed to the teeth, and ready to take advantage of the possible rupture between Prussia and Austria. It is noticeable that the British Government has declared its favorable opinions of the position occupied by Austria, which is rather unexpected considering the family relations between England and Prussia through the Royal families. Our turn may now come through the Mexican imbroglio; as it is understood that our Government has remonstrated with the Austrian against its interference in behalf of Maximilian, and the Austrian Minister at Washington is preparing to return home in expectation of receiving his passports. It is also understood that MR. SEWARD has proposed a friendly arrangement of the French claims on Mexico by a treaty with Juarez, and a payment in money for their acquittance in full. If he succeeds in this, he may take high rank among the diplomatists of the age, and will deserve well of his country. MR. SEWARD'S horizon grows larger as he rises and gets older. Would that all our public men improved in this particular.

The financial situation in a country like ours, where there is so much discussion and so much legislation, of course depends very much on the course taken by politics. This is perhaps the only real danger to which we are exposed. The latest plan of reconstruction as reported to Congress is therefore quite likely to have some effect on the public credit. To ask the eleven Southern States to adopt an amendment to the constitution by which they shall cut themselves off from participating in the affairs of the Government for many years is asking more than we expect from them, and will most assuredly be denied. It is really a great pity that the trust in our long established institutions, in the good sense of majorities, in their rightful power and their common sense cannot be continued a little longer. No one can have read the history of the Parliaments in the time of the Commonwealth of England, and observed how one wrong after another was committed in the name of liberty against liberty by committees and men of the people so called, without seeing the danger we are exposed to in the same manner, by the same processes, and system of legislation. The most palpable violations of law were constantly committed in the forms of law, and the rule and sway of parliamentary Committees were worse than the acts of the Star Chamber itself. Let us be careful that we are not led into revolution by the tactics or the ambition of any Congressional Committees.

"Who narrow their mind
And to party give up, what is meant for mankind."

One of the great topics of discussion among our financial men is the policy of the Treasury department with regard to funding the short obligations of the nation, altogether about 1,200 millions, and now rapidly maturing. It is understood that the Secretary expects to get a 5 per cent loan taken without difficulty. The opinion in the street is that he will not be successful; that the rate offered is not enough to make the conversion prompt, cheerful and tempting. The 5 per cents will be under par with the competition all around them, and the saving of one per cent. or 12 millions per annum, is of no account in comparison with the advantage of getting the debt out of the way for a term of years, and settling the question for a long period. It is maintained that this policy will give great certainty and stability to the finances of the people as well as the government, and have a most favorable effect on the general business of the country. On the other hand, it is asserted that the attempt to get off a loan at 5 per cent. will drag, if it does not actually fail.

The Treasury Department finds its receipts so large and so reliable that it has determined to discontinue the receipt of deposits on interest, thus demonstrating its strength and saving money. Its balance in the Sub-Treasury in this city on Tuesday last was $98,985,378 89, while the Government balance in the Bank of England on the 11th of April was but a little more than twenty millions of dollars, and that in the Bank of France at the same time only between two and three millions! The superiority of our system of finance, so far as results are sought, is thus made apparent. Indeed in the example of revenue this superiority shows itself. We collect nearly 40 per cent. more annual revenue than the Imperial Government, a proof of the resources of the Country, and the cheerful patriotism of the people.

The return of the associated banks for the week ending the 28th of April, exhibit the continued ease of the market. The loans showed an increase of $2,950,629; deposits, $5,909,996; legal tenders, $2,936,334; and circulation, $531,423; with a decrease in specie of $1,251,526. The total of the specie reserves is a little below eight millions, thus showing that the banks have no fear of being called on to redeem their notes, well understanding the Government must first set the example, but taking care to increase their legal tenders, on which they can fall back in case of any difficulty.

The gold market has again declined. It fell the early part of the week 2½ per cent., so that it is evident the payment of the large sums for interest on the 1st inst., by the Treasury had some effect, and had not been discounted as was alledged by the gold operators some time in advance. Thus one after the other the predictions of the friends and champions of an inflated currency fall before the contradiction of events and facts. What new device they will adopt remains to be seen. The fall of gold puts millions of dollars in the pockets of the people, raises the value of our securities, enhances the credit of the country, and gives its money a greater purchasing power. Should we regret this? We think not. Every man who has a greenback in his pocket is richer as gold falls; while on the other hand, as it rises he grows poorer, and goes more and more into the hands of the class of dealers who take advantage of the circumstance to demand larger profits. The true and real foundation on which public and private prosperity rests, is not on the changing and speculative values of a paper currency, but on the realization of industry and labor in actual money of a fixed and reliable value; a common standard by which we may estimate our wants, our receipts and our gains. All property, to be permanent, must be adjusted by this measure. The general stock market has improved in firmness of tone.

We observe that the foreign holders of the confederate cotton bonds have made an effort to obtain relief from the United States Government, under the assurance of extending further pecuniary aid to the Southern States to the extent of one hundred millions of dollars. Their application having been submitted by the President to the consideration of the Secretary of State, that functionary in a long report has utterly declined to listen to the application, and in a very able manner demolished the whole scheme, leaving not a wreck of it behind. Mr. SEWARD is displaying in a new field all this well known ability on other topics. Age seems as yet to have in no way impaired his rhetoric or powers of analysis. We have not been in the practice of eulogizing Mr. Seward, but we cannot withhold our approbation when he is as clever and successful as he has shown himself to be on the Mexican question, and on the present occasion.

In our last number we mentioned the circumstance, that flour was being imported into this country at a profit. We learn that not less than five or six cargoes of the French article are on their way to the United States. It is worth in Liverpool, and sells for 23 to 24 stg. per bbl., of 196 lbs. At $10 per bbl here, it will pay a profit of 5 stg. per bbl., exclusive of duty and charges. It is rather disgraceful to this country that it cannot supply itself with its own bread. We are, however, happy to state that the wheat crop of Wisconsin at least promises to be unusually large the present year, and so in the grain regions of Pennsylvania.

The New York exports, exclusive of specie, for the week ending May 1st, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,008,843	$4,718,633
Prev. reported	60,116,159	79,464,892
Since January 1	$62,125,002	$84,183,526

The New York imports compare as follows:

	1865.	1866.
Dry goods	$425,924	$1,906 886
Gen. merchandise	696,636	4,322,749
Total for the week	$1,122,560	$6,229,635
Prev. reported	43,765,244	110,739,557
Since January 1	$44,887,804	$116,969,192

Exchange took an upward rise on the late foreign news, but we think it will settle back to the old figures. The large supplies of cotton and the certainty of a heavy crop the present year must keep it very nearly where it now is.

The Costa Rica brought on Tuesday from Aspinwall, $1,318,270 California gold. The receipts for the present year from that quarter, from January to May 1st, are $12,078,929, against $7,471,294 for the same period the past year, showing an increased importation of $4,607,635. This year's supply will undoubtedly be a large one.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	April 1, 1866.	May 1, 1866.
Debt bearing int. in coin.	$1,180,236,341 80	$1,186,092,841 80
Debt bearing interest in currency..	1,186,207,011 36	1,188,313,544 62
Matured debt not presented.....	930,679 64	877,729 64
Debt bearing no interest.	460,419,864 02	452,392,755 54
Total.	$2,827,793,896 82	$2,827,676,871 60
Coin in Treasury.....	$62,069,700 80	$76,676,407 02
Currency ...	60,077,680 01	61,310,621 80
	$122,147,380 81	$137,987,028 82
Debt less cash in the Treasury.....	$2,705,646,516 01	$2,689,689,842 78

The total debt shows a decrease since the 1st of April, of $117,025 22. The balance in the Treasury shows an increase, as compared with April 1st, of $15,839,648 01. Deducting the amount on hand from the aggregate debt, both on the 1st of April and the 1st of May, the decrease of debt would be $15,956,673 23. The total debt on the 31st of August last, stood at $2,757,689,571 43. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt, both on the 31st of August, 1865, and the 1st of May, 1866, and the actual increase in the Public Debt since that period has been $20,218,326 48. Omitting the cash in the Treasury in August last, the result will be about as the *Times* stated it in its article of Thursday last, viz: "A net reduction in eight months of $68,091,348." Not taking into account the cash in the Treasury in either instance, the total debt would show an increase since August 31, 1865, of $70,104,325 34.

Smithfield Gold Mining Company.

It is known that during late years we have frequently called the attention of our readers to the great mineral wealth of Colorado, and have advised capitalists to turn their attention in that direction. We have before us a pamphlet showing the formation of a Company called the Smithfield Gold Mining Company, intended to operate on mines in Gilpin Co., with a capital of $400,000 and 100,000 shares with its principal office at 48 Broad street, New York. The President is Edwin Chapin, and the financial agent and General Superintendent is G. D. Chapman, of the firm of Little, Chapman & Co., who will receive subscriptions for the stock. The pamphlet issued by the company contains a brief account of Colorado, testimonials as to the mineral wealth of the country, description of the mines and location, proposed operations, different processes in use for the reduction of the ores, and the articles of association, all very interesting and satisfactory. See advertisement.

Hoffman Rosendale Cement.

The Rosendale Cement made by the Lawrence Cement Co., and sold at 68 William street, is advertised in another column. It is the standard article of its kind in use at the Navy Yard, Brooklyn, and is admirably adapted to a large variety of work, indispensable in the construction of railways, bridges and docks.

Union Pacific Railroad.

The message of the President to Congress submitting a communication from the Secretary of the Interior in relation to the Union Pacific Railroad Company relates to the Eastern Division, or Kansas Branch, of which John D. Perry is President. It appears from this communication that "the company were required to complete one hundred miles of their road within three years after their acceptance of the conditions of the original act of Congress. This period expired December 22, 1865. Sixty-two miles had been previously accepted by the Government, and since that date an additional section of twenty-three miles has been completed. Commissioners appointed for the purpose have examined and reported upon it, and an application has been made for its acceptance. The failure to complete one hundred miles of the road within the period prescribed renders it questionable whether the executive officers of the Government are authorized to issue the bonds and patents to which the company would be entitled if this, as well as other requirements of the act, had been observed. This failure may to some extent be ascribed to the financial condition of the country incident to the recent civil war. As this company appear to be engaged in the energetic prosecution of the work, and manifest a disposition to comply with the conditions of the grant, the President recommends that the time for completing that part of the road be extended, and that authority be given for the issue of bonds and patents on account of the section now offered for acceptance, notwithstanding the failure, should the company in other respects be thereunto entitled."

The Union Pacific Railroad proper, of which General Dix is president, is required to complete one hundred miles of track by the 27th of June next. Sixty-five miles have been accepted by the government; about seventy-three miles have been finished, and the company is laying one mile of track per day. The requirements of the law will be complied with by the 10th of June at farthest.

Railroad from La Crosse to Winona.

A meeting of the corporators of the La Crosse Trempeleau and Prescott Railroad was held in Milwaukee on the 20th ult., when a complete reorganization took place. The following is the new Board of Directors:

Angus Smith, President, Alex. Mitchell, and S. S. Merrill, Milwaukee; Jesse Hoyt, A. H. Barney, Russell Sage, and W. S. Garnee, New York.

It is the intention of the company, as now organized, to proceed without delay to the construction of the road, from a point three or four miles east of La Crosse *via* Trempeleau, to Winona.

☞ The Baltimore and Ohio Railroad Company has just completed arrangements to forward freight to Alexandria, Lynchburg, Knoxville, Dalton and Atlanta, and to points on the Orange and Alexandria, East Tennessee and Virginia, East Tennessee and Georgia, and Western and Atlantic railroads.

☞ It appears that the Government owns $200,000 worth of stock in the Dismal Swamp Canal, $450,000 in the Chesapeake and Delaware Canal, $1,000,000 in the Chesapeake and Ohio Canal, and $300,000 in the Alexandria Canal companies.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad, for the week ending April 21, 1866.... $10,652 67
Corresponding week previous year.... 7,715 67

Increase..... $2,937 00

Receipts from Jan. 1, to April 21:
1866 ..... $149,041 09
1865 ..... 136,650 88

Increase $12,390 21

The traffic of the Great Western Railway of Canada, for the week ending April 27th, 1866, were $71,717 09
Corresponding week of 1865 ..... 66,895 76

Increase..... $4,821 32

The earnings of the Grand Trunk Railway of Canada for the week ending April 21st, 1866, were $125,327 00
Corresponding week of previous year.. 124.210 00

Increase $1,117 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in April, 1866 .. $19,053 00
Corresponding week previous year.... 16,849 79

Increase..... $2,203 21

Commencing 1st Jan. 1866.. ..... $318,615 00
Commencing 1st Jan. 1865..... 333,424 63

Decrease..... $14,809 63

The earnings of the Chicago and Great Eastern Railway for 8d week in April were.... $25,639 78
Same period last year..... 15,620 30

Increase in 1866..... $10,019 48

The earnings of the Michigan Central Railroad for the 3d week in April, 1866, were ... $80,107 33
Corresponding week of previous year.. 71,020 77

Increase..... $9,086 56

The earnings of the Chicago and Alton Railroad for the third week in April, 1865, were $75,573 00
Corresponding period previous year.. 58,720 00

Increase..... $16,853 00

The earnings of the Chicago and Rock Island Railroad for the 3rd week in April, 1866, were $50,574 00
Corresponding week of previous year.. 42,693 00

Increase..... $7,881 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Apr., 1866, were..... $98,593 34
Corresponding week of 1865 ..... 75,897 22

Increase..... $22,696 12

Commerce of Baltimore.

The following statement has been furnished by the collector of the port, of the number of vessels, American and foreign, cleared and entered at Baltimore since 1862, inclusive:

	American		Foreign	
	Cleared.	Entered.	Cleared.	Enter'd.
1862.....	3,049	1,013	169	162
1863.....	4,340	1,545	193	190
1864.....	3,644	2,636	235	213
1865.....	3,944	3,167	231	271
Janu'ry,'66	154	160	25	20
	15,131	8,521	853	856

The above shows the total number of 25,361 vessels, American and foreign, entered and cleared during the period indicated, with generally a gradual progression, the value of which is especially shown, as regards foreign trade by the figures from the custom house as to the customs receipts. The increase of import duties indicates an advance in foreign trade of over two millions in 1864, three millions in 1865, with like encouragement for the current year as attested by the figures for January, February and March. The amount of duties collected from importations in 1862, was $1,963,460 24; in 1863, $1,956,959 27; in 1864, $2,207,209 15; in 1865, $3,039,597 64; in 1866—January, $318,192 73; February, $322,549 83, and March, $318,085 01—total, $9,588,827 57.

Railroad Prospects in Virginia.

By a law passed at the late session of the Virginia Legislature, the charter of the Covington and Ohio Railroad Company, a great unfinished line projected to reach the Ohio river across that State, is shortly to be sold at the best rates attainable, to any competent parties who will agree to contract to complete the line within three years. The Staunton *Vindicator* says it learns from the best authority that capitalists of New York and Liverpool are willing to accept the charter on these terms, and it adds:

We are pleased to learn also that the president of the Baltimore and Ohio Railroad Company has expressed his willingness to lend the sum of $200,000 to the Manassas Gap Railroad Company to be expended in the construction of a railroad from Winchester to Strasburg, for which the Legislature granted a charter at the last session to the Manassas Gap Railroad Company. We have also been informed that the Manassas Gap Railroad Company report that they have rails sufficient to lay the road from Strasburg to within fifteen miles of Harrisonburg. The Baltimore and Ohio Railroad Company will have their engineers here in a short time to survey the road from Harrisonburg to Salem. We are greatly encouraged to hope that arrangements will be made before long which will ensure the construction of the Valley railroad from Harrisonburg to Salem.

Railroad Legislation for the State of New York.

We have selected from the numerous acts, passed by the Legislature during its recent session, the following as having particular reference to the Railroads and other internal improvements of the State:

TITLES OF ACTS.

608. To authorize the town of Nelson, county of Madison, to raise money for surveying a railroad through said town.

620. To authorize the Warwick Valley Railroad Company to extend their railroad to the line of the State of New York.

624. To authorize the towns of Wilna, Champion, Rutland, Watertown, Houndsfield, Philadelphia, Theresa, Clayton, Alexandria, Orleans, Brownville, Antwerp, Pamelia and Le Ray in the county of Jefferson, and the towns of Greig, Watson, New Bremen and Croghan in the county of Lewis, to issue bonds and subscribe and take for said towns capital stock in the Utica and Black River Railroad Company.

625. To authorize the towns in the counties of Jefferson and Lewis to issue bonds and take stock in the Black River Valley Railroad, or in any other company now organized or that shall be legally organized within two years after the passage of this act, for the purpose of building a railroad from the vicinity of Boonville, Oneida county northwesterly through or into both or either of said counties to the navigable waters of Lake Ontario.

635. For the incorporation of the Skaneateles Railroad Company and to authorize the same to construct and operate a railroad from the village of Skaneateles to Skaneateles Junction.

645. To facilitate the construction of the Ithaca and Towanda Railroad and to authorize towns to subscribe to the capital stock thereof.

648. To authorize certain towns in the counties of Ulster, Delaware, Greene and Schoharie to issue bonds and take stock in the Rondout and Oswego Railroad.

649. To provide for the extension of the Chenango canal, pursuant to chapter 115 of the laws of 1863.

659. To authorize the construction of a railroad from the village of Horseheads to the city of Elmira, in the county of Chemung, and in and through the streets of said village and city.

662. To facilitate the construction of the Skaneateles Railroad and to regulate the weight of rails for the same.

664. In relation to the Utica, Chenango and Susquehanna Valley Railroad Company, empowering it to apply for appraisal of land on complying with certain conditions.

672. For the consolidation of the Buffalo and Washington Railroad Company with the Sinnomahoning Portage Railroad Company of Pennsylvania.

680. For the relief of the Brooklyn City and Newtown Railroad Company.

689. To amend an act entitled "An act to incorporate the Malden Railroad Company," passed May 5, 1863.

695. In relation to the safe keeping and filling of assets to town subsciptions to facilitate the completion or construction of certain railroads in this State.

697. Supplementary to the act entitled "An act to authorize the formation of railroad corporations and to regulate the same," passed April 2, 1850.

738. To authorize the construction of a railroad on Hudson avenue and other streets and avenues in the city of Brooklyn.

749. To authorize the formation of a Railroad Company from the village of Hempstead to the village of Jamaica, in the County of Queens.

27. To amend the charter of the Ogdensburg and Lake Champlain Railroad Company.

33. To authorize a survey of the Hudson River from Troy to Fort Edward, and also of the Champlain canal, from Troy to Whitehall.

34. To amend an act to authorize the construction of a railroad from Dunkirk to Fredonia passed April 21, 1864.

46. In relation to the connection between the Plattsburgh and Montreal Railroad and the Ogdensburgh and Lake Champlain Railroad Company.

50. To authorize the city of Utica to take stock in the Utica, Chenango and Susquehanna Valley Railroads and to sell its bonds to provide for the payment thereof.

60. Making appropriations for the payment of the principal and interest of the Canal Debt commencing on the first day of October, 1866, and to provide for the payment of the debt contracted under section 10 of article 7 of the Constitution.

80. To amend chapter 507 of the laws of 1863, authorizing the formation of the East New York and Jamaica Railroad Company.

110. For the relief of the Kingston and Rondout Railroad Company.

135. To extend the time for the completion, and to increase the capital stock of the Southside railroad of Long Island.

156. To provide for the completion of the improvement of the Champlain canal, and to increase the revenue of the Sinking Fund under section three of article seven of the Constitution, so as to make the fund sufficient to preserve the public faith.

160. To facilitate the construction of the Schoharie Valley Railroad, and to regulate the weight of rail and the fare on the same.

197. To authorize the construction of a railroad from the village of Seneca Falls to the village of Waterloo, in the County of Seneca.

304. To reappropriate money for the extension of the Chenango canal, for the improvement of the Champlain canal, and for furnishing water for

the summit of the Genesee Valley, and for building five locks on the same.

259. To amend an act entiled "An act empowering Railroad Companies to employ Police force," passed April 29, 1863, so as to include steamboat companies.

364. To authorize certain towns in the counties of Oneida, Herkimer, Madison, Otsego and Chenango to issue bonds and take stock in the Utica, Chenango and Susquehanna Valley railroad.

366. For the relief of the Brooklyn and Rockaway Beach Railroad Company.

368. Authorizing the construction of a railroad through certain streets in the city of Poughkeepsie and through certain streets and roads in the town of Poughkeepsie, in the county of Dutchess.

373. To authorize any town in the counties of Columbia or Rensselaer to aid in the completion of Lebanon Springs Railroad.

375. To further confirm certain acts of the Common Council of the city of Buffalo in relation to a Railroad in Seneca street in said city.

384. To authorize the construction of a railroad through certain streets in the city of Syracuse, and to Onondaga Valley, in the county of Onondaga.

388. In relation to the Genesee and Water street Railroad Company in Syracuse.

398. To facilitate the construction of the New York and Oswego Midland Railroad, and to authorize towns to subscribe to the capital stock thereof.

426. To permit the town of Lowville to subscribe for stock in a railroad company and to raise money to pay such subscription.

430. To facilitate the construction of the Buffalo and Oil Creek Cross Cut Railroad, and to authorize towns to subscribe to the capital stock thereof.

433. To facilitate the construction of the Southern Central Railroad, and to authorize the towns to subscribe to the capital stock thereof.

479. In relation to the Buffalo Street Railroad Company and for the relief of the same.

486. Authorizing the Plattsburgh and Montreal Railroad to reduce the number of its directors.

488. To extend the time to complete the Cherry Valley and Mohawk River Railroad and to increase the capital stock thereof.

491. To continue the improvement of the navigation of the Hudson River, to make an appropriation therefor, and to continue in office the Commissioners appointed by an act passed April 13, 1863, for the expenditure of the same.

494. To amend an act entitled "An act to incorporate the Hudson and Harlem River Canal Company," passed May 2, 1863, and the amendments thereto, passed April 21, 1864.

544. In relation to the Oswego and Rome Railroad.

546. To provide for the construction of a railroad from the city of Poughkeepsie to the Connecticut or Massachusetts line, and to authorize towns to subscribe to the capital stock thereof.

558. To authorize the construction of a railroad from the village of Carthage to the Oswegatchie river at or near Harrisville.

570. To authorize the President, Directors and Company of the Junction Canal Company to construct a railroad.

582. To amend chapter 340 of the laws of 1863 relative to a railroad in certain streets in the city of Syracuse and town of Onondaga.

Winchester and Potomac Railroad.

This well known road, which suffered so much during the war, is about being re-opened in its entire length. We learn that the track will be completed into Winchester on Wednesday, and on Thursday next passenger and freight trains will run to and from Winchester depot direct. The road is being temporarily worked under contract by the Baltimore and Ohio Company, but has an independent organization with Mr. J. H. Sherrard, of Winchester, as its President. New and substantial station buildings are being put up at Winchester, Charlestown and other points, which will add much to the beauty and completeness of the road. The completion of the road has been done by the Baltimore and Ohio Company.—*Balt. Sun*, May 2.

Pacific Railroad Enterprise.

Nothing indicates more strongly the energy of the American people, than the numerous plans now under consideration for continuing the railroads which intersect the country east of the Mississippi, across the continent to the Pacific shore. The war had hardly closed before the determination was renewed and strengthened to traverse the vast interior of the country, sparsely settled, and in many parts scarcely explored as it is, by various lines fitted to develop the resources of the newer States and Territories, and to augment the commerce of the older portion of the Union.

It has been generally conceded that there would be eventually three trunk railways to the Pacific Ocean. The first of these, which will, we hope, soon be commenced, is the Northern; but it might with propriety be called the Central, for its route will be just half way between Vera Cruz, at the southern base of the continent, on the 20th parallel, and the Arctic coast on the 70th. The line of the 45th parallel will, in reality, be the central route in situation, although it will be the northern in relation to the others. It crosses what is called the desert country, or the plains at the narrowest part, and has the advantage of river communication, more or less, through the entire distance from Lake Superior to Puget Sound. The second of the Pacific railroads is the Union, or as it is generally known, the Central, starting from Omaha, passing south of west to Fort Kearney, where it will meet a branch from St. Louis by way of Atchison; thence west to Virginia Dale, where it will connect with Denver, the capital of Colorado; by Bridger's Pass to Salt Lake City, and through the Humboldt ranges to Carson, Sacramento and San Francisco.

With regard to the southern line to the Pacific there is some conflict of opinion, and some rivalry in determining the precise course which it shall take. The original Southern Pacific Railroad was projected to run near to the 32d parallel, and but for the civil war it would doubtless have been commenced long since. Taking Shreveport, on the Red River, as its starting point, its route was laid almost due west to El Paso, on the Rio Grande, thence through New Mexico and Arizona to San Diego, in California. It was to follow the Rio Gila, crossing the Colorado near the confluence of the two rivers. Its incorporation was pending in Congress at the time of the passage of the act of secession from the Union by the State of Texas. Its friends are now desirous to renew the efforts which were then suspended; but we believe nothing has yet been done to that end.

Another Southern line is seeking legislative aid at Washington; and, in fact, a bill has already passed the Senate giving it organization, and making to it large concessions of the public lands. It is proposed that this road shall take its departure from Springfield, in the State of Missouri, passing by way of Santa Fe through the centre of New Mexico and Arizona, on the 35th parallel, crossing the Colorado River at Williams's Fork, penetrating the Sierra Nevadas at Walker's Pass, and following the San Joaquin River to San Francisco. Of this line it may be said that it will traverse a territory, the wants of which can be equally well supplied by the more Southern line, which, like that from Lake Superior, has the advantage of valuable river navigation along its route. Mr. Bowles, in his very interesting book, "Across the Continent," tells us that the Colorado River is navigable by steamboats during the entire year for four hundred miles, or to within six hundred miles of Salt Lake City; and that the merchants of Utah and the adjacent Territories expect to make this navigation available, greatly to their advantage. While the line by El Paso, by the rivers which run longitudinally, would accommodate this country to the north, it would also open a vast and fertile district, whose products by means of it could pass at once to the Mississippi River, and from thence to New Orleans, Savannah or Charleston by direct routes and thus to the cities of the North. The eastern terminus of the Springfield road would of course be at St. Louis, which is recognized also as one of the principal termini of the Union Pacific Railroad. The interest of our internal commerce would seem to be better promoted by keeping the termini of the various trans-continental railroads distinct and far apart from each other; and especially is it desirable that the Southern line should join the Mississippi River as near to its mouth as may be practicable, and thus turn to the best account the shortness of its distances between navigable rivers, and the directness of its course from ocean to ocean. Judging, therefore, for what we believe to be the best for the great system of railways now being developed, and for the highest benefit of the whole nation, we should advise postponement in the location of the Southern Pacific Railroad until circumstances shall favor its construction on the direct line from the lower Mississippi to the California coast.—*Boston Journal.*

Manassas Gap Railroad.

The Manassas Gap Railroad Company, at its late meeting in Alexandria, adopted measures which look to the sale of all the property of the company west of Strasburg, to the Valley Railroad Company. The objects sought by the Manassas Company are the extinguishment of its mortgage debt, and the providing means for the efficient equipment of the road between Strasburg and Alexandria, to which limits the Manassas Company proposes to restrict itself.

Lynchburg and Danville Railroad.

We conversed yesterday with a gentleman now in this city, who represents a number of capitalists of New York who are desirous of making investments in Southern enterprises. His attention has been attracted to the Lynchburg and Danville Railroad project, and he is now instituting inquiries concerning that proposed enterprise, with the view of taking hold of it if the inducements are such as to justfy the step.—*Lynchburg Virginian.*

☞ In the U. S. House of Representatives on the 30th ult., Mr. Garfield, of Ohio, introduced a bill to construct a continuous line of railroad from Washington to the Northwest. [This bill recites that as there will be a continuous line of railway from Washington to Cumberland, Md., when the Washington and Point of Rocks Railroad is completed, and as there is therefore a link to be filled between Cumberland and Pittsburg, it is declared by the bill that full authority be given to the Pittsburg and Connellsville Railroad Company to complete their road between Connellsville and Pittsburg, and the same is made a United States military and postal road.] Mr. Garfield also introduced a bill to aid in the construction of a railroad from Pittsburg, Pa., to Cleveland, Ohio. [This bill declares the Cleveland and Mahoning Railroad to be a military and postal road, and authorizes the company to construct its road between the two points named.] Both bills were referred to the select committee on military and postal railroads.

☞ At the annual meeting of the Michigan Southern and Northern Indiana Railroad Company held at Toledo, O., on the 26th ult., the old Board of Directors was re-elected with a single exception, viz: Jesse Hoyt in the place of Wm. Williams. Le Grand Lockwood, of New York, was elected Treasurer *vice* Henry Keep, who declined a re-election. E. B. Phillips is President, D. P. Barhydt, Secretary, and Chas. F. Hatch, General Superintendent.

The James River and Kanawha Canal Co.

The Directors of this company met in Richmond on the 18th ult., and were in session two days. The President, Colonel Ellis, laid before the Board the following letter:

"LONDON March 24, 1866.

"*Gentlemen*—I have received on the 19th instant a copy of your resolutions of the 22d February ult. In reply, I beg leave to say we accept the charter. It is difficult to say now when we will take the building of the canal. It depends, in a great degree, upon the promptness with which you will furnish us with the information and documents we want. We assure you that we are doing all in our power to meet your views. I am, with great respect, gentlemen,

"Your very obedient servant,

"E. BELLOT DES MINIERES."

The Board then passed a resolution authorizing the President "to appoint D. S. Walton, or some other competent engineer, as an assistant to the Chief Engineer, in preparing the detailed estimates, &c., of the line of the canal from Covington to the Greenbrier river;" also, a resolution authorizing the Engineer "to employ Mr. Francis Peppercorn as a draftsman for the purpose of preparing the maps of the line of the canal as located between Buchanan and Greenbrier river."

The following resolutions respecting freight were also adopted by the Board:

Resolved, That on all freight coming down the canal from Lynchburg, or beyond, to Richmond, and on all going up the canal from any point east of Richmond, to or beyond Lynchburg, there shall be a deduction of 20 per cent. from the tolls on the first and second class goods, and on manufactured tobacco, flour, corn and hay; provided, the owners of freight boats shall satisfy the toll-gatherers that they have reduced their charge for freight in each case to 12½ cents per 100 pounds on first-class goods; 10 cents per 100 pounds on second-class goods, and on manufactured tobacco; 8 cents per 100 pounds on flour and corn, and 16 cents per 100 pounds on hay, between Richmond and Lynchburg, and making a rateable reduction in existing charges to and from points on the canal beyond Lynchburg.

Resolved, That in cases above mentioned no charge shall be made for lock-toll or dockage.

The President, in accordance with the resolution concerning the appointment of an assistant engineer, has appointed Mr. Walton, who is well-known for his high reputation as a hydraulic engineer. The chief engineer, in accordance with the resolution concerning the employment of a draftsman, has appointed Mr. Peppercorn.

☞ At a public meeting of the citizens of La Crosse on the 15th inst., it was *Resolved*, That the Mayor and Common Council be requested to cause an accurate survey to be made of a line of railroad from opposite La Crosse to Winona at the earliest moment possible.

☞ The last stretch of the telegraphic cable connecting Vancouver's Island with the main land was safely landed at Sadd Bay, San Juan Island, on the 24th of April; the signals were found perfect and direct communication was had with Portland and New Westminster after which Victoria was connected. Congratulatory messages were then passed from place to place.

☞ The Oshkosh (Wis.) *Northwestern* says that at a recent meeting of the citizens of that place, "there was a favorable expression by some of the most influential men to build a railroad from Oshkosh to Omro, to connect the Ripon and Milwaukee Railroad at that town."

☞ A consolidation of the earnings of the Milwaukee and Prairie du Chien Railroad with those of the Milwaukee and St. Paul Company has been effected on the following conditions: The earnings are to be managed by an Executive Committee, consisting of the President and one Director of each road. The expenses are fixed at 65 per cent. The remainder, 35 per cent., is to be divided between the two roads according to mileage, which is 235 miles, or 46 per cent. for the Prairie du Chien, and 275 miles, or 54 per cent. for the Milwaukee and St. Paul. It is immaterial, now, over which road the business goes. This will largely reduce the operating expenses of the two companies, and, of course, add thus much to the net results. By the great saving resulting from this agreement, the joint companies will be enabled to do the business of the public at reduced rates.

SALE
OF THE
Southwest Pacific Railroad,
Heretofore called the Southwest Branch of the Pacific Railroad.

OFFICE OF THE BOARD OF COMMISSIONERS FOR THE SOUTHWEST PACIFIC RAILROAD,
ST. LOUIS, MO., March 2, 1866.

THE UNDERSIGNED HEREBY GIVE PUBLIC notice that, in pursuance of an act of the General Assembly of the State of Missouri, entitled "An act to provide for the sale of certain Railroads and property by the Governor, to foreclose the State's lien thereon, and to secure an early completion of the Southwest Branch Pacific, the Platte County, the St. Louis and Iron Mountain, and the Cairo and Fulton Railroads, of Missouri," approved February 19th, 1866, the undersigned have been duly appointed, confirmed, qualified and established a Board of Commissioners, under the terms and provisions of said act, with full authority to take possession of, manage and operate said Southwest Pacific Railroad, (heretofore called the Southwest Branch of the Pacific Railroad,) and to buy in and resell, or to sell and dispose of the same to others, with all and singular, the lands heretofore appropriated to the construction of said railroad and belonging to the Pacific Railroad, for the use and benefit of said Southwest Branch, at the time of its default, as provided by the act of said General Assembly, entitled "An act to accept a grant of land made to the State of Missouri by the Congress of the United States, to aid in the construction of certain railroads in this State, and to apply a portion thereof to the Pacific Railroad," approved December 25th, 1852; also, with all and singular the rolling stock and other personal property, machine shops, depots, real estate, leasehold or other interest therein, and all the rights, privileges and franchises to said Southwest Pacific Railroad (heretofore known as said Southwest Branch of the Pacific Railroad) appertaining or in any wise belonging.

And the undersigned, Commissioners as aforesaid, in further pursuance of the terms said act, approved February 19th, 1866, do hereby invite written and sealed proposals for the purchase of said Southwest Pacific Railroad, (heretofore known as the Southwest Branch of the Pacific Railroad,) and all the other property, appurtenances, privileges and franchises aforesaid; in which proposals must be stated the price bid for the same, and that such proposal is based upon the following terms and conditions, viz:

First, The price or consideration bid, shall be payable as follows: One-fourth on closing the contract, and the balance in five equal annual instalments; the first instalment payable in one year, the second in two, the third in three, the fourth in four, and the fifth in five years thereafter, with six per cent. interest on deferred payments, payable annually; provided that all sums bid, may be paid at any time, in either cash or the bonds or other liabilities of the State or bonds guaranteed by the State.

Second, The roads and all rolling stock belonging thereto, shall be kept in good serviceable condition, during the progress of the work, to completion of said roads.

Third, The said Southwest Pacific Railroad (formerly known as the Southwest Branch of the Pacific Railroad) shall be finished to a point opposite the town of Lebanon, in Laclede county, within three years; to the town of Springfield in Greene county, within four years, and to the western line of the State, in five years after the date of sale; and that if the bid be accepted, the bidder or bidders shall expend at least five hundred thousand dollars in each and every year between the date of sale and date fixed for the completion aforesaid in the work upon the graduation, masonry or superstructure of said extension. Provided, that the faithful annual expenditures required as aforesaid, shall entitle the Company to an extension of time of payment of principal of purchase money due, that year, until two years after maturity of last instalment; and provided, that an annual statement of expenditures on the road shall be made under oath by the Treasurer and two Directors thereof, and filed with the Secretary of State.

Proposals will be received until the 9th day of May, A. D., 1866.

They must be directed to P. Jos. Osterhaus President of the Board of Commissioners of the Southwest Pacific Railroad, St. Louis, Mo., and endorsed "Proposals for purchase of Southwest Pacific Railroad."

Awards must be approved by the Governor before they will be binding upon the State.

The undersigned Commissioners, as aforesaid, reserve the right to reject any and all proposals not satisfactory.

Copies of the act, approved February 19th, 1866, under which this Board is acting, can be obtained upon application to the Commissioners.

As soon as practicable a catalogue of the rolling stock and personal property to be sold, will be issued, and can also be had upon application to the Commissioners.

P. JOS. OSTERHAUS,
ROBT. J. McELHANY,
A. W. MAUPIN,
Board of Commissioners.

St. Louis, March 2d, 1866. 8t11

"THE CORK CAR SPRING COMPANY OF PHILADA."

OFFERS TO RAILROAD COMPANIES AND CAR BUILDERS, THEIR

CORK SPRINGS,

FOR FREIGHT AND PASSENGER CARS, TENDERS, &C.,

in the belief that they will be found to be the most **ELASTIC, LIGHTEST AND CHEAPEST SPRING** yet offered.

By their method of preparing and subjecting the Cork to a heavy Hydraulic pressure, it is greatly reduced in bulk from its original condition, and is not liable thereafter to lose its set.

After being thus prepared, they are soaked or boiled in oil or molasses and permanently reduced about two-thirds in bulk, when an action of 2 to 4 inches can be obtained for these springs, and they will be found to retain a greater elasticity under pressure, than any spring, excepting the Elliptic Steel Spring, which is much more expensive in its cost. They ask a trial under the belief that they will meet with the entire approval of Rail Road men needing an **EFFICIENT AND CHEAP** spring. They will be made to any external shape, but it is recommended whenever possible, to give an over all measurement of 7 to 9 inches in heighth and 8 to 10 inches in diameter.

PRICES AND DESCRIPTION.

No. 1,	10	in.	Diameter,	9	in.	overall,	$40	per sett of	4	Springs.	No. 5,	7½	in.	Diameter,	6½	in.	overall,	$30	per sett of	4	Springs.

The Fisheries of Maine.

We have recently read with interest an article in the Boston *Journal*, a paper we habitually like, on the fisheries of the State of Maine, and was not before aware of their great importance. The general subject has always attracted the attention of those political economists and statesmen who have from time to time influenced the conduct of our public affairs, and mere politicians have seen in it great influences to bear on the tranquillity of our foreign relations. The census report of 1860 gives us some idea of the extent and value of our fisheries. The States engaged in them were Maine, New Hampshire, Massachusetts, Rhode Island, New York, New Jersey, Maryland, Indiana, Michigan, Wisconsin, Virginia, North Carolina, Florida, Texas, California, Oregon and the Territory of Washington. The value of the codfish, mackerel, &c., annually taken by the Maine fishermen was $1,050,000, of shad by those of New Hampshire, $64,500, of the whale by those of Massachusetts, $6,526,238, and of codfish and mackerel, $2,774,204. Of the whale the Rhode Islanders took the value of $246,350, and of codfish and mackerel, $62,400. The New York fishermen took $14,955, of codfish and mackerel, of shad, $6,815, and of white fish, $36,000. Of oysters they dredged to the value of $93,270. The New Jersey fisheries were of the value, in shad, $41,617, and $167,660 in oysters. Maryland reported $5,800 in shad, and $15,305 in oysters, Indiana, $17,500 in white fish, Michigan, $250,467 of the same, and Wisconsin, $83,512 of the same kind of fish also. Virginia returned $33,600 as the value of her shad fishery, and $53,145 of the oyster trade. Florida, $68,952 of shad. Texas, $6,093 of oysters, Oregon, $13,450 of salmon, California, $18,000 of whales, $77,000 of white fish, $18,950 of salmon, and Washington Territory $18,900 of salmon, and $44,597 of oysters.

It appears that in the aggregate product of the fisheries, there was an increase of 28.5 in their value as ascertained in 1850, ten years before, and the total value in 1860 was, (including oysters, $382,170, and supposed to be far under the real value, and $7,521,588 as the product of the whaling business,) $12,294,092.

The port of Gloucester which is the principal distributing fish market in the Union, has risen to the third rank among the New England ports. Massachusetts stands first among the fishing States, and Maine is second, and not far behind. The value of the codfish, mackerel and herring, being $1,050,755 as already stated, North Carolina catches the most shad, New Jersey, New York and Virginia take the most oysters.

Maine possesses in many respects a decided superiority over all the other Atlantic States. Her coast including bays and harbors, coves and indentations is three thousand miles in lineal extent. The interior waters are also numerous and extensive. Thus the county of Kennebec, besides its rivers and streams has forty-nine lakes and ponds, many of them of considerable size. The seaboard fishing besides shad, codfish and mackerel, embraces the following kinds, the menhaden or pogey, taken principally for the oil and as a fertilizer, the herring, caught, pickled and smoked in immense quantities, the striped bass or rock fish, the horse mackerel, haddock, blue fish, frost and white perch, the blue back trout and the salmon are obtained in various parts of the interior.

It appears that there is a State office which has the inspection of the fisheries, and from returns in 1862-'64 and 1865, several years later than the census, we take the following statement:

In the year 1862 the number of barrels of pickled fish that were inspected was of herring, 1,134 bbls.; cod, 624; haddock, 1,047; mess shad, 548; swordfish, 6; alewives, 62; napes and fins, 13; tongues and sounds, 14; menhaden, 95; boxes of smoked herring, 12,840.

In 1864, as follows: shad, 514½ bbls.; herring, 2871¼; swordfish, 28; haddock, 859; cod, 183; blue fish, 225.

In 1865, as follows: shad, 1,039 bbls.; herring, 16,580½; tongues and sounds, 38; swordfish, 19; haddock, 1,116; alewives, 3; menhaden, 1,830; cod, 558; napes and fins, 4.

The number of barrels of inspected mackerel returned in 1862, was 51,947½.

In 1864 and 1865 the returns were as follows:

	1864. Bbls.	1865. Bbls.
Belfast	1,624½	373
Boothbay	1,154½	4,001½
Bucksport	.....	759
Camden	545¼	2,450
Cranberry Isle	199	.....
Deer Isle	10,303½	9,032
Eastport	465	145½
Frankfort Mills	.....	490
Harpswell	.....	1,175
Lubec	31	.....
Matinious	239½	4½
North Haven	1,256	682
Orland	347	99½
Portland	27,766⅜	30,438⅜
Southport	5,606⅜	3,662¼
Swan's Isle	215	359
Vinalhaven	44	247
Westport	.....	377¼
Total	49,797½	54,215¾

It is understood that there is an evident decrease in the supply of fish in the interior waters, attributable to the construction of dams and mills which interfere with the haunts and habits of the fish. It is also understood that though the oyster was once abundant on the coast of Maine, at least one kind, there is now no supply whatever beyond that obtained from Southern beds, by transportation. It is to be regretted that some steps have not been taken by the present Congress to arrange the fishery question with Great Britain, now at loose ends in consequence of the termination of the reciprocity treaty. Maine and Massachusetts as well as New Hampshire have a direct interest in the deep sea fisheries and the bank fisheries.

It is well understood by persons most familiar with the interests, wishes and policy of the maritime British provinces, that they would be willing to give us the right of fishing and drying our fish, as engaged under the treaty of 1854, if we would admit the coal, plaster and lumber of these provinces into the United States at a moderate duty. But statesmanship is ignored for partizanship, and the very States that should have influence enough to secure these commercial advantages are represented in Congress by mere partizans and party men. So Maine and Massachusetts will find that fishing in troubled waters will not pay in the end.

Debt of Milwaukee.

From the Report of the Comptroller we learn that on the 22d of March ult., there was in the Treasury an actual balance of income over expenditures for the past year of $636 49. The bonded and floating indebtedness of the city is stated by the Comptroller to be as follows:

Old bonds issued for school houses, fire department, dredging, bridges, redemption and sinking fund	$49,000 00
Ward bonds	3,000 00
Readjustment bonds	791,000 00
Readjustment scrip	7,445 93
Total	$850,445 93
Add on bonded debt, not readjusted and still due to June 1, 1861, (when readjustment act took effect)	5,000 00
Old Treasury warrants outstanding, judgments and unsettled claims, etc.	148,407 11
Total	$1,003,853 04

RAILROAD BONDS.

Total issue to railroad companies	$1,614,000 00
Deduct amount to Beloit and Superior Railroad Companies, declared void by United States Court	200,000 00
	$1,414,000 00
Of these bonds there have been retired	890,500 00
Leaving outstanding of legal bonds issued	$523,500 00

Which are all amply secured by mortgages upon the several roads to which they were issued, and the interest promptly paid by the different companies.

On the first day of June proximo there will be retired of the readjustment bonds $24,000 in amount, pursuant to the provisions of the law creating them; making an aggregate of $120,000 of old city indebtedness redeemed in cash during the past four years, and without the incurring of any new debt.

Lake Superior Copper Mines.

A writer in the Detroit *Post* states that the amount of capital invested in the Lake Superior Copper Mines is about $30,000,000, while the present market value of the stock is not over $10,000,000—which depreciation he attributes to the pressure of taxes, and the high price of labor, supplies, &c. The product of copper increased from $8,000,000, in 1862, to $15,000,000 in 1863; but that of 1865 will not exceed $12,000,000, and a still further decrease is anticipated. The same writer avers that it would not be difficult to prove that the losses in the Lake Superior mines, during the last year, have exceeded all the capital invested in foreign ores. The heavy taxes imposed by Government on domestic copper must be met by corresponding duties on the imported article, in order to render copper mining at all profitable.

Atlantic and Great Western Railway.

The annual meeting of the share and bondholders of this company was held in London on the 29th of March. From the reports and statements of accounts which was presented we learn that the traffic receipts for the year ending December 31, 1865 (exclusive of Oil Creek Railway earnings) were:

Quarter ending.	Miles worked.	Receipts from freight.	Receipts from pass.	Total receipts.	Equal per mile per annum to	Per cent of expenses.	Earnings less expenses.	Equal to a net profit per annum of
March	322	$808,847	$260,150	$1,068,997	$18,279			
June	322	814,816	497,521	1,238,337	13,383			
Sept.	490	1,095,157	536,790	1,631,947	13,322			
Dec.	490	1,211,951	660,001	1,871,952	15,280			
		$3,956,771	$1,854,462	$5,811,233			$2,125,200	$3,686,033
March		$788,865			9,800	73.79		
June		897,571			11,150	72.48		
Sept.		924,692			7,548	56.66		
Dec.		1,074,905			8,774	57.42		
							797,047	3,188,188

The receipts of the company from all sources from January 1, to Sept. 30, 1865 were as follows:

Amount of traffic for December, 1864, received in 1865		$14,112 00
Freight earnings		2,744,820 38
Passenger traffic		1,145,052 12
Car service		46,571 36
Other sources, including rents		2,837 12
		$3,953,392 98
Expenditures, viz:		
Working expenses	$2,611,128 16	
Rent of Cleveland and Mahoning Railway for nine months	204,804 00	
		2,815,932 16
Balance to capital		$1,137,460 82

From date of consolidation in October, 1865, to December 31, 1865, the receipts were:

From freight earnings		$1,211,950 80
" passenger traffic		612,956 35
" car service		43,113 69
" other sources, including rents		3,930 89
		$1,871,951 73
Expenditures, viz:		
Working expenses	$1,074,905 00	
Rent of Cleveland and Mahoning Railway for three months	69,423 00	
Three months' interest on $19,358,000 Divisional and Consolidated bonds payable in sterling	406,158 00	
Three months' interest on $6,842,000 bonds payable in currency	119,735 00	
Three months' interest on $1,919,000 preferred stock	33,582 00	
		1,703,808 00
Balance to capital		$168,148 73

We give elsewhere the Report of Sir Morton Peto, Chairman of the Board of Control. The President, S. S. L'Hommedieu, Esq., in his report, says:

The earnings for the year have more than realized expectations, and when it is considered that the road was not opened fully to Dayton and Cincinnati until May, we think its friends have much cause of gratification. It may be said with truth that there is no similar instance in the history of the roads of this or any other country where as large earnings were obtained the first year on the same number of miles.

The through passenger traffic of the broad gauge line between New York, Cincinnati, St. Louis, Chicago, and the Great West, should be five fold greater than it has been the past eight months. All that is requisite to accomplish this result is for the Erie Company to agree to run carriages through to Cincinnati and Cleveland over the Atlantic and Great Western Railway without change at Salamanca as at present, on their own independent time.

In adopting a policy of this kind, they would gain five to one over their route by way of Dunkirk, where a change of cars from the broad to the narrow gauge necessarily takes place.

The route to Cincinnati, Louisville, and the south-west, *via* Erie and Dunkirk, has never been a favorite one with the traveling public, nor do we think it can be made so. The recent opening of the short line to Cincinnati, by way of Pittsburg and the Pan Handle Road, should prompt our friends of the Erie to use and give preference to this their best line to Cincinnati and the south-west.

The fact that the Atlantic and Great Western Railway with the Erie presents a uniform 6 feet gauge, and the general expectation and desire of the travelling public that it should be used as a great through passenger route, would seem to be conclusive as to the proper policy to be pursued.

The amount of earnings from freight the past year would have been greater had the road been sufficiently supplied with sidings and rolling stock. These are now being furnished, and we reasonably anticipate an important increase of traffic the present year.

The oil business of the road is steadily on the increase. Two short but important lines of road, one from Pit Hole to Oil City, and the other from Pit Hole to Reno station will be completed within the next sixty days, thus saving the shipper the great expense of waggoning the oil to our line of road. Other arrangements have been made with oil tank companies for supplying cars to carry oil in bulk, which, it is believed, will be of advantage to the public, the shipper, and the railway companies.

The completion of the branch to Buffalo is a matter almost of vital importance to this road. As we are now situated, we are confined in a measure to a business with but one of the important cities of the East. The trade and passenger traffic between the West and New England, together with that of Western districts of the State of New York, Niagara Falls, and Canada, is not second to that with the City of New York, which alone we now possess.

Until this branch to Buffalo is opened, we are shut out of a large and profitable traffic. I submit a memorial from the leading merchants of that flourishing city on the subject.

Since the last annual statement an important measure has been accomplished in the consolidation of our several Railway Companies in New York, Pennsylvania and Ohio into one corporation.

It is only necessary to mention the fact; the wisdom of the measure will be clear to all—it was determined at once to issue Consolidated Securities, for conversion of all previous issues of Bonds and Shares by the several divisions, and to provide means for the completion of the works.

The New Lisbon Branch from Niles to New Lisbon, and the Silver Creek Branch from Wadsworth, both in the State of Ohio, will bring a great accession of coal and iron traffic.

In order to secure a new outlet to New York, a lease of the Morris and Essex Railway for 999 years has been entered into in order to secure an entrance into Philadelphia.

The Catawissa Railway, the key to these new routes into New York and Philadelphia was also leased by the Western Central Railway, of Pennsylvania under the guarantee of the Atlantic and Great Western; but this issue has met with serious opposition from the Pennsylvania Central Railway, which may cause important changes to be made in the proposed arrangements; but it has not been considered necessary to suspend the great improvements making in the Morris and Essex Railway, to fit it for the enormous coal traffic which we shall unquestionably receive, whether the Catawissa lease be sustained or set aside, as soon as the piers and docks at New York are completed.

The Oil Creek Railway having passed from its close connection with the Atlantic and Great Western into other hands, its earnings are not now included in our receipts. The direct connections made with Oil City by the extension of the Franklin Branch of the Atlantic and Great Western Railway and the completion of the two short railways leading to the heart of the oil regions, will more than compensate for our loss of control over the Oil Creek Railway.

The policy of our company is to cultivate amicable relations with all other companies, to interchange business with all, and to maintain with them rates to a fairly remunerative point.

From the Report of D. McLaren, Esq., General Superintendent, we learn that the number of engines owned by the company December 31, 1865, was 139, of which 121 were broad and 18 narrow gauge. The number of miles run by engines in 1865 was: by passenger engines, 712,053 by freight, 1,262,445; switching, 405,645; gravel, 160,644; fuel, 85,284; other, 21,638—total, 2,647,709, of which 2,247,256 was by broad, and 400,453 by narrow gauge engines.

The number of cars owned by the company December 31, 1865 was: passenger coaches 81; sleeping do., 6; emigrant cars, 9; post office cars, 3; baggage cars, 35; express cars, 8; caboose cars, 58; box cars, 748; stock cars, 927; flat and coal cars, 1,280—total, 3,155; of which 2,491 were broad and 664 narrow gauge. The number of miles run by cars was: passengers, etc., 3,081,552; freight, 17,785,383; gravel, 1,652,882; fuel, 1,022,184—total, 23,542,001, of which 20,670,621 was by broad and 2,871,379 by narrow gauge cars.

The Chief Engineer T. W. Kennard, Esq., reports the entire line in good condition in every respect, and that all renewals required to keep up the track in a thorough state of efficiency during the year have been made, and the same charged to transportation expenses. He then adds:

Very considerable extra accommodation in rolling stock, sidings, permanent engine houses, and machine shops, have also been completed during the year, and I am engaged in pushing forward all the requirements of the road with the greatest energy, and which will, when complete, place us in a position to commence the cattle and corn traffic, neither of which are we able now to accommodate.

Owing to the extreme severity of the weather this winter, I have not thought it advisable to press the construction of the New Lisbon and Buffalo Extensions, but all is in perfect order to resume work as soon as the weather moderates.

The materials are all in readiness for an effective and immediate execution of these latter works so important in giving us a close connection with the New York Central Railway, the Erie Canal, and the Grand Trunk and Great Western Lines of Canada.

The works on the Morris and Essex Railway, and especially the piers at New York for accommodation of the coal traffic, have made excellent progress.

It is very gratifying to me to see all my predictions of traffic so amply fulfilled; in fact, the amount is only controlled by ability to carry it.

I have pushed forward the foundations of the International Bridge, and prepared the stonework for the piers. The drawings for the superstructure I have sent to England for the approval of the Guaranteeing Companies, and the execution of the ironwork.

The bridge is the measure of time in our opening from Randolph to Buffalo, and its rapid construction cannot be overrated in importance.

The total number of shares of capital stock authorized is 600,000, viz: 540,000 common, and 60,000 preferred, at $50 each, amounting to $30,000,000; of which 230,443 common shares, and 38,380 preferred shares have been issued—the total amount of share capital issued being $13,441,150.

The total bonded debt of the company is $30,000,000, and is fully described in the "American Railroad Bond List," on page 450 of this week's issue. The stock and bonds issued December 31, 1865, were as follows:

	Stock.	Bonds.
New York Division:		
Shares	$289,150	
First mortgage bonds		$1,014,000
Second "		800,000
Pennsylvania Division:		
Shares	4,102,000	
First mortgage bonds		2,500,000
Second "		1,000,000
Franklin Branch:		
First mortgage bonds		528,000
Ohio Division:		
Shares	4,047,000	
Preferred shares	1,919,000	
First mortgage bonds		4,000,000
Second "		4,000,000
Buffalo Extension:		
Shares	3,084,000	
First mortgage bonds		2,000,000
Silver Creek:		
First mortgage bonds		300,000
Consolidated bonds		13,858,000
Totals	$13,441,150	$30,000,000

CONDENSED STATEMENT.

Share capital		$13,441,150 00
Mortgage bonds		30,000,000 00
Total		$43,441,150 00
Amount due contractors for works in progress, for rolling stock, etc.		1,796,588 50
Balance at credit of revenue Dec. 31, 1864		1,517,431 72
Do., Sept. 30, 1865	$1,137,460 82	
Do., Dec. 31, 1865	168,148 73	
		1,305,609 55
		$48,060,779 77
Amount expended in construction of 426 miles of railroad in New York, Pennsylvania and Ohio, and in making 51 miles of Cleveland and Mahoning Line into broad gauge, also amount expended on branches to this date, and interest during construction.		$46,606,474 98
Stores and materials	$795,310 49	
Surplus land in Ohio	90,024 23	
Due from other companies, and on current accounts	274,128 34	
Cash at bankers and on hand	294,841 73	
		1,454,304 79
		$48,060,779 77

In 1864 the Atlantic and Great Western Railway carried 675,028 barrels of oil, while last year the quantity carried amounted to 783,945—an increase of 108,917 barrels.

European and North American Railway.

The bill to aid in the construction of this road which is now before the Massachusetts Legislature, provides that when the road is completed from Bangor to Winn—a distance of fifty seven and a half miles—and the State of Maine shall have paid Massachusetts $200,000 now due for the purchase of lands, Massachusetts shall invest this sum in mortgage bonds of the European and North American Railway Company, payable in thirty-three years and bearing interest at six per cent. per annum. The whole issue of these mortgage bonds, of which the $200,000 is a part, is not to exceed $1,000,000, and is to constitute a first mortgage on the railway constructed or to be constructed between the town of Winn and the boundary line between Maine and New Brunswick, and also a first mortgage on all the lands, estimated to include 826,710 acres, granted by Maine to the said railway company and trustees, satisfactory to the Governor and Council of Massachusetts, are to have the lands conveyed to them, and to receive all income from said lands, and pay the same into the Treasury of Massachusetts. Whenever the company shall have completed ten miles of its road from the town of Winn in the direction of the boundary line, so that trains may pass over the same, then the Treasurer of Massachusetts is to be ordered to take mortgage bonds of the said company for additional one hundred thousand dollars, and the same amount for every additional ten miles completed, and when the whole fifty miles is finished and in running order to the boundary line then an additional amount of bonds to be taken to the amount of five thousand dollars per mile on the entire length of the road, from Winn to the boundary line, making an aggregate amount of bonds to be taken by Massachusetts of nine hundred and fifty thousand dollars.

St. Croix and Superior Railroad.

The following gentlemen have been chosen directors of this company: Henry M. Alexander, Thomas A. Scott, Samuel J. Tilden, Andrew H. Green, Jay Cady, Isaac Kiss, Ludlow Patton, Wm. Patton, Anthony W. Morse, Geo. L. Becker, Alexander T. Moore. President, H. M. Alexander; Vice President, Geo. L. Becker; Treasurer, Ludlow Patton; Secretary, Wm. Patton; Trustees for the bondholders, S. J. Tilden, W. H. Swift, and A. H. Green; Managing Director, A. W. Morse; Chief Engineer, J. C. Campbell. The office of the company has been established at No. 6 Wall St.

These gentlemen have undertaken the construction of a road from St. Paul, Minnesota, to Lake Superior, which by a lease of the Stillwater extension of the St. Paul and Pacific Railroad, will extend from St. Paul and Hudson, on Lake St. Croix (a branch of the Mississippi,) to Superior City and Bayfield. They accept the Government grant of lands for this object, made as early as the year 1856, and adopt the style of the St. Croix and Lake Superior Company. The construction of this road will furnish an outlet for the wheat and other products of Minnesota and Northwestern Wisconsin to the lakes. The project is one of moment to an important and rapidly developing region of the Northwest hitherto neglected by railway enterprise.

Trade and Tonnage of San Francisco.

A late San Francisco Circular contains the following interesting and important statements:

In the published statement of tonnage engagements at this port, for the year ending December 31, 1865, the requirements for that year had been as follows:

	No of Vessels.	Tons.
For grain freights	27	12,263
Lumber freights	41	26,018
Copper ore freights	15	9,895
Coal freights	20	12,070
California cargoes (wool, wine, &c.)	23	29,051
Guano freights	21	20,288
Miscellaneous freight	93	44,352
Total	240	153,937

There arrived also during the year 30 vessels, comprising 28,540 tons, under charter, which, after discharging their cargoes, proceeded to ports of loading. In addition, 32 vessels, 23,781 tons, left the port without having concluded any freight engagement—making the total tonnage of the port (exclusive of coasters and regular steam lines), 302 vessels of, in all, 206,258 tons, registered. This, then, having been the amount of our requirements during the last season, the question arises how much will we need during the twelve months commencing July 1, 1866.

	Tons.
The crop of wheat this season will in all probability be the largest ever harvested in this State. The surplus above our own requirements will) if nothing occurs to injure the now growing crop) amount to	200,000
Of old crop of barley we have still a large surplus, and if to this be added the surplus of the growing crop, we shall require to get rid of the surplus of that grain	120,000
The tonnage required to carry copper ore will be certainly 33⅓ per cent. more than last year, or say	13,193
For lumber transport it is fair to say that we shall require full as much as in 1865, say	26,018
The amount of tonnage required for export of California produce, wine wool, ores, &c., will undoubtedly be 25 per cent. larger than last year, the wool crop alone being double what it then was, say	36,316
In coal freights we may have no great increase, but we shall require as much as last year, say	12,070
The demand for guano being regulated abroad, we have no right to speculate for an increase, so we place it the same as last year	20,288
For miscellaneous cargoes we estimate that ten per cent. more tonnage will be required than in 65, say	48,787
Making a grand total of	476,672

Which will be required at this port for the business of the year commencing July 1, 1866. To meet this demand we find that there are now on the way to this port:

	No. of Vessels.	Tons.
From domestic Atlantic ports	25	26,380
" British ports	15	11,192
" French ports	5	3,000
" German ports	4	2,500
" Italian ports	1	500
" East India ports	3	2,000
" Australian ports	4	2,086
" Chinese ports	4	2,500
" South American ports	2	1,000
Total	63	51,158

—or about as much as under ordinary circumstances is required for the transportation of guano over and above the proportion of vessels which commonly reach us already under charter.

From our latest advices from both domestic and foreign ports, we see no reason to anticipate any considerable addition to the number of vessels or amount of tonnage on the way to this port. As far as we can now judge, the amount on the way when our harvest comes in, will be about the same as now, and there will consequently be the enormous deficiency of 425,000 tons to make up after July 1.

This condition of affairs is one which must attract the attention of shipowners and shipmasters all over the world, and we hope will meet with the most attentive consideration. There can be no doubt whatever that after the next California crop is harvested, San Francisco will present greater inducements to vessels in the way of freights and charters than any other port in the Pacific.

Journal of Railroad Law.

LIABILITY OF COMMON CARRIERS.—CONFEDERATE RAIDERS HELD TO BE PUBLIC ENEMIES.

The case of Bland *vs.* Adams Express Company, decided in the Jefferson Circuit Court of Kentucky, decided that the law holds carriers to a peculiar responsibility, admitting no excuse for the loss of goods, except an act of God, or of a public enemy, which could not have been averted or overcome. And it was further held that John Morgan and his band of confederate soldiers, constituted in May, 1862, a dublic enemy, in the technical senses and that the defendant was not liable for a package of money taken by them from a railroad train. The strife in which they were fighting was not an insurrection, but a civil war, in which the parties were belligerents, and respectively entitled to belligerent rights. The opinion of the court was delivered by

JUDGE ROBERTSON.—To a petition by Arthur Bland against the "Adams Express Company," charging the non-delivery according to consignment, of a package containing $2,279, confided by him, at the City of Louisville, on the 10th day of May, 1862, to said company, as a common carrier, to convey from said city to his consignee at the city of Nashville, it filed an answer alleging that its agent forthwith placed the said package with all its said contents in its iron safe on the railroad train then departing from Louisville to Nashville; that on the same day, John Morgan and his band of confederate soldiers, on the way, near Cave city, attacked the train, burnt most of the cars, and by irresistible armed force, robbed the safe of the said package and all its contents; and that no portion of the money so abstracted had been rescued or restored. These facts having been sufficiently proved, the circuit judge, to whom the law and the facts were submitted, dismissed the petition. And the appeal seeks the reversal of that judgment.

Public policy, and consequently the law, holds common carriers to a peculiar responsibility, extremely stringent, admitting no excuse for the loss of goods except an act of God or of a public enemy, which could not, by any proper care or available force, have been overcome or averted. No other human force than that of a public enemy will exonerate the carrier, because, otherwise, he might fradulently master or combine with a force to rob himself.

The only question in this case is, was Morgans band, in the technical sense, a public enemy? And the answer depends on whether the strife in which they were fighting is a civil war. War is either international or civil, foreign or domestic. Insurrection, however violent or formidable, is not war. Civil war is preceded by insurrection, which becomes magnified and matured into war in the legitimate sense. And when so characterized, the parties are belligerents, and respectively entitled to belligerent rights. The American revolution of '76 commenced in insurrection. But the insurgent colonies soon became belligerent States. By the Declaration of Independence civil war was inaugurated, as often and authoritively recognized and adjudged. After that transforming event the American resistance was rebellion no longer, but war for liberty. The struggle in which the United States are now engaged against the seceding States, is more stupendous and quite as eventful. It is to save that which the war of independence achieved. And history records no civil war more flagrant or gigantic than that in which our country is now engaged. If this be not war, what is war, and when or where did it ever rage and desolate and destroy? It has been so treated at home and abroad—by our own government in all its departments, as well as by foreign governments—and if it be war now, it was as certainly war, and as much war, on the 10th of May, 1862.

Wherefore the Judgment is affirmed.

Atlantic and Great Western Railway.

REPORT TO THE BOND AND SHAREHOLDERS.

In submitting to the bond and shareholders in Europe of the Atlantic and Great Western Railway the subjoined accounts and the various Reports of the President, Engineer-in-Chief and General Manager, the Board of Control are enabled to congratulate the bond and shareholders upon the results of the working of the lines of the company during the year 1865.

The Board, having considered it desirable that a thorough investigation of the books and accounts of the company should be made up to the end of the year, a member of the eminent firm of accountants, Messrs. Coleman, Turquand, Youngs & Co., proceeded to New York in January, and made a searching examination into the capital, receipts and expenditures of the railway from the date of the examination by Mr. Young last year. The report is appended hereto.

The communication with Cincinnati was only completed during the summer, and for some time after, in consequence of the want of rolling stock, and the difficulties always attending the initiation of a new service, the line could only be very partially used as a through route.

The most earnest endeavors have been made to meet these difficulties. It will be seen by the return of the rolling stock of the company embraced in the report of the General Manager, that in the conrse of the year, forty-seven new engines, and no less than 559 additional carriages and wagons of various descriptions have been brought into use.

The building of additional engines, carriages and trucks, is being energetically proceeded with, in order to meet the demand for accommodation which is daily increasing throughout the whole length of the railway.

Notwithstanding the drawbacks which must always be experienced in opening out and establishing the business of an important system of lines like the Atlantic and Great Western, the amount of traffic carried and the results of the working for the year 1865 have exceeded the most sanguine expectations.

Up to the end of June the number of miles in work was 822, and the receipts upon them was equal to an amount per mile per annum of £2,-213, in the March quarter, and of £2,564, in the June quarter.

In July, 168 miles of new line had come into work; the total mileage being then 490. The Board cannot conceive any stronger indication of the value of these lines than is involved in the fact that this large average receipt per mile was fully maintained over this greatly extended mile-

age, the receipts upon the whole 490 miles having been equal to £2,220 per mile per annum in the September quarter, and £2,547, in the December quarter. These calculations are based on exchange of six dollars to the £, but at the ordinary exchange of 4s. 2d. to the dollar, the receipts would be equal to £3,183 per mile per annum.

But even more satisfactory has been the result of the opening of the new lines upon the working expenses.

In the March quarter, upon 322 miles, they were equal to £1,633 per mile per annum, or 73.79 per cent. of the gross receipts. In the June quarter, upon the same mileage, they were equal to £1,858 per mile per annum, or 72.48 per cent. of the receipts. In the September quarter, however, the expenses fell to the rate of £1,258 per mile per annum, or 56.66 per cent. of the receipts; and in the December quarter they were equal to £1,468 per mile per annum, or 57.42 per cent. of the receipts.

The effect of this alteration in the proportion of expenditure to receipt is most forcibly illustrated in the column showing the excess of receipts over expenditure; from which it appears that in the December quarter this excess was equal to a yearly profit of 3,188,188 dollars, or £531,364, at an exchange of six dollars to the pound sterling.

The apportionment of net profit at this rate to the capital invested in 1865 will be as follows—

The rent of the Mahoning line payable in currency.

The interest on the bonded debt payable at 4s. to the dollar.

The interest on the bonded debt payable in currency.

The balance being equal to a dividend of 6 per cent. per annum on the shares issued.

The certificates of debentures due in 1867 are secured collaterally by the deposit at the Bank of England of $17,877,750, of the bonds and shares, with other securities amounting in all to $20,708,750.

The receipts for January and February, 1866, show a highly satisfactory advance on the corresponding months of 1865, and with the greater facilities for working the traffic which the railway now possesses, there can be no doubt that this rate of increase will continue.

The experience gained within a few months of the opening of the line as a through communication between the East and the West, before the traffic has been fairly developed, and before the opening of the 117 additional miles comprised in the Buffalo Extension, the New Lisbon and the Silver Creek Branches, appears sufficient to justify the fullest confidence in the future prosperity of the undertaking.

The drawings and specifications of the International Bridge (to connect the American and Canadian system of railways at Buffalo) have been received from Mr. Kennard, and are now before the Directors of the Grand Trunk Railway (as one of the guaranteeing parties) for approval.

Upon a reference to the reports of the President and General Manager of the company, it will be found that they attribute a considerable loss of traffic to the want of rolling stock, siding facilities and arrangements with other companies, all of which wants are being met as rapidly as possible. Mr. L'Hommedieu, the President, points very justly to the increase of traffic which will undoubtedly arise in the present year, consequent upon the provision of additional rolling stock, the steady extension of the oil business, and the facilities being prepared for that valuable traffic by the construction of local railways to Oil City and Reno stations on the company's line. Mr. M'Laren, the General Manager, a gentleman of many years' experience, and thoroughly conversant with the traffic of the country, also says:—"In my opinion, the business to be done in the future will only be limited by the facilities we have for doing it."

The Engineer-in-Chief reports that, during the year, the road has been kept up in a thoroughly efficient state at the expense of revenue, and that considerable extra accommodation in sidings and in permanent engine houses and machine shops, has been completed within the same period.

It will be easily understood that, in the earlier days of a system so extensive as the Atlantic and Great Western, with a very numerous staff to train and bring into harmony, the same measure of economy cannot be attained as may reasonably be expected when the lines have been some time opened, when the road and works have become fully consolidated, and when the Directors and Managers have had the opportunity of arranging the various departments to the best possible advantage.

The subject of the working expenses has had careful consideration, and measures have been taken for having them rigidly checked, and kept down to the lowest figure consistent with the most efficient maintenance of the way and works, and the proper conduct of the company's business.

At the same time it is not the intention of this company to adopt the erroneous system of the principal American railways under which a considerable amount of the yearly net earnings of the line, instead of being divided amongst the shareholders is devoted to purposes properly chargeable to the capital account.

After the necessary expenditure in keeping up the way, works, and rolling stock of the Great Western Company in the highest style of efficiency, the balance of net earnings will be paid to the shareholders.

Since Mr. L'Hommedieu's report was written, the Catawissa lease has been set aside by the Pennsylvania Courts, but the Board are happy to state that cordial relations are being established with their prosperous neighbors, the Pennsylvania Central Railway, which will secure all the advantages to this railway which the Catawissa lease would have conferred.

In conclusion the Board confidently express their opinion that the traffic which is certain to accrue to the company's lines when they are further opened out, and their connections and arrangements with important neighboring systems are extended and perfected, cannot fail at a very early period to place the bond and shareholders in a highly satisfactory position as regards the value and security of their investments. And they feel that it must be considered as conclusive on this point, that with 490 miles of the road open out of 607 that a net revenue is earned in excess of the interest required for all the bonds on the entire road, and that with the opening of the remaining 117 miles and connection with the important system of line at Buffalo, the shareholders will be secured a dividend equal to the best railways in the United States.

S. Morton Peto. *Chairman Board of Control.*

London, March 26th, 1866.

Mobile and Ohio Railroad.

At the recent meeting of the stockholders of this road at Mobile, Ala., Hon. Milton Brown, the President, read a long report on the condition of the road. The report is particularly severe on the cotton agents, who are said to have done more to demoralize and mislead public opinion than any other agency in these wicked times. These agents continued to use him for their fraudulent purposes against the wishes of the company until they were stopped by order of General Thomas. The road lost during the war over $5,000,000 in rebel money and bonds.

Owing to the disloyalty of the President and Board of Directors, they could only reorganize at the close of the war through the special pardon of the President being extended to all of them. The report reflects quite severely on the conduct of the Government toward them since the war. L. J. Fleming, Chief Engineer and General Superintendent, also read a report giving an interesting history of the road during the war, and of its operations since. The earnings of the road from the 1st of May, 1865, to the 1st of January, 1866, were $1,524,675, and the expenditures $699,898. The value of the rolling stock purchased within that period was $709,955. The stock on hand April 1, was: Locomotives in running order, 40; out of order, 54; passenger cars in order, 30; out of order, 4; freight cars in order, 471; under repair, 25.

The highest prices of labor and material require high rates for freights and passengers, but they are less over this road than Southern roads generally. Arrangements have been made for selling through tickets over all the connected roads North, East and West. The additional expenditures which will be required to put the road in thoroughly good condition are estimated at $1,635,000. After the reading of the reports, resolutions of thanks to the President were unanimously adopted, and also to the Superintendent, and the convention adjourned *sine die*.—*Mobile Tribune.*

The National Debt.

The following is a correct statement of the Public Debt of the United States on the 31st of August, 1865, and the 1st of May, 1866:

	Aug. 1, 1865.	May 1, 1866.
Debt bearing int. in coin.	$1,108,310,191 80	$1,186,092,841 80
Debt bearing interest in currency..	1,274,478,103 16	1,188,313,544 62
Matured debt not presented.....	1,503,020 09	877,729 64
Debt bearing no interest.	461,616,311 51	452,392,755 54
Total.	$2,845,907,626 56	$2,827,676,871 60
Coin in Treasury.....	$45,435,771 14	$76,676,407 02
Currency ...	42,782,283 99	61,310,621 80
	$88,218,055 13	$137,987,028 82
Debt less cash in the Treasury.....	$2,757,689,571 43	$2,689,689,842 78

We give this as a correction of our statement of last week. We were led into the error from the fact that in the Shedule published in September of the debt at the close of August, unlike all subsequent statements, the "Cash in the Treasury" was deducted from the "Amount of debt not bearing interest," instead of (as in statement of 1st May,) being deducted from the "Total Debt." This shows a decrease in the debt since August 31, 1865, of $18,230,754 96; and the debt, less cash in the Treasury is $67,999,728 65 less.

The Southern Railroad.

The projectors of the Southern (N. Y.) Railroad from Utica down the Saquoit and Unadilla valleys are pushing the enterprise with considerable vigor. At a recent meeting of the Board of Directors, it was resolved to commence work as soon as the citizens of Utica subscribed the $200,000 required of them in the law bonding the city. Already stock to the amount of $160,000 has been taken, leaving but $40,000 unsubscribed for.

The town of Paris has legally determined to take $150,000 of the stock in the railroad. The town of Sangerfield has decided to take a like amount. The city of Utica had previously voted to make a municipal subscription of $500,000. But it is a condition in the law authorizing the latter that before the Common Council shall perfect the subscription, the sum of $200,000 in stock must be raised from individual citizens of that city.

☞ The Louisville and Nashville Railroad Company has loaned $300,000 to the Memphis, Clarksville and Louisville Railroad to repair and equip their line from Bowling Green, Ky., to Memphis.

American Railroad Journal.

Saturday, May 12, 1866.

Stock Exchange and Money Market.

Mr. Clark, Controller of the Currency, has again appeared in print; not this time to impair public confidence in the Treasury Department, but to confirm it. We were not aware that he had any supervision of its receipts, especially of its metallic reserves; but he claims to have an accurate knowledge of its whole resources and conduct. The following is an abstract of his last statement:

Customs, coin, $128,967,575; Internal revenue, $243,990,549; premium on gold, &c., $37,183,309; actual aggregate receipts to April 1, $410,041,232. The same ratio for the remaining three months will make the aggregate for the year, $540,000,000, without including the income tax now being assessed and to be collected within the present fiscal year, which added, will swell the amount $560,000,000. The bill lately reported by the Committee of Ways and Means, by reason of the increase of revenue that will be derived from spirits, tobacco, cotton, stamps, and licenses, and the increase that will be derived from the Southern States from sources additional to those named, will produce at least $550,000,000, notwithstanding the reduction of, say, $50,000,000 by the exemption of some articles now taxed, and the reduction of rates on others, and the probable falling off of custom duties. By the annexed estimate, the receipts from customs the present year will amount to $171,000,000. The estimate for the next year is $130,000,000. Without increasing the rates now imposed, with the exception of adding three cents per pound on cotton, the receipts for the next fiscal year will amount to or exceed—

From customs	$130,000,000
" tobacco	18,000,000
" whiskey, wine and beer	55,000,000
" cotton	50,000,000
" licenses	20,000,000
" stamps	25,000,000
" miscellaneous sources	35,000,000
Total	$333,000,000

There will be a surplus on hand on the 30th of June, the close of the present fiscal year, of $20,000,000.

Available for the year ending June 30, 1867, $533,000,000. Deduct requirements for the year, per the estimate of Secretary of the Treasury, $284,000,000, leaving a surplus over estimate of $249,000,000.

The above does not materially vary in the aggregate from the revised estimate of revenue from the sources named, made by the Revenue Commissioners. The amount is $49,000,000 more than is required, without reference to the surplus on hand on the 30th of June next, to meet all the requirements of the Government for the fiscal year ending the 30th of June, 1867. There is no necessity, therefore, for taxing any other articles, or imposing any other tax whatever, for Government purposes.

The testimony of so unwilling a witness as Mr. Clark will have more weight than if it was from one less disposed to cavil and complain.

The last report of the Secretary was however sufficiently satisfactory, without this cumulative evidence. The public debt reached its maximum on the 31st of August last, when it stood at $2,757,689,571 43; and at present it is returned at $2,689,689,842 78. The reduction in eight months has therefore been $67,999,728 65, nearly 8½ millions per month, or 102 millions per annum. At the rate of reduction made in the month of April, stated by us in our last number, it is certain that this reduction would be nearly two hundred millions per annum, and the whole debt may be cancelled before the maturity of the 6 per cents in 1881. This is an extraordinary but most gratifying prospect. This Republic has always paid its debts, and shows ample power to discharge this last and greatest one of all. The mere possibility of its being paid off in the short space of 15 years from the present time must have an important bearing on the credit of the country; and to realise it, will be the greatest financial success recorded in the history of nations. Let us be but once more united as a people, and all difficulty in this direction will vanish. We may say that we are using but half our strength at present with a divided Union; what will it be when we shall once more keep step together to its old music.

Exchange took a sudden and considerable rise the last week. This was a rise without any real cause. Our commercial relations have not changed within a week, and buyers seem to think so, for

they are holding back in their purchases with good sense. Sir MORTON PETO, in his work on the United States just published in England, but not yet republished here, asserts we understand, that the United States is a creditor not a debtor of Great Britain. In this laudatory work he praises the enterprise and extols the resources of this Country; and as he knows what he is saying, we place confidence in his opinions whenever he expresses them. Besides the shipments of specie made last week were under a million of dollars, less by several hundred thousand than came by a recent arrival from California at this port, and this notwithstanding the Government had been paying off its May dividends; and it is reasonable to suppose that the export of specie was chiefly on account of the foreign holders of our securities.

The Boston *Commercial Bulletin* contends that the ultimate value of our exports does not appear from the official tables; and gives the illustration of a cargo shipped to China, which is here entered at the market value, but which produces, a large profit at the place of sale, often 50 per cent., and this re-invested in a foreign cargo, appears a considerable sum debited to imports, when the greater part is a real profit. So that the apparent volume of trade in this transaction is really a balance in our favor when we come to the actual truth. Here is one ready solution of the problem, and a reason why exchange should not keep up.

The return of the Associated Banks of this city, for the week ending April 28, shows the following results: Increase of loans, $8,956,442; of specie, $2,671,060; of circulation, $381,897; of deposits, $7,654,729; and of legal tenders, $615,425. It will thus be perceived that the borrowers have increased in their demands very largely, and the Banks have in no way been unwilling to meet them. This looks like a renewed activity in the commercial world, and that it does not believe in the Jacksonian theory that those who trade on borrowed capital ought to break. It is a doctrine which at least is not popular or accepted in New York.

There is yet a tendency to a decline in most articles, certainly in those where the consumer has no immediate necessity to purchase. We notice that the prices of superior and fine clips of wool have fallen off within a few weeks as much as 10 to 15 cents per lb., and those speculators who have millions of pounds on hand will find it a serious matter to make both ends meet, without considerable loss. Flour and wheat, without which the human family could not well be fed, are still dear. White Michigan wheat brings $3 per bushel, and it is no wonder therefore that the price of the best flour is yet quoted as high as $16 per bbl. Provisions have drooped from the war prices very considerably. In the retail trade of the city many articles are to be found at reasonable rates, though the grocers still demand large prices for butter, sugar, coffee, &c.

A rise took place recently in gold. It is quite plentiful again, and is loaned *flat*. The heavy disbursements by the Treasury have evidently been sufficient to supply the demand for customs and shipment, and as it has a large surplus on hand, it can, at any time, by a sale to a moderate amount put down the rates. It is thus a very hazardous speculation to attempt to put them up. The receipts at this port the last week were larger than in 1864–'65 for the same period. For some week's past there has been a gradual advance in governments. Between April 14th, and the 8th of May, the 6s of 1881, have gone up nearly 5 per cent., the 10-40s 4 per cent., and the 7-30s 2 per cent. The one year certificates have been up to par, and are in good repute. It is believed that the city banks have been largely investing in them, and they may do so without apprehension, as they are evidently in no danger of being suddenly called on to redeem their own bills in specie, and they cannot invest their deposits or use their capital in other securities to a sufficient extent to make interest, and Government stocks are the readiest material offered for their use. Abroad, the possible disturbances between Austria and Prussia affected securities generally, and our 5-20s declined a trifle; but the China, whose advices were to the 28th of April, has brought the intelligence that the prices had got back for the 5-20s to 70 and upwards. We expressed the opinion some weeks since that there would be no serious rupture. We may be mistaken; but if there be any, certainly those securities which are least affected by it, and in least danger from it, should according to the rules of common sense be preferred to those which are. So that either way our own will remain in favor abroad. If there be peace, there will be the continuous demand; if war, a preference.

As the country becomes more quiet from the cessation of political difficulties, its railway securities will improve, which is the present tendency. The work of Sir Morton Peto, already alluded to, will help them abroad very materially. We notice that the managers of several Southern railroads, nearly destroyed by the war, are taking vigorous measures to restore them to credit and usefulness, and we trust they will be eminently successful. There is a remarkable difference, however, between the spirit of American railway enterprise and British. The wealth of England is enormous, but its capitalists are chary as to railways. They are never undertaken for the public interests solely, as is often the case in this country. The future is not there discounted as freely and confidently as with us. Many a road has originated and been constructed here on mere patriotic grounds, and subscriptions freely made without the expectation of positive gain, from disinterested motives and private convictions of their propriety. In England, without a good show of profit, a scheme for a railway has no chance at all.

We notice with satisfaction that the British holders of the Georgia State bonds have unanimously accepted the proposal of that State to fund the arrears of coupons and overdue bonds into a new debt carrying 7 per cent. interest. This arrangement will be a good one for both parties, and the readiness of the creditors to close with the offer is honorable to them. It is the very best thing that can be done. Georgia is a noble State, and cannot fail to more than recover itself if it has a chance. Its desire to do so cannot be questioned, and the present arrangement will stimulate exertion.

The failure of one of the National Banks at the seat of Government, by which a large sum of public money deposited there has probably been lost, has attracted public attention. This same danger in former years led to the establishment of the Sub-Treasury system. It is well known that then the Government lost large sums by the deposit banks, and we have again the evidence on the present occasion of the danger of placing the National funds in any bank without proper security. The system certainly requires some additional safeguards in which it is evidently deficient. The prevalence of crimes of this sort is to be attributable to the inordinate desire to accumulate money, unfortunately too much cultivated and at the expense of morality and truth. We are almost inclined to repeat and apply the well known lines of Propertius, the Augustan poet, about his own countrymen during the Augustan age.

"Aurum, omnes, victa jam
pietate, volunt"

The market is abundantly supplied with money. Neither the remittance of coin to foreign bondholders, nor the rise in exchange has in the least affected the rates which continue to rule low. Many persons seem to think we are on the eve of a considerable speculative movement, but as yet we see no such indications. So abundant is money that the Treasury feels its influence, and is about to liquidate the amount of outstanding one year certificates of indebtedness, with the accrued interest, to the extent of 20 millions, if presented before the 1st of June. This is not quite one-third of the sum uncanceled on the 1st of May, when it amounted to $62,620,000.

The New York exports, exclusive of specie, for the week ending May 8th, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,310,302	$3,219,011
Prev. reported	62,125,002	84,183,526
Since January 1	$63,435,304	$87,402,537

The New York imports compare as follows:

	1865.	1866.
Dry goods	$1,122,498	$1,088,264
Gen. merchandise	1,691,660	2,798,296
Total for the week	$2,814,158	$3,886,560
Prev. reported	44,887,804	116,969,192
Since January 1	$47,701,962	$120,855,752

The following are the official figures of the United States 5-20 stock of 1862, as to the relative division of coupon bonds and registered certificates:

Registered	$125,852,950
Coupon	389,027,550
Total issue of 1862	$514,780,500

The balance in the Sub-Treasury on Wednesday was $95,072,646 12.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Louisiana 6s, 97; N. Y. 7s, Bounty Loan, 103⅜; Ohio 6s, 1875, 94; Brooklyn Park Loan, 86; do., Water Loan, 93; Peninsula 1st mort., 75; Milwaukee and St. Paul, 58; do., pref., 72½; do., 1st mort., 86; New Jersey Central, 111¼; Ohio and Miss. 1st mort., 83; Morris and Essex, 85; Chicago and Great Eastern, 43; New York and New Haven, 95; Indianapolis and Cincinnati R. Altona Gold Mining Company.

This is a new company which is to operate in California, the original Dorado, and the mines consist of 8 claims of 200 feet each, at the head of a ravine known as the Miners' Ravine at the east side of Albion Hill, with ample machinery, stamp mill, &c., now in place, and which is by this time at work. The office in New York is at 68 Broadway. The company was organized under the Laws of the State of New York, Feb. 20, 1866. Capital stock, $500,000, in 100,000 shares of $5 each. This stock is now attracting attention from the fact that the books have been closed, and no sales are now made by the company at less than the par value. We are informed that $1.95 is freely offered at the Stock Board, without any stock being offered at less than the subscription price of $2. The company has a clear title to its property, which is in a rich and prolific region, and bids fair to equal the best as yet developed in the golden State. Both water and timber abound in the neighborhood, at the entire disposal of the company, an important advantage and not often obtained by new mining companies.

The Albany Basin.

This work, originally intended as a harbor for canal boats, has a long pier in the middle of the Hudson river in front of the city, completely shutting off the wharf owners from their ancient privileges. Having proved of little benefit to the public, it is now contemplated under a recent act of the Legislature to remove entirely 125 feet at the upper end, to remove the bridge and bulk head at the foot of Hamilton street, and 165 feet of the old pier. This will allow the river steamers and sailing vessels to come up to the centre of the city and enjoy their former facilities.

North Missouri Railroad.

The North Missouri Railroad Company has entered into a contract for the construction of over 100 miles of additional road, being that portion of its main line north of Macon City, and so much of its west branch as is east of Brunswick. The contractors are Champlain, Smith & Co., a firm composed of some of the best known railroad builders in the country. By the terms of the contract the road is to be completed to Brunswick by the 1st of December, and the Iowa extension is to be built without delay.

New Locomotives for the Long Island R.R.

Four splendid new first-class locomotives have just been finished at the immense Ellis Locomotive Works, at Schenectady, for the Long Island Railroad. These engines are admirably finished and ornamented, and are of unusual power. They are companions to the Gen. Grant and Gen. Sherman, placed on this road last Fall. These engines are numbered 33, 34, 35 and 36, and bear the following names: Horace Greeley, A. J. Vanderpool, James Gordon Bennett and James M. Waterbury. The numbering has reference to the whole number of new locomotives built under the direction of President Charlick for this and other railroads in the country. The new engines will be placed on the road immediately. Two immense freight engines are also being built for the Long Island Railroad, the business of which has grown from less than $200,000 under the old management to nearly $800,000 per annum under the present direction. These superb machines have been built under the supervision of the able Superintendent of the works, Mr. McQueen, and are furnished with every approved device of modern engineering skill to insure safety and efficiency.

Union Pacific Railway, Eastern Division.

At the annual meeting of this company held on the 12th ult., the following gentlemen were elected directors for the ensuing year: John D. Perry, Adolphus Meier, John P. Devereau, Geo. Partridge, St. Louis; Thos. L. Price, Jefferson City; William H. Clement, Cincinnati; H. J. Jewett, Zanesville, Ohio; Thomas A. Scott, Philadelphia; and John McManus, Reading, Pennsylvania.

At a subsequent meeting of the directors, the following officers were chosen: President, John D. Perry; Vice President, Adolphus Meier; Superintendent and Chief Engineer, R. M. Shoemaker; Secretary and Treasurer, W. J. Palmer.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad, for the week ending April 30, 1866.... $14,699 22
Corresponding week previous year.... 10,680 17

Increase..... $4,019 05

Receipts from Jan. 1, to April 30:
1866 ..... $163,740 31
1865 ..... 147,331 05

Increase $16,409 26

The traffic of the Great Western Railway of Canada, for the week ending May 4th, 1866, were $70,230 25
Corresponding week of 1865 ..... 65,932 24

Increase..... $4,298 01

The earnings of the Grand Trunk Railway of Canada for the week ending April 28th, 1866, were $129,969 00
Corresponding week of previous year.. 128.545 00

Increase $1,424 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in April, 1866.. $21,406 00
Corresponding week previous year.... 27,004 06

Decrease $5,598 06
Commencing 1st Jan. 1866..... $340,021 00
Commencing 1st Jan. 1865..... 360,428 69

Decrease..... $20,407 69

The earnings of the Chicago and Northwestern Railway for the first week in May, 1866 were..... $142,072 64
Corresponding week of previous year,. 115,418 54

Increase..... $26,654 10

The Pictou Railway.

An important public work has been in process of construction by the Government of Nova Scotia for a twelve-month past—a railway across the neck of the Province from Truro to Pictou, a distance of about 50 miles. The importance of the work may be gathered from the fact, that it will bring Halifax and the valuable coal and other mines about Pictou into direct railway communication, over the road already in existence from Halifax to Truro, and will also provide a short, cheap and direct means of communication between Prince Edward Island and the Nova Scotia metropolis. The original estimate of the cost of constructing this new line of road was placed at $2,216,500 by the Nova Scotian Chief Railway Engineer, Mr. Sandford Fleming, formerly of this city. Contracts were let for the grading, &c., in ten sections, under date of December 31st, 1864, the work to be completed on the 1st of July, 1866. The contract, system however in this instance, proved a total failure. It had been contemplated to have the line open for traffic in the spring of 1867, and the Government had given pledges to parties who have recently invested largely in coal mining property along the line, that the road would be ready for business early in 1867. But it was evident the contractors could not go on with their work much more briskly than they had been doing, owing to its unremunerative character, and a number of them threw up the undertaking. The Government, therefore, appealed to Mr. Fleming for a suggestion as to what means they should employ to have the road opened by the 1st of May, 1867. Mr. Fleming responded that he considered it impracticable to complete the work by the 1st of May, but was willing to pledge himself to open the road by the end of that month, without costing more than the original estimates, if the Government would supply him promptly with the necessary funds to settle with the contractors and push forward the work. This they agreed to do, and gave Mr. Fleming all necessary authority. Some difficulty arising with the contractors, however, the Government proposed that Mr. Fleming should enter into an ordinary contract for the performance of the whole work, which resulted in their making a contract with him, under date of the 10th of January last, for the sum of $2,116,000, or $100,000 less than the original estimate. For this sum, Mr. Fleming agreed to settle with the former contractors, to whom, for work already done under their several engagements, he would be required to pay $310,609. His position as chief railway engineer being incompatible with that of a contractor for railway construction, he sent in his resignation of that office, which was accepted.

We observe that some of our Nova Scotian cotemporaries, while expressing surprise at the secret manner in which the contract was entered into—the press knowing nothing of it for six weeks afterwards—regard it as good news that the road is now sure to be finished by the time contemplated. And, while mildly censuring the Government for allowing Mr. Fleming to enter into a contract without competition, they at the same time congratulate them upon the excellent bargain made, by which they are not only to have the road opened in May, 1867, but at a saving of $100,000 on the price at which the contractors declared themselves unable to continue their engagements.—*Toronto Globe.*

Central Mining Company.

According to the directors' report for the year 1865, the production of copper was 802 tons, 778 lbs., against 502 tons, 877 lbs. for 1864. The amount of mineral shipped was 1,470,199 lbs., of which 42,540 lbs. was lost on board steamer Pewabic, but insured for its value. The total amount of mineral delivered at Detroit was 1,427,659 lbs., yielding 1,099,242 lbs. ingot copper, being an average yield of 77 per cent., against 77 55-100 per cent. for the previous year. The sales of copper have been 1,098,228 lbs., at an average price of 32 78-100 cents per lb., the highest price obtained being 40 cents, and the lowest 28 cents per pound. The gross receipts for the year have been:

From sales of copper.....		$368,587 28
From interest account		1,769 80
From other sources.....		196 17
Total.....		$370,544 25
General expenditure.....	$340,389 78	
Indebtedness at mine diminished in 1865.....	14,087 76	
	$326,302 02	
Deduct amount expended for buildings and addition to plant of mine...	3,724 49	
		322,577 53
Showing a profit for 1865 of.....		$47,966 72
The amount invested during the year in permanent improvement was....		12,486 53
Which being deducted from the gross profits, leaves as available profits the sum of.....		$35,480 19
Add surplus of 1864, after paying dividend No. 2		66,847 22
Net available surplus Dec. 31, 1865...		$102,327 41

Out of which a dividend of $2 50 per share ($50,000) was declared payable January 16, 1866.

☞ The Michigan Southern and Northern Indiana and Chicago and Rock Island Railroad Companies have commenced the erection of a new passenger depot in Chicago. It is to be built on Van Buren street, between Sherman and Griswold, and is to be one of the largest and most magnificent buildings of the kind in the United States. Its dimensions are 542 feet in length and 160 in width.

Interest and Dividends.

The Atlantic Mail Steamship Company have declared a quarterly dividend of 2½ per cent., payable June 1, free of tax. The balance of 30 per cent. due on the capital stock of this company is payable on the 11th of June. The transfer books will be closed on the 19th of May. Such stockholders as choose to pay the instalment of thirty per cent. before the closing of the books, will be entitled to receive their dividend on such full paid stock.

The New York and New Haven Railroad Company will pay, 18th instant, a dividend of $5 per share, free of tax.

The Pennsylvania Railroad Company have declared a semi-annual dividend of 5 per cent., free of tax, payable on the 30th instant.

The West Jersey Railroad Company have declared a dividend of twenty-five per cent., clear of National tax, payable in stock, at par, at the office of the company, in Camden, New Jersey, on the 14th day of May. All fractions or dividends not amounting to a full share will be paid in cash; and any stockholder entitled to a fraction, may, by a cash payment of the balance, procure a full share.

Free Passes.

The following is the law prohibiting the issue of free passes on the railroads in this State:

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Every railroad company in this State is prohibited from issuing free passes over its respective road or roads, *or carrying persons or property free of charge* over the road or roads, except such persons as may be injured upon their road or roads, and except such persons as may be employed by such railroad company, as clerks, laborers, officers or attorney, and except sick and disabled soldiers.

Sec. 2 The penalty for a violation of this act shall be fifty dollars for each offence, to be sued for and recovered in the county where the offence shall be committed, by the District-Attorney thereof, in the name of the people of the State, and when collected, shall be paid into the Treasury of the State.

Sec. 3. This act shall take effect immediately.

Maryland Coal Trade.

The following is a statement of the coal shipments over the Baltimore and Ohio Railroad from Jan. 1, to April 28th:

	Tons.
From companies by Eckhart R. R.	9,068.10
" " C. & P. R. R.....	22,421.11
" " via Piedmont....	102,696.07
" west of Piedmont, gas coal	11,175.00
Total	145,360.28

Orange and Alexandria Railroad.

The financial condition of this company has undergone no material change during the war with the one important exception of accumulated interest on bonded and floating debt. Payments in confederate money on coupons, interest and other debts, have been made on the amount of $105,434 28, and since the close of the war other debts have been paid out of State stock belonging to the company. The following is their financial statement:

Mortgage bonds sold.....	$830,000
Floating debt.....	60,000
Contractor's approximate.....	40,000

At a recent meeting of the stockholders, the directors were authorized to borrow $1,250,000, at

a rate of interest not exceeding 8 per cent., and to execute coupon bonds, to be secured by a mortgage on the rolling stock, other personal property and franchise.

Debt of Connecticut.

The entire debt of this State, according to the Message of the Governor to the Legislature, is comprised in five issues of bonds all bearing six per cent. interest, and amounting to $10,400,000. Against it are the Sinking Fund, $1,211,767; the bank stocks owned by the State, whose market value is $371,300, and cash in hand, $353,644. A deduction of these three items shows that the existing liabilities over and above assets, amount to $8,463,288.

During the year forty-one banks, with an aggregate capital of $12,087,930, in addition to those which had previously taken this course, organized under the National Banking act, leaving but eight State banks, with an aggregate capital on the 1st of April of $1,985,939, and a circulation amounting to $1,275,732. The capital of all the ninety banks, State and national amounts to $26,182,243. On the 1st of January there were fifty-one savings banks, fifty of which reported assets amounting to $28,891,454, and deposits amounting to $28,-319,014. The higher rate of interest paid by adjoining States, and especially by the general government, has reduced the deposits $1,823,274 during the past year, and gradually led the trustees to invest more than a quarter of the whole in national bonds.

Boston Water Power Co.

The receipts of this company for the past year were $676,095 12; and the expenditure, $555,826 23—leaving a balance now on hand of $70,268 89. The lands now sell at an advance of from 25 to 50 per cent. on the prices two or three years ago. They have sold during the year 54,-000 feet of land at $1 per foot, and have ready for market, exclusive of the streets, 1,400,000 feet, and about 4,000 feet which will require no filling. All of this land has been paid for.

The debt of the company in January last was $500,000, but by the creation of 25,000 new shares this debt will be soon paid, leaving them in cash, assets and due for land sold $124,000. It is thought a dividend will be declared during the present year.

Commerce of Philadelphia.

The number of vessels arriving at Philadelphia in April, was 3,665, of which 93 were foreign, and 3,572 coastwise. The following shows the number of arrivals since the 1st of January, 1866, as compared with the same period in 1865:

	1866.			1865.		
	For.	Coast.	Total.	For.	Coast.	Total.
January ..	22	386	408	20	104	214
February .	54	525	579	28	181	209
March	55	2,335	2,390	56	2,190	2,246
April	93	3,572	3,665	55	2,558	2,613
	224	6,818	6,842	159	5,123	5,282

Saratoga and Hudson River Railroad.

It is rumored that the Directors of the Central Railroad passed over and viewed this road, and after due consideration of the matter, came to the conclusion that it was not advisable to either hire or purchase. If this is true, we shall see no running of trains this summer, for the local patronage would hardly pay for the wear and tear of the road, let alone of the locomotive and cars.—*Coeymans Gazette.*

Allegheny Valley Railroad.

The work of grading for the Allegheny Valley Railroad extension has begun on the east side of the Allegheny above Franklin. Concerning this extension the Pittsburg *Commercial* says:

"It is exceedingly gratifying for Pittsburgers to know that under the energetic administration of President Wm. Phillips, this road at last is to be extended to Oil City, and made of great value to our city. Under the act of the late Legislature, approved by the Governor, February 15, 1866, the company was authorized to issue bonds, and for these bonds iron for the extension of the road will doubtless be had on satisfactory terms. The residue of bonds can be placed for cash here and in the East at fair rates; so the company bids fair to be soon like the Fort Wayne and Chicago Railroad Company.

"The estimate of the directors of the Allegheny Valley Railroad Company of the business of this company per annum, after the extension of the road, is as follows:

From oil traffic	$600,000
Trade connected with oil	300,000
From coal traffic	800,000
Iron and salt	500,000
Forest and farm	300,000
Passengers	900,000
Total	$3,400,000

Water Works at Cumberland.

The citizens of Cumberland, Md., are making efforts to secure for that place a better supply of water. The city council have issued bonds to the amount of $60,000 (of which $8,000 have already been sold) for the purpose of building water-works. It is designed to bring the water directly from the mountain streams.

☞ The Philadelphia *Ledger* learns that several of the canals are combining in interest, and that quite a fleet of boats are in preparation for carrying coal by boat in continuous line from the Wyoming coal region, through the Wyoming Canal, West Branch, Pennsylvania and Union Canal, Schuylkill Navigation and Delaware and Raritan Canal. Should there be a defective link in the route as named, then the boats will pass on down the Susquehanna and through the Chesapeake and Delaware Canal to the Delaware River, the charges being nearly or quite the same, and either way, we are informed, lower than coal from the same region can be put into the New York market by railroad. This, if realized, is important to several of the coal carrying companies of that State, as competitors with the New York carrying companies, and is also important to the Wyoming coal region.

☞ The Report of the East Boston Land Co., for 1864, shows the following results: Receipts, $74,533 82; payments, $70,246 10; assets—valuation of 1857, $1,239,548 08; liabilities, $37,144 45; showing a balance of $1,202,403 68. The net immediate liabilities of the company are $32,-856 73. The amount of land sold during the year was 28,425 feet, realizing $6,542 50. There had been no expenditures by the company for improvement in their lands. The amount of land owned by the company is as follows: Sixty-five acres of upland, exclusive of streets; 230 acres of marsh and inclosed flats, and 300 acres of wharf lots and flats inside of the Harbor Commissioners' line, and 200 acres outside of the same. T. B. Hall is President, and A. R. Turner, Treasurer.

Jamestown and Franklin Railroad.

The Venango *Spectator* says: "A large force is now at work on the Jamestown and Franklin Railroad, the grading of which is nearly completed to Waterloo. Mr. A. P. McDonald, the contractor for the whole line, and the engineer, are pushing the work with all possible vigor. It will doubtless be completed by the 1st of September next, though the more sanguine of its friends say by the 1st of August." This road will connect with the Pittsburg and Erie Railroad at Jamestown, and when it is completed passengers will be able to avoid the circuit now made by the Atlantic and Great Western Railway *via* Meadville.

Maryland and Delaware Railroad.

We learn from T. F. Tilghman, Esq., Chief Engineer and Superintendent of this road, that sufficient iron, with spike and fastenings, has been purchased to lay the track to Hillsborough, 34 miles from its junction with the Delaware road, and that it will be completed to that point by 1st August at farthest, with a prospect of completing it to Oxford before the end of the year.

Worcester and Nashua Railroad.

An event of some importance to the Worcester and Nashua Railroad Company has just transpired and is worthy of record. We refer to the payment of the last outstanding bond issued by the corporation. Not a note, bond or mortgage now remains out to trouble the officers of this prosperous company. The railroad is itself free from debt, and besides this more than $60,000 worth of rolling stock has been added to the road since the last annual meeting.—*Worcester Spy.*

Profits of Silver Mining.

The Gould and Curry Silver Mining Company of Nevada declared a dividend of eighty dollars per foot (representing two shares of stock) for April, payable in coin. This company has earned the enormous sum of *fifteen millions* since its organization four years since, dividing in 1865 four million of dollars, coin, among its shareholders. This stock is now quoted at $1,150 per share, the original price having been $10. Other mining companies do equally well—the Empire, of Nevada having paid dividends as high as $320 per share monthly.

Dighton and Somerset Railroad.

This road is now graded so as to admit the running of cars from Fall River to and through this city, and the fact has been put to practical demonstration by the appearance of train of freight cars loaded with sleepers from the former place. There is no doubt but that July will see the road in full operation.—*Taunton Gazette.*

☞ The Smyrna *Times* says: "The first regular train passed over the Maryland and Delaware Railroad on Monday. It consisted of a passenger, a baggage and three flat cars. It came from Wilmington, and proceeded to Slaughter's Station to deliver some construction material. The train will be used for construction purposes until the 7th of May, after which it will run regularly for the transportation of passengers and freight. We learn that negotiations will probably be concluded this week by Mr. Dungan for 2,000 tons of iron, which will carry the road into Talbot County."

☞ The Concord and Claremont Railroad is to be sold at auction in Concord, N. H., on the 9th of July, with all its buildings, engines, cars, &c, and the next day, at Claremont, the Sullivan Railroad; both under mortgages.

☞ The corporate authorities of Alexandria have agreed, so far as they are concerned, to lease the Alexandria canal to Messrs. Quigley, Wells & Dugan for the term of ninety-nine years, at a rent of $1,000 yearly, the deed of lease requiring thorough repair of the work, and stipulating that when the yearly tolls, &c., shall exceed 15 per cent. of $300,000, after paying expenses, the surplus shall be paid to the Alexandria Canal Company.

The gauge of the Elmira and Canandaigua Railroad has been narrowed to conform to the gauge of the Northern Central Railroad, that company having come into possession of the former road either by lease or purchase. The Northern Central Railroad Company have now a uniform gauge from Baltimore to the New York Central Railroad at Canandaigua. The trains commenced running over the road on the 7th inst.

☞ The work of building the new railroad from Camden to Hightstown, *via* Moorestown, Mount Holly and Pemberton, is to be commenced at once. A meeting of the company was held on Thursday last, and the following Board of Directors was elected:—Edwin A. Stevens, John G. Stevens, Richard Stockton, Joseph K. Hulm, Samuel Stockton, Nathaniel S. Rue, Richard Waln, R. H. Conover and James Gelberson.

☞ The debt of the city of Troy, as stated by the Chamberlain, is $1,013,789 15. During the past year the indebtedness was decreased $234,341 05. The cost of maintaining the city Government in 1865, exclusive of water works and bounties, was $328,237 55. The estimate for 1866 is $511,267 27. In the Chamberlain's statement we find an item of $10,581 22, paid for "fighting the bridge."

☞ The Pittsburg, Allegheny and Manchester Railway Company have awarded the contract for the laying of the track and the necessary grading of the extension of their road to Duquesneborough, to John T. Gordon. It is probable that the road will be in running order in June.

☞ The Easton *Gazette* states that parties in New Jersey, who have claims against the Maryland and Delaware Railroad, have entered suit, and that the sheriff of Kent County, Delaware, has the property of the road now in his possession, locked up.

☞ The directors of the Midland Railroad have appointed twelve meetings along its proposed line, which are to be addressed by Hon. Dewitt C. Littlejohn, Senator Low and others. Towns will be requested to issue bonds under the law passed at the late session.

☞ At a meeting of the Southern Railroad Company recently held at Utica, it was resolved to commence work as soon as the citizens of Utica subscribed the $200,000 required of them in the law bonding the city. Already stock to the amount of $160,000 has been taken, leaving $40,000 unsubscribed for.

☞ F. F. Raymond has been elected President, and D. L. Demmon, Treasurer of the Waverly Land Co., Boston. From the Treasurer's report of last year it appears that the company is out of debt, with a balance on hand of $2,000, and their stock is not to be further assessed.

Flint and Holly Railroad.

A Saginaw correspondent of the Detroit *Post* states that the Flint and Holly road connects with the Detroit and Milwaukee at Holly, and is one of the best built and equipped roads in the State. It is the only road in the State built wholly with private capital, without the assistance of land grants. The State is indebted to the practical business capacity and energetic perseverance of Governor Crapo for this important road, as a connecting link to open up such a rich portion of the State. At Flint this road connects with the Flint and Pere Marquette road to Saginaw. The whole line is in excellent condition and well conducted.

☞ A Chicago paper says that "the passage of the ordinance by our City Council, granting to the Northern Railway the power to enter the city of Chicago, has found in the Western Union Railway Company a response, well calculated to encourage all interested in the progress of Chicago and those pecuniarily concerned in the Western Union. The importance to Chicago can be but appreciated when it is fully known that the Western Union will have, within the present year, their line extending south from Savanna as far as Quincy, and west through Iowa from Sabula."

☞ An act was passed at the last session of the Legislature, authorizing the Pennsylvania Railroad Company to increase its capital stock ten millions of dollars by the sale of 200,000 shares, and for the purpose of retiring the company's mortgage bonds at maturity and increasing the facilities generally of the company, to issue six per cent. mortgage bonds to an amount not exceeding at any time the amount of capital stock paid in.

☞ The losses incurred by the Montgomery and West Point Railroad Company, in consequence of the rebellion amounted to $1,618,243. The exhibit of the Treasury, however, shows that the value of the road, with its outfit and property, amounts, despite these heavy losses, to within twelve per cent. of the capital stock paid in.

☞ The Winchester and Potomac Railroad Co., have commenced running their trains through to Winchester. The Orange and Alexandria R. R. Co. intend extending their road at Lynchburg to make connection with the Virginia and Tennessee road.

☞ The Indianapolis and Cincinnati Railroad having purchased the Indianapolis and Lafayette Railroad, and thereby secured a shorter route to Chicago, have abandoned work on the line they were constructing between Indianapolis and Danville.

☞ It is said the Directors of the Detroit and Milwaukee Railroad are agitating the question of making Mill Point instead of Grand Haven, the terminus.

☞ The Reno *Times* says that "the Jamestown and Franklin road is now in running order to Waterloo, five miles from Franklin. A small force is at work completing the grading to Franklin."

☞ The Tidioute *Chronicle* says that the Franklin and Warren Railroad is expected to be in running order from Irvine to Tidioute in about ten days.

☞ The grading on the Pana and Springfield, Ills., Railroad is being pushed rapidly forward. It is said that the cars will be running to Taylorsville by the 1st of August.

☞ All the canals on the Middle Division are in complete readiness and navigation has already commenced.

THE
Sterling Iron and Railway Company,
Office No. 43 Pine Street, New York.
Offer for sale at the lowest market rates, in quantities to suit purchasers,
SUPERIOR MAGNETIC IRON ORE, for Blast and Puddling Furnaces;
STERLING CHARCOAL PIG IRON,
AND
STERLING ANTHRACITE PIG IRON,

New York, Saturday, May 19, 1866.

Cotton Five Percentage.

The proposition now before Congress, to lay an excise duty on cotton of 5 cents per pound, is very naturally attracting public attention, calling forth the notice of the press, and receiving the consideration of commercial associations. We observe that the New York Chamber of Commerce has had the subject before it, and a special report was considered and adopted by that body at its last meeting which condemned the proposed measure. And here it may be very proper to speak of this Chamber, now nearly a hundred years in existence, with a most honorable record of service, with a past and present membership of the most eminent, enlightened and patriotic citizens of New York. The *Journal of Commerce* has recently criticised the facility with which admissions into this body have of late been conferred. Its numbers even now are but about 800, while the Board of Trade of Chicago contains 2,500! To admit to membership none but men of high standing and great wealth, would be to discourage the rising young men of business in their laudable attempt to rise; to forget that the very first men in New York have risen from very unpretending beginnings, and that example and encouragement are afforded by the intercourse and familiarity of membership. Then again, though there may be some who might as well have remained outside, yet it will be remarked that its proceedings are always under the influence and direction of the most experienced members. The reports which emanate from the Chamber are almost without exception carefully written, well considered and wise, full of sound sense and practical information. We do not, indeed, remember an instance in many years past of the publication of any documents by the Chamber of which it may not be proud. Indeed some of them have been noticed favorably abroad by the leading foreign journals, and have been praised in the State papers of the British Government, and in the proceedings of foreign Boards of Trade. Its opinions are therefore always worthy of consideration, and we are happy to say have a deserved influence at the seat of Government. On the present occasion, they are particularly entitled to be considered.

This excise duty of 5 cents a lb. on cotton is very objectionable for several reasons. It is in the nature of an export duty, and is against the letter of the constitution, though that instrument of late appears to be but little regarded. Export duties are considered to be proper as a source of revenue only in those cases where the article made subject to it is exclusively produced by the country exporting it. In that case the tax ultimately falls on the foreign consumer. This is the case with Russian tallow, which is peculiar to that country, is obtained there from one particular source, and cannot be competed with by any other country; but in the case of cotton, it is successfully raised in the East Indies, in the West Indies, in Egypt, Italy and South America; and this tax of 5 cents a lb. on the American staple will stimulate foreign competition, lessen the demand by over supply of the world's markets, and of course lessen our own production.

Again, it is unjust in its special application to a particular portion of the United States. Would it be just to single out the article of cane sugar and tax that at a similar rate? In 1860 there were produced 302,205 hhds. of brown sugar, and 16,387,080 gallons of molasses from the cane in Alabama, Florida, Kentucky, Mississippi, Texas and Louisiana, (the latter State producing more than all the rest together.) Would it be considered fair to single these two articles for heavy taxation because they are a special product of those States?

There is also a peculiar kind of wheat, known as white wheat, raised successfully in the State of Michigan, which has been bringing $3 per bushel within a short time past in this market; upwards of eight millions of bushels of wheat were raised in that State in 1860, and if taxed at 20 cents a bushel, which would be about equal in fairness with the proposed tax on cotton, it would give more than a million and a half of revenue on this particular article alone. But is there any Member of Congress bold enough or insane enough to propose any such tax? And yet there would be quite as much propriety in such a measure as the tax of 5 cents on cotton.

The truth is, that it is an unjust and invidious distinction against one section of the country which makes up for many of its numerous disadvantages of climate, by the possession of one tropical product of great value. And it is not an advantage too much.

The South wants all its natural and all its political advantages to recover from its ruin. It is impoverished, bankrupt in all but its soil, pressed down to the earth and needs helping up, not crushing down. Grievously it has erred, and grievous is the penalty it has paid for its error. It is not the part of a wise, a generous, a magnanimous people like ours, to pursue its conquests after submission has been attained. It might indeed be a more characteristic and efficient measure to offer inducements for the further cultivation of cotton by a small bounty as in the fisheries, or some release from taxation, as a reward for extended cultivation, so that we might supply exclusively the cotton marts of the world. If we could thereby raise 10 to 15 millions of bales a year, it would secure our commercial ascendancy forever.

Our legislation is evidently taking the wrong direction. We must not treat the South as Russia has treated Poland, or Austria Hungary. Continued severity and restriction are not our true

policy, nor that expected from a republican Government where fraternity and equality are cardinal principles. We shall never again be a truly united people if majorities abuse their power under any pretence of preserving majorities. This is the usual attempt of demagogues, and was the means of shedding torrents of blood during the French revolution. The guillotine was but the instrument of the political majorities of the hour, which by force and bloodshed endeavored to maintain themselves in power. This cotton tax of 5 cents is another covert blow in the same spirit, and should be regarded as an act without justice or necessity.

Cotton has played so important a part in restoring solidity to our commerce and finance, that it should at once receive the support of statesmanship, and be an object of its patronage rather than be made an opportunity for exaction.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey present to the stockholders the following report, for the year ending December 31st, 1865. For convenience of comparison, many of the statements are made to cover the year 1864 as well as the past year.

SERVICE OF THE ROAD AND FERRY.

The service of the road has been as follows:

	1865.	1864.
Miles run by passenger trains	431,334	290,641
" " " merchandise "	230,361	177,688
" " " coal trains	393,693	415,740
Total by transportat'n trains	1,055,388	884,069
Miles run by wood trains	3,100	2,633
" " " gravel and constr'ct'n trains	129,490	61,516
Total miles run by trains	1,187,978	948,218

During the year the boats have made 9,984 round trips between New York and Jersey City, 1,874 round trips between New York and Elizabethport, and 14,600 miles in carrying live stock to Fortieth street, making a service of 47,072 miles. In 1864 they ran 39,047 miles.

PASSENGERS, FREIGHT AND COAL.

A comparison of the passenger business of the year 1865 with the year 1864 gives the following results:

	1865.	1864.
Number of passengers	928,806	698,808
Miles traveled by pass	28,831,715	19,397,515
Equal to through pas'ngers	319,889	258,633

A comparison of the merchandise business of the two years, in tons of 2,000 lbs., (excluding iron,) gives the following results:

	1865.	1864.
Number of tons carried	317,181	272,266
Tons carried one mile	17,338,585	14,610,805
Equal to through tonnage.	231,181	194,811

A comparison of the iron tonnage of the two years, in tons of 2,240 pounds, gives the following results:

	1865.	1864.
Number of tons carried	75,469	69,225
Tons carried one mile	4,830,016	4,430,400
Equal to through tonnage.	75,469	69,225

A comparison of the coal business of the two years, in tons of 2,240 pounds, gives the following results, the through tonnage being calculated from Easton to Elizabethport:

	1865.	1864.
Number of tons carried	1,004,506	1,149,964
Tons carried one mile	55,683,624	62,372,269
Equal to through tonnage.	870,057	974,564

There was a decrease in Lackawanna coal of 181,056 tons, owing mainly to strikes at the mines, and an increase in Lehigh coal of 35,598 tons.

The coal tonnage over the road, since the transportation of coal was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.
1856	98,670	33,325	131,995
1857	209,950	84,841	294,791
1858	417,726	122,923	540,649
1859	455,681	183,277	638,958
1860	590,863	262,906	854,769
1861	568,869	254,345	823,214
1862	502,375	314,195	816,570
1863	613,954	435,927	1,049,881
1864	675,743	474,221	1,149,964
1865	494,687	509,819	1,004,506
Total	4,628,518	2,676,779	7,305,297

EQUIPMENT.

The company own 65 engines, of which 19 burn wood or soft coal and 46 hard coal. Of these engines, 53 are narrow gauge and 12 broad gauge. Their condition is reported to be as follows: 30 in good order, 20 in fair order, 10 wanting general repairs, and 5 require new fire boxes. Six new locomotives have been placed on the road during the year, and 14 more are ordered for early delivery. About 55 engines are required for the ordinary daily service.

The equipment of cars is as follows: 46 first class passenger cars, 6 second class passenger cars, 11 baggage and mail cars, 6 smoking cars, 81 eight-wheel house freight cars, 40 four-wheel house freight cars, 20 eight-wheel cattle cars, 103 eight-wheel platform cars, 5 eight-wheel gondola cars, 119 six-wheel platform cars, 15 six-wheel lime cars, 406 eight-wheel coal cars, 109 four-wheel coal cars, 142 four-wheel dirt cars, 4 eight-wheel caboose cars, 8 four-wheel caboose cars, and 2 wrecking cars.

Large additions have been made during the year, as will appear by a comparison with last year's Report.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1865 compared with 1864:

	1865.	1864.
Receipts:		
Passengers	$688,774 05	$488,223 94
Merchandise	898,287 32	731,722 16
Coal	1,388,492 82	1,317,954 27
Mail	7,600 00	7,600 00
Express	32,803 49	22,604 17
Rents	8,361 48	2,223 47
Miscellaneous	12,070 73	6,856 44
Total receipts	$3,036,389 89	$2,537,184 45
Expenses:		
Running expenses	$356,788 25	$239,431 00
Wood consumed	90,746 71	66,114 84
Coal consumed	259,238 66	207,739 83
Repairs of road	249,074 01	175,913 92
Repairs of engines	155,312 89	63,464 40
Repairs pass'nger cars.	37,131 86	28,834 16
Repairs freight cars	44,303 83	30,698 94
Repairs coal cars	33,342 31	19,848 28
Repairs docks, Elizabethport	24,440 55	14,814 14
Rep'rs b'ldings, bridges	48,314 02	32,231 39
Repairs tools, mach'ry.	25,813 14	12,770 91
Expense account	49,041 18	41,697 69
Miscellaneous expenses	56,602 38	44,624 91
Ferry running expenses	108,258 80	79,658 50
Ferry boat repairs	45,522 14	71,177 35
Ferry miscell. expenses	24,918 66	25,278 82
Car service	139,584 83	77,255 46
Total expenses	$1,748,433 72	$1,231,554 54
Balance net earnings.	$1,287,956 17	$1,305,629 91

The following table shows the receipts, expenses and net earnings, from the beginning of the annual reports to the Legislature to the present time:

	Receipts.	Expenses.	Net earnings.
1853.	$349,018	$197,629	$151,389, or 43 p. c.
1854.	378,145	197,349	180,796, or 48 "
1855.	393,729	208,856	184,873, or 47 "
1856.	553,479	258,308	295,171, or 53 "
1857.	682,314	340,502	341,812, or 51 "
1858.	836,934	345,614	491,320, or 58 "
1859.	971,702	385,716	585,986, or 61 "
1860.	1,185,848	475,457	710,391, or 60 "
1861.	1,201,895	522,452	679,443, or 57 "
1862.	1,397,586	623,245	774,341, or 56 "
1863.	1,941,976	814,232	1,127,244, or 58 "
1864.	2,537,185	1,231,554	1,305,631, or 51 "
1865.	3,036,390	1,748,434	1,287,956, or 43 "
Tot.	$15,466,201	$7,349,848	$8,116,353, or 53 p. c.

An increase in receipts is here shown, of $499,205 44, or 19½ per cent. The increase in passenger business was $240,055 11, or 53½ per cent. In merchandise receipts, $92,905 05, or 23 per cent. In coal receipts, $70,538 55, or 5½ per ct.

The expenses show an increase of $516,879 18, or 42 per cent. There has been an increase, in running expenses, of $117,357 25; in fuel consumed, of $76,130 70; in repairs of road, of $73,160 09; in repairs of equipment, of $129,245 11; in other repairs, of $38,751 27; in general expenses, of $19,320 96; in ferry accounts, of $2,584 43; and in car service, an increase of $62,329 37.

The gross receipts per mile run have been as follows: From passenger trains, $1.73 against $1.54 in 1864; from merchandise trains, $3.88 against $4.12; from coal trains, $3.52 against $3.16. The average receipts per mile run from all trains has been $2.87 against $2.93 the previous year. The gross expenses per mile run have been $1.66, against $1.39 the previous year.

FINANCIAL CONDITION.

The following is a statement of the financial operations during the year:

Gross earnings, as per statement		$3,036,389 89
Capital, new stock, full and scrip	$4,185,940	
Less first mortgage bonds, paid off	491,000	
		3,694,940 00
Cash & accounts payable, increase.		155,185 73
Total		$6,886,515 62
Ordinary expenses, as per statement.		$1,748,433 72
Grading, second track, extension, &c.		166,148 18
Masonry		75,386 90
Railway superstructure		283,432 40
Bridge superstructure		23,117 43
Engineering		7,069 81
Land damage		32,591 19
Communipaw filling and bulkheads.		329,845 81
Station houses		75,191 49
Port Johnston coal wharf		187,011 31
Docks in New York		189,005 04
Engines		124,416 54
Passenger cars		107,299 80
Cars built in shops or purchased		24,250 00
Ferry, boats and scows		30,615 61
Lands, machinery, miscellaneous property, increase		2,285,366 66
Sundry accounts, material, &c., increase		43,338 53
Quarterly dividend for year, 10 p. c.		861,675 85
Interest account for year		170,858 65
State taxes for year		31,219 64
United States taxes		90,041 00
Total		$6,886,515 62
The profit and loss account has been credited with the gross earnings		$3,036,389 89
It has been debited as follows:		
Ordinary expenses	$1,748,433 72	
Interest account	170,858 65	
Taxes to State	31,219 64	
United States taxes	90,041 00	
Dividends, 10 per cent.	861,675 85	
		2,902,228 86
Balance		$134,161 03

This balance has been appropriated to the reduction of the various property accounts, to make the purchases during the year correspond with the inventories. Large expenditures for personal property have also been included in the current expense accounts, with the same object.

The balance of surplus profits, therefore, remains $628,159 26, as at the close of the previous year.

EXTENSION TO JERSEY CITY.

During the year the work on this important part of the road has been steadily prosecuted, while the passenger trains have run regularly over it. A portion of the freight business has also been transferred to Jersey City, but the amount that could be so shifted prior to the close of the fiscal year was unimportant. The bulkhead and filling at the Jersey City terminus have been carried on as rapidly as possible, and now (March) a large area is reclaimed and covered with buildings and passenger and freight tracks, and the merchandise and miscellaneous freight coming in narrow gauge cars will soon be all transferred to this place. The economy and expedition with which freight can here be handled will soon justify the large expenditures for land and work made to secure such an outlet, the intention being to save one handling and a great part of the risk of damage and loss, by direct transit between the cars and the owner's warehouse. The broad gauge freight must continue at Elizabethport for the present till a third rail has been laid to Jersey City, or other arrangements made.

PORT JOHNSTON.

The earth from the Bergen Point cut has been used to fill up the approaches to the first coal wharf at this point. The work on this wharf is being pushed on as fast as possible. The foundation piles are now (March) all driven. The lower platform of the wharf is laid over nearly the whole of the surface to be covered, and filled in beneath with the materials taken from the canals. The canals upon the north and south sides of the shipping wharf—1,500 feet long—are excavated about sixty feet in width and twelve feet deep at low water; ultimately they will be one hundred feet wide. The material taken from the canal is spread over the meadows. The storage part of the wharf is 1,150 feet long, making the length of the whole wharf 2,650 feet, with a storage capacity of 100,000 tons. A large part of the trestle work is up, and the remainder is being rapidly raised. Most of the timber, planking, &c., of this wharf has been Burnetized, and the whole would have been, if time could have been allowed for it; but the necessity for the wharf was too great to admit of further delay.

It is now expected to commence shipping over this wharf in May, when the most beneficial effects in the Company's Lehigh coal trade may be expected. The capacity of the wharf for business is estimated at more than all the Lehigh coal wharves at Elizabethport combined; and, in addition, there will now be ample room for depositing coal that cannot be immediately shipped. The regularity that this will give to the movements of cars and the operations at the collieries can hardly be over-estimated. The want of such deposit ground at Elizabethport has been a most serious drawback to the trade for the last two years. The use of the wharves at Elizabethport for coal will be continued till the facilities provided at Port Johnston overtake the demands of the trade, when they will be gradually stripped of their trestle work, and devoted to the iron and lumber trades.

NEWARK BAY BRIDGE.

This important structure is now finished in all its parts, including additional oak ice-fenders. It has stood the test of three severe winters, (the first while building,) and fully proved its capacity to stand any pressure likely to be brought against it. Its length is two miles, and its cost $319,500, including $47,000 for the circular masonry pivot pier, and $27,500 for the iron double track pivot drawbridge.

RIGHT OF WAY.

The land agents of the company are purchasing additional land wherever the right of way is less than 100 feet in width. Purchases have also been made in anticipation of making changes in the line at several points on some future day. With the land in their possession, the company can delay these changes without the risk of their becoming impracticable by improvements made in the meanwhile by landowners. In making these various purchases it has been found a decided advantage often to purchase properties instead of paying exorbitant damages. In this way the company now hold for re-sale a large amount of real estate, which they will dispose of as they get opportunities, and which is generally worth more than they have given.

STATION AND FERRY-HOUSE IN NEW YORK.

About two hundred feet of water-front having been secured in New York city, opposite Liberty and Cedar streets, and immediately south of the Cortlandt street ferry to Jersey city, the company have erected thereon large and commodious structures suited to the expeditious transit of passengers and vehicles. New bulkheads have been built on the commissioners' line, and West Street widened opposite to the buildings to 125 feet. facilities for the freight have been provided on the adjoining Pier 14, belonging partly to the company and partly to the city, which has been entirely re-built and covered in substantially. In these structures architectural effect has been consulted as well as convenience and utility.

COST OF ROAD.

The construction accounts for the extension to Jersey city have been transferred to the general railway account, and consisted of the following items:

Grading	$173,480 15
Masonry	66,537 01
Railway superstructure	381,389 52
Bridge superstructure	311,619 24
Right of way	52,200 00
Engineering	10,838 38
Total	$996,064 30

The cost of grading out the remainder of the cuts will be charged to Communipaw filling, as the most of the earth removed will be taken to that place. All the earth heretofore taken out has been charged to the grading account, though part of it was used at Jersey city.

The cost of the 74 miles of double track railway now stands at $6,106,957 27, being $82,526 44 per mile. Reducing the road and sidings to single track, there are 225 miles at $27,142 03 per mile. The total cost of the 74 miles with equipments, stations, &c., including Port Johnston and Jersey city, is $8,683,451 59, or $117,344 per mile, of double track. Reducing road and sidings to single track as above, there are 225 miles at $38,593 12 per mile. When it is considered what is represented by this cost, and the position which the road occupies, the directors are ready to compare cost with any first-class road.

From its position the investment in this enterprise must necessarily be a very large one, involving as it will, in course of time, a third, and perhaps a fourth track, with corresponding terminal facilities of every sort. The object to be kept in view is to increase these investments only so fast as they will pay, being careful not to impair, but rather to increase the certainty of dividends.

The company's investments in land and water rights, forced on them by necessity or for the sake of conciliation, are now very large. As yet nothing has been realized by sales, but considerable portions can now be prepared for sale, and disposed of, without interfering with the parts that must be retained for the future use of the company or their customers.

PROSPECTS OF BUSINESS.

The uncertainty which hangs over the general business of the country and the general tendency towards a decline, is balanced, in the case of this company, by the enlarged facilities at Jersey city and Port Johnson, the effects of which will be most sensibly felt by the freight and coal departments. As the equipment and shops have been correspondingly enlarged, and as the business is ready to come, a large increase may be looked for, which will give profitable employment to the capital thus invested. Even at lower prices, therefore, the business is likely to be very good.

BALANCE SHEET, JANUARY 1, 1866.

Railroad, 74 miles double track	$6,106,957 27	
Communipaw filling and bulkheads	585,119 06	
Port Johnston coal wharves	187,011 31	
Land and work at Elizabethport	301,855 07	
Station-houses, shops and water stations	218,736 33	
Engines	685,000 00	
Passenger and baggage car	176,000 00	
Freight cars	211,250 00	
Coal cars	211,522 55	
Ferry interest, boats and scows	604,587 03	
Lands, docks, machinery, miscellaneous property, etc	3,845,525 15	
Chairs, spike, iron rails, and ties on hand	59,176 50	
Materials and fuel on hand	62,497 43	
Cash and accounts receivable	406,497 35	
	$13,661,735 05	
Capital stock	$10,685,940 00

President.—JOHN TAYLOR JOHNSTON.

Directors.—John Taylor Johnston, John C. Green, William E. Dodge, Adam Norrie, Benjamin Williamson, F. T. Frelinghuysen, Henry D. Maxwell, Asa Packer.

Secretary and Treasurer.—SAMUEL KNOX.

Engineer.—JAMES MOORE.

Superintendent.—JOSIAH O. STEARNS.

New York Stock Exchange.

The Annual election of officers of the New York Stock Exchange was held on the 14th inst., and resulted in the choice of the following gentlemen: President, William Alexander Smith; First Vice President, M. A. Whitlock; Second Vice President, A. H. Dyett; Treasurer, DeWitt C. Hays; Secretary, G. H. Brodhead; Assistant Secretary, J. W. Munroe; Rollkeeper, E. A. Shipman. Messrs. A. Campbell, W. H. Neilson, J. W. Underhill, W. Seymour Jr., and Charles R. Marvin were appointed a committee on securities; Messrs. J. P. Duffey, C. S. Seyton, W. B. Mott, A. D. Williams and A. H. Dyett a committee on additions to the stock list, and Messrs. C. S. Sloane, W. B. Clarke, A. M. Ferris, E. L. Clarkson, J. K. Warren, J. A. Riston and R. Manley a committee on securities.

Susquehanna Bridge.

The Belair *Intelligencer* says that the Philadelphia, Wilmington and Baltimore Railroad Company are rapidly pushing their bridge to completion. From the Harford shore two spans of the wood structure are nearly completed, while on the Cecil county side the work on three spans is in a forward condition. They are also engaged on the pivot or draw pier, which they hope soon to have completed. This bridge, when finished, will be one of the finest structures in the country. It is being built of the very best material and by first-class workmen, and cannot fail to compare favorably with any other work of the kind in America.

Journal of Railroad Law.

CITY RAILROAD COMPANIES.—STANDING ON THE FRONT PLATFORM NOT NEGLIGENCE.

The case of John Mulhado *vs.* The Brooklyn City Railroad Company, in the Court of Appeals of this State involves a nice question on the liability of city railroad companies for the negligence of their drivers.

The facts appear in the following opinion:

DAVIES, J.—This action is brought to recover damages sustained by the plaintiff in consequence of the negligence of the defendants' agents. The plaintiff was a passenger on the cars of the defendants. The car stopped, and the plaintiff wishing to get out, asked the driver where the car was stopping. He replied, at the corner of Degraw street. The plaintiff said to the driver, "be so kind as to keep your brake." He replied, "Yes sir." The plaintiff then stood up. The driver was in front and the plaintiff was behind him. The car started, the driver having turned the brake, and the plaintiff fell forward and was injured. This is the version of the transaction as given by the plaintiff, and it is the one which the jury must have credited. They found a verdict of $900 for the plaintiff, and judgment was entered thereon, which was affirmed at the General Term. It is claimed on the part of the defendants, that the motion for non-suit should have been granted, as there was no evidence of negligence on the part of the defendants. This cannot be justly said if the statement of the plaintiff was to be believed. He clearly indicated by his acts and words that he wished to alight from the car, at the point where it was then stopping. He made the request to the driver to keep on the brake, and such request could only be understood in the sense that he wished to get out, and desired the car to remain stationary until that was accomplished. The driver instead of complying with this reasonable request immediately, and while the plaintiff was in the act of alighting from the car, turned the brake and set the car in motion, thereby precipitating the plaintiff from the car into the street, causing the injury. If the jury believed this evidence they were justified in finding the driver guilty of negligence, and it was not the province of the Court to discredit it, and non-suit the plaintiff. It is also urged that the plaintiff was not free from fault, in that he did not prefer the request to the conductor to stop the car, instead of the driver. It is difficult to predicate any fault in the plaintiff from this circumstance. It is to be inferred that he was near the driver. He saw he had control of the brake, and it was natural that the request to continue the stationary condition of the car should under the circumstances, be preferred to him. If it had been made to the conductor, who is usually stationed at the other end of the car, he would have had to communicate it to the driver, either by sounding the bell or verbally. It cannot therefore, be said the plaintiff was in fault, and himself contributing to the accident, by reason of making the request to the driver to hold on the brake until he got off, rather than to the conductor. Neither was there any fault in the attempt of the plaintiff to get off the front platform instead of the rear. It does not appear that any notice was given to passengers that they must not get off of the front platform. Without objection from the driver, he might well have supposed from the absence of any notice of the kind indicated, and from the circumstance that he got on at the front platform without objection, that it was an unobjectionable place to leave the car. The attempt of the plaintiff to alight from the car was made while it was stationary. The setting it in motion before he had accomplished that was the cause of the injury, and which was clearly negligence on the part of the defendants' agent.

There is no force in the exception that the physician called to describe the injury to the plaintiff's arm should not have exhibited to him, in the presence of the jury, the arm so injured. Such exhibition certainly tended to make the description of the injury more intelligible, and it cannot be supposed that it could have had any undue influence upon the feelings or sympathies of the jury. As well might it be contended that a man who had lost an arm or a leg, by a similar injury, should not be permitted to appear before a jury to testify in relation to it, lest thereby their feelings might be influenced, and under the undue excitement created thereby they might do injustice. We cannot assume that any such consequences will follow such a course of examination, and we cannot perceive that it was objectionable in the present instance.

The judgment must be affirmed, with costs.

Toledo, Peoria and Warsaw Railway.

This road is 111 miles in length, commencing at the Indiana State Line, the western terminus of the Toledo, Logansport and Burlington Railway, and running thence *via* Gilman, Chenoa and El Paso, to Peoria, Ills. At Gilman it crosses the Chicago Branch of the Illinois Central Railroad; at Chenoa the Chicago and Alton Railroad; and at El Paso the Main Line of the Illinois Central. At Peoria it connects with the Peoria and Bureau Valley and Peoria and Oquawka Railroads. The earnings of this road for the years ending December 31, 1864 and 1865, have been as follows:

	1864.	1865.
From passengers	$104,104 39	$195,336 40
" freight	233,038 91	307,979 39
" mails	9,850 08	9,850 08
" express	4,758 15	5,876 98
" military	5,364 11	11,161 64
" rent of road	.....	39,320 00
" " cars	3,202 00	7,906 17
" miscellaneous	8,315 23	2,901 94
	$404,632 87	$580,332 60
And the expenses were:		
Maintaining roadway & real estate	$80,117 99	$109,397 96
Maintaining machinery	52,520 96	65,021 17
Conducting transp.	110,547 12	126,603 38
	$243,186 07	$301,022 51
Earnings less expenses.	$161,446 80	$279,310 09
From which deduct—		
Interest on bonds	$98,875 00	
Government taxes	16,848 56	
State and local taxes	5,571 83	
Insurance, interest, etc	6,700 32	
		127,995 71
Balance, being surplus earnings.		$151,314 58

The above results show that the company has earned over and above all expenses a sum sufficient to pay 7 per cent. interest on its first preferred shares, and 4 per cent. on its second preferred shares. The report says:

The amount to credit of income account on the surender of the road by the Trustees, amounting to $272,732 43, has been expended for construction and equipment, in accordance with the wishes of a large majority of the shareholders, and under instructions of the Board of Directors; and a further sum from income account this year of $80,739 22, making the total amount thus expended $353,471 65. And also, for the building of a substantial brick round house and machine shops in Peoria.

The construction account is now closed. The charge in Treasurer's report of $4,878,634 09, represents the total cost of the property to date—say for road bed, buildings, motive power, rolling stock and fixtures necessary to operate the same, and upwards of $50,000 real estate in the city of Peoria.

First mortgage bonds to the extent of the mortgage have been issued, and no other mortgage can be made without consent of the preferred and common shareholders.

Total amount of interest on $1,600,000 issued at 7 per cent., is	$112,000
Deduct amount due annually from Illinois Central Railroad Company for lease as per contract	25,000
Total liability for interest, only	$87,000
The company has a right to issue	
1st preferred shares to the extent of	$1,700,000
2d " " " "	1,000,000
Leaving on hand to be used	
1st preferred shares	$49,767
2d " "	91,578

These shares, together with the bonds of the company now in the hands of the Treasurer, will realize within a year a sufficient sum to pay all liabilities of the company, leaving the income to be divided with the shareholders.

I am now pleased to announce to you that, with a view to carry out the plan of the original corporators for a through line from the Mississippi to Lake Erie, and to the Eastern States, that I made proposals some two years since to the bondholders and stockholders of the Mississippi and Wabash Railroad Company, a chartered company owning a line between Peoria and Warsaw, and Keokuk, on the Mississippi River, to merge and consolidate our respective interests, and open the great through line to the Mississippi river at those points. After much necessary delay in arranging terms, &c., the great desideratum has been accomplished, and on the 9th of December, the consolidated articles were filed with the Secretary of State as required by law.

We now own a continuous line from the Mississippi River to the Indiana State Line, a distance of 230 miles.

The gap to be completed is only 100 miles, all of which has been put under contract; the work to be paid for in bonds and the stock of the company.

The division between Warsaw and Bushnell, the point of crossing the Chicago, Burlington and Quincy Railroad will be built first; and will, without doubt, earn a sufficient sum to pay the interest on the outlay.

The division between Peoria and Canton will be built the coming summer, and will add largely to our earnings and our profits.

The country through which the road runs west of Peoria, is unsurpassed in improved farms, and has a much larger population than existed on our old line. When the enterprise is completed, I see no reason why the company, with judicious and economical management, cannot make as large dividends as has been made by the Chicago, Burlington and Quincy Railroad Company.

Our connection at Keokuk will be with the Des Moines Valley Railroad, which taps one of the large feeders of the Chicago, Burlington and Quincy Railroad, and with a new road which is being built from Warsaw to Nebraska City, *via* Bloomfield, Iowa, called the Alexandria and Bloomfield and Missouri and Iowa State Line Railroad. The work on both these lines is pro-

gressing rapidly, and I am credibly informed that more than 150 miles are now graded and ready for the iron, and that it is contemplated to finish the grading on the entire route by the 1st of January next.

The building of the road to Nebraska City is causing great excitement in the gold regions of Colorado, and with parties interested in the original Central Pacific Railroad Company. And I am informed that a company has also been organized to build a road from Fort Kearney to the Missouri River, at Nebraska City, and that two divisions of the work have been already put under contract.

These important western connections have stimulated the roads east to secure the traffic of the *Great Midland Route* to California, and several enterprises are in contemplation to connect with us *via* Logansport. The parties interested in the Pennsylvania Central, Pan Handle, Steubenville and Indiana, and Columbus and Indianapolis Central roads, have already purchased the chartered privileges of a road between Union and Logansport, in Indiana, and contemplate completing it at once to connect at or near Logansport.

The Atlantic and Great Western Railroad Company, having made a contract with the Great Eastern Railroad Company, for Chicago business over their line, are seriously contemplating, in order to shorten the route to Lake Michigan, to build from Marion on their main line, and strike some point on the Great Eastern road, in the neighborhood of Logansport, and a new company has been organized under the auspices of Gov. Schenck, to build an air line road from Lima to Logansport. All or *any* of the enterprises will aid us materially and hasten the work to Fort Kearney and Denver.

The operating expenses, including Federal and State taxes, insurance, etc., amounted in 1865 to $330,143 22, and in 1864 to $265.212 46—making the net earnings in 1865, $250,189 38, and in 1864, $139,420 41.

The proportion of operating expenses to earnings in 1865, including the above charges, is 56.88 per cent. The gross earnings per mile in 1864, were $3,645 34; in 1865, $5,228 22—showing an increase of 43.39 per cent. Of the total traffic of the road in 1865, 67.79 per cent. was local, and 32.21 per cent. through. Of the passenger traffic 57.97 per cent. was local, and 42.03 per cent. through. Of freight, 74.05 per cent. was local, and 25.95 per cent. through.

There have been used the past year in repairs of track 235 tons re-rolled iron, 3,366 new chairs, 53,500 lbs. of spikes, 186 repaired rails, and 36,031 ties. There was also 1,554 lineal feet of trestle work replaced by pile-bridging. The company will require during the present year 200 tons of new iron, 1,000 tons of re-rolled iron and 40,000 new ties.

The equipment of the road consists of 15 locomotives, 6 passenger, 8 baggage, 4 conductors, 201 box, 12 stock, 63 platform and 1 pile drivers car. In addition to these there are 25 coal cars owned by H. L. Marsh & Co.

The number of miles run by locomotives with passenger trains, was 98,702; with freight trains, 82,125; with construction trains, 14,407, and with switching trains, 29,269—total, 224,563 miles.

The number of miles run by cars during the year, was: passenger, 193,957; baggage, 98,612; freight, 1,106,320—total miles run by cars, 1,398,889.

The number of passengers carried was 120,089, of which 92,224 were local, and 27,865 foreign, yielding $195,836 40. The number of local passengers carried eastward, was 47,738; foreign, do., 11,423—total, 59,161, yielding $92,126 91. The number of local passengers carried westward, was 44,486; foreign, do., 16,442—total, 60,928, yielding $103,209 49. The mileage of local passengers was 2,488,978; foreign, 1,707,140—total mileage, 4 196,118.

President.—CHARLES L. FROST.

Directors.—Charles L. Frost, Zeno Secor, James W. Smith, John B. Brown, William H. Cruger, Henry Hill, Edgar P. Bueil, H. B. Ten Eyck and John W. Cherry.

Vice President.—WILLIAM H. CRUGER.

Secretary and Treasurer.—D. W. MCWILLIAMS.

Superintendent.—H. F. CLARK.

Illinois Central Railroad.

The statement of this Company for the month ending April 30, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	4,504.37 for	$48,004 22
Acres Int. Fund Lands sold	160 00 for	2,173 60
Acres Free Lands sold	443.03 for	6,275 69
Total sales during month of April, 1866	5,107.40 for	$56,453 51
To which add Town Lot Sales		1.255 00
Total of all		$57,708 51
Cash collected in April		$91,191 85

TRAFFIC DEPARTMENT.

Receipts from Passengers		$165,608 33
do. Freight		220 806 00
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		10,000 00
Total Receipts		$406,772 66

Railroad Earnings--Monthly.

The Earnings of the Louisville and Frankfort and Lexington and Frankfort Railroads in March, 1866, were $42,648 67; and the expenses, $29,923 14—leaving a balance of $12,725 53.

The earnings of the European and North American Railway for the month ending May 30, 1866, were $10,979 42
Corresponding month of previous year 9,287 93
Increase $1,691 49

Western Maryland Railroad.

On the 3d inst, Mayor Chapman, of Baltimore, Col. W. W. Taylor, Engineer-in-Chief of the Western Maryland Railroad, J. S. Gitt, Esq., Assistant Engineer, and several prominent citizens of Baltimore and residents along the line of the road, arrived at Hagerstown, having followed the line of the contemplated extension of the road from Union Bridge, examining the whole route, and the different contemplated lines over and through the mountain, and having been several days on their journey. The route over the mountain is not yet definitely fixed on, and they left behind them an engineer to run other levels, so as to endeavor to reduce the grades on the west side of the mountain, this being most important, as it is contemplated that at no distant day this will become one of the great coal roads of the country, and it is advisable to have as easy grades as possible in the direction of the heavy transportation.

On the 4th, the party proceeded to Williamsport, with the view of examining the ground between Hagerstown and that place, as it is contemplated to continue the road in that direction at an early day. The road will cross the Conococheague near Williamsport, and immediately west of the town is a meadow at or below the level of the canal, affording ample space for an extensive basin, where any amount of coal can be unloaded and transhipped to board the cars, the track running immediately north of the basin.

We understand it is contemplated to make Williamsport a coal depot, or transhipping point, until the road is extended into the heart of the coal regions. The canal from Cumberland to Williamsport is rarely injured by freshets, as is the case between Williamsport and Georgetown, and a regular supply of coal can always be secured at the Williamsport depot.

It is the intention of the Chief Engineer to proceed immediately to locate the road from Hagerstown to Chewsville, Cavetown, Smithsburg, &c., preparatory to putting it under contract at an early day.

Union Pacific Railway.

In accordance with the contract recently made between this company and "The American Bureau of Mines," Prof. Thomas Egleston, Jr., of the Board of Exports, has been detailed to superintend the proposed reconnoisance of the first hundred miles of the company's route, over which the road is now completed. Professor Egleston left this city on Tuesday with an able corps of assistants, and will enter at once upon the work. The wisdom and foresight of the company in taking this early step to obtain and lay before the public authentic and thorough information as to the value of its lands for agriculture, mining and other purposes, will, it is claimed, be abundantly proved by the results of this examination. It is believed that the field-notes of Professor Egleston and the report of the distinguished board of which he is a member, will command universal confidence, and form an interesting contribution to science.

☞ The bridge constructed by the Western Pennsylvania Railroad Company across the Allegheny river above Freeport, has been completed. We understand that it is the intention to have the road in complete running order by the 1st of August next.

American Railroad Journal.

Saturday, May 19, 1866.

Stock Exchange and Money Market.

The Government is turning its attention, or rather some parts of it are, to the foreign commerce of the country. The Secretary of State, after having long directed his pen to the rectification of our foreign diplomacy, has now, at the prompting of the Secretary of the Treasury, addressed himself to our Consuls abroad, and laid down for them rules for the performance of numerous if not onerous duties. It is believed that by means of false invoices and unfair valuations, the revenue has been defrauded to the extent of twenty millions a year; and it is believed at the Treasury department that greater vigilance on the part of our foreign Consuls whose business it is to authenticate these invoices, would remedy these abuses. So Mr. Seward, in a lengthy circular, has called on them to give particular attention to the subject, and in many cases to require samples of the articles shipped. To tell the truth, these consulates have been hitherto used to reward political adherents without regard to qualifications, and thus these Consulships have been filled up with doctors, lawyers, poets and novelists, whoever could make a stump speech, or write a puff in prose or poetry, or influence a local majority. Many of the incumbents have found it difficult to find their way to the countries to which they were accredited, and the consequence has been a very inefficient discharge of duty, and a continuous violation of the revenue laws by means of false papers and concealed values. We think the Secretary's circular will fail of its intended effect, unless the appointments hereafter are made from a class of persons of a superior grade, both in experience and ability. But the intention is good and the projected change may be followed by the selection of more competent men, otherwise the circular will never be followed up.

The latest news from abroad is, that the danger of a foreign war is imminent. As thunder storms often proceed from an unexpected quarter, so do the present difficulties. It was Austria and Prussia that gave signs of the storm, but now suddenly the wind shifts, and the danger lies between Austria and Italy. We have expressed the opinion that these European troubles would not have much permanent effect on our securities, and we notice that the *Herald* of Tuesday adopts our opinion. Certain it is, that the recent panic in the London Market, greater than before experienced in nine years, had much less effect on our Government bonds, than those of any other country. Emigration from Europe was never on so grand a scale as at this moment, and this remittance of bone and muscle, of men and women, is of a piece with the disposition to remit money here for the purchase of American securities. It is the country and its funds, and its soil, and its prosperity which cannot be competed with successfully in the long run by any other nation. We may count on the future as a sure thing, and if we are in a hurry we may discount it too. Our securities are now being placed in a most permanent form, on a firm basis, and must overtop those of all other markets.

Gold has taken an upward rise of about 2 per cent., with a subsequent slight reaction. The Government has disbursed since 1st of May, about eight millions for interest, but many coupons remain unpresented. A large amount of interest has had to be remitted abroad, and this will fully account for the late shipments, and the corresponding advance in exchange. Yet the balance in the Treasury is enormous, and no doubt much of it will be disposed of as a matter of economy. Indeed there is a bill before Congress authorizing the Secretary of the Treasury to sell it down to $25,000,000. The rise in gold is to be deprecated, however, no matter what the cause may be. The late advance of 2 per cent. reduced the purchasing power of the currency all of thirteen millions of dollars, or in other words, took just so much money out of the pockets of the people. If the paper dollar was again worth its face in gold or

silver, the people would be gainers to the extent of nearly two hundred millions beyond its present received value. Is it any wonder that we are for having good money again? And are they not blind to their own and the public interests who seek to maintain a depreciated currency?

We do not care how much paper money may be set afloat; if it is only redeemable in specie, it will then regulate itself. We believe the business of this country requires a much larger amount of paper than any other of its size or population on the globe; and the reason is apparent. Our commerce expands every hour; if not on the ocean, it does among ourselves. We are a trading, trafficking, enterprising, venturesome people; we must ever "*do or die.*" Let the currency be sound, and it may go where it can. We are not afraid if it is only safe and redeemable on demand. The gold customs received since last July to May 5, were $114,730,460; and the gold interest paid $39,275,861—leaving a balance of $75,454,599. This has, however, been somewhat reduced since that date. No one can question the ability of this Government to meet its obligations promptly, especially when we know that our imports are on the increase. This will be seen at a glance.

In the first six months of 1864, and the three following months (in all nine months) the duties received at this port amounted to $56,357,210 94. In 1865, for the same period, they were $38,898,-986 56; while in the present year of 1866, they have already reached $100,696,231 39. During the same periods the exports from this port were as follows: in 1864, merchandize $120,479,090; specie, $39,397,104—total, $159,876,194. In 1865, merchandize, $178,656,218; specie, $26,263,467—total $204,919,685. In 1866, merchandize, $168,-672,445; specie, $17,646,329—total, $186,318,774; and the exports for the month of March were also in reality nearly ten millions more than they were in the same month in 1865. So that we may safely, say our foreign commerce is growing quite as fast as is desirable or practicable, while prices remain under the influence of our inflated currency, if it is inflated beyond its real value. If flour, for example, could be sold as cheaply abroad as it once was, it would be an element of trade which at present it is not. On the contrary, we have announced the fact that foreign flour is being imported here and paying a large profit. It is rather a disgraceful fact that we cannot raise our own bread—but so it is. Labor is so dear, taxation so heavy, and the imported necessaries of life so costly, that the farmer cannot raise a bushel of wheat at anything like former rates. A general fall of prices would enable him to do better at the old figures than he now does, and his market would be larger and steadier.

The report of the associated Banks for the week ending May 12, shows an increase in loans of $3,-647,183; in specie of $3,056,405; in deposits of $7,179,550; in legal tenders of $3,836,212; and a decrease in circulation of $722,418.

This proves the continuance of an unexampled plentifulness of money, which bids fair to continue, there being no disturbing causes apparent or to be dreaded. Four and five per cent are the rates with good borrowers; and the supply of commercial bills is small, and has been so for sometime past, showing the prudent manner in which general business is conducted. We hope this line of conduct will be persisted in. Nothing will bring this country round so soon as economy and care. Our enterprise is unbounded, and so are our facilities. They however require good management to ensure final success.

We have in this number of the JOURNAL expressed our dissent from the proposition before Congress to tax raw cotton 5 per cent., adopting the views of the N. Y. Chamber of Commerce on this subject, and, indeed, of our merchants generally. Indeed if the Chamber had the powers of legislation we might safely trust to its experience, patriotism and practical good sense, the solution of most of the questions which are disturbing Congress and dividing the people.

Now that the Reciprocity treaty has by its termination deprived us of free coal, lumber, and especially wool, it is a satisfaction to know that we are likely to have a supply of this last from an unexpected quarter. The aggregate exports of domestic produce from California during the last quarter, have been, we are happy to announce, larger than for the whole of any year up to 1861. The wool clip is the finest ever produced. In 1860, California possessed 46,574,004 sheep, increased 10 years from 17,574, and now still more numerous. The quantity of wool raised in 1850 was 5,520 lbs., and in 1860 2,681,922 lbs. In 1850 the whole quantity clipped in the United States was 52½ millions of pounds, and in 1860 it was 60,-511,343 lbs., an increase of 15.2 per cent.

California, in this last mentioned year, manufactured 400,000 lbs. of wool. Its trade with the Sandwich Islands, Australia and New Zealand is largely increased, particularly in breadstuffs; and when the steam line to Japan and China is established, we may expect to see a lucrative trade in that direction, which the Pacific Railroad will assist in bringing to New York, especially in those valuable articles which will admit of being readily transported in cars. This is a consummation to be wished, and devoutly too.

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,213,994	$1,508,753
Gen. merchandise	3,556,837	3,258,368
Total for the week	$4,770,831	$4,767,121
Prev. reported	47,701,962	120,855,752
Since January 1	$52,472,793	$125,622,873

The New York exports, exclusive of specie, for the week ending May 15th, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,757,151	$3,738,972
Prev. reported	63,435,304	87,402,537
Since January 1	$65,192,455	$91,141,509

The balance in the Sub-Treasury on Wednesday was $105,009,551 35.

Governments remain steady and popular; the small decline abroad, owing to the general panic there, having small effect here on the American holders. There seems to be a disposition to pay no regard to foreign quotations of our stocks to any great extent; which, indeed, would not be worth considering, if it were not that foreign agencies here are as much engaged in making money out of our securities as out of any other property, and their tactics have to be looked after. Large short sales of 5-20's by foreign speculators, were entered into, with the expectation of a large rise in gold to match. But sales by the Government on Tuesday at 130 upset all these fine calculations of a handsome profit, much to their disappointment, and loss.

We are glad to state that Railway securities and shares are generally improving under the assurance of increasing business and earnings.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—N. Y. 7s, Bounty Loan, 103⅛; do., 6s, 1873, 92½; do., 5s, 1874, 87½; Tennessee 5s, 73; do., 6s, 1868, 88; Connecticut 6s, 96; Atlantic and Great Western 1st mort., Ohio div., 85; Milwaukee and St. Paul, 56½; do., pref. 71; do., 1st mort., 87; Chicago and N. W. Con., 78; Brooklyn Park Loan, 89; Stonington R. R., 102½; Indianapolis and Cincinnati R. R., 75; Chicago and Milwaukee, 63; New Jersey R. R., 128; New York and New Haven, 105; Long Island, 68; Chicago and Great Eastern, 43; N. J. Central, 113¼; Ohio and Miss. certificates, 28; pref., 28⅛; Cary Imp. Co., 15½; Mariposa pref., 20¾; Boston Water Power, 41½; Central Coal, 43; Wyoming Valley Coal, 39½; Ashburton Coal, 16½; American Coal, 64; Spruce Hill Coal, 4⅝; Spring Mt. Coal, 45; Brunswick Land, 8¾; Manhattan Gas, 150; Western Union Tel., 59¼; do., Russian Extension, 108; Union Navigation, 105¼; Pacific Mail scrip, 218; Bank of Commerce, 109½; Mech., Banking Ass., 106; Merchants Bank, 116; Union Bank, 115; Park Bank, 105; Central Bank, 105; Am. Ex. Bank, 114 Shoe and Leather Bank, 108; St. Nicholas Bank, 103; 4th National Bank, 104; Ocean Bank, 103; Bank of America, 140½; National Bank, 106.

Philadelphia.—Connecting R. R. bonds, 90; Sunbury and Erie 7s, 96; Warren and Franklin guar., 7s, 84; Elmira and Williamsport 5s, 70; Morris and Essex bonds, 92⅛; Reading mort. 6s, 1884–'80, 89; Harrisburg R. R. bonds, 90; Allegheny Co. coupon 5s, 73; Morris Canal Boat Loan, 88; Union Canal, 2⅞; do., interest bonds, 23½; Schuylkill Nav. 7s, Boat Loan, 84; Chester Valley, 1¾; 13th and 15th streets R. R., 20½; Union R. R., 35½; Buck Mt. Coal, 50; Hazleton Coal, 56; N. Y. and Middle Coal Fields, 6½; Mechanics Bank, 29½; Commercial Bank, 55; Penn. Township Bank, 52¼; Farmers and Mechanics Bank, 120; Commonwealth Bank, 55; Bank of North America, 122; Philadelphia Bank, 139; Caldwell Oil, ⅜; Dalzell, 1; Jersey Well, 31c.; Maple Shade, 3; Ocean, 6⅜; Tarr Homestead, ⅝. The latest quotations are: City 6s, 95@96; do., new, 98¼@98½; State 5s, 90@90¼; do., coupon, 89@91; do., 6s, W. L., 102@102; Phila., Wil. and Balt., 60; Reading, 53⅝@53⅞; do., 6s, 1870, 93½@95; do., bonds, 90½@91; do., con., 106@108; Camden and Amboy, 129¾@130; Penn R. Covington and Ohio Railroad.

The Commissioners appointed by the States of Virginia and West Virginia to award a charter for the completion of this road, met according to appointment, in Baltimore on the 1st inst., and after a session of several days' duration, adjourned to meet in New York on the 7th inst., where, we understand, they have been successful in effecting negotiations for the construction of this great work. It will be recollected that the Legislatures of the above States, at their last sessions, passed a concurrent act appointing five commissioners on behalf of each State to offer to capitalists the charter of this road, with full power to bind both States in a contract for the construction, equipment and running of the same. The road is to commence at the termination of the Virginia Central at Covington, on Jackson's River, and to terminate at the mouth of Big Sandy River, on the Ohio, where it will unite with the Lexington and Big Sandy road, in Kentucky. It will reach the Ohio 120 miles below Parkersburg, and will form a link in an important and direct line of railway communication—being the fifth, and the first one starting south of Baltimore—across the continent from the Atlantic to the Pacific. About three and a half millions of dollars were expended before the war on this line, including the tunnel through the Allegheny, (which is finished,) all of which is donated by the two States to the new company. The Covington and Ohio road will be the common feeder to the Virginia Central, the Virginia and Tennessee and the Valley roads from Harper's Ferry to Salem, Va. Its charter interdicts discrimination against any other company chartered by either State. There is also a provision that no taxation shall be imposed on the property of the company until its profits shall amount to *ten per cent. per annum* on its capital.

☞ We call the attention of our readers to the card of Messrs. PRINCE & DAUCHY, Bankers and Brokers, 44 Broad street, successors to J. R. Garland & Co., and W. R. Traverse & Co. Being members of the Stock Exchange, they are enabled to transact business in their line with facility and dispatch. Mr. Garland and Mr. Traverse are special partners. The reputation of these gentlemen, as well as their contribution to the capital of the firm, will add greatly to the character and strength of the house.

☞ The Shore Line Railroad Company, between Boston and New York, are endeavoring to obtain permission from the Connecticut Legislature to bridge the Connecticut River at Lyme.

Erie Railway.—Col. Miller's Improvement.

We learn that the day express trains on this railway have been recently furnished with a new set of coaches, smoking and baggage cars, which are said to be far ahead of anything heretofore in use. These coaches were built at the company's shops, are 67 feet long, supported on six-wheeled trucks, and will seat comfortably 80 passengers. They have been fitted up without regard to expense, and the upholstery is really luxurious. The improvement in the formation of the backs of the seats, being so arranged as to fit every portion of the back like an easy chair, is a very desirable one; while special pains have been taken to give ample room for the limbs and support for the feet.

Miller's Platform, with his patent Self-Coupler and Buffer, has also been adopted, by which the platforms are brought close together, thereby avoiding the jerking and twitching usually experienced in stopping and starting trains, and forming a perfectly smooth and safe passage-way from one coach to another. Beside these advantages, it is claimed that this kind of platform, being a continuation of, and on a direct line with the sills of the coaches, prevents the possibility of one coach telescoping, as it is termed, into another, in case of collison or accident of any kind.

The smoking-cars are furnished with cane-seated revolving chairs, and at one end a news stand has been erected, where all the current literature, as well as a good cigar, can be obtained. On such a train as this, stopping at proper hours for breakfast, dinner and supper, at eating-houses equal, if not superior, to most of the first-class hotels in the country, travelers cannot fail to properly appreciate all that is being done for their comfort by the managers of this great thoroughfare, and at the same time enjoy the magnificent scenery abounding everywhere on this line of railway.

☞ We invite attention to the Advertisement of Messrs. NATHAN, COHEN & Co., on the outside page of this day's paper. Mr. H. H. Nathan is a member of the New York Stock Exchange. Mr. M. Cohen late of Baltimore and well known in that city, was for many years connected with the management of the Hudson River Railroad; and was subsequently the successor of Gen. McClellan in charge of the Western Division of the Ohio and Mississippi Railroad, as its President and Superintendent. More recently he has been connected with the management of the Philadelphia and Reading Railroad. Mr. Cohen brings therefore to his firm great railroad experience, and will no doubt have the confidence of parties desirous of disposing of, or investing in, securities which he so thoroughly understands. Mr. Frederick Nathan is a member of the New York Mining and Petroleum Board.

☞ A meeting of the Directors of the Newburgh and Middletown Railroad Company was held at Newburgh, on the 11th inst., when the organization was completed and the company was put in working order.

☞ Mr. Gerritt Smith brought a suit against the Rome and Oswego Railroad, claiming $60,000 for damages to his property. The case was submitted to arbitration, and the referee awarded Mr. Smith $9,500.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad, for the week ending May 7, 1866..... $14,938 31
Corresponding week previous year..... 12,788 43

Increase..... $2,149 88

Receipts from Jan. 1, to May 7:
1866..... $178,678 62
1865..... 160,119 48

Increase..... $18,559 14

The traffic of the Great Western Railway of Canada, for the week ending May 11th, 1866, were..... $61,834 24
Corresponding week of 1865..... 59,003 62

Increase..... $2,830 62

The earnings of the Grand Trunk Railway of Canada for the week ending May 5th, 1866, were..... $125,780 00
Corresponding week of previous year.. 128.474 00

Decrease..... $2,694 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in May, 1866..... $18,475 00
Corresponding week previous year..... 16,614 48

Increase..... $1,860 52
Commencing 1st Jan. 1866..... $358,496 00
Commencing 1st Jan. 1865..... 377,043 17

Decrease..... $18,547 17

The earnings of the Chicago and Northwestern Railway for the second week in May, 1866 were..... $151,145 72
Corresponding week of previous year.. 125,934 81

Increase..... $25,210 91

The earnings of the Chicago and Great Eastern Railway for 1st week in May were..... $24,226 22
Same period last year..... 18,410 91

Increase in 1866..... $5,815 31

The earnings of the Michigan Central Railroad for the 1st week in May, 1866, were..... $78,542 45
Corresponding week of previous year.. 74,093 48

Increase..... $4,448 97

The earnings of the Chicago and Rock Island Railroad for the 1st week in May, 1866, were..... $63,924 00
Corresponding week of previous year.. 49,627 00

Increase..... $14,297 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in May, 1866, were..... $88,895 00
Corresponding week of 1865..... 79,039 00

Increase..... $9,856 00

Chicago and Northwestern Railway.

The Freeport, Ills., *Journal* says that a very large mortgage was recorded in the County Court at that place on the 19th ultimo. It was executed by the Chicago and Northwestern Railroad Company to Samuel J. Tilden, of the City of New York, to secure the payment of two million five hundred thousand dollars. It covers six hundred and three miles of railroad, and all the depot grounds and other lands and rolling stock belonging to the same. The lines of road covered by the mortgage are the following: The road from Chicago to Green Bay, Wisconsin, 242 miles; from Chicago to Fulton, Illinois, 136 miles; from Chicago to Freeport, 121 miles; from Kenosha, Wisconsin, to Rockford, 73 miles, and from Belvidere to Beloit, 21 miles. The United States revenue stamp affixed to the mortgage is for $2,500. The fee for recording was $15.

Commerce of New York.

The foreign imports at New York for the month of March, are officially stated as follows:

	1865.	1866.
Entered for consumpt'n	$7,066,126	$15,200,809
Do. for warehousing...	7,872,855	9,539,100
Free goods.....	830,450	1,179,177
Specie and bullion....	243,242	285,854
Total entered at port..	$16,012,373	$26,204,940
Withdr'n from wareh'e.	5,795,512	7,844,644

The foreign exports for the same period compare thus:

	1865.	1866.
Domestic produce.....	$13,898,565	$23,291,485
Foreign free mdse.....	307,221	57,167
Foreign dutiable.....	191,927	320,165
Specie and bullion	381,913	1,045,039
Total exports	$14,779,626	$24,713,856
Total excl. of specie..	14,397,713	23,668,847

The imports for the first three months of the current year compare as follows:

	1865.	1866.
Entered for cons'tion..	$17,462,395	$51,147,040
Entered for wareh'ing..	17,950,907	31,407,353
Free goods.....	2,290,642	3,922,187
Specie and bullion....	402,214	530,747
Total entered at port..	$38,106,158	$87,007,322
Wd'n. from warehouse.	17,122,658	22,935,577

The exports for the first three months of the year compare as follows: the foreign exports are given in currency value, and the imports in specie value:

	1865.	1866.
Domestic produce	$24,964,691	$59,844,602
Foreign mdse. (free)..	487,435	122,073
Foreign mdse(dutiable)	1,257,992	1,005,856
Specie and bullion....	4,589,967	5,558,405
Total exports	$51,300,085	$66,530,936
Total excl. of specie...	46,710,128	60,972,531

For the first nine months of the fiscal year the imports were as follows:

	1865.	1866.
Six mos. end'g Jan. 1.	$79,767,221	$142,730,367
In January.....	10,620,117	30,109,830
In February.....	11,473,668	30,692,557
In March	16,012,373	26,204,940
Total nine months....	$117,873,379	$220,737,694
Deposits specie.....	1,240,822	1,602,205
Total mdse.....	$116,632,557	$229,135,489

The exports for the same period compare thus:

	1865.	1866.
Six mos. end'g Jan. 1.	$131,946,100	$107,699,914
In January.....	16,561,593	20,108,207
In February.....	15,750,807	17,195,507
In March.....	14,397,713	23,668,817
Total mdse.....	$178,656,218	$168,672,445
Specie.....	26,263,467	17,646,329
Total exports 9 mos..	$204,919,685	$186,318,774

The receipts at this port for customs duties, for the first nine months of the current fiscal year, were:

	1865.	1866.
Six months ending January 1..	$24,473,902 73	$65,077,328 87
In January.....	4,231,737 47	12,437,474 16
In February.....	4,791,247 10	12,008,273 74
In March.....	5,392,099 26	11,173,154 62

☞ The Dubuque and Sioux City Railroad was formally opened to Iowa Falls on the 26th ult.

Railroads of Missouri.

Summary of the various acts to provide for the sale of certain Railroads in the State of Missouri, and to secure the early completion of others.

On the 19th of February, 1866, the Legislature of Missouri passed an act, in 17 sections, of which the following is a summary:

SEC. 1. The Governor is authorized and required to take immediate possession of the Southwest Branch of the Pacific Railroad, with all its property, real and personal, rights, franchises, etc., and all the lands hitherto appropriated to its construction and granted to the State of Missouri by act of Congress of 1862, and all other acts. And having obtained possession of the same, to turn them over to a Board of Commissioners to be sold by them in the interest of the State; and it is made the further duty of the Governor to advertise the St. Louis and Iron Mountain Railroad, the Cairo and Fulton Railroad, the Weston and Atchison, Atchison and St. Joseph and Platte County Railroads, and their property and appurtenances, and sell the same to the highest bidder by auction. The Weston and Atchison, Atchison and St. Joseph and Platte County roads to be hereafter designated as the Platte County Railroad, and the Southwest Branch of the Pacific Railroad to be designated as the Southwest Pacific Railroad.

2. A Board of three Commissioners is to be appointed for each of the said railroads. Their powers and duties are specially stated in this section and the method of filling vacancies declared.

3. The duty of the Boards is to be to receive possession of the railroads, and "to manage, operate and dispose of the same," as provided for by this act, to attend the sale of the same as by the 1st section, and purchase them in for the use and benefit of the State, for an amount not exceeding the respective liens on said roads in favor of the State.

4. After appointment and qualification, they shall, within 30 days, publish a notice of such appointment, and invite proposals for the purchase of the said roads. The notices to be published for 60 days in two papers in St. Louis, New York, Philadelphia and Boston.

5. The proposals shall be based on the following terms: The price bid shall be payable as follows—one-fourth on closing the contract, and the balance in five equal annual instalments, with 6 per cent. interest on deferred payments, payable in cash or bonds or liabilities of the State, or bonds guaranteed by the State. The roads and rolling stock to be kept in good serviceable condition during the progress of the work, the Southwest Branch to be finished within three years to a point opposite the town of Lebanon, in Laclede county; to the town of Springfield in Greene County in four years; and to the Western line of the State in five years, all from the date of the sale; $500,000 to be expended thereon every year. The St. Louis and Iron Mountain Road to be finished to a point South of Pilot Knob, to connect with the Cairo and Fulton road, in three years, and finished to the Mississippi River, opposite to or below Columbus, Ky., in five years. At least $500,000 to be expended annually. The Cairo and Fulton Road of Missouri is to be completed from the Mississippi river, opposite Cairo or Columbus, to the intersection of the St. Louis and Iron Mountain road, within three years. The Platte County road to be finished from the Missouri river opposite the city of

Kansas to the city of Weston, and from Sarannah to Forest city, in two years from the date of sale, and shall be completed to the State line of Iowa in three years; the sum of $250,000 to be expended annually.

6. The roads are to be awarded to be highest and best bidders, if made in accordance with the terms and conditions stated in the foregoing sections, with power of rejection by the Commissioners.

7. If the bids are unsatisfactory, proposals shall be invited from time to time, under new notices until a sale of said roads is effected; provided, however, that if, in the opinion of the Governor, a more expeditious and advantageous sale may be secured thereby, and work on the Southwest Branch be more speedily commenced, a sale may be made without notice, provided the lien of the State is preserved therein for securing the payment of the purchase money remaining unpaid, and which shall secure the completion of the road, as provided for in section 5; and also that such sale shall be first approved by the Governor.

8. After an award is made, duplicate contracts embracing all these stipulations, to be approved by the Governor, shall be executed and filed, and the latter shall deliver a formal deed of conveyance to the purchasers, which shall be construed as other deeds conveying real estate, and embracing all the road, rolling stock and property of every description; and the purchasers shall execute the proper mortgages to secure the payment of the purchased money; the purchasers of the Cairo and Fulton Railroad are not, however, to receive conveyances of the lands subscribed by counties to the stock of said road.

9. The rights and franchises of the roads are to be enjoyed by the purchasers, subject to the limitations of the act.

10. The purchasers are authorized to borrow money and to issue construction bonds of $500 or $1,000, secured by morgages on their respective roads, appurtenances and rolling stock, subject only to the State's lien for the amount of purchase money unpaid. These bonds are to be endorsed by the Governor, and countersigned by the Secretary of State. The State, however, is not to be held liable for any portion thereof; $125,000 of these bonds may be issued whenever $100,000 in cash have been expended on the work, and in that ratio for larger sums. Expenditures in cash of $50,000 on the Cairo and Fulton and Platte County roads will entitle them to bonds in the same ratio of amount. The books, papers, &c., of the said companies to be subject to the inspection of the Governor, or his agent appointed therefor.

11. The State assumes the full payment of the guaranteed bonds of the Pacific Railroad under act of March 2d, 1861. When the company purchasing the Southwest Branch has 20 miles in running order west of Rolla, and exhibits proof thereof, the Governor is authorized to issue a certificate granting the right of way in the public lands under the act of Congress approved June 1, 1852, not impairing however any existing pre-emption right.

12. The quantity of land sold by the Pacific Railroad under its grant is to be ascertained, and the amount of money received therefor to be paid into the State Treasury.

13. The Commissioners are to have the power to settle all matters of account between the said Branch Road and the Pacific Road, and when put in possession of the Southwest Branch to arrange with the Pacific the terms and conditions of operating the same in conjunction.

14. Failure of purchasers to perform their agreements, to work a forfeiture of the roads, and the Governor is to retake possession.

15. The Legislature to have the reserved right in case of the sale of the St. Louis and Iron Mountain road to regulate freight on iron ore and coal.

16. All acts and parts of acts inconsistent herewith are repealed.

17. The act to act to take effect immediately.

Supplementary Act of March 19, 1866.

SEC. 1. The "Southwest Branch," and the "Southwest Branch of the Pacific Railroad to mean and to be the Southwest Pacific Railroad."

2. The 4th section of the preceding act not construed to require any new advertisement on the part of the Governor.

3. The 10th section to be construed so as to leave it optional with the purchasers to print the said act and certificate of the Governor, on the back of the bonds, or omit the same.

4. The payment in full of the purchase money by the Pacific Railroad, being certified to the State Treasurer he shall execute a deed of the lands referred to in the 12th section, provided that no person shall receive deeds who has not a clear right in accordance with the act of Congress of June 10, 1852, and the laws of the State of Missouri.

5. The newspaper notices modified to one paper in each of the cities named, and 20 days substituted for 30.

6. The act to take effect immediately.

Act to incorporate purchasers under the foregoing acts, approved March 20, 1866.

SEC. 1. Purchasers of the railroads mentioned to form companies, the number of corporators to be not less than 13.

2. Articles of incorporation to state the name, number of miles of road, shares of capital stock, names of directors, &c., who shall manage for one year, or until others are chosen in their places, &c.

3. When $1,000 are subscribed for each mile, and 5 per cent. paid thereon, the articles may be filed, and the body commences its corporate existence.

4. Powers of the original charters extended to the new corporation.

5. The act not to deprive any purchasers of the railroads or branches thereof described in the act of February 19, 1866, from any of the benefits secured them thereby.

6. It shall not be obligatory on the purchasers to incorporate under this or any other act of the Legislature, but they may take possession, and control, and operate in accordance with the terms of this particular act, or under such corporate rights as they may have acquired by the purchase.

7. This act does not relieve purchasers from the terms, conditions and limitations of the other acts.

8. To take effect immediately.

☞ The Sandusky, Dayton and Cincinnati Railroad Company has been re-organized and a new board of Directors chosen. The new Company is called the Sandusky and Cincinnati Railroad.

Maryland and Delaware Railroad.

The Easton, Md., *Star* says: "We learn that the work on the Maryland and Delaware Railroad has been interrupted by some attachments which have been laid against the contractor, growing out of claims against him in New Jersey. As the suits have nothing to do with the Maryland and Delaware Railroad Company, it is thought the matter may be arranged in a few days, so as to allow the work to proceed."

South Side (L. I.) Railroad.

We understand that Messrs. Shanahan, Myers & Co., have taken the contract for the construction of this road. It will commence at Jamaica and run to Islip, 35 miles. It is designed to continue the road into Brooklyn at an early day. Work will be commenced immediately, and prosecuted to early completion. We are informed that the company has sufficient funds now on hand to grade and tie the road, with a considerable surplus towards the purchase of iron. C. F. Fox is President, and Samuel McElroy Chief Engineer.

European and North American Railway.

In the Massachusetts State Senate on the 9th inst., the bill to aid in the construction of this road, the provisions of which we gave in our last issue, was ordered to be engrossed by a vote of 23 to 10. On the 11th, the bill came up in the House, when the Speaker ruled that the bill involved an appropriation of money, and therefore should, under the constitution, have originated in the House. On motion, the bill was laid on the table. On the 15th, the same bill was introduced in the House, and referred to the Committee on Railways and Canals.

Goshen and Montgomery Railroad.

We are informed that the work of construction on this road is now being pushed with vigor at every available point on the line. It is the expectation of the contractors to have the grading completed, ready for the superstructure within 90 days. This road will be 10½ miles in length, and will be an important feeder to the Erie Railway, and will afford railway accommodation to a numerous and wealthy population of a large portion of the Wallkill Valley heretofore so much needed. Mr. Wilkinson, of Montgomery, is President, and A. P. Robinson, Chief Engineer.

Florida Railroad.

At a meeting of the stockholders of this company held at Gainesville, Alachua Co., Florida, on the 21st ult., the following named gentlemen were chosen directors: D. L. Yulee, President; F. C. Barrett, Secretary; E. N. Dickerson, Marshall O. Roberts, A. H. Cole, Philip Dell, James B. Dawkins, H. A. Corley and James T. Thomas.

☞ We give this week an abstract of the laws of Missouri, including the supplementary act subsequently passed, in relation to the sale and future disposition of certain railways in that State, which are of importance to parties interested therein, or intending to become so.

☞ We learn that surveyors are busy locating the route of the New York and Oswego Midland Railroad. The directors have issued an address to the people along the proposed line, in which they estimate the whole cost of construction and equipment from Oswego to New York at about the sum of $8,000,000.

Morris Canal and Banking Co.

We have the report of this company for the year ending February 28, 1866. From this we learn that the necessary repairs and improvements having been completed, the canal was filled in the latter part of March, and business commenced upon it on the first day of April, 1865, and continued without serious interruption until the 14th day of December, a period of two hundred and fifty-eight days.

The income of the company from tolls and other sources during the year was $600,584 30

And the expenses were:

Repairs of canal & works.	$178,897 27	
Operating canal	58,290 47	
Salaries, law and other expenses	$42,949 16	
Less gain in int.	8,167 74	
	34,781 40	
Transportation expenses .	895 43	
		272,864 57
Balance—profits of the business		$327,719 73
Balance at credit, Feb. 28, 1865		90,919 57
		$418,639 30
Dividends on preferred stock		$117,500 00
" " consolidated stock		102,500 00
Interest on mortgage bonds		45,660 00
United States taxes		9,988 49
Discount on boat loan		24,963 12
Depreciation of boat stock		725 72
Balance—surplus		117,351 97
		$418,639 30

The whole amount of freight transported upon the Canal, during the last season, was 716,587 tons, or 7,340 tons less than in 1864. By referring to the "Table of Trade and Tonnage," it will be seen that the quantity of coal exceeded that carried in 1864 by 35,150 tons; and that in the ore trade there was a falling off in the quantity amounting to 49,086 tons.

The receipts of the company from all sources, during the year, have been $600,584 30; the current expenses have been $272,864 57; leaving as net earnings, $327,719 73. Out of this, dividends, amounting to ten per cent., have been paid upon both the preferred and consolidated stocks; and the interest upon the company's bonds as it fell due—after which a balance of $117,351 97 was left to the credit of profit and loss at the close of the fiscal year.

The Board, on the first day of November last, created a "Boat Loan" of $330,000, and authorized the sale of two-thirds of that amount, to stockholders only, on or before the first of January last. Of this $151,220 has been taken upon the terms proposed; and certificates, or bonds, have been prepared and issued to all who have paid the full amount of their subscriptions. The amount subscribed for by stockholders has been less than that directed to be sold; a portion of it, therefore, remains on hand subject to such order as the Board may think proper to make in relation thereto.

From the report of the Assistant Engineer and Superintendent, it appears that the Canal and works are in good condition; and as navigation is now resumed with a larger number of boats than ever before, and with increased facilities for shipping coal at Port Delaware, the prospect of business during the season upon which we are entering appears highly favorable.

As some difference of opinion has existed respecting the proper disposition of the receipts from the canal, over and above the amount which the Directors are bound to pay, as dividends, to the holders of preferred stock, the following extracts from the agreement entered into by the company with the subscribers to that stock are here given, for the information of those concerned.

VII. That the entire receipts of the Canal shall be appropriated as follows:

1st. To the payment of current charges.

2d. To the payment of interest on outstanding debts.

3d. To the payment of dividends on the preferred stock in the fulfilment of the foregoing covenants.

4th. To the payment of dividends on the old or common stock, until such dividends reach two dollars and fifty cents each share per annum, and ten dollars per annum on any consolidation of such stock. Four shares of old or common stock, being taken to compose one share of such consolidated stock.

VIII. That in the event of the net earnings of the company enabling it to pay dividends beyond the rates above named, that such further dividends shall be paid in the same proportion on all the stock. Four shares of old or common stock being taken as equal to one share of preferred stock. But it is understood that the Directors are authorized to make such expenditures, from time to time, as the exigencies and proper management of the business of the company may in their judgment require, before any dividends are paid on the old or consolidated stock, but only so far as it may be done without interfering with the payment of the dividends on the preferred stock, and it is hereby expressly agreed between the Morris Canal and Banking Company and the subscribers and holders of the new preferred stock hereby created, that no dividends shall be paid to the holders of the old or consolidated stock, until the holders of the new preferred stock above mentioned, shall at all times have received equal to ten per cent. per annum, in semi-annual payments on said stock.

GENERAL STATEMENT.

Cost of Canal and appurtenances ...		$3,110,679 59
Assets:

President and Engineer.—WILLIAM H. TALCOTT.
Vice President.—JOHN D. WARD.
Secretary.—JOHN RODGERS.
Ass't Engineer and Sup't.—A. P. BERTHOUD.

☞ The President has approved the bill extending the time for the completion of the Union Pacific Railroad, eastern division, until the 27th of June, 1866. The time for completing each succeeding one hundred miles is to be reckoned from that date. This bill extends for two years, the time for commencing and completing the Northern Pacific Railroad and all its several sections.

☞ The Southwestern of England Railway Company possesses a monster engine, named the Colossus. It has been built to draw a train of eighty loaded wagons eighty miles in three hours, each loaded wagon weighing about ten tons. It can drag nearly one thousand tons from London to Southampton with almost the speed of a bird flying.

Cincinnati, Richmond and Chicago R. R.

The certificate of re-organization of the Eaton and Hamilton railroad company was filed in the office of Secretary of State at Columbus, Ohio, on the 8d inst., under the new name of Cincinnati Richmond and Chicago Railroad Company. The capital stock for the time being is $500,000, divided into 100,000 shares of $50 each. The purpose of the new company is to hold, operate and maintain the railroad heretofore held by the Eaton and Hamilton Railroad Company.

Concord and Claremont Railroad.

The people of Northwestern New Hampshire are spiritedly at work in their endeavors to secure the extension of the Concord and Claremont Railroad from its present terminus at Bradford to Newport and thence to the Connecticut river at Claremont. The town of Newport has recently voted an appropriation of forty-five thousand dollars toward the proposed enterprise. A grand mass meeting for the furtherance of this object is soon to be held at Clarement.

☞ The first meeting of the Coos Railroad Company is to be held at Whitefield, N. H., on the 1st of June. The Boston *Commercial Bulletin* says: The people of Coos county are getting in earnest about a railroad, and it is altogther probable that a road will be built from Littleton to Lancaster at no very distant day, with a connection thence with Northumberland on the Grand Trunk Railroad.

☞ The stock in the proposed Passenger Railway to run from Cooper's Point to Kaighn's Point, N. J., is being taken with sufficient spirit to warrant the commencement of work at an early day. The track, as proposed, will run down Front street to Kaighn's-point avenue, and up Fourth street to Cooper's Point, opposite Vine-street ferry.

☞ The *Milwaukee Sentinel* states that the Chicago and North Western Railroad Company have leased the track and stock of the Chicago and Milwaukee Railroad—the lease having gone into effect on the 8th inst.

The earnings of the Western Union Telegraph Company, for the month of March, 1866, were	$329,112 78
March, 1865	260,645 88
Gain in 1866	$68,466 90

☞ Navigation was opened on the Rideau Canal, between Kingston and Ottawa, Ca., on the 3d inst.

BORDEN & LOVELL,

70 and 71 West Street, New York.

GENERAL AGENTS

Borden Mining Company's

CUMBERLAND COAL.

Orders from Railroad Companies, Manufacturers and others are respectfully solicited.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., NEW YORK, May 1, 1866.

The Annual Meeting of the Shareholders of the Illinois Central Railroad Company for the election of directors and the transaction of other business will be held at the office of the Company, in the City of Chicago, on Wednesday, the 30th day of May, 1866, at 3 o'clock P. M.

The transfer books of the company will be closed at the close of business on the 19th instant and re-opened on the 2d day of June next.

L. A. CATLIN, Secretary.

New York, Saturday, May 26, 1866.

Osage Valley and Southern Kansas R. R.

The Boonville extension of this road, connecting Boonville on the Missouri River with Tipton on the Pacific Railroad, is now under progress of construction. The distance is 24½ miles, and will be completed ready for the superstructure during this year. Its importance as forming a link in a grand central Missouri route, can be readily seen. By a northward continuation of 50 miles through a very favorable country, it will intersect the North Missouri Railroad, thereby making a direct connection with Chicago and the Northeast by the way of Quincy. By intersecting the Pacific Railroad at Tipton, the route to the great west for northern travel is greatly shortened, and a direct eastern outlet obtained from Central Missouri. By the main line itself from the Pacific Railroad at Tipton, in a southeasterly direction through the heart of Missouri into the State of Kansas, a rich and valuable section of country now almost isolated is brought into direct connection with all existing facilities of transit. In fact, the Osage Valley and Southern Kansas Railroad will it is said, at no distant day, appear before the public as the Grand Central Missouri route. This important public work is now under the control of energetic officers, and an efficient Board of Directors. General J. H. Baker is President; Judge Ignatius Hazell, Vice President; Col. D. W. Wear, Secretary; Col. J. A. Eppstein, Treasurer; Capt. Jas. L. Stephens, General Agent; and Chas. W. Allendorph, Chief Engineer.

Southwest Pacific Railroad.

The South West Branch of the Pacific Railroad, which diverges from the Main Line at Franklin, Mo., 37 miles west of St. Louis, and extends thence to Rolla, 76 miles, being one of the four railroads advertised to be sold by the State under foreclosure of its mortgages, was purchased on the 13th inst., by Gen. John C. Fremont, for the sum of $1,300,000. The recent acts of the Legislature of Missouri under which this sale was effected, an abstract of which we gave in our last issue, requires the purchaser to finish the road within three years to a point opposite the town of Lebanon in Laclede County; to the town of Springfield in Greene Co., in four years; and to the western line of the State in five years, all from the date of sale—$500,000 to be expended thereon every year. The terms of payment of the purchase money are: one-fourth on closing the contract, and the balance in five equal annual instalments, with six per cent. interest on deferred payments, payable in cash, or bonds or liabilities of the State, or bonds guaranteed by the State. The purchaser is authorized to borrow such sums of money for the completion of the road, or for the payment of the balance due the State, or any part thereof, on such terms, and at such rate of interest as he may deem expedient; and for that purpose may issue construction bonds of $500 or $1,000, and to secure the payment of the same, may execute in due form a mortgage on the road, appurtenances and rolling stock; subject only to the State's lien for the amount of the purchase money remaining unpaid. This road has a land grant of 1,030,000 acres selected along the line in 1852, embracing some of the best land west of the Mississippi River. The famous Granby lead mines in Newton Co., are a part of its "reality." It is contemplated to make this road a part of the route from Springfield to California, provided for in the Southern Pacific Railroad bill reported in the Senate by Senator Brown of Missouri. Gen. Fremont obligates himself to finish the road within the time specified in the act. He has, it is said, connected with him some of the strongest capitalists in the country. It is estimated that four or five millions of dollars will finish the road; and its owners claim that it will be worth twelve millions when completed. Under the law for consolidating the State debt, the proceeds of the sale of this road will go into a sinking fund for the ultimate redemption of the new Missouri consols.

What to do and how to do it.

The public mind has been much agitated on the subject of increased facilities and cheaper transportation betwen the east and the great west. A Commercial Convention assembled at Chicago in 1864, and another Convention at Detroit in 1865, to take the matter into account. Both Conventions adjourned without the adoption of any efficient plan, at least none that the public has deemed sufficiently feasible to be acted on.

The following plan has been suggested by a gentleman as one that will overcome all difficulties:

First. A double track road-bed, to be owned by a joint stock company, but to be open to free competition in transportation, any one being allowed to put trains on the road and run them, paying tolls to the company the same as a turnpike road or the canals of this State for the privilege of transporting over it.

Second. A uniform rate of speed, and just such rate of speed as will give the road its greatest freight capacity, probably from eight to ten miles an hour.

This plan, though it has nothing new in principle, combines the arrangements in a more perfect form to give it efficiency than anything we have heretofore contemplated. We observe that the *Evening Post*, *Commercial Advertiser*, *Brooklyn Union*, *N. Y. Tribune* and *Scientific American*, are out in approval of the plan. So many and strong advocates will be certain to popularize the project unless there is discovered some defect which we are unable at present to foresee.

It is assumed that a transportation thoroughfare on this plan will have a freight capacity

equivalent to 20 single track or 10 double track roads of unequal rates of speed; that the equal or uniform rate of speed will do away nearly all the difficulties in management and liability to accident, while free competition in transporting over the road will take away the injurious power of monopoly, and consequent imposition on the public.

We confess that our expectations of the success of this plan are sanguine, and if we mistake not, the era of Railway efficiency will soon commence.

*

Minnesota Central Railroad.

We have received a copy of the First Annual Report of this company, comprising the Reports of the President and Directors, Chief Engineer and Superintendent, and the statement of the Treasurer; also a compilation of Acts of the Legislature of Minnesota, and of Congress, relating to the same.

The length of road completed and in operation December 31, 1865, was 56 miles; of this, 42 miles, from Mendota to Northfield, was opened for business on the 4th of September, and the remaining 14 miles to Faribault, on the 18th of October, 1865.

The earnings of the road during these four months were $45,497 19; of which $31,336 45 were from the transportation of freight, $13,364 10 from passengers, and $896 64 from mails, rents, etc. The expenses during the same time were $27,507 69—leaving as net earnings, $17,989 50.

At the time this company succeeded to the property, August, 1863, grading amounting in the aggregate to 20 miles was completed. The masonry and other mechanical work was trifling in amount. Since that dato the grading done by this company on the main line consists of 30 miles north of Faribault, and about 6 miles south of that place, of average cost, and 6 miles of very heavy work at the crossing of the Minnesota River and its approaches, comprising a very large amount of loose sand and solid rock excavation. The masonry consists of four piers and an abutment for the turntable bridge and two adjoining spans across the Minnesota River, also abutments for bridges over Cannon River, and Minne-ha-ha, Vermillion and Heath Creeks, road bridges at Fort Snelling and Faribault, and sluices, culverts and cattle guards.

On the St. Paul Branch, a large amount of grading has been completed, and the foundations for the entire bridge across the Mississippi River prepared. Foundations for 2,000 feet of trestle work are also completed.

About three miles of the road have been ballasted. In addition to the 56 miles of main track, 5.6 miles of side track have been laid. At every station, buildings for passengers and freight have been built; also, at various points on the line, engine houses and water stations, grain warehouses and elevators, machine and car shops, etc.

The amount expended in construction, equipment, etc., to the date of the report will appear in the annexed balance sheet. The estimated cost of completing the road from Faribault to a junction with the Winona and St. Peter Railroad at Owatonna, 15 miles, including all buildings, is $255,581. It is thought the junction will be made by midsummer, when an increase of equipment will be required of three locomotives and two passenger cars.

No less important and advantageous to the company's interests, will be the extension southward to the State line of Iowa, and the connection there with the system of railroads leading to Milwaukee, Chicago and St. Louis, giving a diversity of outlets to the trade of Minnesota, and extending greatly the tributary area of the road. The lumber of Minnesota will be exchanged for the gypsum of Iowa, and an immense increase in freighting will at once ensue.

The length of road from Owatonna to the State line is 44 miles, and the estimated cost of completion $716,553.

The Minnesota Central Railway Company was incorporated by an Act of the Legislature of the Territory of Minnesota, approved March 1, 1856, under the name of the "Minneapolis and Cedar Valley Railroad Company." The lands granted by the Act of Congress, approved March 3, 1857, to the Territory of Minnesota, applicable to the route of the road, were granted to said company by an Act of the Legislature of the Territory of Minnesota, approved May 22, 1857.

Pursuant to the provisions of an amendment of the constitution of the State of Minnesota, ratified by a vote of the people April 15, 1858, the Minneapolis and Cedar Valley Railroad Co., delivered to the State of Minnesota $600,000 of bonds, secured by a first mortgage upon its road, lands and franchises, in exchange for an equal amount of the bonds of the State. Upon default in the payment of interest upon its bonds so issued to the State, the said mortgage was foreclosed by the Trustees named therein, and the road, lands and franchises of the company were bid in by the Governor for the benefit of the State of Minnesota, August 16, 1860. By virtue of the terms of the aforesaid amendment of the constitution, the said company also forfeited to the State, December 31, 1861, all its lands and franchises for failure in the construction of its road as provided in said amendment of the constitution.

The State thus became vested with the lands, property and franchises of the company, both by foreclosure of its mortgage and purchase thereunder, and by the forfeiture provided in the constitution.

By an Act of the Legislature of the State of Minnesota, approved March 10, 1862, the road, lands and franchises then held by the State, were granted conditionally to certain persons therein named, who were authorized to organize and hold the same under the name of the "Minneapolis, Faribault and Cedar Valley Railroad Company." The present Board of Directors are grantees and successors of the persons named as grantees and corporators in the said Act of March 10, 1862. By a recent Act of the Legislature of the State of Minnesota, approved February 1, 1864, the conditions annexed to the grant of 1863 are removed, and the road and its lands and franchises granted unconditionally to, and confirmed in the present company, under the name of the Minnesota Central Railway Company.

The road as in process of construction commences at the State line, between Minnesota and Iowa, in range eighteen, and runs through the Counties of Mower, Dodge, Steele, Rice, Dakota and Hennepin, and terminates at the flourishing towns of Minneapolis and St. Anthony, with a branch road diverging from the main line at Mendota, and running to the city of St. Paul, the capital of the State. The length of the entire road and branch as contemplated, is 120 miles. The original corporation (before the road was foreclosed and became the property of the State,) expended in the aggregate, the sum of $600,000 in the grading and masonry required, and the work performed under their auspices, in detached portions, when equated with reference to the entire cost of graduation and masonry, (excluding from the account a costly structure contemplated by that company at the crossing of the Minnesota River, and seven miles of light finished grading between Fort Snelling and Minneapolis, which has been abandoned for a more favorable location,) amounts to more than six-tenths of the work necessary in the beginning, to prepare the road for the rails, from the State line to Mendota, a distance of 105 miles, or in other words, is fully equal to a continuous road bed of an average value per mile as great as that of Western roads, and 63 miles in length. This result of a very large expenditure of money, all of which will be made available, accompanied the grant from the State, to the present company, as a donation.

The work of preparing the Northern Division of the road from Minneapolis to Faribault 56 miles, for the rails, was commenced by this company in August, 1863, and the road was opened for business from Mendota to Northfield, September 4th, and from Minneapolis to Faribault, October 18th, 1865.

Between Faribault and the junction with the Winona and St. Peter Railroad, at Owatonna, in Steele County, a distance of 15 miles, the work of preparing for the rails, is well advanced; strong parties of men are now engaged in completing the grading and masonry, and the iron will be laid by July 1st, to the junction.

The lines of railroad now in progress, which will form connections with the Minnesota Central, are the branch line of the St. Paul and Pacific, which forms a northward extension of this line from St. Paul and Minneapolis, and is now in operation 42 miles, to Elk River, and to be opened the present year to Watab, a further distance of 38 miles; the main line of the St. Paul and Pacific from Minneapolis, westward, of which 20 miles are now graded, and will be opened the present year; the Minnesota Valley Railroad, now in operation from Mendota to Shakopee, 22 miles, and to be opened the present summer from St. Paul to Belle Plain, a distance of 46 miles; the Winona and St. Peter Railroad, now running from Winona to Kasson, 65 miles, and which is being pushed forward energetically to the junction, at Owatonna, in Steele County; the McGregor Western Railroad, which, like the last mentioned road, is being vigorously prosecuted towards the junction at the State line; and the Cedar Valley Railroad, of Iowa, the completion of which from Cedar Rapids, to the State line, will give with the two last named lines of road, four outlets to the cities of Milwaukee and Chicago and the eastern railroad systems, and open up all Northern Iowa to the lumber trade of St. Anthony Falls.

During the past year the subject of a through line of railroad from St. Louis to St. Paul and Minneapolis, has engaged very largely the attention of the citizens of Missouri, Iowa and Minnesota. As a means of communication with the lower Mississippi Valley, this project is of commanding importance, and its accomplishment, in view of the fact that a number of links in the line are already constructed, is by no means an undertaking of great magnitude.

The consummation of this plan will make the Minnesota Central Railway a part of the great route between the head of navigation on the Mississippi and the Gulf, and by which the products of Minnesota, passing through the port of New Orleans, will seek their markets abroad. The completion of this line at an early day may be confidently relied upon.

The entire cost of completing the road, right of way, fencing, buildings and a full equipment, will be $2,840,000, exclusive of the cost of the branch to St. Paul. The cost of the St. Paul Branch is estimated at $390,000, including a bridge over the Mississippi River and depot grounds in the city of St. Paul. An arrangement has been entered into with the Minnesota Valley Railroad Company, whereby this branch will be built and owned jointly by the two companies, making the cost to each company $195,000. The depot grounds at Minneapolis, fourteen acres in extent, lying but one block distant from the lumber and flour manufactories, have been donated to the company, by the public spirited citizens of that town; their

present value at prices for which cash sales are being daily made is not less than $20,000. A very liberal spirit has been evinced by landholders along the entire line, and when not made a gift to the company, the right of way has been purchased at very low rates.

The land grant of this company is distributed along the entire line, but is mostly located in the Counties of Mower, Freeborn, Dodge and Steele; settlements having been retarded in those counties on account of their remoteness from the river. This grant amounts to 168,110.28 acres. The lands are of excellent quality and embrace every variety of heavy timber, openings, prairie and grass lands. At $7.50 per acre, which it must be conceded is a low estimate for lands contiguous to settlements, and lying within an average distance of 7½ miles of a railroad, their cash value is $1,260,827.10. In this estimate no account is made of the additional grant made by Congress at its last session, whereby all vacant lands lying without the fifteen miles limits and within twenty miles limits, were ceded to the State for the benefit of this line of road. The number of acres included in this grant has not as yet been ascertained, but will, undoubtedly, exceed 20,000 acres, and may reach a much larger amount. These lands are estimated as worth in cash $5 per acre, or $100,000. The supply of timber for wood and ties is abundant. For a distance of twelve miles in the County of Rice, the line passes through a dense forest of hickory, sugar maple, oak, ironwood, elm, and other varieties of timber. This forest is known as the "Big Woods," and extends thence in a body westward to the Minnesota river.

The northern half of Dakota County is also well timbered with burr oak. This abundant supply places it entirely in the power of the company to regulate the price of fuel for a long period of time.

Excepting the counties of Houston, Filmore, Winona, Olmstead, Wabashaw and three-fourths of Dodge and Goodhue, which from their situation east of the line of the road, and their proximity to another line of railroad and the Mississippi River, are necessarily excluded from the calculation, and that portion of the State which may be included in the district tributary to the extension of the Winona and St. Peter Railroad from the junction in Steele County to St. Peter, when that extension is made, the remainder of the State is either directly or indirectly dependent, during at least one-half and mostly for the whole year, upon this road as a means of communication with the east. A large and very fertile and populous district of country bordering the road must remain so for all time.

Independent of the counties and parts of counties heretofore adverted to as not tributary to this road, (except in their intercourse with the State Capital and the manufacturing centre at the Falls of St. Anthony,) the statistics of the population for 1865, taxable valuation for 1864, and agricultural and forest products of the residue of the State for 1861, are as follows:

Population	166,000
Taxable valuation	$28,716,168
Bushels of Wheat	2,159,814
" Barley	143,946
" Corn	1,459,416
" Rye	212,978
" Oats	1,444,242
" Potatoes	1,420,442
Pounds of Wool	14,829
" Cheese	118,737
" Maple Sugar	337,800
" Butter	1,747,083
" Tobacco	28,743
F. B. M. Lumber	90,109,000
Value of Live Stock	1,850,473
Tons of Hay	150,018

The number of tons of way freight carried was 8,970; do., of through freight 2,444—total 11,414. Tons carried one mile 375,591.

Number of way passengers carried 7,871; do., of through passengers, 785—8,556. Number of passengers carried one mile, 263,698.

The number of miles run by loaded cars was, 55,905; by empty cars, 24,648.

The equipment of the road consists of 5 locomotives, 3 first-class passenger cars, 2 baggage, 80 box, 22 flat, 11 hand, 4 ditching, 6 lumber and 4 iron cars.

The estimated revenue of the road the first year after completion is $1,005,400; operating expenses, 55 per cent., $552,970—net eatnings $452,430, equal to 14.9 per cent. on the cost of the road ($3,035,000); and equal to 7 per cent. on a capital of $6,460,700, or a cost per mile of nearly $54,000. Deducting the cash value of the land grant, will leave the net cost of the road $1,674,173—on which the above earnings will be upwards of 27 per cent.

Mississippi and Missouri Railroad.

The Mississippi and Missouri Railroad is to be sold about the 25th of June, at Davenport, under a decree of foreclosure rendered on the 12th instant in the United States District Court at Des Moines. The decree forecloses all the mortgages on the road, viz: First and second mortgages on first division of the road from Davenport to Iowa City and Muscatine; first mortgage on the second division from Iowa City west, including the lands granted by Congress in aid of the road; first mortgage on the Oskaloosa division, from Muscatine to Washington and west, and the second land grant mortgage covering the whole road. The Court found that there is due upon the several mortgages the sum of $7,482,545 34, and entered a decree for that amount. It will be bought by the Rock Island Railroad Company, or the capitalists who control that company, organized as a new company. The sum at which the road is to be purchased is fixed by agreement among the bondholders at $5,500,000, to be divided as follows: First mortgage, first division, and the income bonds given for interest on that mortgage and interest to July 1, 1865, par; second mortgage, first division, 80 per cent. of principal. Oskaloosa division, mortgage, including income bonds given for interest on that mortgage, 62½ per cent. of principal. Land grand mortgage, including income bonds given for interest on that mortgage, 70 per cent. of principal; 2d mortgage construction, 30 per cent. of principal. Stock 16 per cent. This with the expenses of foreclosure, &c., will absorb the entire amount of $5,500,000. The Chicago and Rock Island Railroad Company, on taking possession of the Mississippi and Missouri Railroad, will proceed to extend it westward to Des Moines and Missouri.

Portage Lake Copper Mines.

We give below from the Portage Lake *Mining Gazette*, the product of the mines located in the Portage Lake District for the first quarter of the year 1866:

	January.		February.

Total	463	1,579	1,001	83

☞ We learn that an arrangement has been made between the Vermont and Canada and Vermont Central 1st and 2d mortgages, by which the back interest on the first mortgage will be settled by the issue of new bonds to the amount of 50 per cent., and it is confidently stated by those who are most conversant with its affairs, that the net earnings of the road will, in the course of one or two years, be sufficient to pay the interest on all the issues, including the second mortgage. The 1st mortgage bonds are now selling at 93@93½, including some ten years' back interest.

☞ The Boston and Worcester Railroad Co. have purchased a large piece of ground upon which they contemplate building a large engine house, which will accommodate as many as twenty engines. A new freight house will then be erected in the immediate vicinity of their present one, much larger and more convenient. A large addition of one hundred feet in length is also being added to the freight house of the Western Railroad. The large and rapidly increasing business of these roads has rendered these improvements necessary.

☞ At a meeting in London of the bondholders of the State of Georgia, it was unanimously resolved that the offer of the State to fund the arrears of coupons and over due bonds into a new debt, carrying 7 per cent. interest, be accepted.

☞ Nemaha County, Kansas, has voted $125,000 for the St. Joseph and Denver Railroad, and Doniphan, Brown and Marshall Counties, in that State, are expected to follow the example.

Philadelphia and Reading Railroad.

In the AMERICAN RAILROAD JOURNAL, of January 20th, we gave the President's Report in full. In the present instance we select several important tables referring to the years ending Nov. 30, 1864, and 1865 respectively, and append a general statement of the cost, earnings and dividends since the completion of the road in 1842–'3.

ROADWAY.

American Railroad Journal.

Saturday, May 26, 1866.

Stock Exchange and Money Market.

The last week, in one respect, was a remarkable one. Not since 1859 has as much specie gone from this port at one time as went out on Saturday. Upwards of eight millions of dollars were shipped by the foreign steamers on that day, consigned to Liverpool, Havre, Bremen, and Hamburg, the largest part going to Liverpool. The first idea was, that the premium would certainly advance upon such a shipment, and the speculators then expected, and no doubt have since expected, a rise. We know that speculations are on foot looking to this as a sure event, and preparations are making to take advantage of the circumstance. The causes of this large shipment are stated very differently in the journals of the city, according to the views their editors take of the financial question generally. The reasons are probably of a composite character.

In the first place, we must remember that the interest on the debt due to foreign holders of our securities on as much as 300 millions, had to be remitted. Of course a very large sum is to be accounted for in this way. In the next, the condition of the foreign market, and the prospect of a war on the continent, would induce the foreign houses to get in all their funds in the best shape to be used as emergencies at home might require. And, again, the foreign capitalists, in the interest of their respective governments, might be expected to give what stability they could to their own affairs at home. We must not forget, however much the English political economists may boast of the extent and value of their trade, they deal with no other such country as the United States, where the auction system, the banking system, and the firm hold of foreign agencies give such facilities for the conversion of goods into money. This Country is the Dorado of foreign merchants, and here they literally pile up their gold without much difficulty. The Country is full of foreign houses, with large home credits which they use dexterously and often. It is well known that almost every foreign agent who is able to draw a 60 day bill, will do so when he can; and the remittance to meet it has hitherto been made in American securities, on a rising market, and with a profit. The bonds that have come back here, have come from weak holders abroad, who could not hold on to see the end of their speculations. So that we need not be surprised under the circumstances if specie should suddenly have been called for and shipped on a large scale. What is surprising is that this shipment did not here create a rise in the rate of interest, or the premium on gold. On the contrary the rates were undisturbed and the market was as quiet as possible. The effect of this abroad will be more surprising than the remittance itself, for our rate of interest being unaffected by it, the conclusions in our favor will be immensely to our advantage. The government is understood to have supplied all the extra demand; and with an estimated surplus even now of nearly eighty millions at command, can be ready at any moment to come to the relief of the market again. A large rise in gold is certainly to be deprecated, as prices would advance beyond the control of consumers, to fill the pockets of the holders of articles of necessity, not over scrupulous when they have a chance. The morals of trade are not of a very severe description either in this country or England; certainly not in the latter country, if we may believe what Herbert Spencer writes about it. As the market stands, it is probable that the struggle for a rise in gold will continue, under the expectation of bad news from abroad; but the Treasury can keep the control of the price here, and will be justified in doing so. The operations of the government are on so large a scale, and its receipts are so enormous, that its power of good or evil is immense, and if properly used may have a benign influence. We should prefer seeing its action of less influence on commerce and trade; but we cannot kelp it, and we trust it will be properly directed now and hereafter. The actual amount of gold in the country on the 1st of July, 1860, was as follows: New York city banks, $22,464,000;

United States Treasury, $6,253,000—total, $28,-817,000. On 21st May, 1866, it was net $72,906,-000, almost three times as much, and pretty conclusive evidence of the strength of the money power of the country. To this amount we must add the remittance from California on Monday last. And though on the 1st of July another instalment of interest comes due, the receipts continue large and the credit balances are on the increase.

We nevertheless regret to state that our imports are excessive. For the year ending May 19, inst., they amounted to $270,118,142, against only $139,667,262 for the same period in 1865, showing an increase of $130,450,880, a result by no means to be admired, and likely to produce embarrassment if long persisted in. We have but little that will pay to be exported at present prices; and the fear now is that the cotton crop will not come up to expectation. Indeed already the speculators are operating for a rise. Nothing escapes the vigilance of these persons.

One of the interesting subjects before the public just now is the talk in England with regard to its supply of coal, and the time when it is likely to fail. If we understand Mr. Gladstone correctly, he fears it will fall short in about a hundred years. We think he is mistaken. Professor Austed, one of the greatest of British authorities on this and similar topics, has published an interesting calculation on the subject, but of a different tendency. In the British Islands there are the following well known coal fields:

Newcastle and Durham with area in square miles	460
Cumberland, Westmoreland and Westriding of Yorkshire	40
Lancashire, Flintshire and North Staffordshire	380
Yorkshire, Nottinghamshire and Derbyshire.	750
Shropshire and Worcestershire	28
South Staffordshire	100
Warwickshire and Leicesershire	45
Somersetshire and Gloucestershire	120
South Wales	900
Scotland	1,600
Estimated area	7,023
Extension of new bed (probable)	1,535

The thickness of seams varies from 15 to 84 feet.

Professor Austed estimates that there are not less than 4,500 square miles of this coal area where the formations may be and are worked; and he calculates that the product may be set down at 170,400,000,000 tons of coal. But he also estimates that only one-fourth of this can be regarded as available in consequence of waste, bad working and loss in seams. So that he considers the supply may be reduced to 35,000 millions of tons. Now the present consumption is about one hundred millions of tons per annum, and then we have the supply ascertained at that rate to be sufficient for 350 years, a period remote enough, and likely to outlast even the British constitution itself. We therefore think Mr. Gladstone may dismiss his apprehensions, and if he cannot, then he may rely upon it we shall be able to supply all the deficiency. American coal, as well as American cotton and gold, may yet save the British empire from ruin. Without the two last, it would have often been in difficulty.

The greatest event in the week, however, was the news by the Cuba of the panic in England, the rise of the rate of interest to 10 per cent., the failure of many eminent bankers and contractors, and a general confusion in the British Money Market. This of course was in strong contrast with the ease which prevailed here, and may perhaps be an indication of the belief that the money centre of the world is now on this side of the Atlantic, sure to be so one of these days if not now. It was hoped by those who look for gains whenever there is financial difficulty, that gold would rush up to a high figure again, and the prices of old stocks on hand advance. But the further and immediate supply of the article was so great that the rate advanced but a few per cent, and some of the most anxious operators got rid of their Monday's purchases, while they could cover themselves. The effect of all this flurry is much discussed. We can now see why so much left us on Saturday, if we seek only the nearest reason, that it was wanted abroad in the greatest of emergencies. If the Bank of England had suspended payment, we should not have been at all surprised. The losses by the British operators in various ways since the 1st of January last, are given in round numbers at $650,000,000; and now without as yet feeling it we have sent them eight or nine millions of dollars, and the market is still easy. This must open the eyes of our European friends, and may serve Mr. Gladstone as a text for further eulogy of this country in his next speech.

Still while our debt is held abroad in such large sums, we must expect twice a year at least similar heavy shipments, and some disturbance in public feeling. And if we continue our excessive importations at such enormous prices, we are likely to be very much at the mercy of the foreign houses. We cannot too often inculcate the necessity of economy in the American people. They are buying too much of foreign articles which they do not really require, and the profits of importation are tremendous.

A pair of men's shoes made in Paris, and which cost there about $2, are here sold at $9! Flour brings a very large profit on every barrel brought from England or France, and so of other things. Who dares give the reasons? The real remedy is in economy and retrenchment, and then and not till then will we be safe.

We are happy to state that American credit abroad has not suffered to the extent that might have been expected, and when the large remittances of Saturday last arrives it is fair to conclude, it will be rapidly improved. Breadstuffs and cotton both advanced in the face of the money panic. It is worthy of notice that those journals which advocate inflation and adherence to a paper currency, with predictions of a rise in gold, are endeavoring to uphold the system and to check any desire of contraction. But there are laws which override financial crudities, and the sooner we understand the subject the better it will be for us. What we really have to fear is, that we shall have Europe emptying its warehouses upon us and selling all that our improvidence will inspire us to take. Economy, we say it again, is our only shield and buckler.

The report of the associated banks for the last week shows a gain in legal tenders of $669,448, an increase in the circulation of $496,605, and a decrease in the loans of $1,930,854. The drain for money has not reached the banks, the deposits only lessened $125,124, and the specie $374,937. Money remains plentiful at 5 per cent., just half the rate at the Bank of England.

The New York exports, exclusive of specie, for the week ending May 22d, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,229,028	$3,117,494
Prev. reported	65,192,455	91,141,509
Since January 1	$67,421,483	$94,259,003

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$736,639	$1,892,218
Gen. merchandise	1,579,749	4,238,164
Total for the week	$2,316,388	$6,130,382
Prev. reported	52,472,793	125,622,873
Since January 1	$54,789,181	$131,753,255

The balance in the Sub-Treasury on Wednesday was $108,677,338 87.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Milwaukee and St. Paul, 51⅝; do., pref. 67; do., 1st mort., 89; Ohio and Miss. 1st mort., 87; Goshen Branch bonds, 96¼; Norwich and Worcester, 103½; New York and New Haven, 107½; Stonington R. St. Joseph and Denver Railroad.

A dispatch to the St. Louis *Democrat*, dated St. Joseph, Mo., May 14th, says: "Commissioners are now out in Kansas connecting the route over which the St. Joseph and Denver railroad is to run. The $4,000 just voted by Buchanan county and the subscriptions of the counties in Kansas will be placed on the market without delay, and with the proceeds the work will be commenced at once. An effort will be made to complete fifty miles of the road by next January. Twelve miles are now graded, and twenty-five miles of iron on hand, it having been piled up here since 1860."

St. Paul and Pacific Railroad.

The St. Paul *Pioneer* says that all the iron required to complete the railroad from that city to St. Cloud and enough for twenty miles of the main line of the St. Paul and Pacific Railroad, west of Minneapolis, has been purchased. Over four thousand tons of the iron are now on the way from New York. The number of passengers carried over the completed portion of this road in April of this year was 8,358, an increase over the same month last year of nearly three thousand. The freight business has increased in a corresponding ratio.

Western Maryland Railroad.

At a meeting of the directors of this company held in Baltimore on the 16th inst., it was ordered that proposals for the graduation masonry and bridge superstructure of the whole line, from Union Bridge to Hagerstown, be solicited at the earliest period practicable. Mayor Chapman and the president of the board of county commissioners of Washington county have respectively made the formal subscription under the ordinance of the mayor and city council of Baltimore and the order of the commissioners of Washington county.

☞ The Franklin and Warren Railroad is now in running order from Irvine on the Philadelphia and Erie Railroad to Tideoute, a distance of about twelve miles.

☞ L. H. Culver, Esq., has succeeded Maj. J. H. Wilson as General Superintendent of the Reno, Oil Creek and Pithole Railroad.

Covington and Ohio Railroad.

A Richmond correspondent of the Boston *Journal* says that the Covington and Ohio Railroad from Guyandotte, on the Ohio River, to Covington, in Allegheny county, Virginia, is to be built by Henry Grinnell, Pill & Co., Messrs. Aspinwall, Stewart, and other capitalists of New York, with some men in Virginia. From Covington a branch, fifty miles in length, will connect with Lynchburg on the Virginia and Tennessee Railroad, from thence to Richmond, eighty miles, and from Richmond to Newport News, seventy miles, which gives an ocean terminus to the traffic of the Ohio Valley. Cincinnati is nearer to this port than Baltimore by 193 miles of rail, and 200 miles nearer than to New York. The branches from Lynchburg, *via* Richmond, are in vigorous hands, being under the control of men in Richmond and Cincinnati. Beyond this Virginia will have a water communication by James River and the Kanawha Canal with Ohio. This enterprise is in the hands of the French house of Messrs. Bellot Minieres Brothers of Paris, who have lodged with the State $3,000,000 as a guaranty for the completion of their work. This work is expected to be finished in five years, and the lines of railroads in three, if not less. It is expected that the road from Richmond to Newport News will be in running order within eighteen months.

☞ We invite attention to the Advertisement, in another column, of Messrs. John Davol & Sons, 100 John Street, this city, dealers in copper, spelter, tin, lead, Babbit metal, copper and brass rivets, copper tubing and wire, roiled and sheet brass, etc., etc. This house has been established in business in this city since 1847. The knowledge acquired during an experience of nineteen years ought to enable them to become competent judges of the quality of articles in which they exclusively deal; and we doubt not implicit reliance may be placed in their judgment.

☞ The Western Maryland Railroad Company will receive proposals at their office in Baltimore, until the 20th of June next, for the construction of about 42 miles of road, extending from Union Bridge, its present terminus, to Hagerstown. Bids will be received for the entire line, or it will be let in sections of 14 or 5 miles. Proposals are also requested for the excavation of about 2,000 feet of tunnel at the summit of the South Mountain, and for the arching of the same, either with brick or stone, if deemed necessary.

☞ Messrs. Frederick Schuchardt & Sons, Bankers, have removed from 21 Nassau St., to 40 Exchange Place, where drafts in sums to suit at 3 or 60 days' on London, Paris, Amsterdam, Hamburg, Bremen, Cologne, Berlin, Frankfort-on-the-Main, Zurich, &c., may be obtained; also letters of credit on Europe.

☞ The Dorchester and Delaware Railroad Co. wish to employ a competent and thoroughly practical engineer, to survey a route for a railroad from Cambridge, Maryland, to Seaford, Delaware, a distance of about thirty miles. It is desirable to have an estimate of the cost of survey submitted with the application. The office of the company is at Cambridge, Md. Applications personally, or by letter will be received up to the 30th of May.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad, for the week ending May 14, 1866.....$18,693 36
Corresponding week previous year..... 10,984 89

Increase..... $7,708 47

Receipts from Jan. 1, to May 14:
1866 .....$197,371 98
1865 .....171,104 37

Increase $26,267 61

The traffic of the Great Western Railway of Canada, for the week ending May 18th, 1866, were $64,571 71
Corresponding week of 1865 ..... 60,240 38

Increase..... $4,331 33

The earnings of the Grand Trunk Railway of Canada for the week ending May 12th, 1866, were $113,552 00
Corresponding week of previous year.. 127,433 00

Decrease $13,881 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in May, 1866 ...$21,578 00
Corresponding week previous year..... 16,177 15

Increase.....$5,400 85
Commencing 1st Jan. 1866.....$380,074 00
Commencing 1st Jan. 1865..... 393,220 32

Decrease.....$13,146 32

The earnings of the Chicago and Great Eastern Railway for 2d week in May were.....$24,273 21
Same period last year..... 16,387 78

Increase in 1866..... $7,885 43

The earnings of the Michigan Central Railroad for the 2d week in May, 1866, were....$72,164 00
Corresponding week of previous year.. 84,702 00

Decrease $12,538 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in May, 1866, were $53,441 00
Corresponding week of previous year.. 49,987 00

Increase..... $3,454 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in May, 1866, were..... $94,831 00
Corresponding week of 1865 ..... 76,308 00

Increase..... $18,523 00

☞ A meeting of the corporators of the Manufacturers' and Consumers' Anthracite Railroad Company is to be held at Philadelphia on the 4th of June. The *News* of that city says that "it is designed to proceed at once with the organization of the company, with a view to the construction of the road. There can be no doubt but that the anthracite coal trade of Schuylkill county is now sufficient to the support of an additional line of rail to this city, and as there is very decided need for competition, the public will be glad to know that there is a fair prospect for the prosecution of this new enterprise."

☞ A dispatch from Leavenworth, Kansas, dated May 16th, says that the branch of the Union Pacific Railroad, Eastern Division, is finished between Lawrence and Leavenworth, and trains are now running regularly over 130 miles of the road, making close connections with the East.

☞ The cars on the Albany and Susquehanna Railroad are now running regularly to Unadilla.

Mr. Colwell's Report to the Secretary of the Treasury on Protection.

Mr. Stephen Colwell, one of the United States Revenue Commission, a gentleman well-known and highly esteemed in Pennsylvania, has addressed a letter in more than five columns (of the *Tribune*,) to the Secretary of the Treasury on the relations of foreign trade to domestic industry and internal revenues, giving his views of the subject in a most clear and interesting manner. We propose to give an abstract of his statements which are worthy of serious attention. He says:

Something more than hard work is needful to give industry the power to endure taxation, and this is net income, otherwise industry will be crushed.

The most important class of society is that of laborers; the interest of the mercantile classes is different, as their object is to purchase and sell the products of industry, buying as cheap and selling as dear as possible, which is a cause of disturbance and variation bearing severely on some classes, and unduly benefitting others.

Manufacturers have become an important class, made up of the best genius and capacity of our people, who are inventive and enterprising, but who meet with many reverse, and have never "realized two per cent. on their investments."

The foreign market for our manufactures is small; it is the home market which is most important. The home consumption of iron, steel, copper, lead, zinc, woollen goods, leather and glass, is $1,000,000,000 a year. While the imports of these is but about $100,000,000. To import what we consume would be impossible, and the attempt preposterous. To do this would take all our gold, all our cotton, and leave us in debt for half the amount. It would also compel our manufacturing population to engage in agricultural pursuits, and bring wheat down to 50 cents per bushel. Home manufacturers are therefore a necessity. Mr. Colwell argues this at some length. He says:

The necessity of making our own goods may be explained by supposing that two country merchants offer their several stocks of goods in a rich agricultural district in the West, furnishing the only two sources of supply for the neighborhood. The one taking only such articles for his goods as will bear exportation to some foreign country; the other taking every product of the field, garden, orchard, pasture, and of course, taking nine-tenths of the business. His success will lead him into manufacturing or lead others into it, that he may find a more ready and profitable market for the varied commodities which his mode of doing business brings to his hands.

When the farmer can exchange the entire product of his land at rates corresponding to the general price of labor, he can supply himself abundantly, and his farm will be worth four times as much as it would be when only the cereals can be sold. Land in the vicinity of a manufacturing population is worth, for agricultural purposes, from $100 to $200 per acre, and very often much more. Where such advantage is wanting, farms are, in our country, seldom worth forty dollars per acre.

Pennsylvania could, with difficulty, pay, in any product of her own, for fifty thousand tons of iron imported from Great Britain; but her capitalists and farmers can feed and sustain a population large enough to take from her own mines and manufacture five hundred thousand tons of iron of the value of thirty millions of dollars, and the same policy extended to her other resources makes her annual product worth $300,000,000. The proceeds of her agriculture could not be exchanged abroad for one-half of what the iron brings.

In other words, Pennsylvania, without products of her own to spare, which she can exchange in Great Britain for fifty thousand tons of iron, can manufacture ten times that quantity. The whole agricultural product of the State being thus converted into iron and other manufactures, becomes directly and indirectly a purchasing power in the home market. The product of an acre of wheat exported to England or Scotland may import a ton of iron, but an acre cultivated for vegetables at home will purchase five to ten tons of iron.

The purchasing power of a people mingling manufacturing and agricultural pursuits is tenfold that of a purely agricultural community. The trade between Pennsylvania, New Jersey, New York and the New England States is greater than our trade with Europe. Illustrations may be added with regard to each of the States. As diversity of production adds to productive power and ability to meet taxation, what policy is best on the part of the Government to sustain this principle, and conduce to this result? Imports consist of surplus, are irregular, not always adequate to the demand, and fluctuate in price. The fluctuations are shown in the following table:

POPULATION *as usually estimated for each year, and as stated by each census, with the imports of each, and the rate per head.*

Years.	Population.	Total Imports.	Am'nt per Individ'l
1794	4,400,000	$34,600,000	$7.86
1795	4,600,000	69,700,000	15 15
1796	4,700,000	81,400,000	17.30
1798	5,000,000	68,500,000	13.70
1801	5,000,000	111,300,000	20.20
1803	5,800,000	64,600,000	11.10
1805	6,200,000	120,600,000	19.40
1807	6,600,000	138,500,000	21.00
1818	9,100,000	121,700,000	13.36
1821	10,000,000	62,500,000	6.25
1822	10,200,000	83 200,000	7.16
1825	11,200,000	96,300,000	8.60
1830	12,800,000	70,800,000	5.53
1831	13,200,000	103,100,000	7.81
1835	15,000,000	149,800,000	9.92
1836	15,300,000	189,900,000	12.40
1838	16,200,000	113,700,000	7.00
1839	16,600,000	162,000,000	9.75
1842	18,000,000	100,000,000	5.55
1847	20,780,835	146,545,638	7.05
1848	21,413,890	154,998,928	7.24
1849	21,956,945	147,857,439	6.76
1850	23,246,301	178,138,318	7.65
1851	24,250,000	216,224,933	8.91
1852	24,500,000	212,945,442	8.70
1853	25,000,000	267,978,647	10.72
1854	25,750,000	304,562,381	11.84
1855	26,500,000	261,468,520	9.88
1856	27,400,000	314,639,942	11.49
1857	28,500,000	360,890,141	13.02
1858	29,500,000	282,613,150	9.58
1859	30,385,000	338,768,130	11.18
1860	31,000,000	362,163,941	11.67

IMPORTS *since* 1854–'55, *with the rate of increase or decrease from year to year.*

Years.	Total Imports.	Increase.	Decrease.
1854–'55.	$261,468,520	.....	.....
1855–'56.	314,639,942	20 per cent.	.....

1862–'63.	252,187,587	22 per cent.	.....

The variations in prices partake of the characteristics of gambling; the advalorem system of duties permits frauds, and is a foe to home industry; our shipping is diminished; everything is

under foreign management; foreign agents are charged with robbery and evasion of the laws; they are only commercial parasites. All this places our home industry in the power of foreign manufacturers, who, without "material loss to themselves," may and do disturb our whole fabric of industry and credit. That greater losses have not been sustained is due to the inventive power of our mechanics; and but for them we could not be supplied with one-tenth of what we require. These points are also fully argued by Mr. Colwell. If the 200 millions which must now be drawn from the internal revenue be returned to the channels from which it is drawn, the process will not be a weakening one, but the reverse under a different policy. We must preserve our labor from the competition of cheap labor in other parts of the world, and by means of a tariff have a strict and skilful adjustment between labor of wages at home and abroad, and also the burden of internal duties levied on home products. These last are in great danger for many reasons. Our high priced markets are largely attracting importations. Our bonds are in favor and are readily taken for commodities, and the largest profits are realized by foreign shippers by means of these high prices and the premiums on gold. This is stated thus:

The reason our national bonds sell at such a large discount in Europe is, that as the foreign purchasers can obtain them at the low rate, they are not disposed to give more. Gold being overvalued in this country, having risen in price on account of the special demand for it to pay custom duties to the amount of $2,000,000 weekly, they purchase our bonds, intrinsically worth gold at par in London, and pay us in gold at 40 per cent. premium. If the merchants and manufacturers who now threaten to overwhelm us with foreign commodities sell here for gold, they realize on it a premium of 40 per cent. in our currency and then take the bonds at par. Or, if they sell their goods at our high rates in currency, they take the bonds at par, and $1,000 in these bonds are worth more to hold in London than £206 9s., the equivalent at par in sterling.

At present these circumstances offer the largest profit ever made on the shipment of foreign goods to this country. Those interested in this movement can now realize high prices for their goods, seriously injure our manufacturing industry, weaken their rivals, and obtain our national bonds at a heavy discount. These great advantages thus offered to capitalists are as fully to our detriment as to their benefit. They imperil our productive power, our ability to pay taxes; and in fact, our whole financial system. They sap our national strength; they continuously damage our domestic industry by substituting the products of their own; by depriving our laborers of employment while obtaining in our markets the means of employing their own, beside realizing large profits for the enterprising individuals who engage in the business.

That there is good ground for these apprehensions is proved by the freely-expressed belief in Europe, entertained as fully in this country, that the quantity of goods to reach our shores from Europe this year is to be greater than ever known. Intelligence by every arrival from abroad confirms this anticipation.

It is the policy of European Governments to keep wages low, that they may manufacture for the markets of the world. England holds a million of her people in pauperism, constituting a reservoir of cheap laborers from which she may recruit the ranks of labor as they become thinned by overwork, ill-feeding and bad lodging. Four millions are in a position to be thrown on the parish, on the kindness of their countrymen, or on the charity of distant nations, upon occasions of bad harvests, or of commercial revulsion. Would it be politic or humane to reduce our laboring population to that condition? Would it be economically wise? Would it add to our national strength? Can any man who understands the true interest of the country wish it?

We are under the necessity, as a civilized people, of maintaining a vast system of manufacturing industry. The undue gains alleged to be made by it is denied and explained at some length; and it is insisted that the average profits will not show, in the long run, more than two per cent. The wealth of the New England Companies is analyzed and explained, as being less than supposed.

There should be no struggle to bring down wages, to admit foreigners to a better market than we have for ourselves; but should furnish for ourselves at least four-fifths of what we want. He objects to the import of free goods, as a principle, as well as to the auction system; and advocates such an adaptation of our tariff as will protect our laboring classes and their wages. He advocates large wages, and shows why they should and must remain high in this country. The competition we have to fear is not in quantity, but the prices; and the surplus sent to this market does the damage. He argues that while a saving is sometimes made by the purchase of the foreign cheaper article, the incidental loss more than overbalances the gain. This branch of the report is very fully and strongly argued, indeed at considerable length, for which we have no room at this time.

It then seems to be an imperative duty to increase the duties on foreign commodities competing with our own, especially in those departments of industry upon which we depend for more than three-fourths of our consumption. The high price of gold fails to restrain excessive importation, as goods are sold in currency at a great advance, and production if it is repressed will be less adequate to meet taxation. The duties should be raised so as to prevent this flood of goods. These should be specific. This point is explained and illustrated by the practice of England and France. Our consumption of imported goods is given, for ten specified years.

The following table exhibits the proportion of our consumption of imported goods per capita for 10 years:

Year.	Imports. consumed.	Population.	Consumpt'n per capita.
1852 .	$195,656,060	24,604,261	7.95
1853 .	250,420,187	25,342,388	9.88
1854 .	279,712,187	26,102,659	10.71
1855 .	233,020,227	26,885,738	8.67
1856 .	298,261,364	27,692,310	10.77
1857 .	336,914,524	28,523,079	11.81
1858 .	251,727,008	29,378,771	8.57
1859 .	317,873,053	30,260,134	10.50
1860 .	335,220,919	31,429,891	10.66
1861 .	315,004,728	32,373,388	9.73
Average of 10 years.....			9.92

The report is accompanied by a schedule of proposed changes of duties and provisions in the tariff.

This is a very succinct statement of Mr. Colwell's opinions. We firmly believe that specific duties will have at least an immediate and wholesome effect in restraining the enormous frauds which are now practised on the revenue by the foreign importers abroad.

Richmond and Danville Railroad.

The Richmond *Dispatch* says that the directors of this company, at a recent meeting, determined that all the bonds of the company issued during the war—issued as they were in the regular business of the company—shall stand on the same footing with other bonds. The principal and interest will be fully paid. All holders of bonds were, by resolution of the board invited to fund the arrearages of interest to the 1st of May. All future interest will be promptly met at maturity.

Dorchester and Delaware Railroad.

At a meeting of the stockholders of this road held at Cambridge, Md., on the 9th inst., the following gentlemen were elected directors: Wm. Wilson Byrne, Daniel M. Henry, Edward W. Le Compte, James A. Stewart, John Webster, R. F. Thompson, James Gore and George Winthrop. President, Wm. Wilson Byrn, of Cambridge; Treasurer, Thos. W. Anderson of Cambridge.

☞ The Philapelphia *Ledger* says: "A round lot of ten thousand of Morris and Essex bonds sold at 92½, and five thousand of Warren and Franklin 7s at 84. These bonds are both new on the market, and we presume not generally known. The proceeds of the former are intended for the extension and completion of that road, in New Jersey, to the Delaware river. The latter are on a fifty mile road in this State, and are guaranteed respectively by the Pennsylvania, the Northern Central, and the Philadelphia and Erie Companies."

☞ The Secretary of the Treasury has issued to the Union Pacific Railroad, Eastern Division, $368,000 of six per cent. bonds, being the amount due on the last section of twenty-three miles, which was accepted by the United States Commissioner last month. The road is now completed for ninety-seven miles up the Kansas Valley, from the Missouri border to a point 380 miles West of St. Louis. The road will be open to Fort Riley, 420 miles from St. Louis, on the 15th of July.

☞ The whole amount of stock in the Schuylkill River Passenger Railway (Philadelphia) has been subscribed, viz: ten thousand shares, par $50, and $5 paid, which, it is estimated, will make and equip the road, extending from Twenty-third and Pine streets to the Park.

☞ The Oil City *Register* says the Farmer's Railroad, from Oil City to Petroleum Centre, is now under contract, and the manager reports that the road, about seven miles in length, will be finished in July next.

☞ We learn from the *Tribune* that articles of agreement have been signed by the parties in interest of the Flushing Railroad, by which they agree to extend that road to Huntington. The proposed line of the road will pass near the villages of Glen Cove, Oyster Bay and Cold Spring.

☞ The Shreveport (La.) *Southwestern* announces that a telegraph cable was recently successfully laid across the river at that place.

☞ The Mississippi Central Railroad is completed, and trains are running through from Cairo to New Orleans.

☞ A street railway has just commenced operations in Nashville.

Journal of Railroad Law.

NEW YORK CENTRAL RAILROAD COMPANY.—CONSTRUCTION OF STATUTE REQUIRING ITS TICKET OFFICES TO BE OPENED.

The case of Nellis *vs.* The New York Central Railroad Company, lately decided in the Court of Appeals, is interesting as explaining the statute which requires the New York Central Railroad Company to keep its ticket offices open at least an hour prior to the departure of each passenger train. The opinion of the court was delivered by

MULLIN, J.—A railroad company is under no obligation to establish offices for the sale of tickets. If ticket offices are not established, passengers must pay their fares to the conductors on the cars. Such a system would throw great responsibility and labor on conductors, cause loss to the company, and be the source of annoyance to the passengers. All these consequences are avoided in a great degree, by the establishment of ticket offices, but the benefit is derived mainly by the company.

When, therefore, the Legislature authorized the defendant to demand five cents in addition to the usual fare, of every passenger not purchasing a ticket at a ticket office before getting into the cars, the object was to compel, as far as such provision could compel, travelers to purchase tickets, and thereby benefit the company.

If the law had stopped by giving the power to impose five cents on each passenger not procuring a ticket it is quite clear that the effect of it would be to make it for the interest of the company to embarrass and as far as possible to prevent the purchase of tickets at its offices.

To prevent such an abuse of a power given for the accommodation of the company, it was provided that the five cents should be exacted only of those who failed to purchase tickets at places where a ticket office is established and open.

This provision might be evaded. In order, therefore to secure the public against liability to imposition, it was farther provided that the defendant should keep its offices open one hour for the sale of tickets, prior to the departure of each passenger train from such station, between certain hours specified in the act.

Had the departure of the train on which the plaintiff traveled from Utica to Albany, at the time of the demand for the fare for which this action is brought, occurred during the hours the defendant's ticket offices are required to be kept open, and the one at Utica was not open, it would not be seriously claimed that a demand for the extra fare would have been justified, or that the penalty would have been incurred. But the plaintiff left at one o'clock in the morning, at which time the defendant was not required to open any of its ticket offices; and it is insisted that because the plaintiff did not do what it was impossible for him to do—to wit: buy a ticket before leaving Utica, he became liable to pay the extra fare. It seems to me, the proportion has but to be stated to be rejected as utterly unsound. To compel a passenger to pay a penalty because the company had deprived him of the power to travel for the regular fare, would be so oppressive and unjust that it would require a positive provision of a legislative act to induce any tribunal to sanction it. The statute is open to no such construction. The extra fare can only be demanded when the passenger fails to purchase his ticket at an established ticket office that is open. If it is not open no ticket can be procured, and no right exists to demand the extra fare.

It is urged that the word "open," in the 2d, section of chapter 228, means open at the hours ticket offices are required to be kept open by the first section was intended to protect the public against any evasion of the duty to afford a reasonable opportunity to purchase tickets, and to relieve the company from keeping its offices open at all its stations during the whole night. The legislature in effect say to the company, you shall keep your offices open one hour before the departure of each passenger from each station, from five in the morning till nine in the evening, except in the larger towns they shall be kept open till 11 p. m. If you do this and if passengers shall neglect to purchase tickets you may charge each one five cents additional fare. But if your offices are not open you can get only the regular fare.

The Utica office was not open, as admitted by the demurrer, and hence there was no pretence for demanding extra fare.

The five cents which the defendant may charge is in addition to the usual rate of fare. By these words I understand the legislature to mean that the five cents is taken by the company as fare, and not as a penalty for omitting to buy a ticket. The legislature never permits parties to enforce the collection of penalties given by law to themselves. It was proper to permit the defendant to demand a higher rate of fare from one not complying with a regulation of the company than from those who conformed to it.

The complaint alleges and the demurrer admits that the distance from Utica to Albany is ninety-five miles, and that the fare is $1.90. I am unable to understand how in view of these admissions, the defendant's counsel can claim that the defendant is entitled to charge three cents per mile, or any other sum greater than two cents per mile. For the purposes of this case, we must act on the allegations and admissions in the pleadings, whatever the law may be on the subject. The pleadings make the law, by which the rights of the parties must be determined.

When therefore, the defendant assumed to demand five cents in addition to legal fare, it "asked and received a greater rate of fare than that allowed by law," and is thus brought within the provisions of the first section of chapter 185 of the laws of 1857, and is liable to the consequences of such violation of the provisions of the statute.

The defendant's counsel insists that the complaint should have set out the various enactments, consolidating the several companies which make up the New York Central so as to show that the defendant is restricted to two cents per mile for carrying passengers over its road. I can perceive no more reason for setting out these statutes than there is for setting out the proceedings by which the several companies consolidated into the Central were incorporated and organized, and that it is entitled to demand and receive of passengers travelling over its road, a certain rate of fare; and that it has demanded and received a higher rate. The acts of the legislature, and the proceedings of the separate companies, and of the defendant after consolidation, would be the evidence to establish the facts upon which the limitation of the fare which the defendant may charge, depends.

The court by taking judicial notice of these acts and proceedings could not relieve the defendant from the effect of its admission, deliberately made, that the fare was but two cents per mile, though by the act it might be six cents.

The order and judgment appealed from must be affirmed with costs.

Judgment affirmed.

☞ The Overland Telegraph enterprise is a gigantic affair. Through British America, 1,200 miles; through Russian America, 900 miles; across Behring Strait, 184 miles; across the Gulf of Anadyr, 210 miles; and thence overland to the mouth of the Amoor River, 1,800 miles, or a total of 4,294 miles. At the Amoor it is to be continued by a Russian line connecting it with Irkoutsk, through Western Siberia, communicating with Nijni-Novgorod and Moscow, and thence to St. Petersburgh. The capital involved amounts to $10,000,000.

☞ The town of Delhi, Delaware Co., has voted to issue town bonds to the amount of $200,000 in aid of the New York and Oswego Midland Railroad, and the citizens are raising an additional $100,000 by private subscription.

☞ WM. PRESCOTT SMITH, Esq., has resigned his position as Master of Transportation on the Baltimore and Ohio Railroad, to take effect on the 1st of July proximo.

THE
Sterling Iron and Railway Company,
Office No. 42 Pine Street, New York.
Offer for sale at the lowest market rates, in quantities to suit purchasers,
SUPERIOR MAGNETIC IRON ORE, for Blast and Puddling Furnaces;
STERLING CHARCOAL PIG IRON,
AND
STERLING ANTHRACITE PIG IRON.
J. DUTTON STEELE, President.

CHICAGO AND NORTH WESTERN RAILWAY CO.,
SECRETARY'S OFFICE, CHICAGO, May 3, 1866.

THE annual meeting of the bondholders and stockholders of the Chicago and North Western Railway Company, will be held at the Office of the Company in the City of Chicago, on Thursday the 7th day of June, 1866, at 11 o'clock a. m.

2t21 JAMES R. YOUNG, Secretary.

JOHN DAVOL & SONS,
MANUFACTURERS' DEPOT FOR
Rolled and Sheet Brass, Copper Tubing and Wire,
IRON TINNED,
COPPER AND BRASS RIVETS,
TACKS AND NAILS.
Also Dealers in Copper, Spelter, Tin, Lead, Babbit Metal and Solder.
100 John Street, New York.

BORDEN & LOVELL,
70 and 71 West Street, New York.
GENERAL AGENTS
Borden Mining Company's
CUMBERLAND COAL.
Orders from Railroad Companies, Manufacturers and others are respectfully solicited.

Increased Capacity of Railroads.

Of all questions appertaining to public economy, none stands higher or is of more importance than the subject of "*cheap transportation.*" The question of dividends is interesting to stockholders, and what is called "good management" is a desideratum that must always be taken into account by those identified in proprietorship with our railroads. Even the public, as a general thing, is interested in the success of a road for the simple reason that where the road is pecuniarily successful, the company possesses the financial ability to increase the public accommodation. There is a broader question of success, however, than is involved in the mere question of dividends. It is involved in this proposition. *The largest amount of public accommodation with the least possible exactions from the people.* Dividends may be the result of scheming where the popular interests have not been duly regarded. The people's interest is the object that involves the subject of statesmanship or public economy.

While we hold that actual capital invested in railway enterprises should receive a fair, or even liberal income, the enterprise should be so devised and managed as to give the public the greatest amount of accommodation possible for the outlay to yield. There will always be a twofold question—financial success of the company on the one hand, and benefit to the public on the other. A machine that multiplied production in a manifold degree as compared with another machine of equal cost, but inferior power, would be adopted by every rational man. On the same principle true statesmanship should not encourage, nor even tolerate or allow, knowingly, any scheme or plan that did not give the greatest amount of work to the public for the lowest price consistent with exact justice.

All men will agree in sentiment, that the public should be protected. Franchises are pre-supposed to be granted for the benefit of the public. A franchise that is so granted and permitted to be managed as to yield to the public but twenty-five or fifty per cent. of the advantage that would be capable of being attained under different management, is not a mark of public wisdom; and so far as pecuniary results on the public are concerned, it is not very material whether the project was conceived and carried forward under the influence of honest error or surreptitious design. The public, in either case is a loser. Whilst the country has been rife with complaint against the turpitude of railway management, the public has lost quite as much through the ignorance and honest errors of those who have conducted enterprises, as it has suffered from fraudulent imposition.

What to do, and how to do it, will always be a question in railway economy, as well as in everything else. The solution of this question is the condition precedent to every advance step in progress. Some of the present generation have witnessed the advancement in science, the mechanic arts, improvements in machinery, multiplied means of production and consequent power of developing resources that have worked an almost complete revolution in the capacity for acquiring the comfortable means of subsistence. Among the greatest of these stands the railway system of the present day; and which we think has advanced to about fifty per cent. of the advantages it can be made to accomplish. We shall find the desirable result, if we find it at all, in the adoption of some improved system which shall give the cheapest transportation.

In our last number we alluded to a plan that combined, in our estimation, the incidents that would vastly multiply the capacity of a road. The proposition for an equal rate of speed is the controlling feature of the plan. This would allow the track to be so filled with cars that 500 trains could be passed over the road in 24 hours as easily as 40, under our present system with unequal rates of speed. The lower rate of speed would avoid lateral friction, prevent the rapid wear and tear of the road, and greatly save fuel. Uniform and low rate of speed would take away nearly all the difficulties of management, or greatly simplify it, and consequently the great liability to accident would be avoided. By allowing individuals and companies to put on trains and run them, it would always ensure a full equipment, while it would be a perfect safeguard against monopoly in transportation and the resulting imposition on the public. A proposition has been started for a coal road on this plan to run from the coal mines of Pennsylvania to tide water on the eastern shore of New Jersey. Suppose a double track road bed of this character constructed; branching to the different mines as the approach was made to them in order to get a supply, and diverging as the approach was made to the Jersey shore in order to get sufficient dumping ground; who of us could estimate the freight capacity or probable patronage of such a road?

Again, suppose a road on this plan running through the cities and villages on the line of the New York Central. Each locality could furnish trains for its own accommodation, and thus do away with the complaint of the people on the route as to neglect of way freight, which arises out of the very partial preference of our present roads for through freight.

On some of our thoroughfares, as for instance a coal thoroughfare, or produce and merchandize thoroughfare, crowded with patronage, a company would be able to underbid on freight, and still make a dividend of thirty, forty, or perhaps fifty per cent., unless restricted by the charter to a fair, or liberal income, say 10 or 12 per cent. We do not hesitate to believe that the vast mining

interests of Pennsylvania, the mechanical, commercial and family demand for fuel in New Jersey, New York and the New England States can be brought into conjunction so as to readily associate the capital to lay down a road bed; nor do we doubt but that an equally effective combination can be brought together to relieve the necessities of the great West and to supply the East. As we entertain no doubt as to the feasibility of the plan, we prophecy that public necessity and public interest will combine to force its adoption. We will venture on the prediction that "cheap transportation" will henceforth be the legislative and popular watchword.

When we reflect and make the calculation as to how little is gained to the country by rapid traveling in comparison with how much is lost by expensive freights, occasioned by unequal rates of speed under our prevailing custom, we may well be startled at the perversion of the economic principle. Now that we have the telegraph for extraordinary communication, the subject of rapid express, mail, and passenger trains dwindles into insignificance when compared with the more important subject of cheapening freights. On this point more than any other, will the successful development of our vast interior be made to depend.

Cincinnati, Richmond & Chicago Railway.

The name of the Eaton and Hamilton Railroad has been changed to that of the Cincinnati, Richmond and Chicago Railway. Recently the creditors of the road capitalized their several claims, and under a decree of Court the whole property was sold, by consent of parties, and a single mortgage was issued securing 7 per cent. bonds to the amount of $450,000. This now constitues the entire funded debt of the company. There is no floating debt. The directors of the Cincinnati, Hamilton and Dayton Railroad Co. purchased a majority of the stock at 25 cents on the dollar, and yesterday the management of the road passed into the hands of the latter. The old Board of Directors met at Eaton and closed up the business of the company. The stock and bondholders met at the same place subsequently, and elected as Directors the Cincinnati, Hamilton and Dayton Board, with the exception of Geo. T. Steadman in whose place E. W. McGuire, Secretary of the late Eaton and Hamilton Co., was chosen. The new Board organized by electing S. S. L'Hommedieu, President; John W. Hartwell, Vice President; D. McLaren, General Superintendent; and F. C. Short, Treasurer. E. W. McGuire was appointed agent of the company at Eaton. The ownership of the road is in the hands of the Directors of the Cincinnati, Hamilton and Dayton individually; but it has been secured for the company, subject to the approval of the stockholders. The latter will, of course, accept the purchase, as it is unquestionably an arrangement that will yield a large profit. The road will thus become, in fact, part of the Cincinnati, Hamilton and Dayton, and must prove one of the most important and profitable feeders of this now great trunk line. It is a link in the line to Chicago, and the route as far as Richmond being now in the hands of a powerful and wealthy corporation, the "Air Line," as it is called, will undergo a favorable change, and grow in popularity with the business and travelling public.

Mr. L'Hommedieu is now President of four roads, viz: Cincinnati, Hamilton and Dayton, Dayton and Michigan, Atlantic and Great Western, and Cincinnati, Richmond and Chicago. These roads all run into the trunk line, and are in part, actually, and in whole, as far as business interests are concerned, connected closely with the Cincinnati, Hamilton and Dayton road. The combined interest is a powerful one, and as regards capital and miles of road, is greater than those over which any one man in the United States or in the world, presides. The duties of the position might therefore, at first sight, seem too great for one mind; but owing to the perfect system organized by Mr. L'Hommedieu, and the able corps of assistants, from Vice President down, his work is really less than he would be required to perform if he should attend to the details of a single line. His position, in fact, corresponds to that of a General in the field directing the movements of different corps of one great army. He exercises a general supervision, indicates the general policy, and his Vice Presidents superintend, and Assistant Superintendents attend to details in their respective divisions and departments.

The plan has not been tried before in this country, but it is plain to see that the combined interests can be, (and experience proves that they are being) worked more efficiently and economically under this one head than if managed by distinct organization.

There is no clashing of interests, no disagreements about running arrangements or divisions of earnings, or rates of charges; but from Salamanca, Toledo, and Richmond to Cincinnati, these vast lines are worked with perfect ease and entire harmony; and their business is developed as it could not be under separate organizations.—*Cincinnati Gazette.*

Grand Trunk Railway of Canada.

We have the Report of the Directors of this company for the half year ending December 31, 1865. The gross receipts of the United system of the Grand Trunk, Montreal and Champlain, and Buffalo and Lake Huron railways during that period, compared with the corresponding period of the preceding year, were as follows:

	1864.			1865.		
Passengers	£239,124	19	11	£280,134	0	6
Mails, etc	18,427	2	6	28,237	13	3
Merchandize	362,331	1	10	403,833	9	2
Rents	1,981	12	11	1,652	3	4
Sundries	6,350	2	11	923	11	2
	£628,215	0	1	£714,780	17	5
Expenses, viz:						
Maintenance of way, stations & buildings	£79,518	4	4	£66,553	5	3
Locomotive power, and repairs to engines	109,180	9	1	129,794	0	3
Repairs and renewals of cars.	35,206	6	3	38,497	13	1
Traffic expenses.	124,301	3	1	128,986	11	11
General charges.	13,319	11	11	14,654	17	1
Miscellane's exp.	9,522	17	4	12,517	1	5
Rents and tolls	5,223	19	9	4,670	14	9
	£376,272	3	9	£395,674	3	9
Leaving	£251,942	16	4	£319,106	13	8
From this sum is deducted the whole expenditure incurred in the half year for renewals of the railway and works, viz				89,688	17	2
Which leaves a balance of				£229,417	16	6
It is now proposed to extinguish the whole amount still left at the debit of the renewal suspense account, viz				52,945	7	9
Leaving a balance of				£176,472	8	9
Add balance from last half-year				80	2	0
				£176,552	10	9
Deduct amount of postal and military revenue for half-year, and adjustment of previous accounts carried to separate account				15,363	2	7
				£161,189	8	2

Disposed of as follows:

Discount on American Currency	£58,848	3	4
Interest, &c., paid on lands	2,287	7	2
Do. on mortgage to bank of Upper Canada	4,423	16	1
Do. on loans, bankers' balances, promissory notes, European exchanges, &c.	10,754	18	11
Do. on British American Land company's debentures	616	8	9
Do. on Montreal Seminary debentures	616	8	9
Do. on Island Pond debentures	2,700	0	0
Half-yearly instalments on Portland sinking fund	2,311	12	10
Atlantic and St. Lawrence lease (in full)	32,785	17	2
Detroit line lease (in full)	11,250	0	0
Montreal and Champlain Company	10,273	19	7
Buffalo and Lake Huron Company	16,863	15	3
Equipment bond interest	7,494	0	0
	£161,226	7	10
Less second preference interest overcharged last half year	36	19	8
	£161,189	8	2

Certificates for the interest due for the past year on the preference bonds and stocks will be issued in accordance with the terms of the Arrangements Act, 1862, on and after the 15th of May next.

The course which the bond and stockholders have permitted the Board to take in reference to devoting the net profits for a short period, to works of improvement, conservative of the property, has mainly enabled the Board now to announce that with the exception of the Bankers' balances in Canada, covered by securities, the undertaking was on the 31st December last free from liability, or debit to suspense account; while the net revenue alone has now paid for the whole ordinary and extraordinary renewals undertaken since 1861 inclusive, amounting in total to a sum of no less than £526,865.

It is to be observed that, but for the extraordinary charge against revenue for renewals, exceeding the estimate of past years by over £100,000, and the loss on American currency of £59,000, a sum of say £160,000, would have been available for division on the preference bonds and stocks—sufficient to pay the full half-year's interest on the 1st, 2d and 3d preferences, and a fraction over 1½ per cent. on the 4th preference stock. It must, however, be expected that the cost of renewals will be considerable for some time to come.

Suggestions have been made to the Board in reference to the terms on which additional capital should be provided in order to secure the more rapid development of the revenue, and to obviate the necessity of further interfering, by renewal debits, with the profits available for interest upon the company's bonds and stocks. These suggestions are now under consideration.

The steady decline in the premium of gold in the United States (now 25 per cent.,) gives a reason to hope that the late serious deductions from earnings for loss on the exchange of American currency will ere long cease.

As from the 1st of January last, the Board propose that the net earnings be regularly remitted, and be divided for interest and dividend in accordance with the respective priorities of the bonds and stocks of the company.

The increase of the gross receipts of the half year as compared with the corresponding half of '64 has been £86,565, or at the rate of 14 per cent. Of this increase, the traffic carried by passenger trains has been £50,819, or 19 per cent., while the increase in freight is £41,582, or 11 per cent. There has been a decrease however in "sundry receipts of £5,756, reducing the total increase to £86,565, as above. The average receipt per passenger carried has been 7s 10d against 5s 8d, and the average receipt per ton of freight has been 15s 4d as against 15s 9d in the corresponding half year.

The increase of the ordinary working expenses has been £19,402, or at the rate of 5 per cent., as against the above increase of receipt of 14 per cent.

In consequence of the exceptional charges against the half year, amounting in the aggregate to £142,634(£89,688 and £52,946), the deductions from gross revenue work out to a total debit of 75.31 per cent., but excluding such charges the per centage rate of ordinary working expenses has been 55.35 as against 59.90 per cent. in the corresponding half of last year.

Two special causes of exceptional cost during the half year have been the still excessive prices of labor and materials in the United States and the heavy taxation there imposed. As regards the latter, in addition to large indirect taxation, the direct payments in the half year have been as follows:

Portland section	£6,480 16 8
Detroit section	2,651 0 5
	£9,131 17 1

It could, however, be no matter of surprise to find the burden of the recent war appearing in disturbance of prices; and in the consequent increase of working expenses within the United States.

The whole of the accounts between the Grand Trunk Company and the Government of Canada have been adjusted, and the balance due from the Grand Trunk Company agreed.

The amount due from the Grand Trunk Company to the postal and military bondholders has been settled, and the balance adjusted in the accompanying accounts, and a dividend provided and paid to August last. A further dividend at the rate of £1 9s. per £100 bond, for the half year ended 8th February last, will be payable on the 27th inst.

The gross receipts per mile of railway in the December half year of 1862 and 1865 respectively have been as follows:

	1862.	1865.
On the whole 1,090 miles in 1862, and 1,377 in 1865	£401 13 4	£517 3 10
On the Atlantic Line	544 6 4	765 4 0
On the Detroit Line	258 3 0	618 1 7
On Grand Trunk proper.	387 3 4	518 12 1

The financial arrangements made during the half year may be summarised by stating thus, that

The company cleared off loans amounting to	£140,000 0 0
It paid the balance due Bank of Upper Canada	37,139 8 9
It paid off bills of exchange and bills payable	130,000 0 0
And it returned to the postal and military service bondholders moneys previously used in the working of the line, amounting to	45,811 12 0
Making a total sum of	£352,951 0 9

The measures taken to reduce the debit for stocks of stores have led to a decrease in this item of £74,199.

The Board are in negotiation with the City of Montreal and Portland bondholders in reference to the claim of the former, and the balance of the bonds maturing of the latter.

It is matter of regret that the Reciprocity Treaty, affecting trade and navigation between the British North American Provinces and the United States was allowed to expire on the 17th March last. Some disturbance of trade relations, affecting traffic and interchange more or less seriously must be expected to result; but it may be that the changes in revenue policy which the special interests of Canada require, will now be expedited, and that the great question of the early confederation of the vast territories belonging to the British Crown on the North American continent will be forced by the action of the United States to an immediate issue. From such an union unrestricted and enlarging trade between the five Provinces, now having different tariffs and separate custom houses, will follow; and the construction of the Intercolonial Railway, extending the Grand Trunk system through the New Brunswick coal fields to Halifax, the finest port upon the Atlantic, be rendered inevitable.

The Board may fitly conclude by quoting the following passage from the report of the company's Executive in Canada:—

"The company's credit has been thoroughly re-established. Its accounts are paid with punctuality. The purchasing agents of the company can now purchase in the cheapest market, and enter into transactions with the certainty that all legitimate and proper accounts will be paid with promptitude, and I think I am not wrong in stating that the company's credit has not at any time for many years past stood so high as it does at this time throughout the Province."

Capital Account.

Amount expended on capital account to June 30, 1865		£16,583,038 3 1
Added during the half year:

Portland Loan Sinking Fund.

The Commissioners of the Railroad Sinking Funds have submitted their Report for the year ending July 31, 1865. The principal of the Fund established by Act of August 1, 1848, amounted at that date to $201,250; and the interest to $139,236 11—making the total fund $340,486 11. The City Loan of $1,000,000, for which this fund was established, will mature at various periods from December 1, 1868, to January 1, 1871. The deficiency due this fund for 1861-'62-'63, is $37,500.

The principal of the Fund established by Act of July 27, 1850, at the same time amounted to $91,250; and the interest to $59,205 86—total, $150,455 86. The City Loan of $500,000, for which this Fund was established, will mature February 1, 1871. The deficiency due this fund for 1861-'62-'63, is $18,750.

The aggregate amount of the two Funds was: principal, $292,500; interest, $198,441 97—total, $490,941 97. Aggregate deficiency of principal, $56,260.

The investments of both Funds, as compared with 1864, are as follows:

	1864.	1865.
City scrip of the railroad loans	$147,500 00	$188,500 00
Mortgages	185,186 66	163,186 66
County securities—Cumberland	11,500 00	6,500 00
United States stocks	36,500 00	36,500 00
State of Maine do	51,500 00	91,500 00
Eastern R. R. do	6,000 00	6,000 00
Premium account	309 73	.....
Cash	5,299 03	2,868 45
	$443,795 42	$494,555 11
Credit balance premium account, July 31, 1865		3,613 14
		$490,941 97

The arrears of interest are of moderate amount, and perfectly well secured. Actual measures were entered upon within the year, to supply the deficiencies due the principal of the funds for 1861-'62-'63; but the derangements of the currency here, and unexpectedly high rates of money abroad, rendered these efforts unavailing for the time. The commissioners have no doubt but that these arrears will eventually be made good.

Since the Report was issued, another half year's interest has accumulated, and a further payment for the half year ending December 31, 1865, has been made. The accounts, therefore, now stand as follows: Principal, $303,750; interest, $211,238 75—total, $514,988 75.

☞ The Mississippi and Missouri railroad is to be sold at public auction on the 9th of July next. All holders of the bonds and stock of the company who wish to protect their interest at such sale, must deposit their bonds and stock with the Union Trust Company of New York, on or before the 25th day of June inst.

Report on Iron and Steel.

The United States Revenue Commission have laid before the Secretary of the Treasury a report in regard to iron and steel, comparing the resources of this country with that of Europe, Asia and Africa, from which is inferred that in 1830 the United States became the largest consumer, and so continues to this time.

The Commission is of the opinion that the production of iron in the United States during the last twenty-five years, the development of vast deposits of iron materials and of fuel, demonstrate the capacity of the country to manufacture the whole quantity required for its progress in other manufactures, for the production of machinery and all other instruments of industry, and the continuous enlargement of its productive powers.

Our natural advantages for the production of iron and steel, and other great instruments of production, are not surpassed in the world. Our progress shows that we have learned to avail ourselves of these advantages. Ultimately, under a wise domestic policy, we shall become the largest producers of iron, and perhaps the largest exporters, as many of our mines are near the seaboard, and can furnish large quantities more promptly than any country except Great Britain, and better and more varied qualities than any country.

It must be long, however, before it can be our interest to send iron from our shores. The race for national power and wealth will be indicated not so much by our advance in the production of iron as by its consumption. Our industry can never grow to its full height but by that profusion of machines and implements of production and facilities for transportation which iron alone can furnish.

England now employs iron to the extent of 160 pounds per head of population and exports considerably more than she consumes. We manufacture 1,500,000 and import about 300,000 tons. Our consumption does not yet exceed 120 pounds per head. But, considering the intelligence of our population, its activity, its ingenuity, its proclivities to the employment of iron, and the superior quality of our iron, we may reasonably expect to reach a consumption of 160 pounds per head by the time our population numbers forty millions, making the whole product then equal to 3,200,000 tons.

It is very well known that the State of Pennsylvania could by no means of her own import yearly 50,000 tons of iron, but her mines, labor, food and capital can now furnish nearly 500,000 tons, worth over thirty millions of dollars, and can now, by the further aid of machinery carry the value of this iron to sixty or eighty millions. Thus the people of Pennsylvania can by this medium exchange her minerals, labor and food for the labor and food and other raw materials of other parts of the country.

In regard to the manufacture of steel, the Commission represents that no one who is well informed has a doubt that our country has nearly emancipated itself from such dependence, and is secure of a full supply of the best qualities of steel in peace and war, and for all the demands and exigencies of industry. It is fully demonstrated that the requisite qualities of iron are found within our boundaries, that the requisite skill and knowledge is now attained, and that the requisite confidence in American cast-steel and common steel is now established.

It has been tried throughout all the manufacturing States by the most skilful manipulators of steel in fine cutlery, edge-tools, in both heavy and delicate machinery, and the evidence of its success is complete and irrefutable. Testimony on that subject has been submitted with this report, which cannot fail to carry conviction to all friends of domestic labor, and to satisfy them that American perseverance and ingenuity has triumphed in the production of the highest quality of cast-steel an object vitally important to the progress of national industry.

Pittsburg, Fort Wayne and Chicago Railway.

The earnings and expenses of this road for the years ending December 31, 1863, 1864 and 1865, have been as follows:

Earnings:	1863.	1864.	1865.

The earnings and expenses for 1856 are for 5 months only, viz., from Aug. 1, to Dec. 31.

To comprehend more fully the development of the company's property, the annual increase of earnings should be compared with the increase of capital invested. The amount of capital at the close of each year since the consolidation has been as follows:

	Shares.	Bonds.	Floating.	Total.
1857	$5,258,837 66	$7,371,000 00	$1,418,922 09	$14,048,759 75
1858	5,288,950 27	8,453,000 00	889,159 88	14,631,110 15
1859	5,351,761 84	8,289,500 00	1,916,517 04	15,557,777 88
1860	5,481,869 32	9,306,485 00	1,612 754 22	16,401,108 54
1861	5,480,865 54	9,660,825 00	1,860,430 87	17,002,121 41
1862	6,500,000 00	12,935,173 00	....	19,435,173 00
1863	6,500,000 00	12,935,173 00	....	19,435,173 00
1864	8,181,126 00	12,657,000 00	....	20,838,126 00
1865	9,312,442 00	12,573,500 00	....	21,885,942 00

In the floating debt are included coupons past due and unpaid—1858, $9,341; 1859, $252,150.; 1860, $912,677, and in 1861, $1,519,212.

The reports of the company will be found in the AMERICAN RAILROAD JOUENAL, as follows: Report for 1856, Vol. 30, p. 587; for 1857, Vol. 31, p. 578; for 1858, Vol. 32, p. 330; for 1859, Vol. 33, p. 391; for 1860, Vol. 34, p. 377; for 1861, Vol. 35, p. 406; for 1862, Vol. 36, p. 406; for 1863, Vol. 37, pp. 436 and 472; for 1864, Vol. 38, pp. 822 and 537; and for 1865, Vol. 39, p. 823.

Prussian Rolling Stock.

At a meeting of the Institute of Civil Engineers, held in London on the 24th of April, a paper was read "On the Performance, Wear, and Cost of Maintenance of Rolling Stock," by Mr. T. A. Rochussen, Assoc. Inst. C. E. The communication related to the statistics of three Prussian railways—the Cologne-Minden, the Bergish-Maerkish, and the Rheinish—the general circumstances of which were stated to be somewhat similar. The tables embraced the particulars of the engines and of the carriages and wagons, with the expense of repairs and renewals, the work done by the engines in 1864, the cost of motive power, the repairs and renewals of engine-tyres, and the commercial results. Also the experience of the wear of tyres on the Cologne-Minden Railway for the twenty-years from 1845 to 1864, inclusive, embracing the results of observations upon about twenty-five thousand tyres, of different makes and of different materials. It was stated that, on the Prussian railways, the iron-spoke wheels were gradually replaced by disc wheels, which at first were of wood, but latterly they were entirely of iron. The first form of iron disc, adopted in 1848, was that of a bulged star; a wrought-iron plate, flanged to form the periphery of the wheel, was indented with five triangular bugles from the boss, which was cast on the plate forming the disc. This wheel had proved to be very durable, but it was noisy, and, the boss being 11½ inches in diameter, the structure was heavy. It, however, supported the tyre evenly and well, and reference was made to a pair of these wheels with iron tyres, which had run 116,000 miles without requiring turning, and being still 1⅛ inch thick, it was thought they would last up to 250,000 miles. In 1862 a dished wrought-iron disc wheel was introduced, the manufacture of which was both cheap and expeditious. But the fine grain iron necessary to ensure a sound flanging for the periphery of the wheel made it too rigid. Attention was then directed to the means of obtaining elasticity both in the form of the disc and in the material used. Accordingly fibrous iron was employed, and the flat, or dished disc, was corrugated, the periphery being formed by a rim of fine grain angle iron, riveted to the disc plate. Subsequently the disc and the rim were welded together, and about the same time the Bochum Company introduced steel castings, in the corrugated form, of combined disc and tyre. In the improved form of the corrugated wrought-iron disc, brought out in 1864, the iron used was highly fibrous. Several slabs were forged to the shape of a double cardinal's hat. This bloom was re-heated twice, and by frequent quick rolling was enlarged to about 3 feet in diameter. The rim was welded on under the steam hammer, which at the same time punched the hole in the boss for the axle, and gave the form of the wave to the disc plate. After turning up the rim, the tyre was shrunk on and bolted. Since 1864, the tyre, whether of steel or of iron, had been welded on to the disc wheel by hydraulic pressure. In this form it was believed the disc wheel offered the greatest amount of strength, the fibrous iron gave elasticity, the tyre was supported in every part, there were no joints, bolts, or rivets to wear loose, and after the tyre had been worn out it was simply necessary to turn it down to the thickness of an ordinary wheel rim and to shrink on another tyre. It was asserted that, with steel tyres, these wheels would run from 300,000 to 500,000 miles before requiring a new tyre, and that by grinding the tyres instead of turning them their life would be prolonged from 50,000 to 60,000 miles.

☞ The Southeastern branch of the Louisville and Nashville railroad has been completed as far as Stanstead.

Saturday, June 2, 1866.

Stock Exchange and Money Market.

The effect of the sudden drain of specie from this city, amounting to upwards of twenty millions in two weeks' time, was a partial fall in Government securities, and a rise of the local rate of interest to 7 per cent. This effect was calculated on by the knowing ones, and a large amount of specie was sent out by speculators to help the rise itself, and without any particular reason for the shipment that was legitimate. Then again, the foreign houses are understood to keep their balances in London, not in New York; for their power to sell bills depends entirely on the skill with which they keep up their own home credit. It was of the utmost consequence to them, therefore, that they should be prompt in their remittances. They could borrow here easily at 4 and 5 per cent.; in London the rate was 10; and as long as they can sell a sixty day bill on a decent correspondent, the foreign agents have every advantage from their connection. The Money Market is for the time entirely at their command. So when the pressure took place in London, it was New York which was looked to for relief, and not in vain.

The Assistant Treasurer, under advice from the Secretary of the Treasury, went into the market with his surplus gold, and offered it freely to the public. Much discussion has risen out of this transaction. By some, it is said that if gold had been allowed to go up, as they would have permitted it to go, the loss would have been made entirely by the foreign shippers; and the Government by holding on, would have gained two millions at least in the price. But it must not be forgotten that if gold has become scarce and dear at any time, the Government, by demanding it for duties, assists in making it scarce and dear; that it had an enormous surplus on hand, and that it could well spare the amount. By selling as it did, several objects were attained. It kept the foreign creditors advised of the ample metallic resources of this country, and gold prices from expanding to their former condition. If gold had been withheld by the Treasury, it would possibly have gone up to 200, and the prices of everything else would have doubled and trebled. The paper currency in one week declined in value, by the rise in gold, upwards of sixty millions; and if the Treasury had not come to its relief, it would not long have brought 50 cents on the dollar! Those, therefore, who would have done otherwise, do not understand what they are talking about; they do not perceive that we have ourselves escaped the very panic which prevailed in England, have preserved the current values of our paper money, have saved many parties from bankruptcy and ruin, and kept matters in an easy train that would else have been in very bad confusion. On the whole, then, though it is quite possible the department disposed of more of its reserves than it at first intended, yet the call was so sudden and unexpected, that there was little time for reflection or consultation. What was done had to be done by telegraph, and in a hurry. But as it turns out it is all for the best. It is the first time that the Treasury of a taxed country has been able to assist the public; and that it was so is evident from the conduct of the Secretary at the time not only, but since. Every relief was afforded the Money Market promptly. Every facility was given to prevent any monetary disturbance. The Sub-Treasurer was instructed to take one year certificates, or compound interest notes at par and interest, in lieu of currency for the gold purchased; depositors were allowed to withdraw their deposits from the Sub-Treasury without giving the usual ten days' notice. The Treasury also notified the holders of one year certificates, issued in June, July and August last, to present them for payment at once, the interest being made to cease on the 31st May. They were also to be paid here, instead of being sent as usual to the city of Washington. So that in every possible way, and quite contrary to custom, the Treasury, instead of adding to the alarm, was in a situation to dispel it. At such times all embarrassed Governments only assist the embarrassments of the people. In Europe, the public suffers when the general situation is affected. The panic in England produced an actual suspension of the bank charter, by which the issues were limited to a certain amount, and the rate of interest was actually put up to 12 per cent. Here, the rate of interest, which for a few days, owing to the necessity of speculations in gold, went up to

7 per cent. soon receded to 6, and even lower, so great was the supply of money in the market. As we anticipated, the large shipment must have been a great aid to the foreign houses, and helped their principals more than they expected. We shall hear more of this when we get the return news from abroad. We do not know whether the English have safely gone through the crisis, nor will it be of any consequence to us, for by the last accounts the depreciation in our securities had been much less than in any others which were afloat abroad, and were recovering faster than any other description. Here the fall was not worth speaking of; and those who speculated for it were most unlucky. We know that considerable amounts were returned as soon as they came here to the parties who sent them. We do not see why they should not become the favorite investment with foreign capitalists, for they now see that they can in this gold producing country whenever they are in trouble, have as much of our reserves as they want, either to beg or borrow; and we are ready to help them with the Treasury whenever the occasion requires. No similar example is offered them by any other commercial nation. From no other can they expect such material aid.

When they come to see the official report of the receipts and expenditures of the Treasury Department for the quarter ending the 31st of March last, they will be astonished. The total receipts; exclusive of loans, etc., were $124,939,049 70, or at the rate of nearly *five hundred millions* for the year! the largest revenue paid by any nation on the globe, assessed by themselves, and levied in support of a principle of their own. The receipts on account of loans, etc., were $112,605,595 15. The total expenditures, (including $30,024,447 51 interest on the public debt,) were $90,748,890 70. The expenditures for the reduction of the principal of the public debt were $81,300,472 46. The total receipts were $237,544,644 85; and the total expenditures, $172,049,363 16.

Of the above expenditures, $38,213,900 66 were for the Army, and $7,438,932 28 for the Navy, showing that a return to peace will reduce taxation, and the necessity for it by many millions of dollars, a consummation devoutly to be wished. The public debt has been considerably diminished, which is a most gratifying result. We see nothing in the way of the entire recovery of the Country from its financial difficulties, and do not wonder at the opinion of Mr. Gladstone that he saw nothing in them to give him the slightest alarm. This is much more than he can say of the debt of his own country; more than any other Statesman in Europe can say of any country in it.

The news by the last arrival still leaves the question of peace or war in considerable doubt. Large armies have been raised ostensibly for self defence only; but the principle is a different one in the old world and the new. There it is aggression, family influence, dynastic power which governs nations; the people are mere puppets in the hands of a few. Here the majority rule according to the interests of majorities, and the interest of the majorities is that of the greatest number. We shall always feel safe in their hands. All reflecting persons must come to the same conclusion, soon or later, though

"Princes and lords may flourish or may fade."

The report of the associated Banks for the last week showed a large influx of specie (about six millions) more than usual, and a healthy state of things altogether. The reduction in the amount of legal tenders kept pace with this increase, about seven millions, which is not to be wondered at, considering the demand for specie, which nothing else could buy so well as legal tenders. Next to gold the demand for legal tenders comes; and whenever there is a rush for the one the other will also be looked for. Still the price of gold is on the decline, the liberal conduct of the Treasury showing it will be so beyond all doubt, and its quarterly return is further proof of its advance in the right direction. Some persons even go so far as to state their belief that we are nearer a resumption of specie payments than we have yet been in in many years! be this as it may, this country can never settle down into a prosperous condition until every paper dollar is at the pleasure of the holder convertible into gold or silver. Till then we shall be the sport of speculation and panics, more or less, in spite of our best wishes, to the contrary. Every patriot must have the same conviction, and should do his best to produce this result. This is the only reason why we give our humble but sincere aid to the policy of Mr. McCulloch. For this he has again and again declared, and this we adopt as the Palladium of our safety.

As gold has declined so exchange has become duller. The pressure to remit is over, or nearly so, and of course the demand ceases.

The New York exports, exclusive of specie, for the week ending May 29, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,953,556	$2,260,855
Prev. reported	67,421,483	94,259,003
Since January 1	$69,375,039	$96,519,858

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$650,203	$1,007,837
Gen. merchandise	2,854,650	3,377,547
Total for the week	$3,504,853	$4,385,384
Prev. reported	54,789,181	131,753,255
Since January 1	$58,294,034	$136,138,639

The balance in the Sub-Treasury on Wednesday was $98,575,586 42.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

American Central Railway.

The Aledo, Ills., *Record* of May 16th says: "Judge Thompson, President of the American Central Railway Company, returned from New York last week. We understand that the first cargo of iron is expected to reach New Boston in a few days, and that work will commence on the road in ten days after the $100,000 of the conditional stock for Mercer county is taken. The amount yet to raise, as we are informed by one of the committee, is about $15,000."

☞ The commissioners of the Wicomico and Pocomoke Railroad Company announce in the Worcester (Md.) *Shield* that the sum required in order to organize the company has been subscribed.

Chicago and Michigan Grand Trunk R. R.

At a meeting of the directors of this company, at St. Joseph, Mich., on the 8th ult., terms of consolidation with the Port Huron and Lake Michigan Railroad Company were agreed upon, and acquiesced in by representatives of the latter company, who were present, and will probably be adopted by that company when properly submitted at a meeting called for that purpose. The name agreed upon for the new organization is the "Port Huron, St. Joseph and Chicago Railroad Company." By the terms of consolidation, the assets of the two companies, estimated at $1,567,000, are to form a common joint fund, and the stockholders in both old corporations are to receive the same amount of stock in the new organization as now held by them in the respective old corporations. The Board of Directors of the new company will consist of seven members for the entire line, three of whom are to be selected from each of the old organizations, and the six thus chosen are to make choice of the seventh. If these articles of agreement for a consolidation are ratified by the stockholders of each of the companies proposing to consolidate, then a meeting of the stockholders of the new organization will be held in the city of Lansing at an early day after such ratification for the purpose of electing a Board of Directors, and the transaction of other business. A general good feeling was manifest among all those present at the meeting in St. Joseph, and a determination expressed to carry the work of constructing this important line of railroad along as rapidly as possible. During the interim of several weeks which must occur before the ratification of the terms of consolidation agreed upon at St. Joseph, work upon the lines east and west of Lansing will be vigorously prosecuted by the companies at present in existence.

The Iron Trade of Canada.

The Montreal *Trade Review*, in suggesting branches of manufacture worthy of the attention of the Canadian capitalists, lays particular stress upon iron and steel. Some shipments of ore have been sent to England, and found to be of a quality that, for the manufacture of steel, Sheffield firms will take, of pig reduced from magnetic ore by charcoal, all that several furnaces can produce. It cites the estimate of the Canadian ore given by Pittsburg smelters, which they regard as being very superior in quality. The iron is distributed, more or less, in all sections of the province, with the exception of the western peninsula. The *Review* thinks that furnaces and mills ought to rise up all over these iron localities, the most profitable being South Coosley, on the Rideau Canal, and at Hull, near Ottawa. In both places the iron is magnetic, and yields from fifty to sixty per cent. of metal, and large quantities of it have been shipped to Pittsburg. The supply of beech and maple wood, however, is small, though there is said to be an abundance of a softer kind of wood. There are fine deposits of magnetic ore at Madoc, Metamora and Belmont, but the distance of transit to the front is a drawback, and has already ruined several firms. Thousands of tons are annually gotten out on American account by a different route. There are numerous other localities where iron is known to exist, and where large deposits occur, but which their inland positions at present render unworkable. But the manufacture of iron particularly requires a large capital, and probably, this is the secret why many capitalists hesitate to enter this arena single-handed.

Peninsular (Mich.) Railroad.

The Battle Creek *Times* of April 27th says: "The first stake on the survey of the Peninsular railway (from Battle Creek to Lansing) was driven by the President of the company, L. D. Dibble, Esq., when the engineers immediately proceeded to survey the route. So far as they have gone, they express themselves as being highly pleased with it. The President of the company informs us that the work of construction is expected to commence as soon as the survey is completed."

Iron Bridges.

We have received from the author a pamphlet copy of a work entitled "Description of the Iron Bridge over the Connecticut River, on the Hartford and New Haven Railroad; with a brief history of Iron Bridges—with Plates." By Theo. G. Ellis, C. E. It will be for sale at Appleton's and Wiley's. Price 50 cents.

Central Pacific Railroad.

The Virginia, Nevada, *Enterprise*, of April 15th, says: "The topographical party of the Central Pacific Railroad, consisting of Butler Ives and twenty-one men, had reached up to yesterday as far as Stone and Gates' crossing on the Truckee River, and will start from there on Monday next towards Salt Lake City, which place they will in all probability reach in two months, completing the railroad survey in the meantime."

Through Tickets on Southern Railroads.

At a recent convention of Presidents and Superintendents of railroad and steamboat lines between Baltimore and New Orleans, held at Richmond, it was resolved that through tickets be agreed to from New Orleans, Mobile, Montgomery, Atlanta and Augusta to Richmond, Washington, Baltimore, Philadelphia and New York, on the basis of the prices charged for similar tickets *via* the Western and East Tennessee routes. A system of through checks from New York to New Orleans and intermediate points was devised.

A Large Locomotive.

Messrs. McKay & Aldus, of East Boston, have just completed the largest locomotive ever built in New England, for the Lehigh Valley Railroad. It has 10 wheels, with cylinders of 18 by 22 inches, is 30 tons weight, and is capable of drawing 200 cars, with 5 tons of coal in each car. This is the sixth they have built since December, and they have seven more to build, namely, 2 for the Lehigh Valley, 1 for the Summit Branch, Pa., and 4 for the Central Pacific Railroad in California. This one is named Towanda, and is finished in superior style. Mr. W. B. Healy is the Superintendent of Messrs. McKay & Aldus' locomotive works.

☞ A meeting was held at Millington, Kent Co., Md., on the 19th ult., of those favorable to an extension of the Queen Anne's County Railroad from Millington, through Massey's Cross Roads, or near it, to the nearest or most desirable point on the Delaware road. After some very appropriate remarks a subscription list was opened, and near thirty thousand dollars of stock taken.

☞ The long bridge across the James River on the line of the Richmond and Petersburg Railroad, erected in the place of the bridge destroyed by fire at the time of the evacuation of Richmond, was completed on the 25th ult.

Railroad Earnings.--Weekly.

The earnings of the Western Union Railroad for the week ending May 21, 1866.....$20,744 36
Corresponding week previous year.... 13,408 84

Increase..... $7,335 52

Receipts from Jan. 1, to May 21:
1866 .....$218,116 34
1865 ..... 184,513 21

Increase $33,603 13

The traffic of the Great Western Railway of Canada, for the week ending May 25th, 1866, were $59,324 51
Corresponding week of 1865 ..... 57,103 83

Increase..... $2,220 68

The earnings of the Grand Trunk Railway of Canada for the week ending May 19th, 1866, were $116,189 00
Corresponding week of previous year.. 122,893 00

Decrease $6,704 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in May, 1866 ...$21,229 00
Corresponding week previous year.... 17,235 27

Increase..... $3,993 73

Commencing 1st Jan. 1866..... ....$401,303 00
Commencing 1st Jan. 1865..... ..... 410,455 59

Decrease..... $9,152 59

The earnings of the Michigan Central Railroad for the 3d week in May, 1866, were....$73,656 00
Corresponding week of previous year..102,917 00

Decrease $29,261 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in May, 1866, were $65,191 00
Corresponding week of previous year.. 50,493 00

Increase.....$14,698 00

The earnings of the Chicago and Great Eastern Railway for 3d week in May were.....$24,686 05
Same period last year..... 18,668 72

Increase in 1866..... $6,017 33

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in May, 1866, were..... $97,295 00
Corresponding week of 1865 ..... 72,520 00

Increase..... $24,775 00

The earnings of the Chicago and Northwestern Railway for the third week in May, 1866 were.....$159,467 41
Corresponding week of previous year,. 115,424 39

Increase.....$44,043 02

Indiana and Illinois Central Railroad.

At a meeting of the stockholders of this company recently held in Indianapolis, the following gentlemen were elected directors: S. G. Malone, Benjamin Ellers, James R. Hammett, George Harding, E. Pritchett. D. T. Thornton, W. H. Talbott, James Johnson, Joseph E. McDonald, R. J. Bright, C. C. Nare, E. M. Benson. President, W. H. Talbott; Vice President, James R. Hammett; Secretary B. K. Elliott. This road will commence at Indianapolis and run *via* Danville, Bainbridge, Rockville, and Montezuma to Decatur, Ills., connecting directly with the Hannibal and St. Joseph Railroad. The road will be completed to Danville, Ind., first. The directory will ask for subscriptions to be paid as follows: One-half when the road is ready to receive the iron, and the other at the completion of the work and the first running of the cars over the track.

Journal of Railroad Law.

EXEMPTION OF A COMMON CARRIER FROM LIABILITY.—WHAT IS NEGLIGENCE IN DETENTION IN DELIVERY OF GOODS.

The case of Michaels *vs.* New York Central Railroad Company, decided in the Court of Appeals of this State in June, 1864, is interesting as showing the extent of the liability of a common carrier. The facts of the case appear in the opinion of

DAVIES, J.—The defendants, as common carriers, received, Albany, on the 5th of February, 1857, three boxes of dry goods, in good order to be transported from Albany to Rochester, for a consideration which was to be paid on delivery. Two of said boxes were forwarded immediately on their arrival at Albany by the Hudson River Railroad; and the other, not being accompanied by a bill of back charges from the Hudson River Railroad, was detained by the appellants at their warehouse in Albany. While so detained, the contents of said box were injured by being wet by a rise in the Hudson River, on the 7th, 8th and 9th days of February, 1857. This box was afterwards shipped to, and on or about the 17th day of February, 1857, received by the respondents unaccompanied by a bill of back charges from the Hudson River Railroad Company. Said goods, while so detained at Albany, were damaged by the said flood to the extent of $100. The jury, under the direction of the Court, found a verdict for the plaintiff, and judgment thereon affirmed at the general term.

Two questions are presented for consideration in this case.

1. Whether the defendants are excusable for the detention of the box at Albany; if not, then was it negligence in them so to do?

2. The injury having happened to the goods by an act of God, are the defendants responsible for that injury, under the circumstances presented in this case?

The law is well settled that common carriers, while engaged in the transportation of goods for hire, are not responsible for injuries to them, caused by an act of God, or the public enemy. With the exception of injuries thus caused, they are liable for all damage to goods entrusted to them, while under their care and control. For the reasons stated in the opinion in the case of Read & Spaulding, decided at this term, the carrier to exempt himself, must show he was free from fault at the time the injury or damage happened. He must show that he was without fault himself, and that no act or neglect of his concurred in or contributed to the injury. If he has departed from the line of duty, and has violated his contract, and while thus in fault, and in consequence of that fault, the goods are injured by an act of God, which would not otherwise have produced the injury, then the carrier is not protected. In the present case it is apparent that if the goods had not been detained at Albany until the happening of the flood, no injury to them would have occurred. The question then recurs, was such detention justifiable, or was it negligence on the part of the defendants? They seek to justify it, on the ground that by their regulations, goods received from a connecting road were not forwarded until the receipt of a bill of back charges. When the goods in the present case were delivered to the defendants of the Hudson River Railroad Company, who in this respect acted as the agents of the plaintiff, to be transported to Rochester, and the same was received by them for that purpose, it became the duty of the defendants immediately to send them off. If the Hudson River Railroad delivered no bill of back charges with the goods, nor gave any notice that any such existed, the defendants should have assumed that there were none, and they would have been justified in delivering the goods to the plaintiffs without any claim for such charges. Clearly the Hudson River Railroad Company could have no claim upon the defendants for any bill for back charges. They discharged their lien upon the goods for such back charges, by the delivery of the same to the defendants, to be carried and delivered to the plaintiff without any notice of claim for any such charges; and if any existed, they would have been remitted therefor to their claim against the plaintiff personally.

I am unable to see any justification to the defendants for detaining the plaintiff's goods, because the Hudson River Railroad Company did not present a bill for back charges. Its omission to do so, or to give notice that such charges existed, should have been taken as evidence by the defendants, that in fact there were no back charges. The ground assumed, that they were justified in detaining the goods until a bill of back charges was presented, cannot be maintained. The regulation of the defendants may be reasonable enough as between the two companies, but it cannot be permitted to affect the rights of third parties, ignorant of its existence, and who cannot be presumed to have contracted with reference to it. If the defendants were not excusable for the detention of the box of goods in Albany, to await the rendering of a bill for back charges by the Hudson River Railroad Company, then such detention was negligence on their part. Such negligence having concurred in and contributed to the injury to their plaintiff's goods, they are precluded from claiming the exemption from liability which the law would otherwise extend to them.

The Court, on the trial, properly, therefore, refused to give the instructions asked for by the defendants' counsel, and the instructions and charge to the jury were such as, under the facts proven, it was the duty of the Court to give. The judgment appealed from should be affirmed, with costs.

Judgment affirmed.

Port Huron and Lake Michigan Railway.

We have already alluded to the new proposed railway outlet from Chicago to the seaboard, which crosses the State of Michigan, but the recent organization of the company and the rapid progress made in securing the means of its construction requires of us a more extended notice than heretofore accorded to this new project.

The proposed line runs through the best part of the State of Michigan, traversing the counties of St. Clair, Lapeer, Genesee, Shiawassee, crossing the corner of Clinton and Ingham, to Lansing the capital of the State. Beyond this point, we do not understand the exact line determined upon. The shortest route to Chicago, from Lansing, would intersect the Michigan Central a short distance east of Augusta Station, in Kalamazoo county, but we infer from the very able pamphlet, prepared by Hon. W. L. Bancroft, setting forth

the resources and business prospects of this new line for public favor, that it is proposed to keep north and west of the Central, through the counties of Eaton, Barry, Van Buren and Berrien, having connection with Lake Michigan at the village of St. Joseph, at the mouth St. Joseph river, and from hence along the shore of Lake Michigan to Chicago, the great center of railway traffic in the Northwest.—*Chicago Merchants' Journal.*

Grand Trunk Railway of Canada.

Accompanying the Report of the Directors of this company, is a neatly printed pamphlet from the house of Messrs. Waterloo & Sons, containing a verbatim report of the proceedings at the half yearly meeting of the proprietors and bondholders held in London on the 26th of April, at which Mr. Watkin, President of the company, acted as chairman, and at which he made the customary address. It appears from his remarks, as well as from the Report, an abstract of which is given herewith, that although there has been a very large addition for the capitalized interest on the preference bonds, the real addition to capital for outlay upon new stock and new works is the very small sum of £33,258. That includes additions to stations at four or five different points, also the completion of ten new broad gauge engines, and the balance of expenditure on 100 new box and platform cars.

By reference to the report it will be seen that the gross receipts of the entire system were £714,-781; the ordinary working expenses, £395,674—leaving £319,107. From this sum is deducted the whole expenditure incurred for renewals of way and works, viz: £89,688—leaving a balance of £229,419. Then there has been deducted the further sum of £52,945, being the whole of the amount standing to the debit of the "renewal suspense account." Then from the balance which remains, viz: £176,472, is deducted £15,363, which belongs to the postal and military branch of the revenue, and is therefore carried to the credit of the postal and military bondholders, leaving £161,189, subject to the large deduction of £58,848 discount on American currency. The remainder of the balance has been paid in interest on loans and upon various leased lines, in the proportion of revenue due to the Montreal and Champlain and Buffalo and Lake Huron Companies, and also in the payment of interest on the first class of bonds, the equipment and mortgage bonds.

Since 1861 there has been expended £526,865 upon renewals, every farthing of which has been provided out of revenue. In the course of the half year the number of miles of rails which have been relaid amounts to 65¼; and the number of ties put in, 283,060. On the Grand Trunk proper 45¼ miles were relaid; on the Portland line, 11½; on the Detroit line, 2; and on the Buffalo, 6¾. The number of tons of new iron used was close on 7,000. The price of re-rolling rails on the Grand Trunk and Buffalo sections, both of which are in Canada, was, under contract, $29 a ton, but in the Portland district it was no less than $55, and in the Detroit district $63 a ton.

Since 1861 the ordinary expenses have declined from 68.64 to 55.35 per cent.

The most important item of expense has arisen on the American sections of the road. In addition to the heavy discount of American currency, and large indirect taxation, the *direct* payments for taxes on earnings, capital, dividends, stamps, and city, county and State taxes amounted in the half year to £9,131. The loss on American currency Mr. Watkin might prevent if he would invest his currency in American gold bearing stocks and retaining them as a sinking fund. He states how it would have been practicable to pay a cash dividend on the 1st, 2d, and perhaps 3d preference bonds, the reasons why being fully explained. There is yet unissued capital to the nominal extent of £460,000, from which the loans from bankers have to be deducted.

All the outstanding claims have been paid off, except the balance of Government account £50,-015, which will be met by a sufficient quantity of postal and military bonds. The earnings to the 30th of March, were £305,000, against £294,-000, the same period in the year 1865. The termination of the Reciprocity Treaty has since occasioned a difference in receipts, but it will benefit Canada.

The imports at Montreal for the first three months of 1866, have risen from $2,900,000, to $5,900,000. In Toronto they were in 1865, but $679,000, and in 1866 they had risen to $1,615,-000. In the month of March the Canadian revenue had increased half a million of dollars. The treaty will be in some form renewed. Mr. Watkin contends that the loss to the American revenue from the beer makers alone for want of Canadian barley, is $2,000,000 per annum. He favors confederation of the provinces, and then the Intercolonial railway will be a necessity. The effect is shown very clearly.

He offers four seats in the board if they are wanted, and alludes to the difficulties which beset them in years gone by. But it has lived through the rebellion, the currency question and the Fenian movement, and has had much to contend with from first to last—he moved the adoption of the report.

In explanation of the rate of fares the chairman said in reply to remarks addressed him, that it was deemed expedient not to increase fares for the reason of the depreciation in currency, because the American lines competed. He was also satisfied that the working expenses could not be reduced 1s. per mile as proposed. Various other explanations were given by him on other subjects, and the neutrality of the American Government vouched for. Mr. Watkin was unanimously re-elected Director, and the meeting adjourned to the 7th of June.

☞ At the last (extra) session of the Maryland Legislature an Act was passed to authorize the Mayor and City Council of Baltimore to endorse the first mortgage bonds of the Gwynn's Falls Railroad Company, to an amount not exceeding one hundred and fifty thousand dollars.

Also, an act to enable the Mayor and City Council of Baltimore to subscribe to the capital stock of the Western Maryland Railroad Company to an amount not exceeding two hundred thousand dollars.

Also, an act to incorporate the Union Railroad Company of Baltimore, and to authorize the Mayor and Common Council of Baltimore, the Northern Central and the Western Maryland Railroad Companies and the Canton Company to subscribe for the capital stock thereof, and to endorse the mortgage bonds of said Company.

Virginia Valley Railroad.

Colonel M. G. Harman, the president of the Virginia Valley Railroad, has published a call upon the people of the valley to aid in pushing forward the line of railroad which is to connect the Potomac with the Virginia and Tennessee road. He says it is necessary to have stock taken in the valley to the amount of $1,000,000, and in order to do this, proposes that it shall be done on the following terms: Two per cent. of the amount subscribed to be paid in as soon as called for; thirteen per cent. additional to be paid within the next three years; the remaining eighty-five per cent. to be paid within the next ten years.

Burlington and Missouri River Railroad.

We learn that work upon the extension of this road is progressing rapidly. The bridge across the De Moines was to have been competed by the 1st of June, when track laying would commence. The grading has been completed to Albia, and it is thought the cars will be running to that place by the 1st of August, and to Chariton, 60 miles west of Ottumwa, by June 1, 1867. A very strong force is working on the line, and efforts are being made to complete the connection between Ottumwa and Plattsmouth at an early day.

Warren and Franklin Railroad.

The first division of this road, extending from Irvinetown, at the mouth of the Brokenstraw, on the line of the Philadelphia and Erie Railroad, to Tideoute, a distance of 15 miles was opened to the public on the 14th of May. The grading of the second division to West Hickory is nearly completed. All the materials for track laying have been provided. It is thought that the whole road to Oil City will be finished in July. The Chief Engineer and Superintendent of the road is N. P. Hobart.

☞ C. H. Latrobe, Esq., has just completed his report of the survey of the Baltimore and Pikesville Passenger Railroad. The road will be about 7¼ miles long, from the junction of Gilmore and Cumberland streets, Baltimore, to the Depot Lot in Pikesville. The cost, according to Mr. Latrobe's estimate, is as follows: Grading, &c., $11,000; ballasting, &c., $15,240; superstructures, $41,682; buildings, depots, &c., $5,-500; rolling stock, $14,250; engineering and superintendence, $2,500—making a total of $90,-172, from which is to be deducted ballasting not absolutely necessary, $15,240. This will make the actual cost of the road, 7¼ miles in length, $74,932.

☞ The Omaha *Herald* says that the temporary bridge of the Pacific Railroad over the Loupe Fork was finished on the 6th ult. This work was commenced on the 22d of March, and deducting for bad weather, the time employed in doing it was but 30 days. The permanent bridge over the Loupe will be ready for crossing by the 10th inst.

☞ The Easton, Md., *Star* says that the iron to complete the road to Greensborough has been shipped from New York, and a sufficient force will at once be put to work on the road to lay two and a half miles of track per week.

☞ The Schuylkill Navigation Company has appointed Edward Smith, Jr., of Reading, as Superintendent of the canal at Hamburg, Berks County, in place of Martin Hummel, deceased.

The Southern Temperature.—It should be Moderated.

We should not expect the most complacent temper in our Southern friends. They have been badly handled by our Northern soldiers. Words cannot describe how they have suffered, or still suffer. We entirely mistake the feelings of the people of the North, if we can suppose they would, under similar circumstances, submit in silence to a victor's arms. Human nature is the same, North and South of "Mason and Dickson's line." There is no Equator to discontented people, no matter what part of the continent they inhabit. We are therefore not in the least surprised, that in a tropical climate there should be volcanoes of mud or fire. We expected nothing else; but we must, for all, do our whole duty, if we have performed it at all. This JOURNAL at an early day looked at the question in a purely economical light. We did not suffer, as journalists, our private feelings to control our judgment. In the light of history we looked at the question, and do so still. It is the interest, the great interest of the South to lay aside its bitterness. We have none among the business men of the North, none among the real faithful honest supporters of the Constitution of the United States. To that we are willing as to an impartial umpire to submit all the questions which yet remain; and these specially regard the rights of the States not fully and unquivocally surrendered with their consent. It is for them to say on what terms their remaining privileges shall be exercised. Do we not enjoy free trade among ourselves, which would be jeoparded or lost by a separation? Do we not possess in a remarkable manner the right of locomotion over natural and artificial lines of communication, unparalleled in the history of Nations? Does capital refuse its assistance to any project of a national character, because it is more or less distant? Does not, in fact, northern capital lend wings to the enterprise of the South, and ever rest itself where it is invited to come? Do not northern men build their railways, and equip and manage them successfully; or when they are devastated by war and broken down, hasten to their assistance and offer them money and recuperation? Now this is the natural condition of both sections. They cannot well get along without each other. God has joined them, woe to him who would keep them asunder. The southern people, if they cherish any bitter feeling, if they yet mistake our magnanimity, do themselves a grievous wrong, they mistake our temper, and our objects. We think they have greatly erred. They might have done much better than they chose to do. There was no occasion for an appeal to arms; for the fearful loss of life; for the rolling up of a debt the extinction of which few men living will see; for taxation such as the world never before submitted to; such a destruction of human interests as the world has never before seen. Those who brought these evils on us should not have done so; those who have ruined themselves have only themselves to blame. The path of duty is a plain one; it is to make the best of a bad bargain, and submit to what is unavoidable and irremediable. The clamors and injustice of the few leading heated politicians who always gain by revolution, and have little to lose in its vortex, should not be attended to. They are the peoples' worst enemies, and care not for their blood and treasure, if they can but lead them, in comparative safety themselves. Office is all they toil for, no matter if it be from the regions of death itself, if it be but office, and that office has its emoluments. We regret, therefore, to learn that in some places an effort is still made among our refractory friends of the press, to fan the expiring embers and keep their readers in a glow! There is really nothing of this here. The North is complacent to a fault; it freely admits the misdirected bravery of the South, and the desperate valor with which it sustained a doubtful cause. In the grave of oblivion let all the past rest; it is not the first time that families have differed; happy are those with whom blood is thicker than water. We are disposed to take by the hands all who stretch out their's. We are even disposed to do much more, to share our last crust with the unfortunate, and to attribute to error and misfortune all that may be required of us.

We shall yet fill the South with northern emigrants anxious to enjoy its healthful climate, to till its fertile soil, to reap its luxuriant crops, and to ally itself with the altars and firesides of the southern men and women. Neither will lose by the most intimate connection. What one character wants the other will impart to it; what one is deficient in the other will make up to it. No alliance with a foreign nation, no isolation of of itself, could make any valuable or desirable change. We should have had a wretched dependency, or an unjust oligarchy with the degradation of millions of unfortunate beings for whom the day light would bring no hope and night no repose. All may yet be well, if patience but does its perfect work. The southern character needed discipline only, and that it has gained after a fearful struggle. It has but to wait for the remedies of time, swift enough after they once come, though slow in their approach when looked for anxiously. We shall see peace and prosperity again filling our sails, and contentment again brightening our course. The great majority of this people are wise, just and generous. We have faith in them, and we do not doubt the South will soon learn that to "err is human, to forgive divine." We have long adopted the opinion.

Columbia and Port Deposit Railroad.

The Wrightsville (Pa.) *Star* says that several engineers and their assistants are now engaged in making a survey for a railroad from that place "up the river where the Northern Central Railway makes the river—a distance of about nine miles. This survey is made at the direction of the Columbia and Port Deposit Railroad Company, to connect with their proposed road between Columbia and Port Deposit, Md., of which, we presume, it is to be considered an extension."

☞ We learn that work has been commenced on the new line of road between Union City and Logansport, *via* Marion, Ind. On the 14th ult., ground was broken at the former place, and the contractors have undertaken to have thirty-four miles of the road west from Union City completed by October 1. This forms an important connecting link in the line which is to connect Columbus with Chicago, by way of the Columbus and Indianapolis Central. It is expected that the work will be completed as far as Logansport by January, 1867. From Logansport connection to Chicago will be made over the track of the Chicago and Great Eastern Railway.

☞ At a meeting of the stockholders of the Philadelphia and North Branch railroad, held at Pottsville, Pa., on the 8th ult., a board of directors was chosen, with Franklin B. Gowan, Esq., as president. The Luzerne *Union* says that the stock has all been subscribed. It is intended to connect the Schuylkill Valley with the Wyoming Coal Field by a new route. Some 15 miles of the road has been located.

☞ The Topeka *Record* says that the Union Pacific Railroad Co., Eastern Division, have mortgaged their road from Wyandotte to Fort Riley, including rolling stock, depots and all other property, excepting their lands granted them by act of Congress, to J. Edgar Thomson, of Philadelphia, and H. M. Alexander, of N. Y., for $2,240,000, with interest at 6 per cent. per annum, payable semi-annually in gold.

☞ At a meeting of the stockholders of the Shore Line Railroad, held at Tyler's Hall, on the 22d ult., the following Board of Directors were elected: Charles Langdon, C. S. Bushnell, Henry Hotchkiss, James M. Townsend, Sereno H. Scranton, Edward Ingraham, and A. N. Ramsdell. It was voted to authorize the sale of $100,000 worth of bonds. At a subsequent meeting of the Directors, Sereno H. Scranton, of Madison, was elected President of the company. Mr. Scranton will continue to act as Superintendent.

☞ The contract for the new Water Works at New Bedford, Mass., has been awarded by the authorities of that place to James McDonald, of Albany. The work will involve an expenditure of over one million dollars, and is to commence at once.

☞ At a meeting of the stockholders of the Ohioville Railroad Company, recently held in New Brighton, Pa., a board of directors was elected, with J. W. Blanchard as President. The company propose to build a short railway from the Ohio river up to the Island Run, Beaver county, oil regions.

☞ The Winchester and Potomac Railroad Company are now running their trains to and from their depot in Winchester. The road is being temporarily worked under contract by the Baltimore and Ohio company, but has an independent organization, with Mr. J. H. Sherrard, of Winchester, as its president.

☞ The corporation of Danville, Va., has almost unanimously voted a subscription of ten thousand dollars to the Lynchburg and Danville Railroad. In Lynchburg one hundred additional shares to the same road were taken.

☞ The Lehigh Coal and Navigation Company are rapidly pushing forward the construction of their new railroad.

American Railroad Journal.

New York, Saturday, June 9, 1866.

A New York City Railroad.

The Senate of the State of New York, on the 20th of April last, adopted the following resolution:

Resolved, That a select committee of three be appointed to sit during the recess, with the Mayor of New York, the State Engineer, and the Engineer of the Croton Board, to ascertain and report to the Senate the most advantageous and proper route or routes for a railway or railways suited to the transportation of passengers from the upper to the lower portion of the city of New York, having in view the greatest practical benefit and safety to the public, and the least loss and injury to property on or adjacent to said route or routes.

The members of the Commission are: Senators Geo. H. Andrews, Henry R. Low, and Charles G. Cornell; State Engineer J. P. Goodsell; Mayor John T. Hoffman; Engineer Alfred W. Craven.

At meetings of the Board, held on May 31 and June 2, it was resolved that parties interested be and they are hereby invited to submit plans and specifications upon the subject embraced in the above resolution, to be addressed "To the Senate Commission on Railroad," at the office of the Street Commissioner, corner of Broadway and Park place, in the city of New York, on or before Tuesday, the 1st day of August next.

The Committee deem it desirable that the plans should be accompanied by approximate estimates of expense.

Confederation of the British North American Provinces.

If we were Provincials, we should most probably be warmly in favor of Confederation. The lake, river and maritime Provinces have at present very differing tariffs and interests, arising out of their position and commercial relations. All Governments and nations are supposed to exist for the benefit of the governed; if not in one shape, yet in some other. When they are brought to a common standard, then the greatest good of the greatest number must prevail.

Canada, East and West, has the greatest population, and territory suitable to increase; the maritime Provinces possess the fisheries, lumber and the coal supply; some of the greatest supports of commerce and industry; they, by position, prefer a constant intercourse with the United States; and it might have been continued on the most favorable terms if the men at Washington had comprehended the subject. A simple bill might have been introduced by which reciprocity could have been retained wherever it was desirable, and the fisheries preserved, for which such men as Adams, Everett, Webster and Marcy were always anxious. From American statesmen we could have expected some such legislation by which confederation might have been prevented. For it cannot be disguised that a union of the British North American Provinces bodes no good to us. It establishes on our Northern border, from one end to the other, a united and powerful antagonist; and builds up in the face of our lake commerce and lake cities, a rival interest with no very friendly feeling. The late movement of the Fenians, the violation of our neutrality, and the possibility of a war with Great Britain, have all raised a feeling in favor of confederation in the Provinces which did not exist before. And though the Legislature of Prince Edward's Island has declared against it, a warm election is growing out of it in New Brunswick, and the first men in the Provinces are opposed to the Quebec scheme; yet the Imperial and Canadian Governments have thrown their whole influence in its favor, and it will in the end prevail, no matter how strong the opposition has been and may be. Confederated, the Provinces will be cemented and united, have one commercial system, one spirit, one destiny, and in their renewed force, will become an antagonist such as they have never been before.

Already we see that, by the force of the change of the reciprocity system, Canada has advanced in its commerce. Montreal and Toronto have since the 4th of March last, gained largely in trade and revenue receipts, and are boasting of their success. A roving commission has been welcomed in South America and the West Indies, and assured of a profitable business. New orders in council may be looked for favoring the colonial interests, and the American shipper will there find a favorite in advance of him. And yet there is no one to see this, no one to raise his voice in time. It is forgotten at what trouble and expense the Reciprocity Treaty was effected; how it took years to bring it about; how under it we have largely gained in markets, in profits, and in the balance of trade. All this is forgotten in the clamor of the hour, and the struggles of party. Intented on punishing rebellion after it has been defeated and cries for quarter, we are shutting our eyes to other questions of as much magnitude, and in fact of greater consequence. We are building up all sort of interests that will only last for a day, and forget those which exist for all time.

In this light we view the apathy with which we are looking on the steps taken by the British North American Provinces to build up another and a dangerous empire on our frontier. We do not blame them for unity in all shapes, but we perceive in it danger to ourselves; not so immediate, perhaps, but yet not the less certain.

A great convention was held at Detroit in favor of continuing our commercial relations with the Provinces; it was crowded with intelligent commercial representatives, and the opinions were unanimous. Yet what good did it do? The politicians had their way, and commerce was struck a mortal blow. It appears from the debates in Parliament that every attempt was made by the Governments of the Provinces, and by the Imperial Government to renew this commerce,

but they were refused; and now we have the poor consolation of seeing the confederation deriving its strongest arguments from our want of fairness.

We have a set of writers among us, who are only of consequence as they stir up wrath; and politicians, whose only importance is in their fury. These men have no national objects, no national feeling, all they seek is trouble. As the pot boils, the scum gets up to the top, and they are continually striving to add fuel to the flame. The Canadian and maritime confederation would never have risen to its present importance, if we had only acted with decent self-respect and a regard to our true commercial interests.

If any one is so dull as to believe that this plan of the confederation designed at Quebec in 1864, was without management on the part of the home and Canadian Governments, they are much mistaken. But certain it is, by our own want of wisdom we have greatly contributed to the result which is about to happen. We have closed our eyes to our manifest interests, going over the whole world to seek its trade, and shutting that off which lies conveniently at our own doors.

Allegheny Valley Railroad.

The earnings and expenses of this road for the years ending January 31, 1865 and 1866, have been as follows:

Receipts:	1865.	1866.
From freights	$118,269 47	$187,476 21
" passengers	132,774 53	165,550 92
" mail	3,208 33	3,250 00
" interest	2,255 31	.....
	$256,507 64	$356,277 13
Expenses, viz:		
Operation expenses	$151,510 72	$199,526 63
Salaries	7,381 45	10,329 99
Taxes, State, city, county, etc.	2,002 68	1,533 49
Internal revenue tax	5,318 56	16,041 15
Rents	2,010 00	2,966 83
Miscellaneous	1,540 74	1,987 30
	$169,764 15	$232,385 39
Net earnings	$86,743 49	$123,891 74
Interest	33,775 00	41,075 57
Balance	$52,968 49	$82,816 17

The gross earnings of the past show an increase over those of the preceding year of $99,769 49; with an increase in expenses of $62,621 24—making the increase of net earnings, $37,148 25. The operating expenses show an increase of only $48,-014 61—about 47 per cent., or a fraction over. The large increase in the earnings of the road, and the comparatively small addition to expenses for operating, furnish conclusive evidence of the sound condition of the company's affairs. The operating expenses of the past year were 55½ per cent. of the gross earnings—a result equally gratifying to the owners and managers of the road. Depot grounds have been purchased at Kittanning, and the depot at that place removed to the property of the company, where a convenient building has been erected for the accommodation of travelers. Should tonnage and travel continue to increase at the ratio of last year, additional depot facilities will be required at an early day. The report says:

We had hoped to be enabled to state, in this report, the fact of the completion of the extension to the mouth of the Mahoning. The grading and ballasting have been finished, and the road structure completed, to Pine Creek. The bridges at and above that point are framed and are now being put up. The delay in completion has arisen from failure to procure cross ties as rapidly as, from contracts made, we had a right to expect their delivery. This difficulty is now removed, and the completion and opening of the road for business, to Mahoning, may be confidently expected by the middle of April. This portion of the line is very thoroughly and substantially built and ballasted.

The expenditure on these ten miles has been $345,335 32. This high cost is owing to the many causes that have inflated values of everything about us, the scarcity of labor, and the delay and difficulty in procuring materials, at any price. The use of this extension promises a very large increase to the gross receipts, while its operating or working expenses will be very trifling. The vast lumber region, watered by the Mahonings, and penetrating far into adjoining counties; the several valuable and extensive furnaces on the line, and deposits of mineral wealth along the route, must necessarily concentrate upon this work a heavy freight and passenger business. A large part of Clarion County, all of Jefferson, and portions of Armstrong, Indiana and Elk Counties, will find the mouth of the Mahoning the best and cheapest depot for trade and passage to and from this city. Many intelligent and well informed persons place so high an estimate upon the extent of this business, that your Managers feel justified in saying, that at least twenty-five per cent. on your present earnings, will be secured by the extension of your road.

In submitting these details, the duties of your Managers would be scarcely performed, if they failed to urge the further extension and final completion of this great line of trade and travel, to a connection with outlets north and east of its present terminus. In a former report, it was stated that arrangements had been made with a company, intended to secure the completion of your line to Franklin. This arrangement was not carried into effect. The French Creek and Mahoning Railroad Company failing to comply with the terms and stipulations of the lease, it has therefore been rescinded. It now devolves upon us to complete the work, in preparation for which the necessary legislation has been obtained for authority to issue preferred stock, to the amount of one million of dollars, bearing an interest of ten per cent. per annum. This preferred stock is now offered to the present stockholders, and to be issued to other parties in the event of refusal to take it by our stockholders. We have also procured the power to create a mortgage lien, on the whole road, to the amount of four millions of dollars, bearing interest at the rate of seven and three-tenths per cent. per annum. With these means, (being only an anticipation of future earnings,) the Managers propose to complete the work under their charge. Surveys and estimates have been made, and proposals invited for grading, bridging, ballasting and superstructure of fifteen miles, from Mahoning northward, and fifteen miles from opposite Oil City southward.

It is proposed to offer for sale, at present, one and a half millions of mortgage bonds, as well as the preferred stock authorized. To effect a sale of these securities, it is only necessary to show how entirely certain will be the payment of the interest and principal. The interest on the mortgage bonds will amount annually to $109,500. The present net earnings of the company, over and above the payment of all interest on its present indebtedness, arising from the use of only forty-four miles of finished railway, amount to $82,916 17. The increased receipts from the Mahoning extension, placed at even—in net revenue—$40,000, instead of $89,000, as anticipated, exhibits the entire and absolute ability to pay said interest. In addition, it must be recollected that each mile of railway finished, from this end, adds its fair proportion to the ability to make and security of the payment. These additions to the length of road throw all their accumulations of trade and travel upon the present finished line, and thus increase its earnings without much increase of outlay for machinery or operating expenses. We invite to this investment, not only parties interested in the extension of the road, but also capitalists desirous of placing funds in that which is safe and permanent, with the certainty of interest being paid punctually as it matures. In the further prosecution of the work to completion, the residue of the mortgage bonds will be offered for sale, the proceeds of which—from estimates made from actual surveys, and assumed from exploration—will furnish all the funds required to finish, in complete condition, the entire line of one hundred and twenty-nine miles—the distance from Oil City to Pittsburg.

The company own 13 locomotives, 11 passenger, 3 baggage, mail and express, 46 platform, 40 box and stock, and 24 gravel and construction cars. There have been added during the year 3 locomotives, 2 passenger and 31 freight cars.

The length of road in operation at the date of the report was 44 miles. Number of miles run by all trains during the year, 134,201. Passenger mileage for the year, 4,102,045; tonnage, do., 4,-043,699. Number of passengers carried, 234,597, of which 28,281 were through. Tons of freight carried, 246,138, of which 16,625 were through. Tons of coal carried, 119,088.

The income account of the company for the year ending February 1, 1866, is as follows:

Balance, February 1, 1865	$559 10
Received on earnings for the year ending January 31, 1866	337,105 66
Received for military transportation	683 43
First mortgage bonds negotiated	2,000 00
Second " "	43,000 00
Bills payable	166,392 56
Collected on accounts due prior to Feb. 1, 1866	9,073 33
Loan to U. S. Government collected	70,000 00
Exchange National Bank	7,596 31
	$636,410 39
Paid on railway superstructure	$107 25
" rolling stock	71,497 17

	$2,876,341 80

The office of the company is at Pittsbnrg, Pa. The officers and directors elected at the annual meeting, February 27, 1866, are as follows:

President.—WILLIAM PHILLIPS.

Directors.—James B. Murray, James Park, Jr., George Black, N. Holmes, B. F. Jones and Thos. McCulloch.

Secretary and Treasurer.—JOHN BALLANTINE.

Superintendent.—H. BLACKSTONE.

Chief Engineer.—FRANKLIN WRIGHT.

Coos Railroad.

The first meeting of this company was held at Whitefield, N. H., on the 1st inst. A. M. Chase presided, and H. O. Kent acted as Secretary. A temporary board of directors was chosen. Much interest was manifested, and it is proposed to make immediate survey of the route, and to take practicable steps for securing a road.

Terre Haute and Indianapolis Railroad.

The earnings of this road for the years ending November 30, 1864 and 1865, have been as follows:

	1864.	1865.
From passengers	$404,565 41	$563,800 87
" U. S. troops	61,776 31	80,578 34
" freight	453,900 18	502,613 08
" coal	55,880 90	62,061 12
" mail, express, etc	31,856 41	39,672 47
	$1,007,979 21	$1,248,725 88
Expenses, viz:		
Running road	$105,029 71	$146,046 64
Road repairs	183,398 70	197,904 36
Machine shop	90,071 67	149,057 37
Sundries	88,852 46	122,648 59
U. S. Taxes	19,372 27	34,398 13
	$486,724 81	$650,055 09
Net earnings	$521,254 40	$598,670 79
Additional expendit's.	174,770 92	260,977 14
Balance	$346,483 48	$337,693 65

Compared with 1864 the gross earnings of 1865 show an increase of $240,746 67; with an increase in expenses of $163,330 28—making the increase in net earnings $77,416 39. The report says:

The successful business of the road has enabled the Board to make a fair dividend on the capital, leaving a balance to the credit of surplus. This surplus is the property of stockholders and in part available for any improvements or extensions that may be necessary. Part of this fund may be required to extend the road to the Illinois State Line, as the charter of the road provides; this extension has not heretofore been required, but the building of a road, which we understand is in contemplation, from Saint Louis, by the way of Highland, to the Illinois State Line near the town of Darwin, will make it expedient to extend our road, from its present terminus at Terre Haute to connect with the contemplated road, as it would give a shorter and more favorable route to Saint Louis.

From the present indications we are of the opinion that a falling off of receipts for the year on which we have now entered, may be expected; no accurate estimate can be made, but we should not be disappointed if the receipts should be thirty per cent. less than those of 1865.

At the last session of the Legislature of Indiana, the corporate name of the company was changed from Terre Haute and Richmond to that of the Terre Haute and Indianapolis Railroad Company.

The gross receipts from transportation were		$1,248,725 88
From other sources		25,868 17
Total		$1,274,594 05
Operating expenses	$615,656 96	
U. S. taxes	34,398 13	
New locomotives	43.455 00	
" cars	117,776 54	
" buildings	13.383 14	
Re-building bridges	36,006 01	
Losses by fire	13,715 54	
State and Co. taxes	26,602 65	
Interest and exchange	5,038 26	
Subscription to Vol. Fund	5,000 00	
		911,032 24
Net revenue		$363,561 82
Two semi-annual dividends of six per cent. each	$230,898 00	
U. S. tax on same	12,152 52	
		243,050 52
Surplus		$120,511 30
U. S. tax on surplus		6,025 55
Net surplus		$114,485 75

The capital stock was increased during the year $28,000 by the surrender of bonds to that amount and stock issued for the same, making the capital stock November 30, 1865, $1,928,150. This, together with the bonds then outstanding and which matured March 1, 1866, viz: $60,000, is represented by the cost of the road, ($1,988,150,) as shown in the annexed balance sheet.

The road is 73 miles in length extending from Terre Haute to Indianapolis. The following statement will show the cost, capital, gross and net earnings, and dividends since commencement of operations in the spring of 1852:

	Capital stock.	Cost of road.	Gross earn'gs.	Net earn'gs.	Divi-d'ds, p. c.
	$	$	$	$	
1852.	632,387	1,324,898	105,944	71,446	4
1853.	738,650	1,435,526	177,976	111,645	8
1854.	924,100	1,465,322	239,993	159,324	10
1855.	974,800	1,502,166	287,512	189,702	10
1856.	1,294,450	1,611,450	531,335	371,497	10
1857.	1,361,450	1,611,450	481,271	206,078	12
1858.	1,376,450	1,611,450	380,274	186,448	10
1859.	1,381,450	1,611,450	357,297	182,154	10
1860.	1,381,450	1,611,450	404,599	217,381	10
1861.	1,381,450	1,611,450	377,692	216,184	10
1862.	1,440,450	1,611,450	563,314	361,272	12
1863.	1,517,450	1,611,450	774,618	307,527	13
1864.	1,900,150	1,988,150	1,007,979	346,483	18
1865.	1,928,150	1,988,150	1,248,725	337,694	12

The equipment of the road consists of 26 locomotives, 23 passenger, 9 mail and baggage, 69 compromise box, 9 caboose, 47 stock, 60 platform, 178 box, 133 coal, 4 lime, 24 work train platform, 10 gravel and 21 hand cars.

The number of miles run by engines with passenger trains, 170,822; with freight trains 191,243; with other trains, 49,213—total 411,278 miles. Cost for repairs $49,352 97, or $11.99 per 100 miles run. The average cost of running an engine 100 miles was $37.76.

The number of through passengers carried was 142,517; way do., 187,738—total 330,255, an increase over the previous year of 50,448.

Secretary.—CHARLES WOOD.

Treasurer.—JOHN SCOTT.

Sup't and Engineer.—R. E. RICKER.

Copiapo Railway.

The construction of a railway from the River Plate across the Andes to the Pacific, whereby a new route will be created to Australia, and an important saving of time effected in the transit of the mail, is believed likely to be realised within the next ten years. Already 240 miles of the route are in course of rapid construction from the port of Rosario, in the River Plate, to the interior city of Cordova; and there can be little doubt that, with the progress of immigration and settlement, this line—the Central Argentine—will be steadily extended. Mr. Wheelwright, who may be considered the father of the project, continuous devoted to it, and by the last mail writes as follows: "I am in hopes to find means to carry out and complete the survey of the Cordillera from the point called the Southern Pass, in Chili, down north to Copiapo, in order to determine if a more favorable pass can be found than that which I have surveyed, the pass of San Francisco. There are seven favorable points to be explored before it can be finally determined which is best." The success of the Mont Cenis over the Alps will greatly accelerate all enterprises of this character.

Chicago and Great Eastern Railway.

This road is 224 miles in length, extending from Richmond to Chicago. The equipment consists of 41 locomotives, 23 passenger, and 765 freight cars. Share capital paid in, $1,390,000. Bonded debt, $5,600,000.

☞ The Cincinnati *Railroad Record* says that Fort Wayne, Indiana, has contributed $100,000 in aid of the Grand Rapids and Indiana Railroad.

British North American Provinces.

The confederation of the several British North American Provinces may now be regarded as an accomplished fact, and such being the case, we learn by the last mail that arrangements have been completed to establish a line of steamers, pending the construction of the Intercolonial Railroad, to run regularly between Canada and the ports of the lower provinces. We are also gratified to observe that a line of steamers is also proposed to trade regularly between the St. Lawrence and the West India Islands—the recent reports of the Canadian Commissioners being of so satisfactory a character that it is felt that the intercolonial trade between these islands and the British North American Provinces may by judicious development be made one of the most important elements in the future commercial greatness of all concerned. Let us look for a moment at the resources of these provinces.

Canada contains 330,000 square miles; Newfoundland, 40,200; New Brunswick, 27,710; Nova Scotia, 18,600; Prince Edward's Island, 2,131; British Columbia, 213,500; Vancouver's Island, 16,000; Hudson's Bay Territory, 1,570,500; making 2,218,641 square miles, a territory nearly twice as large as all Europe, if we deduct Russia.

According to the statistics of 1861, the area of land held by private individuals in the North American provinces was: In Upper Canada 17,708,232 acres, of which 6,051,619 were under cultivation. In Lower Canada 13,680,000 acres, of which 4,804,325 were under cultivation. In Nova Scotia 5,748,893 acres, of which 1,023,032 are under cultivation. New Brunswick 6,637,329 acres, 835,108 under cultivation. Newfoundland 100,000 acres, 41,108 under cultivation. Prince Edward's Island 1,365,400 acres, 368,127 acres under cultivation. The annual agricultural products of the provinces now yield $150,000,000. Competent authorities have given the actual annual yield of the fisheries at $20,000,000, much of which is lost by those who should profit by it and has gone to the enrichment of foreigners. "The British North American Provinces," says a recent writer, "possessing 5,000 miles of sea coast, if consolidated into one power, would possess not only all the materials necessary for constructing ships of war, but also bands of skilful and hardy seamen wherewith to man a powerful fleet." The tonnage of the commercial marine of the Provinces, inward and outward, required for the accommodation of trade is 13,419,614, of which Nova Scotia requires 1,432,94 tons; New Brunswick, 1,386,980; Prince Edward's Island, 167,098; Newfoundland, 1,392,345; and Canada, 9,040,337. The sea-going tonnage of Canada amounts to 2,133,000 tons. In 1832 the tonnage of vessels built in British North America amounted to only 33,776 tons. In 1866 the number of vessels built was 645, with a capacity of 219,763 tons, (according to the speech of the Finance Minister of Canada Feb. 7, 1865,) costing $9,000,000. According to the last census returns the number of sailors and fishermen of the colonies was 69,256, and the population of the six Provinces by the census of 1861, was:—Upper Canada, 1,396,091; Lower Canada, 1,111,566; Nova Scotia, 338,857; New Brunswick, 252,047; Newfoundland, 122,635; Prince Edward's Island, 80,057: total, 3,294,959. The whole population is at present over 4,000,000. The imports and exports of 1863, were:—

	Imports.	Exports.	Total.
Canada	$45,964,493	$41,811,532	$87,776,025
N. Brunswick	7,764,824	8,964,784	16,729,608
Nova Scotia.	10,201,391	8,420,968	18,622,359
P. E. Island.	1,428,028	1,627,540	3,055,568
Newfoundla'd	5,242,720	6,002,312	11,245,032

Besides a fertile soil and magnificent forests, the Provinces possess inexhaustible mineral resources. Gold, iron, coal and copper are found in Nova Scotia in abundance, and the coal beds are not exceeded, in richness and availibility for mining, by any in the world. The mineral wealth of New Brunswick is also enormous and her coal formation is of a thickness almost incredible. Canada has her mines of copper and iron ore in abundance, which only need development to become a great source of wealth. Gold has been found on the Chaudiere and elsewhere to some extent and the coal of New Brunswick will, by-and-bye, be required to work the furnaces in iron mines of Canada.

From the foregoing description of the vast and magnificent resources of the British North American Provinces, it will be at once seen that it is only necessary to develope these resources to secure for the people to whom they belong a position and power proportionately second to none on the American continent.—*Canadian News, May* 17.

Southwest Pacific Railroad.

From good authority we learn the following particulars of the sale of the Southwest Pacific Railroad, and the terms of the contract:

Under the act for sale, approved Feb. 19, 1866, the required sixty days' notice having been duly given, the Commissioners for the sale of the Southwest Pacific met on the 9th of May, compared the several bids and proposals received by them, and deeming them unsatisfactory rejected the same.

Then, in obedience to the said act, the Governor, on the 10th, directed the Commissioners to sell at private sale.

On the 12th, a proposal in writing was submitted by John C. Fremont, to which some modifications were suggested and were accepted, and the proposal as thus modified was approved by the Commissioners and by the Governor.

The agreement or contract was entered into on the 28th, by and between P. Joseph Osterhaus, Robert J. McElhany and A. W. Maupin, the authorized Board of Commissioners, acting for and in behalf of the State, and John C. Fremont, of New York City.

The points of the contract are as follows:

Fremont is to pay one million three hundred thousand dollars for the Southwest Pacific Railroad and all the franchises, privileges, rights, titles, choses in action, and easements thereof, with all the rolling stock, cars, engines, depots, machine shops, and all the property, real and personal, belonging to said road and the lands granted in aid of its construction by Act of Congress of June 10, 1852, and which by the State were also granted in December, 1852, to the Pacific Railroad Company, to construct said Southwest road or "Branch."

One-fourth of the purchase money to be paid on delivery, to the purchaser, of the formal deed of conveyance, by the Governor, pursuant to section 8th of Assembly act of February 19, 1866. The balance to be paid in four equal instalments; the first in one year, the second in two years, the third in three years, and the fourth in four years after the delivery of the deed; with 6 per centum interest on each from said delivery. Part or all of these instalments may be paid before maturity, and in either cash or bonds or other liabilities of the State, or bonds guaranteed by the State—which bonds shall be taken in payment for principal and interest due on the same.

The road and rolling stock are to be kept in good serviceable condition by the purchaser or his representatives or assigns, during the progress of the work and until the completion of the road, as well as thereafter.

The work of further construction must begin within thirty days after the delivery of the deed; and must be finished to a point opposite Lebanon, in Laclede County, within one year and nine months; to Springfield, in Green County, within two years and six months; and to the western line of the State within three years and six months, after the delivery of the deed. But should it be practicable to avoid the proposed tunnel and heavy embankment between the Little Piney and Lebanon, then the periods shall be: to Lebanon within one year and six months; to Springfield within two years; and to the western line of the State within three years.

The purchaser, or his representatives or assigns, must expend at least half a million of dollars each year until the completion of the road, upon the graduation, masonry, superstructure and equipment of said extension.

Any failure to comply with any of these conditions shall work a forfeiture of the road and of all its franchises, privileges, appurtenances, &c., &c., real and personal, to the State; and the Governor may then take possession without process of law, and by agents operate the road till the Legislature otherwise dispose of it; or at his option, he may sell the road to the highest bidder, for cash or State bonds, at public vendue, at the east front of the Court-house, in St. Louis, after first advertising daily said sale for three months next preceding it in a newspaper in each of the cities of St. Louis, New York, Boston and Philadelphia.

For money unpaid, the State shall have the first lien, which shall be evidenced by a mortgage in due form.

The purchasing party acquires all the rights, immunities, &c., enjoyed by the Pacific Railroad Company—for whose default said Southwest Pacific Railroad is sold, under charter of said company, subject to said charter conditions and the act under which the contract is made.

The purchaser and his associates or representatives and assigns may borrow money to complete the road and to pay the State, as they may deem best, except that the State's priority of lien cannot be impaired.

The State act of March 2, 1861, "concerning bonds of the Pacific Railroad guaranteed by the State," is to remain in full force, and the State will pay such bonds not exchanged, as provided for in said act.

When the purchasing party have the road in running order to a point twenty miles west of Rolla, so that they may make legal title to such lands as they are authorized to sell, the Governor shall issue the necessary certificates to the Secretary of the Interior, as per section 5 of act of Congress entitled, "An act granting the right of way to the State of Missouri," approved June 10, 1852.

To the above we will add, for greater explicitness, that the preliminary instalment of one-fourth of the purchase money has been paid, and thus the contract finally closed, and the deed executed and delivered.—*St. Louis Dem., May* 31.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st May, inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1865	64,900	403,800	560,500	99,800
1866	21,700	169,800	1,384,200	40,700
Dec.	43,200	234,000	*823,700	49,100

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 90,000 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of May, in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1.
Flour, bbls	51,100	64,900	21,700
Wheat, bush	2,450,400	403,800	169,800
Corn, bush	369,400	560,500	1,384,200
Barley, bush	99,100	99,800	40,700
Oats, bush	1,180,900	1,711,000	570,700
Rye, bush	22,400	29,800	55,000
Malt, bush	.....	92,100	40,100
Beef, bbls	1,900	2,900	100
Pork, bbls	11,500	6,810	3
Bacon, lbs	316,600	724,600	.....
Butter, lbs	600	8,500	100
Lard, lbs	139,300	260,500	5,600
Cheese, lbs	.....	34,300	39,700
Wool	7,500	16,100	30,400

Cumberland Valley Railroad.

The earnings of this road for the years ending Sept. 30, 1862, 1863, 1864 and 1865, have been as follows:

	1862.	1863.	1864.	1865.
From passengers	$90,314 80	$125,222 06	$185,646 38	$215,137 08

In 1865 the Franklin R. R. Co. and the Cumberland Valley R. R. Co. were consolidated—one share of the stock of the Consolidated Company being given for four of the Franklin stock. The capital of the Franklin was $360,000. The mortgage debt was $200,000, bearing 7 per cent. interest. Of these bonds, $108,100 have been exchanged for the six per cent. bonds of the Cumberland Valley R. R. Co.

The equipment of the road consists of 14 locomotives, 12 1st class passenger cars, 5 mail and express, and 101 eight-wheel freight cars.

The number of miles run by locomotives with passenger trains, in 1865, was 97,917; with freight trains, 77,972; with other trains, 4,809—total miles run, 180,698.

The total number of passengers carried in 1865, was 336,914, of which 167,781 went east, and 169,133 west. The number of tons of freight carried was 123,781, of which 70,509 tons went east, and 53,272 west.

COST, EARNINGS AND EXPENSES YEARLY.

	Cost of road, etc.	Gross Earnings.	Ordinary Expenses.	Net Earnings.
1860	$1,192,111	$182,673	$65,851	$116,822
1861	1,126,574	249,778	90,247	159,531

1863	1,131,037	255,365	158,047	97,321
1864	1,131,037	345,450	201,052	144,398
1865	1,582,937	403,983	320,931	83,052

The office of the company is at Carlisle, Pa. The officers and directors are:

President.—FREDERICK WATTS.

Directors.—Frederick Watts, Thos. A. Biddle, Thomas A. Scott, John Hulme, Wistar Morris, Josiah Bacon, J. H. Seymour, Daniel O. Gehr, Thomas B. Kennedy, D. N. Mahon and John B. Parker.

Secretary and Treasurer.—EDWARD M. BIDDLE.

Superintendent.—O. N. LULL.

The Midland, Utica Southern, and Black River Railroads.

The Directors of the New York and Oswego Midland railroad are exerting themselves to secure the necessary assent of the towns on the route to issue bonds in aid of the work. Meetings are being held in the different villages and towns, and it is reported that the feeling in favor of granting aid is almost universal. The town of De Ruyter has given a pledge for $125,000; Otselic for $87,000; Plymouth for $100,000; Norwich for $450,000; Oxford for $250,000. In the County of Chenango, subscriptions and bonds have been secured to the amount of one million dollars. The projectors of the work feel sanguine of success.

The Utica, Chenango and Susquehanna Valley Railroad is being pushed forward with vigor. The private subscriptions in Utica have reached the sum of $200,000, and twenty miles of the road will be put under contract in a few weeks. The towns on the route are bonding themselves for the raising of money for the object, and in case of any failure from this source, individuals are ready to push the enterprise by their own private subscriptions.

The Utica people, in conjunction with the Black River interest, are moving for the extension of the Black River Railroad north from Boonville, the present terminus. The Watertown *Reformer*, in advocating the advantages of that locality in connection with these projected enterprises, says:

"The Midland Railroad enterprise, the Utica Southern Railroad and the Black River Railroad, will be but links of a grand through route from the foot of Lake Ontario to the City of New York. The water power of Black River is far superior to the water power of Oswego and Rochester, and a better harbor can be had at Sacketts Harbor or Henderson than either Rochester or Oswego possess. The people of this section may now, by putting forth the requisite effort, put Watertown in the foreground of facilities, a rival in prosperity to Oswego and Rochester. We need not get far ahead of the projected road from Utica south, or of the Midland road, but we ought not to be far behind them."

Philadelphia and Reading Railroad.

The traffic receipts of this road for the month of March, 1866 were $779,198, against $1,116,215 in March, 1865—a decrease of $337,017. The net profit for the month was $197,210 against $503,572 in March, 1865—a decrease of $306,017. The total net profit for the first four months of the present fiscal year were $875,089; in the corresponding period of the previous year they were $1,124,259—a decrease in the four months of $249,170.

Railroad Earnings—Monthly.

The Earnings of the Louisville and Frankfort and Lexington and Frankfort Railroads in April, 1866, were $35,410 03; and the expenses, $30,213 45—leaving a balance of $5,194 54.

The earnings of the Cleveland and Pittsburg Railroad in April, 1866, were	$173,732 28
April 1865	196,153 78
Decrease	$22,421 55

☞ At a meeting of the new board of directors of the Concord railroad, Josiah Stickney, of Boston, was elected President, and Sam'l N. Bell, of Manchester, clerk of the corporation. Hon. Joseph A. Gilmore was continued in the office of Superintendent.

American Railroad Journal.

Saturday, June 9, 1866.

Stock Exchange and Money Market.

The financial Editor of the *World* expresses his satisfaction at the argument made in our last number in relation to the recent large sales of gold in this city by the Treasury Department, but does not accept our conclusions. We must form our opinions more conclusively when we shall have learned the effect of this shipment on the other side. Right or wrong, we have shown the English that in a panic and emergency, when the Bank of England is embarrassed, and the rate of interest goes up with it to 12 per cent., that we are able and willing to assist her materially, and have ample means to do so in the face of a large public debt and a taxation that is grievous, though ever so patriotically submitted to. But no one seems to remember that if gold had been allowed to go up to 200 to spite the foreign shippers, we should have suffered intensely in this country by an immediate rise in all articles of necessity, and consumers would have groaned under fresh exactions.

There are some of the press very much addicted to poetry and homeopathy which boldly declare for a different policy. They recommend that the Treasury should hold all its gold, accumulate it, and thus obtain a fund for the redemption of our paper currency. Let us see if this is practicable and whether it is the best plan. We think not. We find that the receipts for customs during the first three quarters ending the 31st of March last was $46,645,597 83. Add one-fourth more to make up the year's receipts and we have the total of $58,006,993 28, and this is in fact a little more than the returns up to June 1st would justify us in assuming as the result. The gold interest paid from the 1st of June, 1865, to the 1st of June, 1866, was $45,389,896. This would leave a balance of gold in the treasury of $12,627,647 28. Now if this sum was actually retained by the Treasury for the redemption of its legal tenders it would take more than 20 years to get enough together to make any impression on this currency. But while redemption would be more remote than ever, the country would feel the effects most disastrously. Gold would rise to its greatest height, and prices would go up all around us. We should not be able to raise a staple that would pay for export while the necessaries of life, would be scarcer and dearer than ever. Consumption and labor would be sufferers in the midst of peace and production. We see, therefore, no remedy in the proposed plan; no wisdom in the scheme whatever. If we prefer paper money to all other kinds we must take the consequences. The rest of the world does not like it, and will not receive it if it can be avoided. The first thing a foreign importer now does is to turn his invoices into gold, for the prices we have ourselves set upon everything enable him to do so to advantage. Now by the returns of the specie from California alone since July 1, 1865, we find we have had an increase of $11,973,715 in one year—the total being $27,277,803. How much has come to us from the other states and territories of the plains and the Pacific is not stated; but it must have been large, since the treasury has paid out in gold interest in a single year ending in June inst., upwards of $45,000,000. Where does the difference come from? We seem to overlook two important facts; one, that there is a constant arrival here of coin from South and Central America; and the other that we have the largest emigration by thousands ever before known; and each emigrant who comes to settle here, as most do, brings some funds with him.

Nor must we forget that this Country, despite its ingenuity and industry, is a large consumer of foreign goods, though a large part of them, we confess, are entirely useless. But since July 1, 1865, the imports have run up to $282,371,751 against only $147,601,475 the same time last year. Our exports of domestic products have increased a little by $9,887,234, with a total, ending June 1st, of $204,319,882. If any one will take the trouble to read over the invoices of the vessels coming to this port from abroad, he will be astonished to learn the nature of the cargoes sent to this Country. They are composed of the most useless trash. Articles of which we can and do raise here a superior quality fill up these vessels. Nothing is beneath the notice of a foreign shipper if he can but sell it in the United States; and we are constantly called upon to admit a heavy balance of trade for imports we not want, and are a pest after they reach our shores.

It is a curious circumstance that the British Government through Earl Clarendon, a celebrated diplomatist, and the foreign office, have thought it necessary to address a circular to its legations and embassies throughout Europe explaining their action during the late panic, in which we notice the singular request that "all classes should co-operate with the Government to allay a needless alarm." This is a confession we did not expect to find in a state paper emanating from the aristocracy, and in support of one of their most cherished institutions. But so it is. Progress is making its way, the earth moves and we see the oldest institutions dependent on public opinion. In this Country we need no official statement to assure the people of the proper conduct of their affairs. We have the inexpressible satisfaction of being able to correct any mistakes of our rulers at stated periods at the polls, where a sound public opinion uttered by means of the independent press may always be relied upon as the final arbitrator in all disputed questions; and we are willing to abide by the expressed will of the greatest number. The people may for a time be misled, but not very long. An enlightened self interest in politics, as in finance, may be very generally counted upon as a sure means of our security.

It has been sometimes debated whether a cheerful or a desponding view of public affairs should be the most habitual with an American journalist. Though ourselves very often inclined to look at positive wrongs and exclaim against them, yet a long experience convinces us that the progress of this country, in spite of all obstacles, may be considered as wonderful and encouraging beyond precedent. When we achieved our independence, we were but three millions strong; our population now amounts to thirty millions! Then we had a narrow belt of Atlantic States, 13 in number, and were almost altogether dependent on foreign nations. Now we have 32 large States, produce more gold than any other country in the world, and have come out of the greatest war ever waged on this globe, with increased strength and power. The State of New York, an empire in itself, is superior in population to some of the oldest and most renowned States of Europe; and her canals which at one time bore the contemptuous name of *ditches*, are now the most lucrative and efficient in the world. We might pursue this subject to an endless length, but it is sufficient to inquire whether we are not justified in looking at the bright side of events, and expecting from the future as much as we have realized in the past.

On a former occasion we suggested a plan of restriction of the currency, and its redemption which attracted the notice of some of our cotemporaries but without any effect. It was to change the security of issues by the National Banks by giving up to them the bonds of the Government on which they draw 6 per cent. interest, and issue to a few per cent. thereon their own bills, and demanding that on the surrender of these bonds, they should deposit legal tenders as security for their issues. This would take full three hundred millions out of circulation, and enable the Government to resume specie payments at once. This plan would put the banks to but little inconvenience, and at once restore the value of currency, retiring the issues of the Government and giving the banks the capital to resume specie payments on their own bills. As the Comptroller of the currency proposes to enlarge the bank circulation a hundred millions, we would ask if our suggestion is not a timely one, and every way worthy of a reconsideration. If a resumption is ever to take place it must be by some decisive act like that proposed.

The return of the associated banks of this city for the last week, shows some large changes which may be easily traced to the condition of the market as affected by the foreign connection. The loans had decreased $7,019,092, for credit was temporarily affected. The specie increased $2,121,164, for the speculators, believing that it would rise, were glad to obtain it from the Treasury at 130½, and hold on to what they could. The circulation was increased, $20,350. The legal tenders, for which the gold buyers were anxious, decreased $4,650,955; and the deposits diminished $10,350,616. So that we may easily determine what became of the gold. The full one-half of what was sent to England and the continent was purchased by these very depositors, and they had to reduce their balances to save their correspondents. If they should not be able to sell their time bills they will be short and crowded themselves. This remains to be seen, in the end. It is the quotient which decides the importance of the sum.

The New York exports, exclusive of specie, for the week ending June 5, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,725,342	$1,634,555
Prev. reported	69,375,039	96,519,858
Since January 1	$71,100,831	$98,154,413

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$897,385	$2,278,930
Gen. merchandise	1,954,880	5,490,393
Total for the week	$2,852,265	$7,769,323
Prev. reported	58,294,034	136,138,639
Since January 1	$61,146,299	$143,907,962

The balance in the Sub-Treasury on Wednesday was $87,227,717 03.

We have the official report of the Treasury department for the month of June. It is the most favorable one yet issued, and is convincing proof, if any were wanting, that the management of the National finances could not be better than it is at present. It shows a very large reduction of the debt, and a heavy balance of gold on hand, much beyond the wants of the whole year before us, with the certainty of several millions of addition from California, and a still larger amount from the customs. Now, although gold has gone up several per cent. under the impulse of the last shipments, yet there cannot be a heavy pressure for more in all probability. On the contrary, there will be a full supply in the country, the Treasury will be able to sell large amounts, demand for it in England will have ceased. How it is to be kept up we do not well perceive. Our readers have most probably seen the letters of the Secretary of the Treasury and of the Assistant Treasurer, on the subject of the recent sales of gold. They are a complete vindication of those officials, and give precisely the same reasons for their conduct which were anticipated by us at the time. Their conclusive character must lessen the price of gold, and have a very wholesome effect on the market. It is no wonder that the Money Market is easy, and the Governments are steady and in good demand. Even the embarrassed States are rapidly improving.

Exchange has declined a little, and bills are not as popular as they were. Short sight and of the best character are now preferred by all who have remittances to make, or goods to order. This is a symptom that cannot be overlooked.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Kentucky 6s, 94¼; N. Y. 6s, 1873, 96½; do., 5s, 1874, 90; do., 7s, Bounty Loan, 102; Indiana 5s, 86; Tennessee 5s, 75; Brooklyn 6s, Water Loan, 94; New Jersey Central, 116; do., 1st mort., 100½; Milwaukee and St. Paul, 56; do., pref., 70; Morris and Essex R. Erie Railway.

It cannot be disguised that very great uneasiness prevails in interested circles with regard to the condition of this road.

We are naturally expected to express some opinion on the subject, and do so with considerable embarrassment.

We do not believe the road, with every advantage of route and business, is doing as well as it might, that it is not earning any dividends, and is in a bad condition, track and rolling stock. But on the other hand, if it wants money, and the relief it seeks cannot be had except by placing itself in the hands of a wealthy director, we do not see how this can be avoided. The directors are in possession of all the facts in the case, and cannot be supposed to be indifferent to their true interests. If anything is wrong about it, they alone are to blame. The public look to them for a proper guardianship of the vast and valuable property placed in their hands. If there is anything wrong in their management, they will be held to a strict account.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	May 1, 1866.	June 1, 1867.
Debt bearing int. in coin.	$1,186,092,841 80	$1,195,825,191 80
Debt bearing interest in currency..	1,188,313,544 62	1,147,222,226 28
Matured debt not presented.....	877,729 64	4,900,429 64
Debt bearing no interest.	452,392,755 54	452,031,603 04
Total.	$2,827,676,871 60	$2,799,979,450 76
Coin in Treasury.....	$76,676,407 02	$50,679,957 72
Currency ...	61,310,621 80	79,011,125 52
	$137,987,028 82	$129,691,083 24
Debt less cash in the Treasury.....	$2,689,689,842 78	$2,670,288,367 52

The total debt shows a decrease since the 1st of May of $27,697,420 84. The balance in the Treasury shows a decrease, as compared May 1st, of $8,295,945 58. Deducting the amount on hand from the aggregate debt, both on the 1st of May and the 1st of June, the decrease of debt would be $19,401,475 26. The total debt on the 31st of August last, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August 1865, and the 1st of June, 1866, and the actual decrease in the Public Debt since that period has been $87,401,203 91.

Mississippi and Missouri Railroad.

This road is to be sold at auction on the 9th of July. The road extends from the eastern boundary of the State of Iowa, at Davenport, to the Missouri River, at Council Bluffs, and includes a branch from Wilton to Oskaloosa, Iowa. All the property is covered by mortgages, which have been foreclosed. All the lands granted to the State of Iowa by act of Congress, to aid in the construction of the main line of the road, and by the General Assembly of the State of Iowa granted to the Railroad Company, will also be sold.

Western Maryland Railroad.

We learn from the Hagerstown *Herald*, that the surveys which have been in progress for the past few weeks have resulted in the selection by the engineers of two routes, one north and the other south of the town, both starting from the Franklin railroad near the warehouse. Both routes are considerable feasible. The "engineers are now making up their profiles and calculations, as to the cost of each route, &c., which will be laid before the meeting on Tuesday next, when one of the routes located will, no doubt, be determined upon, and the work put under contract very soon."

Buffalo and Washington Railroad.

The construction of the Buffalo and Washington Railroad, leading from Buffalo to the coal fields of Pennsylvania, is being urged, and the consent of the City of Buffalo is to be secured for the issue of bonds to a large amount for this object. It is claimed that such a road will give Buffalo an independent coal route, and place that city within 110 miles of extensive coal fields, giving it an advantage of 39 miles over Erie and 10 miles over Philadelphia. A writer in the Buffalo *Commercial Advertiser* urges the people to vote for bonding the city, and says:

"We all must be satisfied that it is vastly for our interest to have the road built, so as to provide the means of making this city what it is destined to be, one of the greatest cities west of the Atlantic. Give it cheap, reliable and abundant fuel, and its position is assured, beyond any doubt. Even now, with an uncertain supply of fuel, selling at times for exorbitant prices, it stands fifth as a manufacturing city in the United States."

Slatington and Hamburg Railroad.

A meeting of the Commissioners named in the act incorporating this company was held in Reading, Penna., on the 21st ult. After accepting the charter, and transacting some other business, the commissioners, who are made the Directors of the company until the first Monday of January next proceeded to elect permanent officers, whereupon Hon. John D. Stiles was elected President, and John W. Jones, Secretary and Treasurer. A committee was appointed to open the books to receive subscriptions to the capital stock, which will be done without delay.

☞ At the recent annual meeting of the stockholders of the Nashua and Lowell and Wilton Railroad Companies, it was voted to increase the capital stock $200,000, which is to be divided among the stockholders at par value. The Directors of the Nashua and Lowell are; F. B. Crowninshield, D. S. Richardson, Ed. Spaulding, Onslow Stearns and H. Sigourney. Of the Wilton: W. Ramsdell, C. C. Boutwell, A. McKean, A. F. Stevens and John Reed.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad for the week ending May 31, 1866.....$32,537 20
Corresponding week previous year..... 26,679 81

Increase..... $5,857 39

Receipts from Jan. 1, to May 31:
1866 .....$250.653 54
1865 .....211,193 02

Increase $39,460 52

The traffic of the Great Western Railway of Canada, for the week ending June 1st, 1866, were $58,960 48
Corresponding week of 1865 ..... 57,186 15

Increase..... $1,776 33

The earnings of the Grand Trunk Railway of Canada for the week ending May 26th, 1866, were $112,779 00
Corresponding week of previous year.. 117,360 00

Decrease $4,581 00

The earnings of the Chicago and Northwestern Railway for the fourth week in May, 1866 were.....$282,397 04
Corresponding week of previous year.. 212,126 08

Increase.....$70,270 96

The earnings of the Chicago and Great Eastern Railway for 4th week in May were....$35,787 95
Same period last year..... 19,963 88

Increase in 1866 .....$15,824 07

The earnings of the Chicago and Rock Island Railroad for the 4th week in May, 1866, were $82,046 00
Corresponding week of previous year.. 77,151 00

Increase..... $4,895 00

Journal of Railroad Law.

NEGLIGENCE,—BUILDING FENCE.

The case of Joseph Powell Respondent, *vs.* The Hannibal and St. Joseph Railroad Company, Appellant, decided in the Supreme Court of Missouri, is interesting as holding that in an action against a railroad company for animals killed on the track, if the accident occur on a portion of the road not enclosed by a lawful fence, and not at the crossing of a public highway, actual negligence need not be shown.

DRYDEN, JUDGE, delivered the opinion of the court. Powell, the plaintiff below, sued the railroad company before a justice of the peace in Levingston county, for the value of a mule of the plaintiff killed on the defendant's railroad. The complaint filed with the justice alleged the killing to have occurred in Levingston county, in May, 1863, 1863, on a part of the road not enclosed by a lawful fence, and not at the crossing of a public highway, and asked judgment for the value of the mule laid at $125. The plaintiff having recovered judgment before the justice, the defendant appealed to the Circuit Court, where, on a trial *de novo*, the plaintiff again recovered, and the defendant has brought the case here by appeal.

The appellant has pressed upon our consideration several grounds for the reversal of the judgment of the circuit court, which we will notice in the order in which they are presented.

1. A witness who was introduced to show the absence of a cattle-guard, and then to prove the railroad at the place where the mule was killed was not enclosed by a lawful fence, having answered that he was ignorant of what a cattle-guard was, the respondent was permitted to describe a cattle-guard, and then to ask the witness if the thing described existed at the place, and this the appellant claims was error.

The question which the witness was unable to answer was only introductory and did not bear upon the main issue in the case. The ultimate fact sought to be proved was the existence or non-existence of a cattle-guard at a given place. The inability of the witness to answer the preliminary question was by no means inconsistent with his intimate knowlege of the ultimate fact to be proven. Now, assuming that the witness possessed the knowledge supposed, shall the plaintiff be deprived of it merely because of the ignorance of the witness of the preliminary matter? One would think not. And yet this is just what the appellant's position practically leads to, for it is scarcely conceivable how the mind of the witness could have been brought to the point, and his knowledge of the disputed fact elicited by any other mode of examination than the one employed and which is now complained of.

2. In the progress of the trial, the respondent asked a witness (Moore) the following question, viz: "what was the value of this mule at the time it was killed?" to which the appellant's counsel objected, and stated as the ground of his objection "that the question was not proper to be asked until he first testified that he knew the market value of mules at the time of crippling the mule in question." That the market value of the property at the time and place of the injury as a general rule furnishes the measure of recovery, in cases like this, hardly admits of question; but what mode of examination of the witness the court shall adopt to ascertain that value, is another and different question. The point of the appellant's objection is that before a witness can speak on the point of value, he must first be examined as to the extent and sources of his knowledge.

The course of examination insisted upon, would generally be very proper and convenient, and could often economize the time of the court and facilitate the dispatch of business, but I am not aware of any rule of law making such course imperative. The question is a question of practice resting in the sound discretion of the court, and its decision in favor of the one or the other line of examination is no ground of reversal. (1 Greenl., Ev. § 421.)

3. It is objected that there was no evidence showing that the injury complained of was committed within the territorial jurisdiction of the justice before whom the suit originated, and that therefore the action could not be maintained without discussing the question whether the evidence in any case could be material on the trial of the merits; it is enough to say, that in this case the jurisdictional facts were distinctly alleged in the complaint filed with the justice, and it nowhere appears in the record that these facts were put in issue. The attention of the court was in no wise called to the subject on the trial, and certainly a point so utterly barren of merit ought not to receive the favorable regard of the court after verdict.

4. There is nothing in the fourth point made by the appellant, viz: "that the respondent is not entitled to recover unless he has shown that the appellant was guilty of negligence"—that is, actual negligence. The issues involved in the case were passed upon by the jury after a consideration of the evidence, and there being evidence before them upon which they could find as they did, we have no right to review their finding. Furthermore, the objection assumes what is not true, that the issues involve the actual negligence of the railroad company or its agents. The record presented no issue. The complaint was framed under the damage act, and expressly based the plaintiff's right of recovery on the ground that the injury was committed on a part of the road not enclosed, and not at the crossing of a public highway.

There is no error in the record. Let the judgment be affirmed; Judge Bay concurring.

Railways in Venezuela.

The Republic of Venezuela is one which invites commercial enterprise to an extent which, at present, is by no means fully appreciated in this country. Unfortunately, a policy has been adopted which has placed the country and its Government in an unfavorable position in the eyes of capitalists, but from the various communications we have read on this subject we are bound to say the Venezuela Government is not altogether so black as it is painted, and there is good reason to believe that in the matter of its public credit a decided change for the better will soon be made, and that the future of Venezuela, with the assistance of those most interested in the country, will be marked by a strict and honorable discharge of its obligations to the foreign creditor. The territory included within the Venezuela Republic covers an area larger than four times that of France. As in the case of the other South American Republics, the State is divided into a number of provinces, of which those of the Caraccas, the Carabobo, and Barquisimeto are among the principal. These provinces have a coast line of several hundreds of miles on the northern extremity of the Southern Continent of America, and forming a boundary of the Carribean Sea, or Gulf of Mexico. The coast line extends from the Gulf of Paria, near to Trinidad on the east, to the Gulf of Triste on the west. On the eastern coast the magnificent river Orinoco, after traversing more than 1,000 miles of the State, pours its volume of waters into the Southern Atlantic, and the coast line is indented with many admirable harbors and roadsteads. Of these ports the principal one is Puerto Cabella. Its entrance is protected by several islands, forming an immense natural breakwater, which, with the high lands on the coast, make the harbor land-locked, and, at the same time, accessible at all times of the year. Vessels of 1,000 tons lay alongside the quay, and the area of the inner harbor is sufficiently large to provide anchorage for the whole British fleet. Running parallel with the northern coast, and gradually rising from the sea, is a chain of mountains, the Cordilleras of the coast, the highest point of which is the Silla of the Caraccas. This range—a few miles westward of Puerto Cabella—diverges to the south-west, and continues generally in this direction towards the Republic of New Granada—along its eastern side, extending over many hundreds of miles, the Orinoco itself, and its almost countless number of tributaries that feed, passing on its way to the sea through countries on which nature appears to have lavished all its wealth with more than the accustomed prodigality of the tropics. Through this range of mountains, from seaward to the interior, there are at present eight openings, two of which are badly constructed cart roads, the rest being mule tracks, upon which the varied produce of the country is brought to the sea-coast for shipment. In the one province of Carabobo alone, covering an area of 3,500 square miles, there are produced considerable quantities of sugar, cotton, coffee, cocoa, indigo, tobacco, and other products of the same tropical regions, but not one tithe of what could be produced by cultivation. Copper, and gold,

and silver exist in enormous quantities. The valley of the Orinoco teems with the rich luxuriance of nature; and articles for which our manufacturers sigh, and which would enter largely into the consumption of all classes of Englishmen, are all but completely excluded from us for want of adequate means of conveying them to the coast. And yet such is the natural desire to exchange these products for the manufactures of Europe and America that the growers pay at the rate of £7 or £8 a ton for the conveyance of a ton of coffee or cotton from San Felipe to Puerto Cabella. The distance is about fifty-four miles; the road is a mule track, except from the first 7¼ miles to Palito, and the time occupied in making the journey from three to six days; when the cart road exists such as that to Valencia, the rate is somewhat reduced. Long lines of mules and donkeys, each carrying about 200 pounds weight of produce, toil slowly and wearily along these rough roads from the interior to the port of shipment. And yet, under all these difficulties, there arrived last year at Puerto Cabella, 22,500,000 pounds of coffee; 475,500 pounds of cocoa, nearly 8,000,000 pounds of cotton, over 8,000 pounds of indigo, and about 50,000 hides, together an aggregate of something more than 30,000 tons of goods. In 1864 the produce brought to Puerto Cabella was shipped in 152 vessels, of which 42 bore the English, 18 Spanish, 16 American, 1 Italian, 19 French, 11 Danish, 15 Dutch, and 23 the German flags. These figures represent merely the export business of this one port of shipment, and would be increased in 1865. There were borne, however, along these tortuous mule tracks in addition to the above the provision and stores for the consumption of the population of the city of Puerto Cabella, and there were taken back into the provinces for internal consumption a quantity of manufactured goods equal to two-thirds of the value of the exports.

Our object, of course, in drawing attention to these figures is to show the value which such improved means of communication as railways would afford to the country. The producers and merchants of Venezuela are fully alive to the value of railways, and they have done much to promote their construction in the country. The Government of the States have guaranteed 9 per cent. on the capital required for the construction of a line from Puerto Cabella to San Felipe, and a similar guarantee on a second line from the city to Valencia. The total length of the former is 54, and of the latter 32 miles, and of this the first section to Palito was completed and opened in February of this year. But, more than this, the Local Government of the State of Carabobo have guaranteed a further 6 per cent. on that portion of the line which runs through that province, making together a total guarantee of 15 per cent. The first question that will be asked in considering the extraordinary nature of this arrangement is. What are the chances of the 9 per cent. guarantee being fulfilled? In the first place, then, it is secured by the hypothecation of 10 per cent. of the import duties of La Guayra and Puerto Cabella; and the 6 per cent. of the State is guaranteed by an allocation of the tolls now taken, and further tolls to be imposed on the public roads leading to the ports of shipment, and we learn that up to date the 9 per cent. guarantee has been most honorably and promptly paid. The promoters of the railway have made arrangements with native contractors for keeping the roads in order at a sum which will yield a good profit on the work actually done in addition to the gross receipts derived from the tolls. A further concession has been made to the promoters of the line by the exemption of the capital employed from all national, provincial, and municipal taxes for a period of 40 years, and the right to import all materials for the construction and use of the railway free of duty for 25 years. The desire to have railways provided in the State is one not merely confined to the Government, but is very generally entertained by the people of Venezuela, and public opinion is not without its influence in this as in other States. The people believe that if the railway is made it will tend greatly to assist in the development of the trade and commerce of the country, and will go far to put an end to those political disturbances which have hitherto done so much to arrest the progress of the country. If the railway is so much needed, and if its prospects are so good, why, it may be asked, do not the people make the line themselves? The answer given in the report of Mr. Fairlie, the engineer is, "simply that the people have not the pecuniary means of making the line, although in possesion of one of the richest mineral and most fertile countries in the New World, and this owing principally to the want of means of conveyance." For the Venezuela Central Railway, a portion of which has already been completed, the people subscribed a very fair proportion of the shares, and in this circumstance there is afforded an additional ground for believing that the gaurantees will be faithfully carried out. A proposal to raise a capital £100,000 for the construction of the section between Puerto Cabella and Valencia will, we understand, be shortly submitted in this country. The line will be constructed so as to be worked by the new engines of Mr. Fairlie's, which can be applied to steeper gradients than the ordinary locomotives. One feature of the proposal to be submitted is, that no promotion money is to be paid for establishing the company.—*London Railway News.*

Delaware and Hudson Canal.

The business of this company for the years ending March 1, 1865 and 1866 has been as follows:

	1865.	1866.
Sales of coal to March 1	$6,828,575 91	$6,577,369 14
Canal tolls collected.	1,213,570 46	201,679 38
Miscellaneous profits	77,460 36	41,397 21
Coal on hand at Honesdale, Rondout and New York, and on line of canal	351,472 00	324,831 00
	$8,471,078 73	$7,145,276 73
Coal on hand March 1	$444,264 75	$351,472 00
Mining coal	1,644,323 53	1,558,951 88
Railroad transportation and repairs	636,211 45	571,054 02
Canal repairs and superintendence	469,117 08	458,048 94
Freight of coal on canal	1,076,519 00	955,895 03
Labor and expenses at Rondout	111,314 40	89,817 86
Rent, salaries, current expenses, etc., New York office	58,742 12	69,415 71
Coal yard and Harbor expenses, taxes, interest, etc	594,023 89	500,926 42
Depreciation account	310,328 67	231,855 38
	$5,344,844 89	$4,787,437 24
Balance, net profit	$3,126,233 84	$2,357,839 49

The operations of the company were seriously interrupted by a strike of the railroad men in the early part of the year, and of the miners in the summer—the work having been suspended in the latter case about seventy days, or fully one-third of our season of Canal Navigation.

Our receipts were also largely diminished by the diversion of the business of the Pennsylvania Coal Company to the Erie railway. In view of these unfavorable circumstances, the result of the year's work will probably not be regarded as unsatisfactory.

Believing that the action of the Pennsylvania Coal Company, already referred to, is in violation of their agreement with us, a suit has been commenced in the United States Court for the recovery of tolls on the Coal wrongfully diverted from our Canal. The amount of damages claimed by us for the year 1864 alone is over $600,000.

Preparations have been made to bring to market a largely increased supply of Coal during the season which has just been opened, and there is no reason to doubt that a ready market will be found for it at remunerative prices.

CONDENSED BALANCE SHEET, March 1.

	1865.	1866.
Capital stock	$10,000,000 00	$10,000,000 00
Funded debt	1,200,000 00	641,000 00

President.—G. TALBOT OLYPHANT.

Vice President.—THOMAS DICKSON.

Directors.—Wm. S. Herriman, Charles N. Talbot, Edward J. Woolsey, G. Talbot Olyphant, Samuel B. Schieffelin, Abiel A. Low, Robert L. Kennedy, James M. Halsted. Le Grand B. Cannon, Jno. L. Aspinwall, James R. Taylor, Thomas Dickson and O. De F. Grant.

Treasurer.—ISAAC N. SEYMOUR.

Secretary.—RICHARD H. NODYNE.

Southern Railroad Company.

At the annual meeting of the stockholders of the Southern Railroad Company, held at their office in Vicksburg, on the 7th of May, 1866, the following gentlemen were elected Members of the Board of Managers for the ensuing year: M. Emanuel, Thos. Rigby, A. B. Reading, P. Anderson, Jas. R. McDowell, Thos. M. Smedes, Wm. Crutcher, T. S. Dabney, F. B. Dancy, Shepherd Brown and D. W. Flowerree.

At a meeting of the newly elected Board of Managers, held at the office of the company on the 22d May, 1866, Dr. M. Emanuel was re-elected President; Thomas Rigby, Vice President, and N. G. Bryson, Secretary and Treasurer.

The officers of the company are: M. Emanuel, President; T. Rigby, Vice President; N. G. Bryson, Secretary and Treasurer; R. C. Slaughter, Chief Engineer and Gen. Superintendent; G. D. Lawrence, Master Transportation and General Freight and Ticket Agent; Robert Harrison, Master Machinist.

Philadelphia and Erie Railroad.

The Philadelphia and Erie Railroad is worked by the Pennsylvania Railroad Company at 30 per cent. of gross profits to the former company. The following were the results for the first four months of the present year, compared with the same months last year:

30 per cent. of earnings.	1865.	1866.
January	$30,643	$59,868
February	29,067	53,684
March	30,308	52,768
April	33,874	54,635
	$123,892	$220,905
Increase in 1866 (about 80 per cent.)		$97,012

☞ At a meeting of the stockholders of the Macon and Brunswick Railroad, in Macon, Ga., on the 10th ult., it was resolved to issue bonds of a sufficient amount to insure the completion of the road from Brunswick to Macon, immediately. This road, with the exception of about fifty-six miles, is already graded and clear of debt.

Railways in France.

The Ministry of Public Works has just issued a statistical return of railways for 1864 and 1865, from which it appears that the total length worked on the 31st of December of the former year was 13,052 kilometres (8,158 miles); and on the 31st of December of the latter, 13,557 kilometres (8,473 miles). Subjoined is a detail of the receipts of the respective lines for the two years:

Old Network.	1864. francs.	1865. francs.
Northern	70,591,848	76,519,873
Eastern	50,098,665	53,489,649
Western	52,791,781	55,054,977
Orleans	73,091,008	75,294,730
Lyons & Mediterranean	140,521,129	144,523,018
Southern	30,913,117	32,505,687
Vict. Emanuel (sect. du Rhone)	1,795,575	1,855,398
Ceinture (round Paris)	2,206,253	2,510,881
Epinac to Velars	449,323	390,901
Graissessac to Beziers	848,304	825,113
Besseges to Alais	1,850,323	1,849,819
Anzin to Somain	501,677	590,421
Carmaux to Albi	183,483	191,175
La Croix-Rousse to Sathonay	145,681	144,500
Lyons to la Croix-Rousse	.....	.....
	425,988,467	445,746,202
New Network.		
Northern	2,580,788	2,799,273
Eastern	33,387,118	38,301,294
Western	9,663,735	13,328,321
Orleans	15,074,463	18,147,617
Lyons & Mediterranean	34,198,420	35,909,302
Southern	4,687,639	5,765,009
	99,592,163	114,250,816
Tot'l of the two networks	525,580,630	559,997,018

Chesapeake and Potomac Canal.

This important addition to the public improvements of Maryland has, after four different surveys, been located as follows:

The canal proper will commence at Bladensburg, along the eastern branch of the Anacosta River, crossing the highest summit (156 feet at low tide water,) at Luther D. Jones's place, striking the Big Patuxent at Dr. William Duvall's place; thence down to the forks of the Patuxent, crossing said river to the head of South River, 4½ miles distant; thence 3½ miles upon the river, reaching Annapolis harbor by Spa Creek, in the rear of the Catholic Church, formerly the residence of Charles Carroll of Carrollton. The proposed termination at Round Bay was found to be ineligible. The elevation of 156 feet was also not anticipated. There will be eighteen locks—nine upon each side of the summit. There will be twenty-three miles of canal excavation. The cost of the canal is estimated at about $2,500,000, being the cheapest canal, it is thought, for its length, in the United States. Under the auspices of the coal interest of Allegheny County, which centres in New York, the canal will be immediately put under contract, and it is intended to be completed in two years. This important work is under the superintendence of G. L. Walker, Esq., of New York city.

☞ The *Ostdeutsche Post* states that plans have been drawn up for the construction of a large railway network to embrace the whole of the interior of the Austrian empire. The expenses are to be defrayed by the issue of railway bonds to the amount of 300,000.000 florins, bearing interest at 8 per cent., and redeemable within thirty-two years.

☞ The new road from Shenectady to Athens on the Hudson River has been leased by the New York Central Railroad Company at $120,000 per annum.

Philadelphia, Wilmington and Baltimore Railroad.

The following is a comparative statement of the receipts of this road for the first four months of 1865 and 1866:

	1865.	1866.
January	$298,971 49	$223,482 26
February	297,000 04	202,364 21
March	331,063 10	249,515 65
April	286,298 57	200,055 27
	$1,213,333 20	$875.417 39
Decrease in four months		$337,915 81

As the time of payment of dividends has been changed from the 1st of April to the 1st of July, it has been expected that the Company would pass the nine months' dividend of 7½ per cent., but we learn that the Directors have decided to pay the usual dividend of 5 per cent., $2 50 per share.

Manufacturers' and Consumers' R. R. Co.

We learn that the Manufacturers' and Consumers' Railroad Company will be organized next week. We are informed that it is in the hands of heavy capitalists, who will take a large portion of the stock immediately after its organization. It is proposed to run it from Sunbury to Philadelphia through Schuylkill County, and the company have also the privilege to connect with any road now built or to be built hereafter through New Jersey, leading direct to New York. The charter is very liberal, almost unlimited in its privileges, and will prove one of the most profitable investments in the country. While it opens the whole extent of our coal field, it will be the most direct outlet for the trade of the great Sunbury and Erie Railroad leading directly to Philadelphia and New York. It will be filled with trade as soon as it is finished and the rolling stock furnished.—*Pottsville Miners' Journal, June* 2.

Rondout and Oswego.

At a recent meeting of the directors of this road. Thos. Cornell was elected President, Wm. C. Moore treasurer, and Robt. H. Atwater secretary. Resolutions were adopted directing the president to appoint a committee to ascertain and report the most feasible route for the road west of Shondaker Centre; that twenty-five miles of the road beginning at Rondout be located and commenced at once; and requesting the several towns on the proposed routes west of Shondaker to issue their bonds and get the free right of way through the respective towns where the engineer of the road may fix the location.

☞ The earnings of the Western Union Telegraph Company in April, 1866, were..$363,831 84
April, 1865 ..... 255,775 43

Gain in 1866 ..... $108,056 41

☞ The directors of the Whitehall and Plattsburgh Railroad have resolved to make an effort to build the road, notwithstanding the Governor's veto of the bill granting State aid. Committees have been appointed to procure a survey, solicit subscriptions, and obtain releases for right of way. The advantages of this road, not only to the country through which it passes, but to Montreal, Troy, Albany and New York, would be very great.

☞ Work is progressing rapidly on the Oil City and Petroleum Centre Railroad. Satisfactory progress is also being made on the Oil City and Petroleum Bridge over the Allegheny river.

☞ The Eastern Shore (Md.) railroad is completed to within eight miles of its terminus, Somer's Cove, in the lower part of Somerset County.

The Hoosac Tunnel.

For the last twenty years the Massachusetts Commissioners have been boring away at their famous Hoosac Tunnel. They have spent all the money set apart for their use, exhausted all the loans, and being without funds, have concluded to make a report to the State and ask for more. During the twenty years they and other contractors have been laboring they have bored 3,598 feet of the tunnel, and they have yet to bore just 24,586 feet, or more than four miles. For the work $3,700,000 have already been spent, and if it progresses as satisfactorily as it has done thus far, the good people of Massachusetts will wake up some fine morning in the year of grace 1986 with the Hoosac Tunnel completed, and a neat little bill of about $25,900,000 to pay for it.—*Baltimore American.*

☞ At the recent meeting of Railroad Presidents in this city, a resolution was adopted abolishing all commissions on the sale of passenger tickets from and after the tenth day of June. It is designed to let the trunk lines manage the passenger business at the eastern end, and the western lines to have control of the eastward bound passenger traffic at the West.

☞ We invite attention to the card of A. P. Merrill, Jr., in another column. Mr. Merrill is the successor of Goodman & Merrill, at No. 36 New street and 38 Broad street. He is prepared to advance on consignments, and attend to the purchase, sale or renting of Southern lands. Also supplies machinery for plantations, and transacts a general commission business.

☞ The Niagara *Mail* says that the Erie and Niagara Railway has been made over to or leased by the Grand Trunk, and Grand Trunk trains are now busy at work on it ballasting and putting the road in order for opening it in about three weeks, in connection with the Grand Trunk Railway at Fort Erie.

☞ A company has been chartered in Maine to build a railroad from Wiscasset to the Portland and Kennebec road, and they are pushing forward their scheme. There is also a plan to construct a road from Rockland to Wiscasset, that shall connect the Kennebec with Penobscot Bay.

☞ The Quakake or Lehigh and Mahoning Railroad has been extended to Mount Carmel, and the connections will soon be made to send coal from the Shamokin Region *via* Lehigh Valley Railroad to New York.

☞ The survey for the lateral branch of the Morris and Essex Railroad, through Morris and Essex Counties, has been made, but work has not been commenced thereon.

☞ The Allegheny Valley railroad is being pushed to completion. A large number of hands are engaged in grading just below Venango City.

☞ The authorized National Banks now number 1,650, with an aggregate capital of $414,921,479, and a circulation of $276,540,510.

☞ It is stated that freights have been greatly reduced on the New York Central road. Flour is now taken from Rochester to Albany for forty cents per barrel, and thence to New York by river for five cents per barrel. Corn is taken from Buffalo to New York at ten cents per bushel. It costs forty cents per barrel to send flour by canal from Oswego to New York, and eleven cents per

American Railroad Journal.

New York, Saturday, June 16, 1866.

The Security of Navigation.

This JOURNAL, while enjoying the advantage of representing the interests of the Railway Companies, and looking closely after their advancement and advantage, has nevertheless devoted itself for many years to the affiliated subjects of Commerce and Navigation. We should be wanting to the great principles which have inspired our columns and actuated our motives if we did not at every convenient opportunity refer to these important topics. We class among our readers a large body of intelligent capitalists and financiers to whom we address ourselves on every fitting occasion; for if we convince them, our mission is well nigh performed. We have been led into these reflections from a brief report of the Proceedings of an Association at the Cooper Union, which appeared in the *Tribune* some days since, and was headed "On the Establishment of a Magnetic Observatory in New York." A committee has been appointed to collect information on the subject, and report at some future meeting of the Association. This Committee consists of the reader of the communication, S. De Witt Bloodgood, Esq., a member of the Chamber of Commerce, Professor Seeley, M. Maury, Esq., H. O. Reilly, the telegrapher of the West, and Dr. Gale, formerly of the U. S. Patent Office. Since that time considerable interest has been felt in the subject, and much outside strength has been given to the proposition.

It may be as well to state that Navigation is greatly dependent on the accuracy of the Mariner's Compass, long a subject of serious consideration and much study.

Since the time of Columbus it has been ascertained that the needle does not uniformly point due north, but has for many years been to the West of North, and is now slowly traversing to the East; that the earth is filled with magnetism—if not a great magnet herself—that it has one or more north magnetic poles, and as many southern; that the magnetic and terrestrial equators are not alike; that there is a dip of the needle at different latitudes; and, finally, that maps of all these variations have been commenced, and are partially in use at the present time.

Now if this was all exactly ascertained, the problems of longitude and latitude could be easily solved by mere inspection. Many of the most enlightened of modern civilized Governments have paid attention to the subjects involved. Charts, publications, instructions and magnetic observatories are become quite common. In the communication read before the Association all these facts were stated. So, too, the difficulties in the way of the subject were explained, and the advantages of proper observations pointed out. Especially was it urged that while in other countries, observations on the magnetic currents and the proper method of rectifying Compasses were duly studied, here in New York, one of the largest and most flourishing commercial cities of the world, and most intimately connected with navigation, no corresponding effort was made.

It is now proposed to establish a magnetic observatory at some convenient place in this city—in the Central Park, or on the battery. The expense of the building and the necessary instruments will be small. To record the observations will be the most expensive; and even this will not be a serious difficulty, since an apparatus has been invented, and is now in use in the Greenwich observatory, by which the variations record themselves on a cylinder of paper. A small fee levied on visitors, and a small charge for the correction of compasses, would give the means of support. On the other hand, no one could tell what the advantages of such an establishment would be to ship captains, ship owners and insurance officers. Thousands of dollars might be saved by reference to such an institution. Here is an appeal to the American pocket at once. We say nothing of the general benefit which would result from it in a purely scientific view. When we are told that the whole civilized world is studying magnetism, and is studded with magnetic observatories, we may surely enter the lists without much reserve. We, too, should do our part in the great work, and contribute our share to the prosecution of inquiries of the greatest importance.

We therefore trust that the objects set forth in the proposition may be fully attained; that ample subscriptions may at once be secured; that the committee entrusted with them may act energetically and unitedly to achieve them without delay; and that New York, which now boasts justly of its charitable and literary institutions, may add to the number this most desirable one of a magnetic observatory. There is wealth enough and enterprise enough to secure its success, and the sum wanted is quite inconsiderable in proportion to the magnitude of the effects it may produce. A few thousand dollars can only be required to secure the result; and it is not to be doubted that the Committee, on appealing to the public, will find the public ready fully to respond.

It is believed that the greatest part of our shipwrecks are attributable entirely to the inaccuracy of compasses. Great pains have been taken by the British Government to rectify these instruments; and many institutions, devoted to the cultivation of this science, alone owe their origin and maintenance to private liberality. We have not a single institution devoted to this pursuit, and it is time that the great city of New York took the lead in this useful work.

☞ A survey has been completed of the proposed railroad from Collinsville, Conn., to the Massachusetts line, through Norfolk and Canaan, where it is to be continued by the Boston, Hartford and Erie road to the Hudson.

Journal of Railroad Law.

LIABILITY OF RAILROAD COMPANY FOR INJURY BY COLLISION AT CROSSING OF PUBLIC ROADS.—NEGLIGENCE ON PART OF PLAINTIFF.

The case of the North Penn. R. R. *vs.* Heildman decides that at the intersection of a railroad with a common road, there are concurrent rights; and neither the traveler on the highway nor the company has an exclusive right of passage.

The opinion of the Court was delivered, February 16th, 1865, by STRONG, J.—The plaintiff sued for an injury to himself and his property caused, as he alleged, by the negligence of the defendants. It was the result of a collision. The accident occurred at the intersection of the defendants' railroad with Dauphin street along which the plaintiff was driving a horse attached to a covered wagon, in consequence, as was averred, of the carelessness of the defendants' agents. Whether there was such carelessness was submitted to the jury, and of the mode of submission there is complaint. But the contest in the Court below involved also the inquiry how far, if at all, the negligent conduct of the plaintiff had contributed to the hurt sustained by him. There was evidence that as he approached the crossing of the railroad, he was seated far back in his covered wagon with the curtains down (closed,) that the curtains were tight, though there was a small glass window on each side, and that a person coming down Dauphin street in the direction in which he came, could have seen the railroad track had he looked out, for from seventy to seventy-five yards from its intersection with Dauphin street. Such evidence justified the defendants in proposing their points to the Court, the first of which was as follows: "That it is the duty of a traveler approaching a railroad crossing to look along the line of the railroad and see if any train is coming; and if the jury believe the plaintiff failed to take such precaution, he was guilty of negligence and cannot recover in this suit."

This point the Court answered by saying: "This is one of the reasonable precautions a man is bound to use, and its absence is evidence of neglect." This was not a full answer to the point. The Court conceded that looking out for the approach of a train is a duty, when a traveler is about to cross a railroad track, but instead of charging the jury that failure to look out is negligence, instructed them that it was evidence of negligence. This was not all the defendants asked nor all they were entitled to have. Absence of such a precaution was more than evidence of negligence. It was negligence itself, and it was such as may have contributed directly to the injury, for the uncontradicted evidence was that the plaintiff drove his horse and wagon slowly upon the track in front of the passing locomotive. If he did this without looking along the track, he acted without any precaution, and contributed to his hurt.

That what constitutes negligence in a particular case is generally a question for the jury and not the Court is undoubtedly true, because negligence is want of ordinary care. To determine whether there has been any involves therefore, two inquiries: first, what would have been ordinary care under the circumstances; and, second, whether the conduct of the person charged with negligence came up to that standard. In most cases the standard is variable, and it must be found by a jury. But when the standard is fixed, where the measure of duty is defined by the law, entire omission to perform it is negligence. In such a case the jury have but one of these inquiries to make. They have only to find whether he upon whom the duty rests has performed it. If he has not, the law fixes the character of his failure, and pronounces it negligence. Of this there are many illustrations.

Now, that it is the duty of a traveler when approaching the intersection of a railroad with a common highway to look out for approaching trains or engines, the Court below asserted more than once and correctly. That standard of duty is fixed by the law. At the place of intersection there are concurrent rights. Neither the traveler on the common highway nor the railroad company has an exclusive right of passage. Even on a common road, travelers must look out for the approach of other vehicles passing. And this is the more necessary at a railroad crossing, because movement upon such a road is more speedy, and because the consequences of a collision are usually so disastrous. Precaution, looking out for danger, is therefore a duty. It was well said in Reeves *vs.* The Delaware and Lackawanna Railroad Company, 6 Casey, 464: "The traveler has the obligation of prudence upon him; he is bound to stop and look out for trains, and may not rush heedlessly, or remain unnecessarily in a spot over which the law allows engines of fearful power to be propelled." Not looking for a coming train is not merely an imperfect performance of duty; it is an entire failure of performance. Had the Court been asked to declare failure to look out until the plaintiff was within a certain distance of the intersection, to be negligence, the case would have been different. That was the state of facts in Pennsylvania Railroad Company *vs.* Ogier, 11 cases, 60. There it would necessarily have been for the jury to determine what degree of vigilance he should have exercised. But not looking at all is an entire absence of vigilance. We think, therefore, the Court should have instructed the jury that it was negligence itself, and not merely evidence of it, from which they might or might not find it. This would have left to them to find whether the plaintiff had looked for a train, and if he had not, whether his neglect to look had been a contributing cause of the injury he had received.

The second point proposed was but a repetition of the first, and the answer is obnoxious to the same criticism.

Judgment reversed, and *venire de novo* awarded.

Steel Boilers.

In Prussia experiments have been made with steel boilers with the following results: Two boilers, each 86 feet long and four in diameter, without flues, were placed side by side. One was made of steel plates ½ an inch thick, the other of iron plates of 0.415 of an inch thickness. The steel boiler was tested by hydraulic pressure of 135 pounds per square inch. Both boilers were worked for about a year and a half under 65 pound pressure. At the end of that time there was less scale in the steel than in the iron boiler. The steel boiler generated 25 per cent. more steam, and evaporated an average of 11.65 cubic feet of water per hour, the iron evaporated 9.37 cubic feet. The quantity of coal consumed per 12 hours was 2,806 pounds for the steel and 2,972 for the iron boiler. The plates of the steel boiler directly over the fire were found to be uninjured, while those of the other were worn out. The advantages of the steel boiler are strength, lightness, rapidity of evaporation, durability under heat, the security of more perfect riveting and comparative freedom from scale.

Chicago and Rock Island Railroad.

The earnings and expenses of this road for the years ending March 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$1,021,779 69	$1,005,872 41
" freight	2,222,309 27	2,016,305 54
" mails, etc	115,301 84	132,057 73
	$3,359,390 80	$3,154,235 68
Expenses, viz:

Net earnings	$1,891,709 01	$1,442,781 17

Payments in 1865–'66.

Rent Peoria and Bureau Valley R. R. Co.	$125,000 00	
Interest on bonds	101,535 00	
Dividends including tax on same	631,578 94	
Interest on Bridge bonds	40,000 00	
Taxes on real estate	63,462 02	
U. S. tax on earnings	93,722 64	
Legal expenses	7,361 74	
Extraordinary repairs	46,438 39	
		1,109,098 73
		$333,682 44

There has been expended during the year:

For land	$131,496 69	
For new equipment	113,712 10	
		245,208 79
Balance unappropriated net earnings.		$88,473 65

Compared with the previous year the gross earnings of 1865–'66 show a decrease of $205,155 12; with an increase in operating expenses of $243,772 72—making the decrease in net earnings $448,927 84. The increase in gross expenditures over the preceding year was $517,412 18.

There has been retired and cancelled during the year $2,500 of the Income bonds, leaving outstanding the sum of $51,000, and for which the trustee holds $57,396 27, invested in United States Government Bonds.

The Board have deemed it of the most vital importance to the future prosperity of this road that the Mississippi and Missouri Railroad should be built to the Missouri River, and thus connect with the Pacific Railroad; and with this end in view they have afforded that road aid by advancing money on eight hundred thousand dollars of its Land Grant Bonds to the extent of five hundred thousand dollars, as explained in the two

previous reports of this company. The bonds referred to have since been purchased from the Mississippi and Missouri Railroad Company, and now belong to this company.

Since the date of the last annual report, the directors have executed a contract with the Mississippi and Missouri Railroad Company for the ultimate control and use of that road, its lands and franchises, on certain conditions, which will more fully appear by reference to the contract itself, which is appended to this report; and in order further to facilitate and with greater speed accomplish the ends in view, the directors have, since their report of May 20, 1865, invested the sum of four hundred and fifty-two thousand two hundred and forty-two dollars in the purchase of the different classes of bonds of the Mississippi and Missouri Railroad Company.

The expenditures properly chargeable to construction, equipment and tax account amount to $596,576 05; of which there has been charged to construction, repairs, equipment and tax accounts, $448,831 84. The balance, $147,744 21, being charged to ordinary repairs. In addition to the above, $13,824 42 have been expended in re-building 1,718 feet of pile and trestle bridges.

There have been $380,008 57 expended in the purchase of the following new material for use in track during the year, viz: 78,694 ties; 998 tons of new rails; 26 tons Atlas steel rails; 4,136 tons re-rolled rails; 900 kegs spike at $6.22; 27,820 lbs. wrought chairs, at 7¼c.; 38,740 lbs. bolts for fish plates, at 9.36c.; 195,151 lbs. fish plates, at 6.36c. There have been re-laid with re-rolled iron 43.78 miles; new rails, 11.43 miles, and 1.71 miles new side track, making a total of 57.01 miles. The number of rails repaired at the company's shops was 15,810, costing $13,290 64, an average cost per rail of 84.6 cents.

The company have 65 engines, which are with few exceptions in good repair; of this number 6 have been purchased during the year, 26 engines have been thoroughly repaired, 7 of these being changed from wood to coal burners, and rebuilt and fitted with copper fire boxes. There have also been constructed at the shops of the company 2 passenger cars, and 110 freight cars, and rebuilt, 6 passenger and 21 freight cars. A number of pilots, cabs, tanks, &c., have also been built.

The number of miles run by locomotives with passenger trains was 364,870; with freight trains, 791,387; with wood and gravel trains, 78,594—total miles run 1,234,851. The average cost per mile for each locomotive, including repairs, fuel, engineer and firemen, oil, tallow and waste, was 38.39 cents, being 5.28 cents more than the previous year.

The entire cost per mile for operating the road, including car repairs, equipment, land, taxes, &c., was $9,461 98.

Gross earnings per mile of road	$13,595 07
Net " " "	6,749 65

The proportion of expenses to earnings, including new work, construction, repairs, equipment, land, taxes, &c., was 69.59 per cent. Less extraordinary expenses, 50.35 per cent.

The whole amount of freight transported over the road during the year was 919,172,110 pounds; a decrease from last year of 25,141,828 pounds. The number of loaded cars was 55,097; going west, 23,998; going east, 31,099. Tons carried one mile 59,218,394. Average earnings per ton per mile 3.45 cents.

The number of passengers carried was 434,744, of which 434,891 were 1st class, and 2,853 2d class; of these, 61,371 were through, and 376,373 way; 204,343 went east, and 233,401 west. Number carried one mile, 26,934,579. The number of soldiers transported over the road, and included in the above, was 40,761, of which 13,437 went east, and 27,324 west. The average rate per mile for transporting passengers was 3.733 cents.

The total number of pounds of freight transported over the Mississippi Bridge during the year was 284,651,806, being 15,350,910 pounds less than the previous year. The number of loaded cars passing for the same period was 17,505, of which 9,067 went east, and 8,434 west. The total number of foot passengers crossing the bridge was 101,675, of which 50,963 went east, and 50,712 went west. Number of boats passing the draw going north, 437; do., south, 453; barges going north, 238; do., south, 255. Total number of rafts 576.

Vice President.—JOHN F. TRACY.

Treasurer.—E. W. DUNHAM.

Secretary.—FRANCIS H. TOWS.

Ass't Superintendent.—G. H. BEARDSLEY.

Philadelphia and Baltimore Central R. R.

At a meeting of the stockholders of this Company at Rising Sun on the 2d instant, authority was granted to the Directors to create a mortgage of $300,000 on the Cecil county division of the road, from the sale of which the Directors expect to realize funds to complete the road to the Susquehanna during the next year. The Philadelphia, Wilmington and Baltimore Railroad Company are now completing their branch track to Port Deposit, and propose extending the same to connect with the Philadelphia and Baltimore Central Railroad at the crossing of the Susquehanna. This will at once give us all the advantages of a through route to Baltimore. It is also in contemplation to continue the construction of the road through Hartford and Baltimore counties to Baltimore as fast as the funds can be raised for the purpose. The track is at present completed to Briscoe's land, west of Rising Sun, and the workmen are engaged in grading beyond that point.

The projected road from Columbia down the Susquehanna to Port Deposit will be constructed in the course of a few years, the Pennsylvania Central Company having already made a branch of about one mile in that direction in the Borough of Columbia.—*Oxford Press.*

Atlantic and Great Western Railway.

The debenture holders in this undertaking were of course prepared to learn that cash had arrived in this country more than equal to meet payment of interest due on 15th May. It was also satisfactory in the highest degree to be informed that funds had arrived to provide for the interest due on 15th November next, as well as a portion for the distribution in May, 1867. But it is excessively annoying to be informed that this cash had been deposited in the Consolidated Bank, an establishment which declared itself insolvent on the evening of Sunday last at 9 p. m.

The traffic on the line, according to the monthly returns, exhibits a falling off on the one hand in unison with the receipts on the whole of the great American arteries, and an increase on the other when compared with the earnings of previous periods. Thus we learn that the receipts for the current year contrast as follow with the first four months of 1865 and 1864:

	1866.	1865.	1864.
January	$504,991	$289,400	$160,000
February	408,864	327,269	179,041
March	388,480	399,870	154,575
April	394,533	343,408	181,034
Total	$1,696,868	$1,359,947	$674,580

With such receipts as these there need be no disquiet in regard to the undertaking being more than able to meet the whole of the interest on its bonds as it may become due.

Again, from the fact of the cash being transmitted to this country every month, and consequently bearing interest here until its disbursement to the bondholders, it inevitably follows, even should there occur some delay in obtaining repossession of the money lodged in the Consolidated Bank, that the later payments, lodged in some more secure establishment, will speedily provide a fund to meet any contingent arrears. There cannot possibly be a loss to the railway company, inasmuch as the shareholders in the bank are liable to the full extent of their subscriptions. Nor may it be contended that any great body of these shareholders are likely to prove defaulters in regard to the amounts for which they are respectively liable. There should therefore be not the slightest misgiving on the part of the debenture holders of the Atlantic and Great Western.—*London Railway Times, June 2.*

☞ A preliminary survey is being made for the extension of the New Haven and Northampton Railroad from Williamsburg, through Cummington and Savoy, to North Adams. The contract to build the road from Northampton to Williamsburg has not yet been taken.

The Inter-State Railroad Bill.

The bill to regulate commercial interests between the several States has passed both Houses of Congress, and only awaits the signature of the President to become law. The following is a copy of the bill:

Whereas, The Constitution of the United States confers upon Congress, in express terms, the power to regulate commerce among the several States, to establish post roads, and to raise and support armies; therefore,

Be it enacted in the Senate and House of Representatives assembled, That every railroad company in the United States, whose road is operated by steam, its successors and assigns, be and is hereby authorized to carry upon and over its road, boats, bridges and ferries, all passengers, troops, Government supplies, freight and property on their way from any State to another State, and to receive compensation therefor, and to connect with roads of other States so as to form continuous lines for the transportation of the same to the place of destination.

Provided, That this act shall not affect any stipulations between the Government of the United States and any railroad company for transportation or fares without compensation, nor impair or change the conditions imposed by the terms of any act granting lands to any such company to aid in the construction of its road; nor shall it be construed to authorize any railroad company to build any new road, or connection with any other road, without authority from the State in which such railroad or connection may be proposed.

SEC. 2. *And be it further enacted*, That Congress may at any time alter, amend or repeal this act.

Coal and the Susquehanna Railroad.

The Albany and Susquehanna Railroad is being rapidly completed to Ninevah, the point where the railroad being constructed by the Delaware and Hudson Canal Company from Carbondale, in the Wyoming Valley joins it. When both these roads are finished, the whole of the Anthracite coal regions will be opened to Albany by a very short, direct and level route, and coal can be delivered at Albany as cheaply as at any other point on the Hudson River. The Delaware and Hudson Canal Company were aware of this fact when they projected the road from Carbondale to Ninevah, and hence its construction. By the present route, they are obliged to transport their coal over seven inclined plains, five of which are operated by stationary power, then tranship it into boats and take it to Rondout, where, for the winter months, it is ice bound. This is attended with great cost, while to bring it to Albany by the Susquehanna road, there will be no inclined plains, a constant market through the winter months, and, according to the report of Mr. Sweet, late Deputy State Engineer, it can be transported at a cost to the road of from eight to nine mills per ton per mile. The distance from Carbondale is about two hundred and three miles. The Delaware, Lackawanna and Western Railroad Company, another of the great coal monopolies, now run their coal cars to Great Bend, about eighteen miles from Ninevah, and by a short road can connect with the Susquehanna road at that point, or can run over the Erie to Lanesboro, and thence over the Carbondale and Ninevah road to the latter place. The owners of the mines at Barclay are constructing a road to the Erie road, a short distance from Athens, to bring out their semi-bituminous coal, and when the Susquehanna road is completed to Binghamton, a direct connection will be had with their mines also.

The Susquehanna road has made a very favorable contract with the Delaware and Hudson Company, and a similar one can undoubtedly be made with the two other companies above named. When these roads shall have been completed, it will put Albany in the possession of an abundance of coal, and at much cheaper prices than have been known for many years. The consumption of coal, in and within a circuit of one hundred miles of Albany, is about two millions of tons per annum, and the greater portion of this will be hauled over the Susquehanna road, when they get the facilities for doing the business.

The profit for doing this, to that road, at a very trifling advance over the actual cost, will be over one hundred thousand dollars per annum, while to the city of Albany the benefit will be immense. —*Albany E. Journal.*

Lehigh Coal and Navigation Company.

The shipments of coal by canal for the years ending December 31, 1864 and 1865, were as follows:

	1864.	1865.
Shipped at Mauch Chunk	446,718	483,756
" East Mauch Chunk	311,369	405,028
Total, tons of 2,240 lbs.	758,087	888,784

—showing an increase of 130,696 tons over the shipments of the previous year.

The distribution of coal carried on canal was as follows:

	1864.	1865.
Consumed on the line of the Lehigh Canal	93,039	82,235
Passed into the Morris Canal	194,096	217,813
Passed into the Del. Div. Canal	470,952	588,736

The coal that passed into the Delaware Division Canal divided itself thus:

	1864.	1865.
Consumed on the line of the canal	27,426	28,930
Entered the Del. & Raritan Canal	241,201	399,067
Reached tide water at Bristol	202,325	160,739

Of the coal that entered the feeder of the Delaware and Raritan Canal, 41,191 tons passed out at Bordentown; this having been, for a period of nearly two months, the only way for boats to come through to Philadelphia—navigation on the Delaware Division Canal below the outlet lock having been suspended for repairs, from the 16th of July to the 9th of September.

The total amounts of freights of all kinds (tons) carried on the canal is shown in the following table:

	Ascending.	Descending.	Total.
1865	133,552	914,086	1,047,638
1864	145,677	800,539	946,216
Inc. in 1865.	12,125	113,547	101,422

The yield of the company's coal mines for the years 1864 and 1865, was as follows:

Mined on company's account—	1864.	1865.
Panther Creek, Summit and Old Tunnel Mines	379,727	408,172
Mined under lease from company—		
Room Run Mines	92,738	79,753
Tamaqua Mines	32,685	19,535
Greenwood Mines	.....	6,022
Old heaps	12,030	3,543
Total product of Co.'s mines	517,180	517,025

The tonnage for the year, of the old Lehigh and Susquehanna Railroad proper, or of what may now be called the northern division of the road, lying between Wilkesbarre and White Haven, was as follows:

	Going North.	Going South.	Total.
Coal	85,478	251,966	337,444
Lumber	4,282	15,127	19,409
Corkwood and bark	....	66	66
Lime and limestone	102	.....	102
Other stone, plaster, etc.	40	364	404
Merchandize	332	24	356
Total tons.	90,234	267,547	357,781

—which is a gain of 233,667 over the aggregate of 1864.

The coal going north (85,478 tons,) was transported from the planes to the Wyoming Canal.

The number of passengers carried was 26,333, of which 23,882 were through, and 2,451 way.

The amount of freight offered to go to the Lehigh, was vastly in excess of what was carried, and our own ability to transport was fully equal to a business one-third greater; but the Lehigh Valley Railroad Company failed to provide sufficient motive power to do the business over the White Haven and Penn Haven branch of their road, and the expense to which we had gone to prepare for a larger business, was thereby rendered unavailing, and the cost of the transportation done by us much increased. The profits, however, have been satisfactory. Next year we hope to have a road of our own in operation between White Haven and Penn Haven, so that there need be no repetition of these difficulties hereafter.

In the month of June, an important link in the extension to Easton of the Lehigh and Susquehanna Railroad, was opened to trade, viz: that part lying between the Hazleton Railroad and the head of our canal, a distance of about six miles. During the five months of active operations on said link of road, there was carried over it a total of 202,895 tons 17 cwt. of coal, of which 121,712 tons were received from the Hazleton Railroad, and 81,183.17 tons from the northern division of the Lehigh and Susquehanna Railroad, over the Penn Haven and White Haven branch of the Lehigh Valley Railroad. All of the above coal was shipped upon the company's navigation, over the new pockets below the Turn-hole. This trade will be largely increased the present year, both from the Hazleton and the Wyoming regions.

The earnings and expenses for 1865, were as follows:

Earnings:		
Water and ground rents		$11,789 15
Coal sold, including mine rents		584,748 23
Tolls on canal less expenses of collection		612,803 21
Profits on transportation account, L. & S. R. R. including car service		170,796 95
		$1,380,137 54
Expenses, viz:		
State tax on capital st'ck.	$23,467 50	
Balance of interest acc't.	189,144 68	
Repairs and improvements of the navigation	74,694 17	
For future renewals of pockets at Turn-hole	30,940 77	
		318,247 12
Net profits		$1,061,890 42
Balance to credit of profit and loss, January 1, 1865		2,983,236 08
		$4,045,126 50
U. S. tax on surplus profits of 1864	$48,219 79	
Dividend, May 23, 1865, 5 per cent. and U. S. tax	225,418 42	
Dividend, Nov. 28, 1865, 5 per cent. and U. S. tax	268,634 21	
		542,272 42
Balance to credit of profit and loss January 1, 1866		$3,502,854 08

The profits from all sources, for the year 1865, were $1,380,137 54. After paying State tax, interest, repairs, and expenses, there remains a balance to be carried to the credit of profit and loss, of $1,061,890 42, equal to 24¾ per cent. on the capital stock, as it stood up to May 24th, 1865, prior to the issues of new stock, made, respectively, in May and November last. As said new issues of stock contributed nothing to the profits of the year, being represented by railroads still unfinished and not in operation, it is proper to calculate the percentage of profit on the capital actually engaged in the business, which gives a result of nearly 25 per cent., as already stated.

After deducting from the net profits of the year, the two dividends of five per cent. each, declared in May and November, there remains a surplus, for the year, of $567,837 79, and a total balance to the credit of profit and loss, of $3,502,854 08.

During the year 1865, the capital stock was increased $1,808,750; the funded debt was increased $235,001 82; and the floating debt (including unpaid interest and dividends) increased $53,478 79. On the first of January, 1866, the aggregate of the company's liabilities, including capital stock, funded debt, and obligations of every kind, was $10,494,464 28.

There was expended upon the new locomotive road, around the inclined planes on the Lehigh and Susquehanna Railroad, the sum of $334,474 11. For ground for a new freight and passenger depot at Wilkesbarre, $9,109 49. In other improvements, between Wilkesbarre and White Haven, $68,264 75. On the branch to the Nescopec mines, $2,245 68. On the different sections of the Lehigh and Susqehanna extension—between White Haven and Easton—a total of $712,335 61, besides $49,489, paid for land and right of way, and charged temporarily to lands purchased.

The cost of the railroad, from the bridge at the Turn-hole to the new pockets, originally charged to land improvements, has been transferred from that account to construction of Lehigh and Susquehanna Railroad. The amount of this item, including the bridge, the tunnel, and the sidings, is $223,550 92. Total charged to construction of Lehigh and Susquehanna Railroad, in 1865, $1,209,813 07.

In the purchase of additional rolling stock, for the Lehigh and Susquehanna Railroad, including six new locomotive engines, and 684 new cars, there was expended the sum of $426,519 33.

By the purchase of a new locomotive, for use on the road to Tunnel No. 10, and by other additions to the rolling and other stock at the company's mines, and on the railroads connected therewith, there has been added to this item of the company's assets, the sum of $62,069 04.

Upon their coal improvements, including their coal mines and the railroads connected therewith, the company expended last year, the sum of $322,524, of which, however, only $80,712 09 has been permanently charged to that account; the balance to the current expenses of the business.

Upon other portions of the company's real estate, expenditures have been made under the head of land improvements, to the amount of $64,823 84. The sum of $30,940 77 has been credited to that account, on the score of the new pockets built in 1864 and 1865, to cover what depreciation they may have already sustained, and the extra cost arising from the high price of labor and materials. The total amount charged to this account was less by $175,237 10, at the end of 1865, than at the end of 1864.

The investment of the company in canal boats, was increased during the year, $11,054 12.

The following exhibits the financial condition of the company at the end of the year.

Capital stock	$6,091,700 00
Common loans	3,081,433 74
Floating debt	1,256,497 70
Unpaid dividends	9,213 70
Arrears of interest	55,619 14
	$10,494,464 28
Balance to credit of profit & loss	3,502,854 08
Total	$13,997,318 36
Canal and river improvements	$4,455,000 00
Lehigh and Susquehanna R. R.	3,127,708 42
Real estate, coal mine and other lands, mine railroads, &c., and works at Phila., &c.	2,037,089 72
Moveable effects:—debts due, bills receivable, bonds and mortgages, &c.	2,907,157 38
Contingent fund, cost of investm'nts	680,246 58
Cash on hand	790,116 26
Total	$13,997,318 36

The indebtedness of the company at the end of 1864 and 1865, comparatively, is shown in the following summary:

	1864.	1865.
6 pr ct. loan, due Mar. 1, 1870	$414,607 77	$414,157 77
6 per cent. loan, due April 1, 1884	2,432,274 15	2,667,275 97
Total	$2,846,881 92	$3,081,433 74
Increase of funded debt		$234,551 82
" floating debt		53,478 79
Increase of debt and liabilities in '65		$288,030 61
" stock in 1865		1,808,750 00
Total increase of debt and stock		$2,096,780 61

Meanwhile the property and assets of the company have increased by a total of $2,616,398.

The following table exhibits at one view the cost of the company's works, and the earnings yearly for the last fourteen years:

Years.	Cost of works, lands, mines, &c.	Gross Earnings.	Total Expenses.	Net Earnings.	Dividends.
1852	$7,142,876	$722,999	$153,366	$569,633	6
1853	7,015,998	804,715	134,259	670,456	6
1854	7,116,901	1,090,652	167,136	923,516	6
1855	7,169,727	1,019,271	209,125	810,146	6
1856	7,241,654	864,657	237,176	627,481	6
1857	7,263,971	593,290	127,126	466,164	6
1858	7,228,273	595,857	92,197	503,660	6
1859	7,228,789	672,688	97,763	574,925	6
1860	7,288,264	753,318	83,091	670,227	6
1861	7,357,473	528,246	201,314	326,932	6
1862	7,454,365	307,347	123,487	183,860	6
1863	7,574,840	1,152,694	129,110	1,023,584	6
1864	8,445,880	1,560,582	238,305	1,322,277	10
1865	9,619,798	1,380,137	318,247	1,061,890	10

At an election held May 1st, 1866, the following named persons were chosen officers of the company, for the ensuing year:

President.—James S. Cox.

Managers.—John Farnum, Richard Richardson, Andrew Manderson, Jacob P. Jones, Francis C. Yarnall, Samuel E. Stokes, Francis R. Cope, Frederick Graff, Fisher Hazard, Charles L. Borie, Charles Wheeler.

Vice President.—William F. Biddle.

Superintendent & Engineer.—John Leisenring.

Treasurer.—Solomon Shepherd.

Secretary.—Francis Mitchell.

The Wabash and Erie Canal in Indiana.

A company composed of leading business men on the line of this canal, has been formed for the purpose of leasing the canal for a term of years, to put and keep it in navigable order. The company organized at Delphi last week by the appointment of Reed Case, of Delphi, T. Donovan, of Pittsburg, M. Bradley, of Peru, A. P. Edgerton, of Ft. Wayne, Judge Petit of Wabash, L. Jewett, Capt. Moore, Robert Breckinridge, Henry Taylor and J. W. Martin, of Lafayette, Directors of the Company. At a subsequent meeting, Messrs. Edgerton, Case, Bradley, Breckenridge and Jewett, were elected an Executive Committee, and Hon. A. P. Edgerton, President.

It is generally known that in the settlement of Indiana with the foreign holders of her bonds, this canal passed into other hands, and was for many years managed by trustees for them, during which it declined in condition. It was then leased to a company consisting of A. P. Edgerton, H. McCulloch, and we think, Jesse L. Williams, who bound themselves no further than to keep the canal in repair if its revenue was sufficient. This arrangement did not create a sufficient interest, nor induce the investment of sufficient capital to keep the canal in navigable order. This season, it has been opened no further south than Logansport, with no prospect, under the old arrangement, of any effort to open it through.

The character of the members of the new company, their interest in business and property along the line of the canal, and the capital they have invested in this enterprise, are an assurance of an energetic management that will put this important canal in order and make it again profitable. Business men in Toledo have taken a part in the undertaking by pledging themselves to build thirty boats for the canal, this kind of stock having declined for several years on account of the uncertainty as to the continuance of the canal.

This canal has, like the Ohio Canal, suffered from railroad competition. The foreign owners would not stand up to the continual draft upon them to keep it in repair, as the State of Ohio did for her canals for many years, until she leased them. The lessees of the Indiana Canal did not put that interest and energy into the management that the Ohio lessees gave to their enterprise. The declining condition of the canal, and the facilities furnished by the railroads, made the people indifferent to its preservation. But the people of Ohio are aware that their canals are worth the cost for their influence on the price of freight, even though they should carry none. And so is the Wabash and Erie Canal to the people of Indiana, as they would find, to their cost, if they should allow it to go out of existence.

Before our canals were leased they were an annual drain of from one to two hundred thousand dollars a year upon the general fund of the State Treasury, besides the interest on their cost of sixteen or eighteen millions. In spite of this bad showing of direct results, we believe they were worth the cost for their influence on freights. They were a security against any extraordinary pressure upon the means of transit, and against the natural effect of this on prices. The energy and economy of private interest and management has sustained and improved them with their own revenues, and the prospect which at one time was probable that they would run down and be abandoned, is now removed.

The people of Indiana have the same interest in their canal, and it is probable that this enterprise will have as beneficial a result. The trade of the Wabash and Erie Canal in Indiana was once of much importance to this city. It fell off on account of the change the war made in the course of trade, as well as from the declining condition of the canal. The restoration of trade to its natural course and the repair of the canal will revive and increase its importance to this city. It is indispensable for the transportation of all kinds of heavy freight and produce, and it is also a very important feeder to the Ohio portion of the same line of canal.—*Cin. Gazette.*

☞ The first annual meeting of the International Telegraph Company was held in Portland on the 5th inst., and the following board of directors was chosen for the ensuing year: E. K. Harding, Bath; A. D. Brown, George F. Shepley, H. N. Jose, Woodbury Davis, Portland; Wm. McGilvery, J. C. Nichols, Searsport; J. B. Foster, J. W. Palmer, Bangor; E. C. Bailey, Dwight Foster, Boston. At a meeting of the directors Col. E. K. Harding of Bath was chosen President, and Col. Charles B. Merrill of Portland, Treasurer.

☞ In the suit of the California State Telegraph Company versus the United States Pacific Telegraph Company in the District Court of the United States for Nevada, Judge Baldwin has awarded an injunction restraining the defendants from telegraphing between the cities of Nevada and California, on the ground that the plaintiffs have exclusive and irrepealable franchise from the Nevada Legislature, which even Congress cannot invade. This closes the line of the defendants.

☞ Mr. D. S. Hessey, of Delaware, has been elected Chief Engineer of the Dorchester and Delaware railroad company.

American Railroad Journal.

Saturday, June 16, 1866.

Stock Exchange and Money Market.

Without pretending to know more than our neighbors, we confess to being guided by a long and intimate observation of the course of public events; and we believe, judging from the past, one may speculate with considerable certainty as to the future. Thus we see that gold was settling down to its price before the late shipment, with a probability that it may fall still lower; for money, however dear abroad, is here still cheap and plentiful. It has been slightly resuscitated, and on Tuesday again declined.

It has been contended that we should not have allowed so much gold to leave us at the recurrence of the foreign panic; and that by selling it as low as we did, the Treasury lost several millions to the people. More than this, some very good thinkers contend that if the Treasury had not sold at all, the Bank of England itself would have suspended specie payments, and with it a universal bankruptcy would have taken place among the English merchants. They also say that both countries would then have been placed on the same footing as regards paper money; that there would have been an equal depreciation of the currency in both; and that no more shipments of specie would have been necessary!

But these persons forget that the consequences would have been much worse for us than any other country if we had allowed gold to go up to its old price. A large number of bankers would have gone by the board, our currency between 900 and 1,000 millions, would have been reduced in value at least one-half, and the prices of the necessaries of life would have been raised 200 or 300 per cent., and consumers would have to pay for what they wanted, more than they have even done for the last four years.

The Government, in the meantime, by holding on to its gold, making it scarcer—forestalling it, in fact—would have added to the general disturbance and gained nothing.

Now the news from the other side, as far as heard, is to the effect that the supply of specie sent from this country saved the foreign merchants, replenished the contracting vaults of the bank, and stopped at the threshold the universal bankruptcy which was dreaded. Instead of the bonds coming back here by many millions, it appears but a proportionally few came. Within one short month 35 millions have been sent out from this country, and have been spared without our feeling it, without creating a sensation in the street, so to speak, without any failures here, and without any injury to the Treasury, since it has still left about fifty millions for future use, with a certainty that it will increase largely every week during the present year. In a single month, was not only all this effected, but the public debt was reduced nearly twenty millions besides. The effect of all this on the European mind must have been, and continue to be, of the most salutary description. It was found by the foreign holders of our bonds, who took them as they would any other of our products, that this country was rich, prosperous and prompt. They might lose hundreds of millions by the fall in cotton from 19d. to 11d. stg. per pound, which on the stock held in Liverpool alone, 400,000 bales, would be millions of dollars, and it effected us not. We could not only take all the returned bonds, but pay in specie, and send them as much as they wanted in their distress. The foreign houses doing business with the United States found out that this country, of all others, is the best to trade with, and in dark hours, the most reliable of all with which they can have financial connections. So on the continent. The latest Frankfort papers state that while all other stocks are dull, American bonds are still *well supported*, and that *the public continue to invest in them*. The United States Consul there, Mr. Murphy, has published a note of very late date, affirming that but about 10 millions, instead of 70 millions, had been counted and sealed in his office for transmission to New York—a much less amount than has been reported—and that the speculation to return such bonds, even if gold keeps at 140, will be a poor one. Now as gold has been again falling since the last sales, the chances of its advance are growing small by degrees and beautifully less, and the cry about the returning avalanche of our securities from Europe is proved to be a senseless and unfounded one.

We are of the opinion, then, if there were no other reason, that the "logic of events" will sustain the action of the Treasury. All we hope is,

that its patronage will hereafter be given to its real friends if they are in the field. The gift of the Government brokerage is one of the most valuable it has to bestow, and it should not be thrown away. No one expects this.

The 5-20s under the effect of the receipt of the large sums of specie from this country, had at the last dates risen to 66¼@66¾, and cotton had gone up 1d. a pound, and sales had been made at the advance. The imports of this article at this port are on the increase. About 14,000 bales came in from the South the past week; and at the same time, and for the same period, about 14,000 emigrants, all in good health, landed at this port and joined the "innumerable throng" of laborers and consumers, as well as bringing with them all they could carry of what they had saved abroad.

The report of the associated banks of this city for the week ending June 9th, shows the following result: The loans had decreased, $1,120,003; specie, $6,036,480; and circulation, $276,272. While on the other hand, the deposits increased, $4,376,660; and the legal tenders, $5,449,662. From this statement it is evident they have considerably improved their general condition. They now hold $16,821,663 of specie for their circulation of $25,967,258; but have $74,628,674 of legal tenders on hand, besides their specie; and of course will be able, at the earliest redemption to meet all demands for coin on them with readiness.

It is proposed in Congress to reduce the circulation of the National Banks a very considerable sum; probably it is intended to apportion it more equally than it was convenient to do at first.

It is also understood that the funding bill advocated by Mr. Sherman will be defeated finally, as it contains a large operation of 2 per cent. profit on the agency alone! at all events, this objection is made to it. On the other hand, the simple proposition of the Secretary of the Treasury, which is free from this objection, has another, that 5 per cent. will not be interest enough to induce the present holders of gold 6's and of currency 7-30s to make the required conversion. We think there is some doubt of the immediate success of the measure.

The crisis in Europe will no doubt tell favorably on our financial situation. The Old World may fall into trouble, just at the time when the New is becoming more tranquil. The effect of this must be that capital and labor will seek a new home as fast as possible. We are inclined to think that a War in Europe will greatly help our agriculturists, manufacturers and shippers; and that we shall witness a prosperity such as we have never before seen taking place so rapidly. It must not be forgotten that the Pacific Railroad is now being rapidly constructed. It is already pushed 105 miles West of Omaha, has now easy grades and light work to encounter, and is being laid at the rate of a mile a day. The Western end is also being rapidly constructed; and an application before Congress is favorably received, that the Eastern and Western divisions may now go on until they meet each other. It is impossible to describe in sufficiently glowing terms the effect of an early completion of the Union Pacific Railroad. We may look with perfect indifference, if not contempt, on all European complications, when we once obtain steam communication overland between the Atlantic and Pacific Oceans. We shall have trade enough, oceans enough, commerce enough, and gold enough taken out of our soil, to answer all demands, meet all exchanges, and make all contented if they will be. The artificial and unjust systems of the old world will be out of place here, and it is to be hoped will never find advocates in the new world.

The money market has been very easy all the week. There was an attempt made on Tuesday to get up the price of gold, and the rate of interest; but the effort—the attempt of a clique of operators—was a failure, and prices went down after a few hours. We see no reason to change the opinions which we have expressed for the last few weeks. We believe that the foreign advices, as they come to us for some time hence, will have a favorable effect on all our National interests.

We notice the following results which we think it well enough to record, viz: From the 1st of July, 1865, to the 2d of June, inclusive, the total receipts of gold at this port from California were $28,230,736 against $15,874,298, received during the same period last year. The customs' receipts since July 1, 1865, to June 9, inst., inclusive, have been $126,385,900; while the amount of gold interest paid during the same period was $45,673,696. So that it is evident we are getting more than twice the amount of gold that we have use for.

We notice an act of magnanimity in the Senate, which should not pass without fitting comment. We allude to the manly defence of the Secretary by Mr. Fessenden. We shall have hopes of the future, if a sense of justice and fairness will induce even party men to pause in the work of misrepresentation. The finance question is every where the pivotal question of nations. Let money be easy, taxation light, and the public debt small, and the great objects of government are already attained. The minister who is able to produce a satisfactory budget has got to the end of things, and is the finisher of diplomacy, war and legislation.

We observe that considerable specie will go out this week; and it is well enough to note that, after all, much of this is going out on pure speculation. We have already sent much more than was expected, although by the published correspondence in the London *Times*, it appears that the foreign correspondents in this city declared we could spare 50 millions as well as 35 millions, and that it was of no use here.

Bills against this very gold have been drawn by the shippers, in the hope of a small profit on the transaction. We may therefore safely say that the large shipments really mean nothing more than that parties in want of assistance, and other parties trying to turn the opportunity to account, have been one of the causes of the movement itself. It really means nothing of a very important character. The reaction of this shipment was not only felt here in keeping down the prices of all other articles, but its effect on the cotton trade was very largely beneficial to this country. We are glad to see that some of the ablest men in the United States Senate fully comprehended the subject.

There has been a better feeling growing up in railways, and a considerable steadiness in Governments. The progress of the market will be traced in our usual quotations.

The New York exports, exclusive of specie, for the week ending June 12, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,25[illegible]702	$1,943,944
Prev. reported	71,100,381	98,154,413
Since January 1	$72,351,083	$100,097,907

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$415,247	$611,374
Gen. merchandise	3,175,292	2,119,385
Total for the week	$3,590,539	$2,730,759
Prev. reported	61,146,299	143,907,962
Since January 1	$64,736,838	$146,638,721

The balance in the Sub-Treasury on Wednesday was $90,310,357 35.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois Canal bonds, 1870, 100; Georgia 6s, 105; N. Y. 7s, Bounty Loan, 102⅛; do., 6s, 1873, 96½; Indiana War Loan, 96; Jersey City Water Loan, 92; Brooklyn 6s, Water Loan, 94; New Jersey Central, 117; Long Island R. R., 60; Stonington, 110; Cattawissa, 77½; New York and New Haven R. R., 109½; Milwaukee and St. Paul, 58; do., pref., 72½; Ohio and Miss. 1st mort., 90; Peninsula R. R. 1st mort., 77; Goshen Branch bonds, 97; Spruce Hill Coal, 4¼; Wilkesbarre Coal, 55; Boston Water Power, 50; Cary Imp. Co., 15; Brunswick Land, 8; Mariposa pref., 24; Western Union Tel., 56¾; do., Russian Extension, 106; Am. Ex. Bank, 113; Continental Bank, 100; 4th National Bank, 103¾; Bank of Commonwealth, 102; Merchants' Bank, 110; Bank of Commerce, 102; St. Nicholas Bank, 105; Park Bank, 150; Central Bank, 106⅞; Bank State of New York, 109; Nassau Bank, 108; Mechanics Banking Ass., 106; Ocean Bank, 100; Park Bank, 150.

Philadelphia.—Allegheny County coupon 5s, 74; Pittsburg 5s, 70; do., 4s, 55; Allegheny City 6s, 1880, 90¾; Warren and Franklin 7s, 87½; Connecting R. R. 6s, 90; Morris Canal Boat Loan, 90; Schuylkill Navigation 7s, Boat Loan, 85; 13th and 15th streets R. R., 22; Girard College R. R., 27; Ridge Avenue R. R., 13½; 10th and 11th streets, 60; New Creek Coal, ⅝; N. Y. and Middle Coal Fields, 57⅞; St. Nicholas Coal, 2⅝; Hazleton Coal, 58; Fulton Coal, 6¼; Big Mt., 4⅞; Keystone Zinc, ¾; Western Bank, 80; Farmers' and Mechanics' Bank, 123¾; Mechanics' Bank, 31; Commercial Bank, 53; Bank of North America, 221; Consolidation Bank, 41; Curtin Oil, ¾; Dalzell, ⅞; Ocean, 6½; McClintock, ⅝; Tarr Home, 1; West, 3½. North Carolina Bonds.

Hon. Kemp P. Battle, Public Treasurer of North Carolina, gives notice that he is prepared, in accordance with the provisions of the act of March 10th, 1866, known as the "Funding Act," to deliver bonds of the State of the denomination of $1,000 in exchange for past due bonds and coupons of bonds of the State issued under acts passed prior to May 20, 1861.

The $500 and $100 bonds are promised by the engraver in a short time.

The new bonds are six per cent. untaxables, dated January 1st, 1866, running thirty-four years, with semi-annual coupons payable, as is also the principal when due, at the National Bank of the Republic in New York.

Applicants must pay in the proper securities or in currency the value of the bonds to date of payment, including interest from July 1st, 1866, the law requiring they should be sold at par.

Coupons or past due bonds may be forwarded to the Treasurer, at Raleigh, and bonds will be returned in exchange, provided some party is authorized to receipt for the same.

Where coupons are payable in New York, the bonds from which they are cut need not be forwarded, but only the coupons.

The same rule applies to coupons payable at Raleigh during the war, of the Western Railroad and the Western North Carolina Railroad, as they can be identified without the bonds.

Coupons of bonds issued to the Wilmington, Charlotte and Rutherford Railroad Company, July 1st, 1862, must be forwarded *with the bonds* for identification.

Past due coupons, including those of date of April, 1866, will be funded now, the July and October 1866 coupons when due.

Bonds past due bear interest from maturity, which interest is fundable. Bonds of Cape Fear and Deep River Navigation Company endorsed by the State stand on the same footing as State bonds.

Holders of registered bonds must forward a receipt for the interest due to last regular day of payment.

The minor details of the exchange will be arranged by correspondence.

☞ The new railroad which has been commenced from Vera Cruz to the capital has been temporarily suspended, and many of the laborers discharged, owing to the temporary cessation of funds, an immense iron bridge, nine hundred feet long, is on its way from Liverpool, and is designed to span a large gap in the road above Orizaba.

Union Railroad.

The General Assembly of Maryland, at its late session, passed an act incorporating the Union Railroad Company, with authority to construct and maintain a railroad from the point known as the Relay House, on the Northern Central Railway, by way of the Stoney Run route, to the tide water at Canton, together with any lateral road to the city of Baltimore connected therewith.

The commissioners named in the act are: John W. Randolph, Chauncey Brooks, Horace Abbott, Wm. A. Fisher, Alfred Mace, Jesse Tyson, Sam'l M. Shoemaker, Dr. G. H. Tyler, Thos. Booz, F. Littig Shaeffer, S. J. Carroll, Charles J. Baker, and Evan T. Ellicott, under whose direction books of subscription have been opened in Baltimore, to remain open until the 23d inst., or until 1,500 shares shall have been subscribed.

The capital stock is fixed at $600,000 in shares of $100 each. Whenever 1,500 shares are subscribed, and $1 paid thereon, the subscribers to the stock may organize the company by the election of one Director for each five hundred shares subscribed. These, with one Director to be appointed by the city of Baltimore, or any other corporation which may subscribe for five hundred shares or more, are authorized to appoint a President, and the President and Directors shall be invested with all the rights and power necessary to construct and maintain the road.

Russian American Telegraph.

Major E. L. Pope, Assistant Engineer of the Russian American Telegraph, has reported to Colonel Bulkley, Engineer in Chief, that he has surveyed the country from Lake Tatla to the headwaters of the Sleeping river, in British Columbia, a distance of three hundred miles, and found an excellent route for building the telegraph the entire distance.

The country north of Sleeping river is believed to be of a similar character. After travelling five hundred miles on snow shoes Major Pope reached the ocean, seven hundred miles north of Victoria The native Indians were disposed to extend every assistance.

Manassas Gap Railroad.

The Alexandria *Journal* says that "efforts are being made in some quarters, looking to the early reconstruction of the damaged portions of the Manassas Gap Railroad, and its extension to the point of original design. A comparatively small amount only is said to be required, to establish its original proportions, and we hope soon to be able to chronicle the important fact that its trains are in motion."

The Hoosic Tunnel.

The Adams *Transcript* says: "The rock on the west end of the tunnel, which inspired so much confidence in its friends, lasted only sixty feet, and the same quicksands are now encountered as before." The "demoralized rock," it seems, is still as troublesome as ever. The same paper says: "The State is making a splendid brick yard near the west end of the tunnel. A large number of men and teams have been employed for some weeks." This will make a big hole in the $900,000 appropriation.

☞ At a meeting of the directors of the Concord Railroad last week, Josiah Stickney, Esq., o Boston, was unanimously elected President, and Samuel D. Bell, Esq., of Manchester, Clerk.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad for the week ending June 7, 1866 ..... $23,687 55
Corresponding week previous year..... 18,009 18

Increase..... $5,628 37

Receipts from Jan. 1, to June 7:
1866 ..... $274,291 09
1865 ..... 229,202 20

Increase $45,088 89

The traffic of the Great Western Railway of Canada, for the week ending June 6th, 1866, were $59,165 91
Corresponding week of 1865 ..... 55,924 21

Increase..... $3,241 70

The earnings of the Marietta and Cincinnati Railroad the 4th week in May, 1866... $34,382 00
Corresponding week previous year..... 23,815 06

Increase..... $10,566 94

Commencing 1st Jan. 1866..... $435,685 00
Commencing 1st Jan. 1865..... 434,270 65

Increase..... $1,414 35

The earnings of the Grand Trunk Railway of Canada for the week ending June 2d, 1866, were $116,691 00
Corresponding week of previous year.. 114,926 00

Increase..... $1,765 00

The earnings of the Chicago and Northwestern Railway for the first week in June, 1866 were $218,651 21
Corresponding week of previous year,. 176,766 85

Increase..... $41,874 36

The earnings of the Chicago and Rock Island Railroad for the 1st week in June, 1866, were $80,084 00
Corresponding week of previous year.. 86,629 00

Decrease $6,545 00

The earnings of the Michigan Central Railroad for the 1st week in June, 1866, were... $72,804 03
Corresponding week of previous year.. 76,309 00

Decrease $3,504 97

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in June, 1866, were $81,518 00
Corresponding week of 1865 ..... 83,021 00

Decrease $1,503 00

The earnings of the Detroit and Milwaukee Railroad for the first week in June, 1866, were $30,270 00
Corresponding week of 1865..... 30,791 00

Decrease $521 00

☞ The "Pinnacle Ledge," at Stoughton, on the line of the Dighton and Somerset railroad, which has been a grand obstacle in the progress of this road, has been removed. The Ledge was originally some seventeen hundred feet long, and from eight to twenty-five feet in depth, composed of an exceedingly hard variety of blue-stone, and all its seams were so filled with water that a "seam blast" was almost an impossibility. It is now expected that the road will be in running order before the last of July.

☞ The bill to loan the credit of the State of Massachusetts, to the amount of one million dollars, in favor of the European and North American Railway, has been rejected by the lower branch of the legislature of that State.

Illinois Central Railroad.

The statement of this Company for the month ending May 31, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	4,298.06 for	$16,848 50
Acres Int. Fund Lands sold	40.00 for	459 80
Acres Free Lands sold	601.62 for	7,077 51
Total sales during month of May, 1866	4,939.68 for	$54,385 81
To which add Town Lot Sales		2,650 00
Total of all		$57,035 81
Cash collected in May		$122,327 99

TRAFFIC DEPARTMENT.

Receipts from Passengers		$152,938 53
do. Freight		314,533 00
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		30,000 00
Total Receipts in month of May, 1866.		$507,829 86
Total Receipts in month of May, 1865.		$454,745 77

Erie Railway.

The earnings of the Erie Railway and Buffalo Division for the month of May, 1866, were:

Erie Railway	$1,008,816 77	
Buffalo Division	92,851 65	$1,101,668 42
May, 1865—		
Erie Railway	$1,333,460 62	
Buffalo Division	91,659 77	1,425,120 39
Decrease on Erie Railway and Buffalo Division		$323,451 97

The earnings of the Erie Railway (including the Buffalo Division) for the first five months of the fiscal years 1865 and 1866, have been as follows:

	1865.	1366.	
January	$1,070,890	$1,187,188	Inc. $116,298
February	1,011,735	983,855	Dec. 27,880
March	1,331,124	1,170,434	Dec. 260,690
April	1,538,313	1,153,295	Dec. 385,018
May	1,425,120	1,101,668	Dec. 323,452

Total decrease $880,741

Tests of Rails.

The following tests of the strength of different kinds of rail to resist the blow of a hammer were made at the machine shops of the Boston and Providence Railway Company, under the supervision of the Master Mechanic, Geo. S. Griggs, Esq. The rails were placed under the steam hammer separately, resting on blocks of iron placed fourteen inches apart. Each piece of rail was about three feet long, and each received the same drop of hammer, the hammer weighing 700 lbs.:

	Lbs. to the yd.	No blows rec'd of steam ham.	Bent.	Dented.
Cast steel rail	60	85	3-4 in.	1-16 in.
Steel-headed rail	63	42	3-4 in.	1-8 in.
Eng. rail, 2 samples	56 ea.	24 ea.	3-4 in.	1-8 in.
English rail	56	13	broke.	.....
Our common rail	56	13	3-4 in.	3-16 in.

There was no fracture in any of the above rails except in the English rail marked "broke."—*Railway Times.*

☞ The Battle Creek, (Michigan,) *Journal* of May 31st says: "The work on the Peninsular Railway, leading from Battle Creek to Lansing, has commenced in sober earnest. The engineers are far on their way toward Lansing, at which city they are expected to arrive during the forepart of the coming week."

The Tax on Steel.

The Government heavily taxes the steel manufacturers, as will be seen by the following table, which is intended to show the revenue of Government upon each ton of rolled or hammered cast steel made in the United States under the law as it now stands, viz:

The excise per ton on rolled or hammered steel is	$15 00
The excise per ton of blooms used in making steel is	3 60
The excise per ton on bar iron	3 60
The excise cost of crucibles consumed	60
The excise on cast iron molds, castings for repairs, firebrick, oil, etc., used in making one ton of steel is	60
The cost of stamps on letters, notes, checks, bills, lading, etc	60
The indirect tax on labor, on same basis as that estimated by D. J. Morrill, at the Cambria Iron Works on the average value of cast steel, six per cent., exclusive of income tax	23 00
Total tax on one ton of steel of 2,000 lbs.	$50 00

From which it appears that the direct and indirect tax paid by the American manufacturer upon every pound of cast steel produced by him amounts to two and a half cents.—*Railway Times.*

Finances of Ohio.

The following is the official statement showing the condition of the Ohio State Treasury on the 1st day of June, 1866:

Balance general revenue fund	$206,351 57
Balance canal fund	44,640 72
Balance sinking fund	258,736 07
Balance common school fund	109,270 08
Balance allotment fund	8,602 78
Balance military fund	325,803 81
Balance volunteer relief fund	196,997 29
Balance national road fund	3,033 79
Balance bank redemption fund	3,453 93
Balance district library fund	83 15
Balance soldiers' claims fund	19,067 70
Total	$1,171,040 44

CREDIT.

Currency	$692,569 44
Silver	2,117 60
Exchange	389,046 56
New York bank account	85,966 97
Seneca County bank notes redeemed	1,279 50
National road bonds	60 37
Total	$1,171,040 44

Finances of Philadelphia.

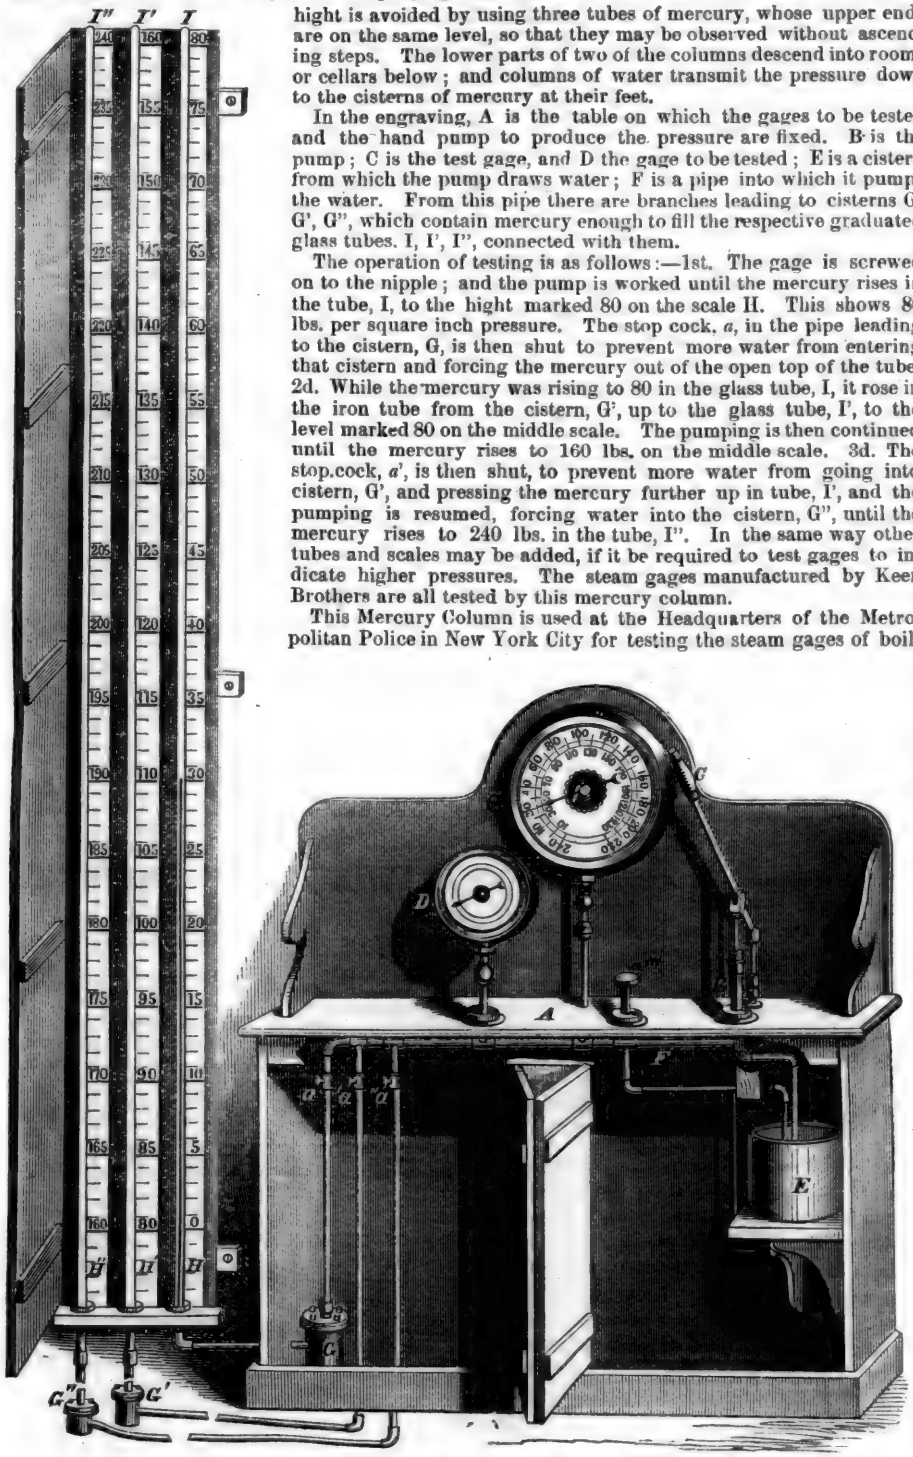
The condition of the City Treasury on the 1st of June, 1866, was as follows:

Cash set apart for the payment of interest on city loans due the 1st of July, 1866	$1,115,285 48
Cash set apart for the payment of maturing city loans falling due on the 1st of July, 1866	186,118 78
Cash on hand for the payment of warrants	206,058 49
Cash in drawer	3,976 65
Cash balance in City Treasury 1st of June, 1866	$1,511,439 40

The warrants paid since 1st of June for police, salaries of heads of departments, clerks and laborers, amounts to upwards of $100,000.

The interest due on the 1st of July will be paid without the necessity, as heretofore, of creating a temporary loan of $500,000 for its payment.

☞ A petition is to be presented to the New Hampshire Legislature for a railroad along the New Hampshire side of the Connecticut river, between Walpole or Westmoreland on the Cheshire road and Hinsdale on the Ashuelot road.



Improved Steam Gage.

The most accurate and convincing means of testing gages is a column of mercury; but to test a gage up 240 lbs. requires a column about 50 feet high, which is inconvenient to the observer. In the arrangement illustrated by the accompanying engraving the inconvenience of a glass tube of great hight is avoided by using three tubes of mercury, whose upper ends are on the same level, so that they may be observed without ascending steps. The lower parts of two of the columns descend into rooms or cellars below; and columns of water transmit the pressure down to the cisterns of mercury at their feet.

In the engraving, A is the table on which the gages to be tested and the hand pump to produce the pressure are fixed. B is the pump; C is the test gage, and D the gage to be tested; E is a cistern from which the pump draws water; F is a pipe into which it pumps the water. From this pipe there are branches leading to cisterns G, G', G", which contain mercury enough to fill the respective graduated glass tubes. I, I', I", connected with them.

The operation of testing is as follows:—1st. The gage is screwed on to the nipple; and the pump is worked until the mercury rises in the tube, I, to the hight marked 80 on the scale H. This shows 80 lbs. per square inch pressure. The stop cock, *a*, in the pipe leading to the cistern, G, is then shut to prevent more water from entering that cistern and forcing the mercury out of the open top of the tube. 2d. While the mercury was rising to 80 in the glass tube, I, it rose in the iron tube from the cistern, G', up to the glass tube, I', to the level marked 80 on the middle scale. The pumping is then continued until the mercury rises to 160 lbs. on the middle scale. 3d. The stop.cock, *a'*, is then shut, to prevent more water from going into cistern, G', and pressing the mercury further up in tube, I', and the pumping is resumed, forcing water into the cistern, G", until the mercury rises to 240 lbs. in the tube, I". In the same way other tubes and scales may be added, if it be required to test gages to indicate higher pressures. The steam gages manufactured by Keen Brothers are all tested by this mercury column.

This Mercury Column is used at the Headquarters of the Metropolitan Police in New York City for testing the steam gages of boil-

KEEN BROTHERS' STANDARD STEAM GAGE.

ers officially inspected by the engineers acting under the Police Commissioners; by Messrs. Hopper & Douglas the U. S. Local Inspectors of Steamboats (office 23 Pine St.) who have three of their gages for testing the boilers and gages of all steamboats owned in this district, to whom they refer or to any of the following parties:

N. Y. Steam Engine Works, 23d St., E. R., Washington Iron Works, Newburg, N. Y., Danforth Locomotive Works, Paterson, N. J., and Todd & Rafferty, 4 Dey St., N. Y. City. For further information or circulars address

KEEN BROTHERS, 218 Fulton St., N. Y. City.

Canton Company.

The annual meeting of the stockholders of this company was held in Baltimore on the 7th inst. The annual report of the directors, giving the details of the affairs of the company for the year ending May 31, 1866, was presented, and was considered in every way satisfactory. A resolution was passed to subscribe $50,000 of their funds to the Union Railroad Company, who are to make their terminus at Canton, and which it is considered will materially increase the value of property at Canton. The New York Directors have withdrawn, with the exception of Mr. A. B. Bayliss. Mr. Joseph Reynolds and Mr. B. F. Gardner, of Baltimore, have also resigned. The Directors for the ensuing year are as follows: Messrs. A. B. Bayliss, Wm. Fisher, Charles J. Barker, J. W. Randolph, George S. Brown and Charles E. Waters.

The new board will meet on the 20th inst., to appoint a president and other officers for the year.

Minnesota Railroads.

The Minnesota Central Railroad is to be completed to Owatonna by the first of September, where it will connect with the Winona and St. Paul Railroad, which is to be completed to the same point, by the first of August.

The Minnesota Valley, connecting with the Central at Mendota, will also be completed by the first of September, to St. Paul, thus making a continuous line of railroad from St. Paul to Winona.

The St. Paul and Pacific Railroad Branch line is to be completed to St. Cloud, by the first of September, and Mr. E. B. Litchfield writes from Germany that he has purchased the iron for twenty miles of the main line west of Minneapolis, but whether it is to be laid this year is not known.

The Winona Branch of the St. Paul and Pacific Railroad has suspended operations for the present. Mr. Edmund Rice has sailed for Europe on business connected with it.—*Chicago Mercantile Journal.*

Union Pacific Railroad, Eastern Division.

Commissioner Edmunds, of the Land Office, has received advices that the eastern division of the Union Pacific Railroad has been completed from Kansas City, up the valley of the Kansas river to the vicinity of Manhattan, for a distance of 100 miles on the main line whilst the track from Manhattan to Fort Reilly, a distance of 40 miles, has been nearly finished, with an adequate supply of rolling stock. Besides these advances in the work, a branch from Leavenworth to Lawrence, in a southwesterly direction, has been completed for a distance of 40 miles.

☞ The Philadelphia *Ledger* is assured, on competent authority, that the Warren and Franklin Railroad bonds are not guaranteed by the Pennsylvania and Northern Central Railroad Companies. The latter have only agreed to accept them and the unpaid coupons in payment of twenty per cent. of the charges for freight passed over their roads by the Warren and Franklin. This is a very different thing from a guarantee, but the bonds are guaranteed by the Philadelphia and Erie Company.

☞ A new first class locomotive has been added to the rolling stock of the Albany and Susquehanna road. It is called the Peter Cagger, and was built by Danforth Cook & Co., Paterson, N. J. The Susquehanna road is rapidly adding to its facilities.

Finances of New Hampshire.

From the Message of the Governor recently delivered to the Legislature of the State, we learn that the receipts into the treasury for the year ending June 1,1866,were $4,116,078 54. The principal items of income were—from State tax, $748,-436 12; railroad tax, $184,967 92; savings bank tax $56,077 17; United States war claims, $91,-352 98; State bonds $610,228 24; State notes, $2,397,675 74. The disbursements of the year amounted to $3,958,199 69. The principal payments were, to towns for State aid, $509,204 92; bounty to volunteers, $50,200; notes paid $2,831,-149 57; interest, $286,411 55. The State now owes $4,160,698 89, of which $1,922,546 74 is in notes, and $2,238,152 15 in funded debts and trust funds. The transactions of the treasury the past year greatly exceed in amount those of any previous year. It has been the paying year of the war, and the governor says it is a matter of congratulation that the State has been able to pass through it not only unscathed in credit, but has strengthened the confidence of its creditors in its ability and determination to meet and discharge its obligations promptly at maturity. In no instance has more than the market rate of interest been paid. The auditor estimates the revenue of the present year at $856,800, and the expenses at $91,025, leaving $252,275 to be applied to the reduction of the State debt. The governor recommends the most rigid economy and rigorous retrenchment of expenses, and a careful scrutiny of all claims upon the treasury. No legislation in regard to the finances is asked at the present session, except authority to provide means to meet maturing obligations, amounting to about $1,800,-000. The governor states the present condition of the claims of the State against the United States, and says he shall not relax his efforts for their settlement.

Interest and Dividends.

The Chesapeake and Delaware Canal Company will pay on demand a dividend of 3 per cent., or $6 per share.

The Portland, Saco and Portsmouth Railroad Company has declared a dividend of 3 per cent., payable June 11.

The Cape Cod Railroad Company have declared a dividend of $2 per share, (par $60) payable July 2.

The interest on the public debt of the State of Illinois, maturing on the first Monday in July, 1866, will be paid at the Ocean National Bank of the City of New York, on the second to the sixteenth day, inclusive, of July, 1866.

☞ The scheme of a railroad west from St. Joseph is growing up into one of grand proportions. It now has $500,000 from St. Joseph to work on. Nemaha county, Kansas, has given $125,000 and Marshall county has voted to issue $100,000. The name of the road is "The Northern Kansas Railroad."

☞ The New London Northern Railroad Company are extending their road from Amherst to Grouts Corner, Mass., and in July it is expected to run trains from New London, Conn., to Brattleboro', Vermont. The capital stock of the New London Northern is $669,805, and its indebtedness about $140,000. Total dividends in 1865, eight per cent. Its stock has recently been quoted at 85 offered.

☞ The Lafayette, (Ind.,) *Journal* says the combination of the Jeffersonville and Indianapolis and Peru Railroads, is for the purpose of making a through line to Chicago, by way of Kokomo, over the Chicago and Great Eastern road, and thinks it may divert a portion of the Chicago business which now goes through their city. The reported purchase of the old La Crosse road by the Louisville, New Albany and Chicago road, if carried out, will in a great measure counteract the influence of the Jeffersonville and Peru combination.

☞ At the biddings for the State interest in railroad stock, in Columbus, two bids only were offered for the State stock in the Sandusky, Mansfield and Newark Railroad, that of J. O. Moss for four cents, and that of George B. Wright, of Columbus, for five cents on the dollar, the stock was awarded to the latter. For Sandusky, Dayton and Cincinnati Railroad, about $400,000, six bids were presented, and the award made to Rush R. Sloane, of Sandusky, at 8.55 cents for regular and 49 cents for preferred stock, that being the highest amount offered.

☞ The Brunswick and Florida Railroad is reported to be on the eve of active operation. Mr. H. S. Wells, the agent of the company, has obtained from the War Department the necessary authority to repossess the rails (some 36 miles in length) which were removed by the Confederates during the war. The engineer of the road, Colonel Slaughter, has proceeded to Georgia with the intention to lay down the road immediately and put it in running order. The original grades are reported in perfect order. Thirty saw mills are already erected in the city limits of Brunswick.

☞ A railroad is projected in Piscataquis County, Maine, to connect with the Maine Central at Newport and to extend through the towns of Corinna, Dexter, Garland and Dover, with a probable extension to Brownville. Great interest in the enterprise is manifested in Piscataquis County, and subscriptions for stock are liberally offered. It is understood that if the road is built it will be leased by the Maine Central, and that the latter corporation is disposed to render all feasible aid in its construction.

☞ The lessees of the Alexandria canal have obtained full permission from the Secretary of War to immediately resume the work of repair on the Georgetown aqueduct, preparatory to its final relinquishment to them by the government as soon as the Long Bridge is made available for travel. They have also been authorized to repair the Long Bridge, as soon as the appropriation of $10,000 for that purpose, which has passed the House of Representatives, shall have passed the Senate. In the year 1795 this bridge was declared a post route—the great thoroughfare between the North and South.

☞ The amount received for duties on imports at Boston during the first five months of the years 1865 and 1866, has been as follows:

	1865.	1866.
January	$714,922 35	$1,009,348 53
February	525,104 35	1,552,910 93
March	705,561 75	1,329,836 01
April	811,116 29	1,472,091 39
May	1,002,300 24	1,683,988 84
	$3,795,004 98	$7,048,175 70

☞ At a meeting of the stockholders of the La Crosse, Trempeleau and Prescott Railroad Company, held in Milwaukee, on the 29th ult., the following persons were elected directors: Angus Smith, Alexander Mitchell, D. N. Barney, Jesse Hoyt, Russell Sage, A. H. Barney, S. S. Merrill, John W. Cary and James S. Peck.

☞ At a meeting of the friends of the Valley (Va.) Railroad at Lexington on the 1st inst., the sum of $35,000 was subscribed to the capital stock, and committees appointed to solicit further subscriptions. The Lexington *Gazette* believes the sum will be increased to $200,000 in the whole county.

IRON ORES FOR SALE.

The Rossie Iron Works

Are now prepared to make sales of

SELECTED IRON ORES,

FROM THEIR WELL-KNOWN

Caledonia Mines, in St. Lawrence County, N. Y.

These Ores yield from Fifty to Fifty-five per cent., in the large way, and the quality of the Iron made from them is well established.

The Ores can be delivered at Keene Station, on the line of the Rome, Watertown and Ogdensburg Railroad Company, or at Ogdensburg, as purchasers may prefer, and the Company's Agents at Ogdensburg will secure freight Westward for the Ore without any charge of commission.

Further particulars may be obtained by addressing the Company's Secretary,

4t24 R. GORDON, Box 43, New York.

To Railroad Co.'s & Contractors.

A YOUNG MAN accustomed to working in all kinds of Stone, would accept a situation on a Railroad or Canal to superintend the preparation of stone for Buildings, Bridges, Locks, Dams, etc., etc. Is a good accountant. Address C. M. B., Post-office, Brooklyn, E. D., N. Y.

Drawing and Surveying

INSTRUMENTS,

Of the finest Swiss, French, and American Manufacture.

A large assortment of the latest patterns; and all other supplies for Civil Engineers, Architects, Draughtsman, and Surveyors.

T. H. McALLISTER,

(Of the late firm of McAllister & Bro., Phila.)

49 Nassau Street, New York.

IMPORTANT TO CONSUMERS OF STEAM.

FUEL ECONOMIZED

AND

POWER OF STEAM INCREASED.

CARVALHO'S

IMPROVED SUPER-HEATER,

Prevents "Priming" in Boilers, and Economizes from 20 to 30 per cent. of the fuel used.

This invention, awarded a **SILVER MEDAL** at the Fair of the American Institute, 1865, **IS SIMPLE IN CONSTRUCTION,** and is easily attached **at small cost** to boilers in use, **OR TO LOCOMOTIVES,** greatly increasing their economy and efficiency. It will furnish pure steam of a moderate temperature for use in engines, or when required, produces, without the least fear of decomposition, highly Super-Heated Steam, for Chemical and Manufacturing purposes, fumigating ships, &c. Persons interested in the use of Steam, are invited to call upon, or address the subscriber, who is the sole Agent for the United States.

HENRY W. BULKLEY,

Consulting Engineer,

57 Broadway, New York.

Personal Liability of Directors of Corporations.

By a statute of this State, (Revised Statutes 602 §3) it is provided that the debts of corporations (except library, religious and certain moneyed corporations) shall not at any time exceed three times the amount of the capital stock paid in; and in case of any excess, the directors, except those not present and those dissenting, are jointly and severally liable without limitation.

It may be considered well settled law that no director can be held personally liable by reason of any contract made, or any act done, on behalf of the company, within the scope of the authority conferred by the statutes of the legislature and the company, or as it is expressed "by reason of any lawful act done by them." The difficult question in all cases involving the personal liability of directors, is whether the act complained of was done under lawful right and authority. The statute of this state which we have cited above specifies one act which is not lawful, namely—the contraction of debts three times the amount of paid up capital stock. The courts have been called upon to interpret the statute, and their decisions are uniform in doctrine. And it is held that the statute remedy is not exclusive, but the creditors of the corporation are creditors of the directors, and may pursue them or their property by the general methods of the law, as by attachment (20 Wend., 614). But when directors have become liable to the corporation creditors, they are entitled to a deduction for advances made by them to the company, as well against demands of creditors after dissolution, as they would against the demand of the corporation before dissolution. (Tallmadge *vs.* Fiskill Iron Co., 4 Barb., 382.)

But the directors of a corporation may become personally liable for other acts than the contraction of debts, as for instance, *an abuse of trust*. The directors of a joint stock corporation who wilfully abuse their trust or misapply the funds of the corporation, by which a loss is sustained are personally liable, as trustees, to make good the loss. (Robinson *vs.* Smith 3 Paige 222; Cunningham *vs.* Pell, 5 Id., 607.) And they are equally liable if they suffer the corporate funds or property to be lost or wasted by gross negligence and inattention to the duties of their trust. (3 Paige, 222.) But the directors are not sureties to the corporators for the fidelity of an officer whom they appoint, unless they had knowledge of his bad character. Thus in the case of Scott *vs.* Depeyster, (1 Edw. ch. 513) the secretary of an insurance company, by means of forgery, for two or three years, defrauded the corporation of about one hundred thousand dollars, it appearing that all the checks and precautions in ordinary use by such companies had been used by the directors, and that the loss in no respect was attributable to a want of ordinary care. Held that the directors were not responsible for the loss. In the case of Seizer *vs.* Mali, decided by the Supreme Court of this State in 1860 it was held that the directors of a company who issue *unauthorized certificates of stock*, are not liable directly to ultimate purchasers of the stock, who made no contract with them, and did not act on their representations. Their remedy must be against those from whom they directly purchased.

An officer of a corporation who wilfully publishes false statements about its condition relying on which a person is induced to buy its stock, is liable to him for the damages sustained thereby (31 Barb., 121; 19 How. Pr. 275; see 3 Bosw., 346.) Especially is this so where the officer was privy to the sale, and interested in effecting it. And it is not necessary that the statements were made to the buyer of the stock. Statements made in a report to the corporation which was required by law to be made and published, render the person making them liable to any one so misled. (19 How. Pr. 275).

For damages sustained by a stockholder from illegal and fraudulent acts of directors and officers of a company, an action may be sustained by the stockholder against the officers and directors. (Crook *vs.* Jewett 12 How. Pr. 19.) It should be borne in mind however that in a case where a minority of the directors who by their charter are incompetent to transact business, a joint action cannot be maintained against them for acts done as directors. Being a minority they are incapable of doing any corporate act, and could not jointly as directors. If they have wasted and lost the funds of the corporation the action must be against them severally as individuals.

American Central Railroad.

If any one will look at a map of the Northern States he will notice that the 41st degree of latitude is the shortest and most palpable line between the most populous and commercial parts of Ohio, Indiana and Illinois, and the Missouri River at the point whence the great Union Pacific Railroad leads off westwardly to the Pacific. The straight line route which shall bring this new traffic by rails into the heart of the Atlantic States must have advantages over all other existing and irregular lines; must, in fact, do the principal business of the Union Pacific Railroad, and become the main eastern channel of this new commerce. This event has already been foreseen; and the company which now owns the charters and property of the American Central Railroad has secured, free from all question, the immense advantages of this project. We take pleasure in communicating the following facts in relation to its present condition and prospects:

HISTORY.

From the report originally made by the Chief Engineer as long ago as 1853, we perceive that

the project was well understood from the beginning, being a design to establish an easy and direct route from Salem, Ohio, as far as the Missouri River. Charters had been obtained from the States of Indiana, Illinois and Iowa, estimates and surveys duly made of the work in three divisions—Eastern, Western and Middle—legal steps taken to change the names given to a part of the links of the route, a complete organization was effected, and in fact all the necessary steps were taken to carry on the work. Since that period, it has been found most advantageous to extend the action of the company. The rights and property have been consolidated and placed by legal steps in the present hands; and the new company, composed of a few capitalists, are now prepared to proceed without further delay.

DESCRIPTION.

The length of the line is now 585 miles, with a narrow gauge. It has an easy and natural grade, and can be constructed at a moderate cost. On the different divisions, about $1,200,000 have been expended in grading. The whole line has in fact been surveyed, and 70 miles of the Illinois portion are ready for the iron.

The piers of the bridge over the Iowa River are ready for the superstructure, and a large amount of work has been done.

It is expected that fifty miles, from Galva to the Mississippi River, will be the first portion completed. This will become immediately useful and profitable for many obvious reasons. It is ascertained that the above fifty miles of the road westward of the Chicago, Burlington and Quincy line can be completed easily in six months' time.

PROSPECTS.

The growing wealth and population of the States through which this line passes, ensure a large traffic of freight and passengers. But it must be remembered that the route from the river to New York will be at least 75 miles shorter than any other, as can be verified by the examination of the map alone.

The number of counties through which the road is laid out in the States of Iowa, Indiana and Illinois, is 26, with a population of nearly a million, and a value of real and personal property amounting, as long ago as 1860, to $178,964,497; while the rate of increase of taxable property is going on at the rate of hundreds per cent in many of these Western counties. Twenty other fertile and populous counties by their proximity to the line in Illinois, Indiana and Iowa alone, will furnish their business to the road.

These facts are stated in confirmation of the well established value of local traffic, which on many roads has been found greater and more profitable than the through traffic itself.

But this is not all. The American Central being the grand trunk road will receive the business of a large number of other lines which cannot be avoided. If they were rivers they would be affluents and confluents.

Beginning at Fort Wayne, after having reached there from Salem coming west, we leave behind us these feeders: the Atlantic and Great Western, the Cleveland, Columbus and Cincinnati, the Sandusky, Mansfield and Newark, the Sandusky, Dayton and Cincinnati, the Fremont and Indiana and the Dayton and Michigan, all of which are in fact contributors to the traffic of the Central line. We then, coming upon it, meet and cross the Pittsburg, Fort Wayne and Chicago, and the Toledo, Wabash and Western; 30 miles further, the Cincinnati and Grand Haven; 15 miles further, the Indianapolis and Peru; 20 miles further, the Chicago and Great Eastern; 10 miles further, the Louisville, New Albany and Chicago; 12 miles further, the Chicago and Lafayette; 35 miles further, the Chicago branch of the Illinois Central; 31 miles further, the Chicago, Alton and St. Louis; 29 miles further, the main trunk of the Illinois Central; 21 miles further, the Bureau Valley; 31 miles further, the Jacksonville and Savannah; 5 miles further, the Chicago, Burlington and Quincy; and 50 miles further, we reach New Boston on the Mississippi River, opposite the mouth of the Iowa river. From thence to Council Bluffs on the Missouri, opposite Omaha city, where it will connect with the Union Pacific road, several lines in operation and projected will be crossed. Thus we have the benefit of the connection and business of all these great, and most of them prosperous lines, and having a good credit in the market. We are not aware of any other line existing or projected in this country which has as many tributaries and auxiliaries, or which can gain as much from any such sources.

THE DISTANCES.

From Fort Wayne to the Illinois State line is 126 miles. From the Indiana State line to New Boston on the Mississippi River is 186 miles. From the Mississippi to the Missouri River, 273 miles. It will thus be perceived at a glance that we have a straight trunk line, that a large part of it is ready for the rails, and that it secures the aid and business of over 20 lines that cross and run into it. We also find from the Engineer's early report that the grades are easy, the line straight, and the ground most favorable.

We do not know of any impediment in the way of its immediate completion. It is in the hands of honorable and energetic men who are able to push the project through at once, and we do not know that they require a word of commendation at our hands.

It has been known for years that we have been warm supporters of the Union Pacific Railroad; we have gone so far as to recommend the employment of a large body of the army upon the work as soon as the war was over, and have on all occasions urged the liberal support of the Government to this work whenever needed.

And yet without the addition of the trunk line and straight outlet of the American Central, the Union Pacific would be scarcely worthy of the public favor.

It is of little consequence how much of the trade and commerce of the Pacific and the plains might be gained, if they were to stop and terminate on the Missouri. They must be prolonged to the Atlantic States, and be extended to the Atlantic Ocean. All the other existing links have a local character and belong to localities. This while it draws largely on local interests is continental in character and indispensable to the general policy and system.

It would be easy to demonstrate from the earnings per mile of the principal roads in its neighborhood, that those of the American Central at the average of these would, after paying all expenses, net a large annual dividend, certainly not less than 20 per cent.; while if the business of the Union Pacific proves anything like the estimates, we may safely double this amount and expect a dividend of 40 per cent.

We know of no project with so large a result open to the public, nor will there ever be again. The line occupies the only route which nature has permitted and science detected, by which the great national work may be made of immediate and incalculable benefit to the Atlantic States. The more we reflect on this project, the more and more we are of the opinion that it will meet with the support of capitalists not only, but the whole people of the north.

It is the greatest route of the day, of the times, and of the commerce of the country, an indispensable link in the great chain of our internal improvements, and commends itself to every thinking person, and every one capable of looking at the future of the republic. *

Boston, Concord and Montreal Railroad.

The receipts and expenditures of this road for the years ending March 31, 1865 and 1866, have been as follows:

Receipts:	1865.	1866.
From passengers	$147,850 41	$169,715 14
" freight	245,751 14	245,793 87
" mails	10,188 02	2,542 13
" express	3,500 00	3,750 00
" miscellaneous	1,098 79	1,027 53
Total receipts	$408,388 36	$422,828 67
Expenditures, viz:		
Maintenance of way	$102,693 36	$111,570 55
" motive power	50,765 42	51,552 79
Cost of working road	75,980 42	81,723 97
" management	7,790 93	9,223 31
Miscellaneous	29,751 31	33,887 25
Total expenditures	$266,981 44	$287,957 87
Net balance	$741,406 92	$134,870 80
Balance from last report	48,630 25	90,001 01
Interest received	3,008 00	6,704 53
Materials less than last year	.....	1,730 84
In hands of Superintendent less than last year	.....	17,434 61
Total income	$193,040 17	$250,741 79
Appropriated as follows:		
Paid coupons	$61,003 96	$80,377 61
Trustees of sinking fund	12,500 00	12,500 00
Patent rights, etc.	2,325 00	.....
Sundries	.....	3,055 92
Pemigewasset House	6,000 00	.....
Materials more than last year	5,996 10	.....
In hands of Superintendent more than last year	15,214 10	.....
Cash on hand	90,001 01	154,808 26
	$193,040 17	$250,741 79

The receipts of 1865, exceed those of 1864, by $94,964 47; the expenses, $78,967 72, and the net receipts, $5,996 75.

Compared with 1865, the receipts of 1866 show an increase of $14,440 31; with an increase in expenses of $20,976 43—making a decrease in net receipts of $6,536 12. The report says:

The above balance of $134,870 80, with the amount due from the United States Government for carrying the mails, will make the net earnings over $143,000. The receipts from freight are about the same as last year, and from passengers, nearly $22,000 more; but the expenses have been large, as there has been but a small, if any, reduction in the cost of working the road.

We have made more extensive repairs this year than last, and they are as follows:

We have purchased and re-rolled 271 tons of iron more than last year		$11,789 89
We have laid 12,714 sleepers more than last year		3,204 89
Expenses on freight and passenger cars more than last year		6,000 00
Extraordinary expenses in filling up wash-outs, etc		5,000 00
We have paid State and town taxes this year	$16,658 36	
United States taxes this year	10,343 65	
	$27,002 01	
Paid State and town taxes last year	$10,258 86	
U. S. taxes	8,716 95	
	18,975 81	
Increase in taxes over last year		8,026 20
		$34,020 98

The passenger and freight cars and motive power are all in as good if not better condition than last year.

The roadway and superstructure are in better condition.

Our business connections with the lower roads are in the same unsettled state that they were at the time of our last report.

The extended mortgage bonds ($500 000,) became due the 15th of August last; and, as most of these bonds were held by parties who had no other interest in the road, and the high rate of interest paid by the General and State Governments made it difficult to exchange with them for six per cent. sinking fund bonds, we therefore had to make other arrangements for a large proportion of them. We have cancelled $136,000, and issued sinking fund bonds for the same.

The Directors do not deem it proper or prudent to make dividends until these bonds are more permanently arranged; and if they could manage to have $250,000 in sinking fund bonds taken, the balance could be held until the amount is wanted by the Trustees of the sinking fund, which now amounts to over $158,000, and which, with the annual payment of $12,500 to the fund, and its accumulations, will very quickly absorb the bonds.

It is for the interest of the preferred stockholders to come forward and take this amount; for, as soon as this is done, we can commence paying regular dividends, and continue to do so.

There can be no question as to the security of these bonds; as, taking the sinking fund as the property of the road, the amount of cash and bonds on hand will reduce the bonded debt to less than $800,000.

The demand for these bonds for the sinking fund will soon be $25,000 per year, and this amount will probably take all that will be offered for sale in the course of the year, and will keep the price at par, if not at a premium.

The number of passengers carried in 1865, was 121,239. Total number of tons of freight carried 50,406.

The following statement will show the financial condition of the company on the 31st of March, 1865 and 1866:

	1865.	1866.
Construction	$2,850,000 00	$2,850,000 00
Wood & oil on hand.	5,695 91	8,713 80
Stock, etc., on hand.	26,948 95	22.200 22
Bonds on hand	800 00	100,800 00
Trustees of sinking fund	101,500 00	114,000 00

President.—JOHN E. LYON.

Directors.—John E. Lyon, Alexander H. Tilton, Joseph P. Pitman, John L. Rix, John A. Parks and Joseph W. Lang.

Treasurer.—EDWARD D. HARLOW.

Superintendent.—J. A. DODGE.

Virginia Valley Railroad.

We learn from the Rockingham County *Register* of 14th inst., that a corps of civil engineers from the Baltimore and Ohio Railroad Company, under Richard Randolph, Esq., had arrived in that county, and established their headquarters in the vicinity of Mount Crawford. The party consisted of ten, including the chief, and immediately commenced the examination of the country for the purpose of selecting the most eligible route for the proposed railroad from Harrisburg, in Rockingham Co., to Salem, in Roanoke Co. Mr. Randolph's instructions are to reconnoitre *thoroughly*, not being confined to any particular number of experimental lines. That route will be taken which presents the greatest natural advantages—such as uniformity of surface, facilities for bridging streams, productiveness, &c. Of course no correct idea can be formed of the route that will be adopted.

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund we learn that the total funded debt of the State Nov. 15, 1865, was $12,912,014 45

Since that date there has been redeemed of the foreign loan of 1860	$25,470 31	
Of the foreign loan of 1865	374,847 13	
Of the Union loan of 1866	500 00	
		400,817 44
Outstanding May 15, 1866		$12,511,197 01

The existing funded debt of the State consists of the following loans:

FOREIGN DEBT, PAYABLE IN NEW YORK.

Loan of 1860, 6 per cent. interest	$536,798 25
" 1865, 5 " "	634,652 87
" 1868, 6 " "	379,866 00
" 1870, 6 " "	2,183,531 93
" 1875, 6 " "	1,600,000 00
" 1881, 6 " "	4,095,309 47
" 1886, 6 " "	2,400,000 00
Total foreign debt	$11,830,158 52

DOMESTIC DEBT, PAYABLE AT COLUMBUS.

Stock of 1849, not bearing interest	$1,765 00	
National road bonds, not bearing interest.	60 36	
Union Loan of 1868, 6 per cent. interest.	279,213 13	
Union Loan of 1871, 6 per cent. interest	400,000 00	
		681,038 49
Total funded debt, May 15, 1866		$12,511,197 01

The receipts into the Sinking Fund, and the disbursements therefrom, during the past six months were as follows:

RECEIPTS.

Balance in the Treasury Nov. 15, 1865	$328,611 11
From taxes—sinking fund	548.854 55
From taxes—war loan fund	60,967 41
From school lands, etc.	39,907 80
From soldiers' relief fund, transferred under act of March 9, 1866	461,344 00
From surplus revenue	7,966 05
From sale of stocks, dividends, etc.	34,440 70
Total receipts	$1,482,091 62

DISBURSEMENTS.

For interest	$588,850 68	
For redempt'n of foreign debt	627,990 31	
For redemption of Union loan	500 00	
Sundry expenses	3,901 07	
		1,221,242 06
Balance in Treasury May 15, 1866.		$260,849 56
" New York "		259,672 46
Total am't of sinking fund on hand.		$520,522 02

The balance in New York is funds transmitted and deposited there for the payment of the principal and interest of the 5 per cent. loan of 1865, the holders thereof having been notified that the funds were ready for them, and that if not previously redeemed the interest would cease on the 1st day of July next.

Railroad in Colorado.

There is a lively excitement in Denver in relation to securing the route of the Union Pacific in that direction. We have been informed that engineers and surveyors are now on the way surveying the two routes—one *via* Denver, through the Bethoud Pass, over the range, into the middle Park—the other by the way of Cassel la Poudre Pass, some seventy miles north of that city. In the event of the route being finally located at the latter point, a branch road must be built from Denver, in order to bring the large amount of freight and passengers which is constantly driving there, and to the rich mines of Gilpin County. Trains are now constantly arriving from the States, freighted with all kinds of commodities. Emigration is pouring in, and soon, with this influx of emmigration, the large domain now lying waste, will be occupied, and teeming with the products of the husbandman.

☞ A despatch from St. Louis states that the deed of sale of the Southwest Pacific Railroad, has been signed by the State authorities and the property turned over to the purchaser, General Fremont. The purchase was made by him several weeks ago, since which time strong efforts have been employed to prevent the State from carrying out the terms of the sale, but the difficulty now appears to have been finally overcome.

☞ The new iron bridge over the Connecticut River at Windsor Locks, Conn., erected by the Hartford and New Haven Railroad Company, is among the great enterprises of the day. The iron work was brought from England, where it was manufactured by Fairbairn & Co., of Manchester. The work of erecting the bridge was begun the last week in June, 1865, and progressed without interruption until the whole iron work was finished on Feb. 1, 1866. Its total weight is about 624 tons, and its entire cost, when completed, was $264,784.

St. Louis, Alton and Terre Haute Railroad.

The earnings of this road for the years ending December 31, 1864 and 1865 have been as follows:

	1864.	1865.
From passengers....	$655,446 85	$853,960 82
" freight.....	1,324,396 12	1,251,161 04
" mails.....	21,398 00	28,137 50
" express.....	38,442 08	44,768 58
" miscellaneous.	44,391 27	62,715 69
	$2,084,074 32	$2,240,743 63

Locomotives	110,785 06	
Cars	29,377 16	
		160,915 14
		$488,558 38

In addition to the amount ($160,915 14) stated above, there was expended and included in the operating expenses the sum of $175,894 76; of which $58,350 was for new cars built in the company's shops, $32,839 22 for masonry in bridges, culverts, etc., $53,823 25 for increased amount of wood on hand, and the remainder for other permanent improvements. Deducting this sum from the amount given above, as ordinary expenses, will leave $1,315,375 35 as the operating expenses for the year, leaving a balance of earnings of $925,368 28, an excess as compared with the preceding year, after making similar deductions, of $131,203 30. The report says:

The construction account of this road was closed some years since, and it is difficult to say with precision what the ordinary operating expenses have been. The extraordinary expenditures during the year, embraced in the above amount, are about $283,000, exclusive of extra fuel, and inclusive of four new engines and seventy-six cars, added to the rolling stock, leaving the ordinary expenses, so called, to average between 65 and 70 per cent. of the gross earnings.

It was hoped the wages of labor could be reduced after the close of the war and the return of discharged soldiers to the pursuits of civil life, but our expectations have not been realized up to the present time. An inflated currency stimulating every species of enterprise, and speculation offering the most flattering inducements, has diverted so large a proportion of the labor of the country from the ordinary and legitimate pursuits of life, that there has been no reduction of prices, and it is not probable there will be any until the public mind is turned from speculation to solid production.

Whilst there has been no reduction in the price of labor, and but little in the cost of material used in the maintenance of railroads, our United States taxes on earnings alone have been materially increased. They were last year $37,719 62, and this year they have been $57,441 38.

There has been much complaint in portions of the West of the tariff of charges, particularly on ordinary freight, but there should be no reduction in these charges until the cost of maintaining and operating railroads can be reduced. For many years, fifty per cent. of the gross earnings was a fair allowance for operating expenses, but these expenses have now risen to fully seventy per cent. on an average, making an advance of fully forty per cent., whilst the charges for freight and passengers have not been increased in any such proportion. The result is, that the net earnings, at this time, bear a less proportion to the gross receipts and the actual work performed in the movement of persons and property, than, perhaps, at any previous period. Under this state of facts, there can be no reduction in the tariff of charges without doing great injustice to the owners of railroad property.

Whilst the gross receipts have exceeded our estimates, the net income has fallen below, and we find ourselves without the means to make improvements, imperatively demanded at many points on the road. At East St. Louis we have purchased about fifty-three acres of ground for depot purposes, at a cost, in addition to the relinquishment of the ground previously contracted for, of seventy-five thousand dollars, on which fifteen thousand dollars have been paid, leaving a balance of sixty thousand dollars to be met in monthly instalments. These grounds are eligibly situated, and their possession was indispensable to the economical transaction of our business at this point. The cost of filling in with earth to a level above high water mark will be about $105,000. The freight depot required at this place was estimated, last January, to cost $137,800, but building materials have advanced in price materially since that time. We also require a passenger house, that may, perhaps, be built a cost of $20,000; so that the necessary expenditure at this point will not probably fall much short of $350,000.

It is contemplated to commence these improvements in the spring, and prosecute them as fast as practicable, having due regard to economy and the means at our disposal. The whole may perhaps be accomplished in four years. Again this winter we have experienced the difficulties and damages to our business, at East St. Louis, incident to the closing of the river by ice, and the want of suitable depot accommodation. * * *

It is true these interruptions and serious damages to our business would not be wholly remedied by the construction of ample depots, but the suspensions and risks would be greatly lessened thereby. The only complete prevention of these troubles is the construction of a substantial bridge over the Mississippi River, and it is believed the demand for such an improvement is yearly becoming so great that its construction cannot be much longer delayed. The enormous tax upon the citizens of St. Louis, in the enhanced price of coal and upon the large proportion of their general supplies which come from the east side of the river, must stimulate them to enter into some arrangement for the consummation of this most important improvement.

It will be seen by the report of the General Superintendent that the expenditures, the past year, on account of permanent improvements, including additions to rolling stock from our own shops, and fuel, have been $336,809 90. We contracted the latter part of the year for 350 tons of new rails. During the same time there have been 1,549 tons re-rolled and paid for, but still one of our greatest needs at this time is new iron. For want of a sufficient surplus of new iron, we have not been able to get our worn rails to the rolling mills, at times when we could have got our work done promptly, and we have therefore, not succeeded in getting our track in as good condition as it should be. The condition of the rails in many places was such as to excite apprehension of damages to trains during the severe weather of the winter, but by great care, and perhaps good fortune, we have thus far escaped any serious accidents; and in this connection it may be remarked that an examination of the report of casualties during the year will show satisfactory results.

It was intended during the past year to have commenced the work of extending the Wabash River bridge, but labor has been scarce and our means so limited, that nothing has yet been done at this point. It is our intention to do what may be practicable the ensuing season, having reference to economy and our available resources. This work will cost about $50,000. The necessity of incurring this large expenditure was fully stated in last year's report, to which I beg leave to refer.

It will be seen from the operations of the road during the year 1865, and the heavy outlays made and to be made on the line of road of a necessary and permanent character, that no dividend can be paid on the preferred stock in May, 1866. This dividend is required to be paid out of the net earnings of the road for the year, and if not paid, is, by an express provision in the second mortgage deed of trust, made cumulative, and is to be paid thereafter, when the earnings of the road will permit, and before any dividend can be made on the common stock. The same deed of trust exercises a prudent care for the safety and judicious development of the property and its equipment by the authority conferred in the application of its earnings, contained in the following provision:

"The words 'net earnings,' as herein used, are hereby declared and agreed to mean such surplus of the earnings of the said railroad as shall remain, after paying all expenses of operating the said railroad and carrying on its business, including all taxes and assessments, and payments on encumbrances, prior in lien to these presents, upon specific portions of the property hereby conveyed, of completing, repairing or replacing the said railroad, its appurtenaces and equipments, so that the same shall be in high condition, and of providing such additional equipment as the said company shall deem necessary for the business of said railroad."

The company have no means to improve the condition of the road or add to its rolling stock or equipment, except from its earnings. The managers have adhered rigidly to the rule of incurring no floating debt, and of paying promptly for all work, labor and materials required on the road. This policy they will continue to adhere to. The necessities of the road have required, and will continue to require, the application of considerable sums of money for permanent improvements, and to supply the needful power and facilities to conduct its increasing business. While the earnings of the road will be ample to pay the interest as it accrues on the bonded debt of the company, there will be a considerable surplus each year over and above the ordinary operating expenses, which, if judiciously applied, will be sufficient to meet these expenditures for permanent improvements and additions to equipment, after which it will again be applied to the payment of the dividends. The duty of the managers in this matter is so obvious that no argument is needed to sustain it. They are persuaded that all parties in interest will come to the same conclusion on a careful examination of the facts.

In view of the actual condition of the road, and the proposition seriously entertained to construct a new line, and a shorter one, between Terre Haute and St. Louis, the managers feel that it is a matter of vital necessity, in order to protect the interests of bondholders and stockholders in the property, that the road be put and kept in high condition. To this end considerable outlays are required for new iron, chairs and ties, depot accommodations and facilities at East St. Louis, the extension of the Wabash River bridge, suitable station houses on the line of road, water stations, fencing, ballasting, bridges, stone culverts, in place of wooden structures, and solid embankment in place of trestle work.

Last spring a company was organized under a liberal charter from the State of Illinois, with power to construct a railroad "from Pana, in

Christian County, through Taylorville and Springfield, to some suitable point to be selected by the company on the Illinois River." In September last the work embraced in the division extending from Pana to Springfield, the capital of the State, was let, and the work of grading has been progressing during the fall and winter.

The distance from Pana (where the Illinois Central road crosses the St. Louis, Alton and Terre Haute road) to Springfield, is forty-one miles, through the richest portion of the State of Illinois, in a fair state of cultivation. It is expected by the parties having this work in charge that the road will be completed to Springfield by the 1st of January, 1867: it is probable there will be no difficulty in its accomplishment, should they succeed in procuring the iron in due time.

When this branch is completed, it is expected that some satisfactory arrangement may be made between the two companies to operate it.

In view of the connection with the capital of the State of Illinois, and the fertility of the country through which this road will pass, it is believed that we shall derive material advantage from the business of freight and passengers brought to our road from that quarter, all of which, destined eastward, must pass over ninety-four miles of our road. There is much intercourse between the people of Central and Southern Indiana and Ohio, and also Kentucky and those of the Northwest, and passing westward from Indianapolis, this travel would follow the Central line to Pana, in Illinois, and then strike across to Springfield over this branch road.

There have been several legislative grants obtained from the Assembly of the State of Illinois for the purpose of securing railroad communication between St. Louis and Cairo, at the mouth of the Ohio River. One of these charters, incorporating the Belleville and Southern Illinois Railroad Company, authorizes the construction of a road from Belleville to Duquoin, a point on the Illinois Central Railroad, 56½ miles from Belleville and 74 miles from Cairo. This road would connect with our branch at Belleville, making the whole distance from East St. Louis to Cairo 144½ miles.

Authority was next given to our company "to extend its railroad from its present terminus in the city of Belleville, in the County of St. Clair, in a southeasterly direction, to the Illinois Central Railroad, and to unite and form a connection with the same." Under this grant it is probable Duquoin would be selected as the point of intersection on the Illinois Central road, making all the distances the same as stated above.

Last winter a charter was granted to a company, authorizing the construction of a railroad from East St. Louis, or Illinoistown, to Cairo, on the most direct and eligible route. During the past year surveys were made on this route, and I understand the whole length of road would be about 142½ miles, or 2 miles shorter than the other lines connecting with the Illinois Central at Duquoin. In the absence of accurate data, I can only express the general opinion, from reliable information, that the route in extension of our Belleville branch to Duquoin is greatly to be preferred in every respect. It passes over a coal field all the way to Duquoin, a rich productive farming country, in a high state of cultivation, and the cost of grading and bridging on this route would be much less than upon any other proposed. The difference in distance of 2 miles would be more than balanced by straight lines and easy grades.

The company organized under the first named charter have recently decided to enter upon the construction of their road without delay, and it is understood with encouragement from the Illinois Central Railroad Company.

If this company shall waive the right to construct the road under its charter, it will be because the object will be attained, and the benefits to this company fully secured, by its construction under the charter of the Belleville and Southern Illinois Railroad Company, this company consenting and co-operating with that, and rendering all needful aid in the accomplishment of the work.

Whilst our powers, under deeds of trust are limited, and forbid the application of our resources to collateral objects, we still may do much in directing and fostering such improvements, by timely advice and the offer of such facilities for the operating of the road as our means will afford, without detriment to our regular business. We cannot, with safety to our interests, remain indifferent to enterprises undertaken and contemplated all around. The railroad interest is essentially aggressive; and if we do not sympathize with this progress, and place ourselves in a position to receive our share of the benefits, other connections and combinations will surely be made, resulting, it may be, to our damage.

The local passenger and freight business of the road is steadily increasing, as the returns show; while the extension and completion of important lines of western railroads terminating at St. Louis, will concentrate there an amount of business, both of freight and passengers, probably surpassed by no other point in the great West, and taxing all eastern railroad facilities from that point to their utmost capacity.

The company had on the road at the close of the year 46 locomotives, 16 of which were coal burners. Of these 10 were in running order; 29 in good order; and 3 in shops for repairs.

The rolling stock consists of 25 1st class passenger, 5 2d class passenger, 4 baggage and express, 5 baggage and mail, 21 caboose, 242 box, 93 compromise, 17 blue line, 12 lime, 92 stock, 188 platform and 328 coal cars, making a total of 1,032 cars, of which 973 are in good order, 47 in running order, and 12 in shop for repairs.

INCOME ACCOUNT.

Balance, December 31, 1864		$201,449 42
Earnings during the year		2,240,743 63
		$2,442,193 05
Transportation expenses as above	$1,591,270 11	
Permanent improvements	160,915 14	
Coupons on bonds, dividends on preferred stock, due May, 1865, including amount of coupons and dividends unpaid on the 1st Jan., 1866, and sinking fund	690,500 00	
Balance December 31, 1865	89,507 80	
		$2,442,193 05

The total cost of road and equipment has been $10,700,000, represented by: Common stock, $2,300,000; preferred stock, $1,700,000; bonds, $6,700,000. For a description of the bonds, showing the several series, and the time of payment of coupons, See AMERICAN RAILROAD JOURNAL Bond List, page 596 of this week's issue.

Sec. & Auditor.—JAMES B. RALSTON.

General Sup't.—HENRY C. MOORE.

Ass't Superintendent.—J. L. HINCKLEY.

Chief Engineer.—WILLIAM I. BALL.

The Delaware Railroad Extension.

We understand that the work on the Eastern Shore Railroad, the extension of the Delaware road, is being rapidly pushed forward under the chief engineership of E. Q. Sewell, Esq. The $16,000 asked for by the company has been favorably acted upon by the Board of Trade, Philadelphia. The route is graded nearly the entire length, and about five miles of the track laid beyond Princess Anne, leaving only fifteen miles of track to be put down to reach Somer's Cove. It is designed to have the road completed by the first or middle of July, and to have the trains running by the first of August. The wharves are being built at the Cove, and will be in readiness by the time the trains are put on. The steamers to connect the line with Norfolk are in readiness.

By this new route from Norfolk to New York the distance is shortened nearly ten hours. It is said to be nearly an air line from Charleston.

This will make the Delaware Railroad the great thoroughfare for Southern travel, and give it an importance second to but few in the United States. In addition to this, it is the grand trunk for all the railroads on the Peninsula, to which all other railroads must unite. It has stimulated enterprises on the Eastern Shore to an extent hardly thought of, and is attracting an attention and importance to the Peninsula that is fast working out its salvation. It is introducing it to the outside world, and causing it to loom up as a garden spot in the land.—*Smyrna Times.*

☞ In accordance with the provisions of the act of Assembly of the State of Virginia of March 2, 1866, entitled "An act to provide for funding the interest on the public debt," the Commonwealth of Virginia is now prepared to fund the interest due January 1, 1866, upon her coupon and registered debt. Persons to whom interest is due must make application to the clerk in the Second Auditor's office, in the basement of the capitol, at Richmond.

American Railroad Journal.

Saturday, June 23, 1866.

Stock Exchange and Money Market.

As late as Monday afternoon last, gold had risen and fallen many per cent. from the quotations of the Saturday previous; and even then had again started above 150. It went up to 163; but on the arrival of the news from Europe, by the *China*, went down suddenly to 155. On Tuesday it fell to 149½. The street exhibited the wildest forms of speculation, and the air resounded with the shouts of anxious bidders. What are the facts, and has judgment fled to brutish beasts, and has man lost his reason? It would really seem so; and it is worth while, perhaps, to look into this matter a little.

Now the great fact is, that the condition of things in England, and the vast engagements made by foreign speculators, have rendered gold scarce abroad, and raised the price of interest far beyond what it has been for years. In addition to this, the folly, pride and ambition of a few royal families have plunged Europe into a war which will be both costly and bloody. In this trouble, *gold* is sought for as the only remedy for which men should strive, as the panacea for all other sufferings; and it must be had at whatever cost.

To the United States, just emerged into tranquility, with a low rate of interest, with a large revenue, with immense gold and silver bearing mines, and with a most desirable trade, it was necessary to look for relief. The foreign agents doing business here were violently appealed to for assistance. In this emergency, our Government—which was steadily reducing its debt, accumulating specie and receiving a large income—was able, in its power to enhance the value of its own paper money, to part with a large amount of its surplus reserves. By this operation it cleared about 30 per cent. on 35 or 40 millions, nearly or quite twelve millions of dollars, a clear profit, with which it gained just so much to pay on the 7-30's; it kept the value of the paper money where it was; prevented the rise of prices and the extortion of speculators; and, in fact, did everything it could to keep business steady. It was bound to do this, for it now controls the business of the Country. If it had allowed the price of gold to go up suddenly at the time, under the assurance that it would hold on to its resources regardless of consequences, we should have seen it mount to 200!! This would not have been desirable for many obvious reasons. Now what was the effect abroad? Letters from London as late as June 6th addressed to correspondents in this city, state that the supply which we permitted to go was "an immense thing for American credit." It is everywhere admitted, says the same letter, "to have saved general bankruptcy in England." The acceptances of New York drawers stand in the "highest credit on the London market." The news by the *China* to the 9th of June, state the reving of the 5-20s and their sale at 66; and well they might recover.

On the other hand a sudden demand for gold in this Country, and a rise to 200, or anything like it, would have created a universal panic here, led to the ruin of many people, and the breaking down of many institutions.

If any one wishes to know the effect of a panic in New York, he has only to refer to the files of our daily papers; he will then see what a panic was in 1836, and 1837, when bankers of the fairest names, merchants of the highest standing, banks in the best credit, fell at a touch; when in two months there were 280 failures in this city, 168 in Boston, and a large number in other principal towns; when, in six months, real estate depreciated 40 millions and local stocks declined 20 more; when merchandize fell 30 per cent., and 20,000 persons were discharged from their employments. All this we have escaped by letting our surplus gold go into the market of the world, and made 30 per cent. in doing it.

At the same time we contend that the demand for it was no disparagement to us; it was not the result of our own fault; for, much as we have overtraded the past year, there was no legitimate call on us for any balance actually due from us that was sent. It is stated, on good authority, that much of the gold that was shipped was the effect of urgent call, and even more in a spirit of speculation; much of the gold sent was paid for in bills of exchange, which bills were actually sold below the market price! The shippers took the risk under the emergency; their correspondents were paying 10 and 12 per cent. for money in London; they could afford to lose one or two

per cent. for this relief. *And they got it.* They must judge how solvent they are, and how much the accommodation was worth. Meanwhile we place on record the following figures taken from the *Journal of Commerce*, compiled from the returns of the British Board of trade, which put a very different aspect on our foreign commerce. We are not prepared to accept it without further examination, as it invalidates much of the reasoning which of late has been used in discussing our commercial relations. The following table shows the balance of British trade, so called, to be in our favor; at least from 1854 to 1864, inclusive; and leads to the doubt whether there was any real cause for the late shipments to the extent admitted.

The value of American products imported into England, was as follows:

1854	£29,795,302
1855	25,741,732
1856	36,047,743
1857	33,647,227
1858	34,257,515
1859	34,294,042
1860	44,727,202
1861	49,389,602
1862	27,715,157
1863	19,570,815
1864	17,923,678
	£353,110,045

The value of goods exported from Great Britain to the United States, was as follows:

1854	£22,333,403
1855	18,062,602
1856	22,616,877
1857	20,076,895
1858	15,793,701
1859	24,417,892
1860	22,907,681
1861	11,025,683
1862	19,173,907
1863	19,696,785
1864	20,171,820
	£216,277,247

If we deduct the balance, it will be seen that we exported £136,832,798 more than we received from England, (more than five hundred millions of dollars,) during this period. And we were not a debtor nation, and were not called upon as such to remit what we did. This is in accordance with what we have observed of late in the columns of financial papers at the seats of trade in that country, which have declared for some months back that the American trade was not in debt, that orders were accompanied by money, and that in fact we owed them nothing. This late flurry would therefore seem to be a spasmodic effort to relieve themselves. They could not have gotten 35 millions from France—there are no such relations of confidence or intimacy which would have enabled them to get half that sum from Paris, in any such emergency.

If this reasoning be correct, if the facts are what we believe they are, it seems unavoidable that a reaction is at hand which will be productive of great benefits to this country, "both here and elsewhere," greatly to its credit, its honor and its name. It will be impossible to keep gold up to the price it brought on Tuesday, except by the most extraordinary and persistent combinations which will finally ruin everybody engaged in the plot. If the extraordinary imports of British goods the last year have even occasioned a temporary balance against us, and the high prices of products have prevented their exports, the effect will be but temporary. The average of former years giving us a balance will be repeated; and the result continue favorable as before. We have a right to take this view of the subject, though we confess we do not like the character of this trade too much of which is mere trash, and too much of it luxury. The state of war in Europe may there keep up the price for a time, but not long; for all the nations engaged in it will resort to paper money on the first opportunity, and will supply themselves for their expenses in that way. They have no specie reserves that will last three months.

The report of the associated banks for the week ending the 6th of June, showed the following results: The loans had decreased $2,237,412; the specie, $4,664,358; the circulation, $79,377; the deposits, $88,278; and the legal tenders had increased $4,550,630—the total amount of these now on hand being $79,179,304. The specie is down to the low figure of $4,694,358, thus showing that the shipments did not all come from the Treasury sales.

Exchange has been difficult of sale, and as low as 2½ per cent. below par on Tuesday. If the balance of trade was against us very decidedly, as some stoutly contend, the price should rise and keep up. But as the reverse is the fact, we leave the explanation of the cause to those who contend we are largely in debt, and cannot readily pay it. The men who lose their wits in the street may, if they can, explain the difficulty.

The rate of interest is falling; only four per cent. was asked in many quarters the present week; though it must be admitted that some classes of borrowers were willing to pay one per cent. a month, as is allowed in some distant States, and on what is deemed good security. But such operations are always doubtful, and the security offered is always precarious. When we consider that much of the exchange in the street was borrowed, and used to speculate in gold when much of it was sold several per cent. below par; when we know that some of the operators for a rise have after all failed to make good their engagements, and drawers who have branches of their houses abroad do not like to draw at all, we may well doubt whether the balances of trade are piling up against us, improvident as we are, and whether our good fortune, or industry, or Providence does not carry us through all our mistakes. Our manifest destiny seems to be too much for all opposing difficulties; we seem bound to succeed and prosper, come what may.

The following is a statement of the reserves of the gold in the country as near as can be ascertained:

In the Treasury, June 1	$50,679,957
Received from customs since June 1	4,576,739
Received from California	1,286,685
Received from the territories	5,000,000
	$60,863,615
Deduct interest paid since June 1	421,300
Balance	$60,442,305
Specie in banks	11,217,305
Total	$71,659,610

The feeling in favor of railways is improving. The prices in some securities are well supported. In a few leading lines there is some anxiety for the future, more as to the management, however, than the real value. This last depends on the former so closely that without the one the other cannot be much depended on. The truth is, that our railway companies are too much managed for the street, and little for the business of the public. A radical change is necessary to place them on their true footing.

Governments are firm, and it is confidently expected they will be in greater demand than ever European letters advise us that they will be preferred abroad above all other kinds of security. Whatever surplus economists or capitalists may wish to preserve will hereafter, be safest in the United States.

The New York exports, exclusive of specie, for the week ending June 19, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,105,979	$2,397,972
Prev. reported	72,351,083	100,097,907
Since January 1	$74,457,062	$102,495,879

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,213,042	$2,009,003
Gen. merchandise	1,457,394	7,046,742
Total for the week	$2,670,436	$9,055,745
Prev. reported	64,736,838	146,638,721
Since January 1	$67,407,274	$155,694,466

The balance in the Sub-Treasury on Wednesday was $93,903,312 51.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Milwaukee and St. Paul, 57½; do., pref., 72; do., 1st mort., 90; Central R. R. of New Jersey 1st mort., 102; New York and New Haven R. R., 110; Cattawissa, 77; Stonington, 111; Brooklyn 6s, Water Loan, 94; Minnesota 8s, 1867, 100; N. Y. 6s, 1873, 95¾; Georgia 6s, 105; Tennessee 6s, 1868, 95; Boston Water Power, 40; Brunswick Land, 8; Spruce Hill Coal, 4⅛; Spring Mt. Coal, 36; American Coal, 60; Wilkesbarre Coal, 55; Wyoming Valley Coal, 40; Mariposa pref., 23¾; Manhattan Gas, 145; Western Union Tel., 55½; do., Russian Extension, 106¾; Bank of Commerce, 114; 4th National Bank, 104; Metropolitan Bank, 125; Bank of Commonwealth, 102; Central Bank, 105½; Merchants' Bank, 110; Continental Bank, 110; Manhattan Bank, 132; Ocean Bank, 100; Phœnix Bank, 140; Importers' and Traders' Bank, 113.

Philadelphia.—Belvidere Delaware bonds, 80; Warran and Franklin 7s, 88; Camden and Atlantic 2d mort., 61; Allegheny Co. 5 per cent. scrip, 72; Allegheny City 6s, 1880, 90¾; Pittsburg 5s, 70; 13th and 15th streets, 22½; Ridge Avenue, 14; 10th and 11th streets, 60; Morris Canal Boat Loan, 90; St. Nicholas Coal, 2¾; Locust Mt., 46¼; Coal Ridge, 9½; Black Heath, 4; Fulton Coal, 6¼; New Creek Coal, ⅜; N. Y. and Middle Coal Fields, 5; Mahanoy Coal, 2; Keystone Zinc, ¾; Mechanics' Bank, 30¾; Commonwealth Bank, 54; Corn Ex. Bank, 63; Farmers' and Mechanics' Bank, 124; Consolidation Bank, 41; Ocean Oil, 7⅜; Maple Shade, 2¾; Dalzell, ⅞; McElrath, ⅛. The latest quotations are: City 6s, 93@93⅛; do., new, 96½@96¾; State 5s, 91

Tennessee State Bonds.

The July, 1866, coupon on the bonds of the State of Tennessee will be paid on and after July 1, at the National Bank of the Republic in this city. The 30 per cent. arrearages of interest since 1861, up to and including January, 1866, coupon, are fundable into new bonds of the same tenor as the original issues, upon which a July, 1866, coupon falls due and will be paid on presentation as above. This funded 30 per cent. increases the mortgage lien of the State upon the railways, to the construction of which the bonds were originally applied, from $10,000 to $13,000 per mile. In addition to the interest on this $13,000 lien, the railway companies are now required to contribute four per cent. a year by way of sinking fund for the redemption of the principal.

Albany and Susquehanna Railroad.

The Schoharie (N. Y.) *Republican* says: "Owing to the veto of the Governor, the Susquehanna Railroad will not be extended beyond Nineveh this fall. Nineveh is twenty miles beyond Unadilla. At Nineveh the Susquehanna road intersects a road which crosses the Erie Railroad, and terminates at the coal mines belonging to the Delaware and Hudson Canal Company.

Southern Pacific Railroad.

We learn from Louisiana papers that very considerable progress has been made in laying the rails of the southern route to the Pacific. One hundred and fifty tons of railroad iron were carried up the river by the steamer Alabama in one week, and it is thought that the road will be in running order to Marshal by the 1st of August.

Union Pacific Railroad.

A dispatch dated Omaha, June 14th says, that 112 miles of the Union Pacific Railroad have been completed, and was examined by the Government Commissioner o-day. The track is now being laid at the rate of a mile and a half per day. The road will be finished to Fort Kearney, 200 miles by October.

Iron Bridges for Tennessee.

The Baltimore *Sun* mentions the fact that a large amount of Bridge materials are now awaiting shipment at that port, by the steamship Liberty on her next voyage to New Orleans. Their ultimate destination is Memphis, being designed for the Memphis and Charleston railroad. Brown's Wharf, Fell's Point, it says, is now literally covered with these materials, amounting to upwards of 500 tons. Everything pertaining to a first-class iron railroad bridge is embraced in the shipment, even the screws and bolts. All the parts are painted, so as to be impervious to the weather, and each piece so numbered that they can be put up with the least possible delay. These bridges have been constructed at the extensive works of Messrs. Wendell Bollman and A. & W. Denmead & Son. The iron used in their construction was furnished from the rolling mill of Messrs. Trego & Thompson, and was entirely of Maryland ores. This iron has stood the test of 63,000 to 71,000 pounds per inch, which, according to those versed in such matters, has never been exceeded. The building of the bridges is supposed to have been the most rapid work of the kind ever performed in this country, they having been finished in six weeks from the time the order was received. They consist of six spans of 160 feet each. The same gentlemen have just contracted for the building of fifteen more spans for the same company, which they expect to have ready for shipment by the steamship Liberty, on her July voyage to New Orleans. Freight has also been secured on the Liberty for a first-class steam fire-engine, built with all the latest improvements by Messrs. Poole & Hunt of Baltimore, for the city authorities of New Orleans, into which city these wonderful machines are now about being introduced for the first time. These are but the beginnings of a trade which promises to be one of vast importance to the industrial interests of Baltimore. The agents of the Baltimore and New Orleans line of steamers are indefatigable in their exertions to open up new avenues of trade for the city, and so far they have been eminently successful. Mr. Bollman, it is understood, has gone to Charleston, where he expects to make further contracts for the building of iron railroad bridges.

Shipping Directory.

United States Express Guide and Shipping Directory. C. H. Bass, General Agent for the Publisher, Geo. W. Hawes of Baltimore, Md., is in the city securing information and orders for the above work; a book which, when completed, will contain all the Express Stations and Offices in the U. S. Also giving full Shipping directions to all important and unimportant places situated on railroads, stage routes and steamboat lines. A work of this kind ought to meet with good success.
